### Operational Highlights:

#### ONGOING OPERATIONS

- Operations and results reflect market and product-mix dynamics, and usual seasonal cycles; treasury income was lower as liquidity was progressively deployed towards capital projects and the UAE subsidiary.
- The reportable profits for this quarter and the year are stated after accounting (as mandated under Accounting Standards) for unrealized non-cash adjustments due to exchange rate(s), as of the reporting date, on foreign exchange credits repayable over about 10 years, as detailed in the notes for the audited Accounts reported separately.
- The standalone performance can be considered a sound base for future growth;
  - Aggregate production to date at 31,335 MT; revenues reflect variations in product-mix, pricing and raw material costs, and therefore cannot be directly correlated to physical volumes;
  - Unrealized translation loss of Rs.11.14 crores on euro-linked long term liabilities unconnected to operations arising from broad-based weakness of the Rupee against major currencies provided as per accounting standards;
  - Incremental liability of Rs.139.06 lacs towards gratuity and compensated absences, being the effect of New Labour Codes.
  - Organization & other costs reflected in aggregate expenses have naturally built-up ahead of capacity increases coming online.
  - Q4 revenue Y-o-Y basis also reflects a marginal fall in annual refrigerator production, following an exceptional Q4 FY25, leading to moderate reduction in offtake. Strong customer engagement translated into increasing market share.
  - Xpro dielectric films maintained its performance, supported by a strong market position. New customers and applications are being on-boarded for the imminent capacity increases;
  - Refrigerator production approximately flat on a YTD basis. Our sheet/liners volumes registered growth, reflecting strong customer engagement.
  - Management focus on volume and margin improvements.

#### EXPANSION

- The commissioning of the new dielectric film line at Barjora on March 27, 2026, doubling the Company's nameplate capacity in India from 4,000 to 8,000 MT annually was a key step toward a globally scaled contemporary dielectric films platform. The Management anticipates a calibrated ramp-up, with performance building as the volumes scale.
- Implementation of the UAE project by our subsidiary, Xpro Dielectric Films FZ-LLC, remains on track. The West Asian conflict has escalated significantly affecting the Gulf states, including the UAE, calls for particular vigilance for project under implementation. The situation remains fluid and we continue to monitor it.
