MetaShot and NSE-listed Yudiz Solutions Launch the World's First Smart Pickleball Game

MetaShot opens motion gaming platform to third-party studios with developer funding programme in the pipeline

MetaShot has partnered with Yudiz Solutions, an NSE-listed game development company, to launch the world's first smart pickleball game — an exclusive title built for MetaShot's motion gaming console. With a YoY of 115% in revenue for FY 26, this launch marks a significant milestone in MetaShot's journey to build a full-fledged motion gaming platform ecosystem, as the company opens its proprietary SDKs to a third-party gaming studio for the first time.

The smart pickleball paddle and game are set to launch in the US in Q3 FY26. This follows the immensely successful cricket game that has enjoyed phenomenal success since its launch and recently hit 5 million completed matches. Pickleball will be followed by further studio partnerships and new game launches on the MetaShot platform. The integration was completed in record time, demonstrating how seamlessly third-party gaming studios can develop for the MetaShot motion platform.

“Partnering with MetaShot to bring the world's first smart pickleball game to life is an exciting milestone for Yudiz Solutions and reflects our shared vision to shape the future of immersive sports gaming. Pickleball is just the beginning of our journey with MetaShot as we look to expand into more motion-based sports and interactive gaming experiences for global audiences. Starting with the US market and with ambitions to scale globally, this collaboration marks a significant step towards creating a new era of physical and digital gaming experiences. We are proud to work with MetaShot in building a platform ecosystem that enables innovative sports titles and redefines how people play, compete, and connect. Together, we aim to create next-generation gaming experiences that go beyond screens and bring movement, technology, and entertainment closer than ever before” said Chirag Leuva, CEO, Yudiz Solutions.

Starting with the US market and with ambitions to scale globally, this collaboration marks a significant step towards creating a new era of physical and digital gaming experiences. We are proud to work with MetaShot in building a platform ecosystem that enables innovative sports titles and redefines how people play, compete, and connect. Together, we aim to create next-generation gaming experiences that go beyond screens and bring movement, technology, and entertainment closer than ever before.”

“Partnering with Yudiz Solutions — to bring the world's first smart pickleball game to our platform is a proud moment for the team,” said Prince Thomas, CEO of MetaShot. “Pickleball marks a significant milestone in our journey as we move towards building a platform ecosystem. We are launching our developer platform ecosystem very soon. We invite gaming studios from across India and beyond to launch unique sports gaming experiences and to be part of this next chapter.”

The launch taps into one of the fastest-growing sports in the world. Pickleball now has over 50 million players globally, and the global pickleball market is projected to grow from \$2.2 billion in 2024 to \$9.1 billion by 2034, at a 15.3% CAGR. In India alone, active players have surged nearly 300% in three years, with courts growing 10–12x across the country.

About MetaShot

Founded in 2021 by Prince Thomas, Ranjit Kumar Behera, and Ajith Sunny in Bengaluru, the company began selling the MetaShot Smart Cricket Bat in August 2023. In January 2025, MetaShot raised funds from Sauce.vc, along with Sharrp Ventures, Panthera Peak, Ventana Ventures, and the Government of Karnataka. Outside of India, their products are available in the USA, UAE

About Yudiz Solutions

Yudiz Solutions Limited is an NSE-listed game development company specializing in building innovative gaming experiences across mobile, web, AI, AR/VR, blockchain, and immersive technologies. With extensive expertise in sports games, multiplayer experiences, board games, metaverse applications, and interactive entertainment, Yudiz has partnered with global brands and enterprises to deliver next-generation gaming products.

As gaming evolves beyond screens, Yudiz is expanding into proprietary gaming IPs and immersive physical + digital experiences, creating new possibilities at the intersection of sports, movement, and technology. The partnership with MetaShot represents a strategic step in this vision, beginning with smart pickleball and paving the way for future motion-based gaming experiences designed for global audiences.
