Dear Sir/Madam,

Sub: Press Release relating to grant of Patent

Please find attached the press release titled **Zen Technologies Secures Patent for Innovation in Laser-Based Combat Training.**

This is for your kind information and records.

Thanking You

Yours sincerely,

For Zen Technologies Limited

Sourav Dhar

Zen Technologies Secures Patent for Innovation in Laser-Based Combat Training

Zen Technologies Limited (“Zen”) is pleased to announce the grant of its 54th Indian patent, titled “Single ILU Long Pass Filter”, marking a significant breakthrough in laser-based military training systems. This patent also represents the company’s 82nd patent globally, reinforcing Zen’s leadership in defence innovation through indigenous research and development.

The newly patented long-pass optical filter enables the seamless integration of visible and infrared laser beams into a single, stable output. This innovation enhances the accuracy, realism, and responsiveness of combat training simulators. Unlike traditional systems that rely on separate beams and often face issues related to alignment and durability, Zen’s compact and robust solution delivers superior optical performance under rugged field conditions, while significantly reducing the need for recalibration and maintenance.

In addition to bolstering domestic capabilities, this technological leap opens significant export opportunities for Zen. With several nations actively seeking to modernize their military training infrastructure, Zen’s high-performance, cost-effective, and low-footprint solution is well-positioned to address international demand. The patented filter system’s compact design and modularity make it ideal not only for full-scale simulator environments but also for mobile deployment and export-oriented models.

This development further demonstrates India's growing capability to design and deliver advanced defence technologies through homegrown innovation. By reducing reliance on foreign components and emphasizing domestic R&D, Zen contributes to building a more self-sufficient and globally competitive defence manufacturing ecosystem. The patent adds to Zen’s expanding intellectual property portfolio and highlights the strategic importance of sustained investment in indigenous technological advancement.

About Zen Technologies Limited

Zen Technologies Limited is a pioneer and leader in providing world class state-of-the art Defense Training and Anti-Drone solutions and has a proven track record in building training systems for imparting defense training and measuring combat readiness of security forces. With a dedicated R&D (recognized by the Ministry of Science and Technology, Government of India) and production facility in Hyderabad, the company has applied for over 172+ patents and shipped more than 1,000 training systems around the world. With over 30 years' experience fielding realistic combat training solutions to armed forces worldwide, Zen constantly updates its portfolio to include new solutions for emergent threats. Leveraging their world-class, in-house production facilities, Zen has developed strategic solutions tailored to the specific needs of End Users Ministry of Interiors and Ministry of Defence including customized training programs aligned with the requirements of the U.S. Army and U.S. Department of Defense.
