Wipro and Google Cloud Expand Partnership to Scale AI into Core Enterprise Operations

Scaling Gemini Enterprise to equip 10,000 AI-certified specialists, including 1,500 FDEs, with advanced AI capabilities

EAST BRUNSWICK, N.J. | BENGALURU, India – Aug 27, 2026: Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO), a leading AI-powered technology services and consulting company, today announced the expansion of its partnership with Google Cloud to accelerate the enterprise-wide adoption of Gemini Enterprise and agentic AI. Additionally, Wipro is scaling the internal deployment of Gemini Enterprise and will empower over 10,000 AI-certified specialists, including 1,500 Forward Deployed Engineers (FDEs), with advanced AI capabilities to enhance productivity, streamline operations, and accelerate decision-making.

As part of this partnership, Wipro has launched the LIFT (Launch-Ignite-Flywheel-Transform) framework to help enterprises accelerate AI transformation and operationalize agentic AI at scale. Powered by Wipro Intelligence™, the unified suite of AI platforms, solutions, and transformative offerings, the LIFT framework integrates Gemini Enterprise with Wipro's AI-powered delivery platforms, WINGS and WEGA. This unified ecosystem enables organizations to seamlessly transition from basic task-automation to embedding secure, autonomous AI agents directly into their core, multi-step business workflows.

"AI is foundational to how Wipro is shaping its future, driving innovation, transforming operations, and delivering differentiated value for our clients," said **Kanwar Singh, Managing Partner and Global Head of Technology Services, Wipro Limited**. "By strengthening Wipro Intelligence™ with Gemini Enterprise, we are embedding intelligence into everyday core operations, helping clients scale outcomes, adapt faster, and compete more effectively in a dynamic environment."

To accelerate value creation, Wipro is building a dedicated team of more than 1,500 certified FDEs, combining Google Cloud's expertise with Wipro's consulting and engineering capabilities to seamlessly scale AI adoption from pilot to enterprise-wide deployment.

"Our partnership with Wipro continues to drive real-world value for enterprise customers looking to scale AI across their organizations. The strong demand for Gemini Enterprise indicates the value it is adding for customers today," said **Kevin Ichhpurani, President, Global Partner Ecosystem, Google Cloud**. "By embedding Gemini Enterprise into their own operations and their customer-facing platforms, Wipro is demonstrating how AI transformation drives tangible efficiency. Together, we are helping joint customers bridge the gap between AI potential and business performance using Google Cloud's agentic AI capabilities."

Drawing on its AI transformation experience through the 'Operate Better with AI' strategy and 'Client Zero' approach, Wipro has deployed Gemini Enterprise as its central agentic orchestration platform. Gemini's advanced reasoning and long-context capabilities have enabled Wipro to build autonomous AI agents that streamline critical workflows across compliance, HR, and sales intelligence, transforming AI from basic task automation into an enterprise-wide decision intelligence layer.

Furthermore, Wipro has integrated Antigravity Command Line Interface into its software engineering ecosystem, enabling agentic workflows that assist developers with planning, coding, testing, and application modernization. This transition has delivered highly quantifiable outcomes for development lifecycles, including productivity improvements for custom application development and significant reductions in post-production defects.

About Wipro Limited
Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO) is a leading AI-powered technology services and consulting company focused on building innovative solutions that address clients' most complex digital transformation needs. Leveraging our consulting-led approach and the Wipro Intelligence™ unified suite of AI-powered platforms, solutions and transformative offerings, we help clients realize their boldest ambitions to build intelligent and sustainable businesses. The Wipro Innovation Network–part of the Wipro Intelligence™ suite–underpins our commitment to client-centric co-innovation and co-creation by bringing together capabilities from the innovation labs and partner labs, academia, and global tech communities. With over 240,000 employees and business partners across 65 countries, we deliver on the promise of helping our customers, colleagues, and communities thrive in an ever-changing world. Forward-Looking Statements
The forward-looking statements contained herein represent Wipro's beliefs regarding future events, many of which are by their nature, inherently uncertain and outside Wipro's control. Such statements include, but are not limited to, statements regarding Wipro's growth prospects, its future financial operating results, and its plans, expectations and intentions. Wipro cautions readers that the forward-looking statements contained herein are subject to risks and uncertainties that could cause actual results to differ materially from the results anticipated by such statements. Such risks and uncertainties include, but are not limited to, risks and uncertainties regarding fluctuations in our earnings, revenue and profits, our ability to generate and manage growth, complete proposed corporate actions, intense competition in IT services, our ability to maintain our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which we make strategic investments, withdrawal of fiscal governmental incentives, political instability, war, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property and general economic conditions affecting our business and industry.

Additional risks that could affect our future operating results are more fully described in our filings with the United States Securities and Exchange Commission, including, but not limited to, Annual Reports on Form 20-F. These filings are available at www.sec.gov. We may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. We do not undertake to update any forward-looking statement that may be made from time to time by us or on our behalf.
