# India pitches magnet scheme to 14 nations

NITIN KUMAR  
New Delhi, April 2

THE GOVERNMENT HAS reached out to 14 countries, including the United States, the United Kingdom, Japan, Australia, and the United Arab Emirates, seeking to attract global participation in its ₹7,280 crore scheme to promote domestic manufacturing of sintered rare earth permanent magnets (REPM).

The ministry of heavy industries has written to embassies and high commissions of these countries, urging them to encourage companies to participate in the scheme. A pre-bid meeting is scheduled for April 7.

The outreach is part of India's broader strategy to reduce dependence on China for critical inputs such as rare-earth magnets, which are essential for sectors including electric vehicles, electronics and renewable energy. The scheme was formulated against the backdrop of global supply disruptions following China's move last year to restrict rare-earth magnet exports amid escalating trade tensions with the US.

China currently accounts for nearly 60% of global rare-earth mining and about 90% of processing capacity, giving it a dominant position in the supply chain. Recent restric-

Magnets, making domestic industries heavily reliant on imports. The participation of foreign companies is expected to bridge this gap through capital investment and advanced technology transfers.

Under the scheme, companies can bid to set up integrated manufacturing facilities for sintered neodymium-iron-boron (NdFeB) magnets in India. The government is offering a mix of capital subsidies, sales-linked incentives, assured raw material supply and policy support.

The scheme provides a capital subsidy of ₹750 crore for setting up five processing units, along with ₹6,450 crore in sales-linked incentives to be disbursed post-production. Rare-earth oxides required for production will be supplied by state-run India Rare Earths to the three lowest bidders. India holds rare-earth oxide resources of approximately 8.52 million tonne. The Union Budget for FY27 also announced dedicated rare-earth corridors in Odisha, Kerala, Andhra Pradesh and Tamil Nadu to promote extraction and processing, further supporting domestic manufacturing of magnets.

Bidders can apply for manufacturing capacities ranging from 600 to 1,200 tonne under the global tender.

# Govt's liabilities rose due to increase in public debt: CAG

PRESS TRUST OF INDIA  
New Delhi, April 2

THE OVERALL LIABILITIES of the Union government increased during FY25 mainly due to an increase in public debt, CAG said in a report on Thursday. "Internal debt and external debt increased by 8.35% and 9.83%, respectively, compared to 2023-24. At the end of FY25, internal debt stood at ₹1,59,25,949 crore and Market loans, its primary component, accounted for 69.96% of the total internal debt," CAG reported in Parliament said.

Capital expenditure as a percentage of GDP decreased slightly from 2.78% in 2023-24 to 2.70% in 2024-25, it said. Repayment of debt has been the biggest draw from the Consolidated Fund of India, accounting for 62.57% of the total outgo during 2024-25, it said. Both revenue deficit and fiscal deficit declined compared to the previous year, indicating prudent fiscal management, it said, adding the revenue deficit was 1.78% of GDP in FY25.

It decreased by 26.24% compared to FY24, reflecting better control over revenue expenditure and steady growth in revenue receipts. The fiscal deficit was 4.62% in FY25. It decreased by 8.27% compared to FY24. The report said irregularities were noticed in accounting of the Central Government Employees Group-

related to receipts and remaining misclassifications aggregating to ₹8,742.56 crore related to expenditure and were largely related to booking of expenditure under wrong object head (₹8,723.83 crore), it said. Supplementary provisions obtained in respect of 26 minor/sub-heads under 16 Grants during 2024-25, in anticipation of higher expenditure, were found unnecessary as the final expenditure was less than the original provisions under the corresponding minor/sub-heads, it said. "With respect to re-appropriation, we noticed that re-appropriations exceeding ₹10 crore each were injudiciously made to 18 minor/sub-heads across 10 Grants/Appropriations, as the sanctioned provision under the minor/sub-heads to which augmentation was made by way of re-appropriation were adequate and re-appropriations were not required," it said.

Test check revealed incorrect booking of CGEGIS payments up to minor head level instead of prescribed sub-head level, which impacts calculation of closing balance under Insurance Fund/Saving Fund and consequently calculation of interest on the CGEGIS balances, it said. Variation was observed between CGEGIS figures maintained by PAO-IDA (Pay & Accounts Office-Internal Debt & Accounts) and those appearing in the Union Government Finance Accounts (UGFA), it said. Further, it said, instances of incorrect classification of saving fund/insurance fund payments and double accounting of receipt figures pertaining to Ministry of Railways were also noticed, affecting the accuracy of the accounts.

"We also noted instances of misclassification in accounting amounting to ₹12,754.47 crore. Of these, ₹4,011.91 crore

# Low demand caps thermal plant load factor at 66%

SAURAV ANAND  
New Delhi, April 2

INDIA'S THERMAL POWER plant utilisation is set to remain under pressure with plant load factor (PLF) expected to stay at 65-66% in FY27 even as electricity demand is projected to recover, according to an Icrta report.

The rating agency flagged a sharp slowdown in demand, with electricity consumption rising just 1.1% year-on-year so far in FY26, while growth remained flat at 0.9% in the first 11 months.

"In 11 months of FY2026, the y-o-y electricity demand growth remained flat at 0.9%, due to prolonged monsoon conditions and a high base despite some recovery in the winter months," said Ankit Jain, vice president and co-group head -- Corporate Ratings, Icrta.

The weak demand has already impacted thermal utilisation, with average PLF declining to 64.4% in 10M FY2026 from 68.8% in the same period last year.

Icrta estimates PLF may average 66.6% in FY26 and remain range-bound in FY27 despite a demand rebound.

"Considering the muted growth expected in electricity demand in FY26... despite expectations of a rebound in demand growth in FY27, Icrta estimates the PLF to remain at 65-66%," the report said.

The demand slowdown was also visible in March, where growth moderated to 0.8% y-o-y during March 1-22, 2026, compared with 4.9% in February, reflecting volatility driven by weather conditions.

The rating agency, however, expects demand growth to recover to around 5% in FY27, supported by normalised weather, a lower base and continued industrial and commercial activity.

The subdued thermal performance comes even as capacity addition accelerates sharply. Gross power generation capacity addition reached 49.4 GW in the first 10 months of FY26, surpassing the 34.1 GW added in the full year FY25. For FY26, total capacity addition is projected at 53.5 GW, largely driven by renewable energy expansion along with higher additions in the thermal segment.

The report underlines a structural shift in the power sector, where rising renewable capacity is limiting thermal plant utilisation even as overall capacity grows. At the same time, transmission infrastructure remains a bottleneck.
