Zen Technologies Secures Indian Patent for 60 mm Mortar Simulator

Hyderabad, December 22, 2025: Zen Technologies, a pioneer in defence training and simulation systems, announces that the Indian Patent Office has granted an Indian patent for its “60 mm Mortar Simulator”.

This grant marks a key milestone in Zen Technologies’ innovation journey, taking its portfolio to 57 Indian patents, 85 patents worldwide, and the 8th patent granted in 2025. The achievement reinforces the company’s sustained focus on indigenous R&D and intellectual property creation in advanced defence training technologies.

The patented invention delivers a comprehensive, end-to-end solution for training on high-angled firing weapons, including mortar systems. It integrates a realistic weapon architecture with advanced sensor assemblies, azimuth and elevation control mechanisms, recoil simulation, and computer-generated imagery based battlefield scenarios. The system enables accurate replication of operational conditions while allowing safe, indoor, and all-weather training without dependence on live ammunition or field firing ranges.

The grant of this patent significantly enhances Zen Technologies’ global competitiveness and export potential. With defence forces worldwide increasingly adopting simulation-based training to improve readiness and reduce risk, the patented high-angled firing weapon simulator is well positioned for international markets. Strong IP protection supports Zen’s participation in global tenders, defence collaborations, offset programs, and long-term export engagements. This patent further strengthens Zen Technologies’ position as a research-driven defence technology company and underscores its commitment to delivering world-class, indigenous training solutions that meet evolving operational requirements of armed forces in India and abroad.

About Zen Technologies Limited

Zen Technologies Limited is a pioneer and leader in providing world class state-of-the-art Defence Training and Anti-Drone solutions and has a proven track record in building training systems for imparting defense training and measuring combat readiness of security forces. With a dedicated R&D (recognized by the Ministry of Science and Technology, Government of India) and production facility in Hyderabad, the company has applied for over 180+ patents and shipped more than 1,000 training systems around the world.
