Crude oil gains on geopolitical concerns

Crude oil climbed on worries that the US may resume strikes against Iran, risking fresh turbulence in West Asia. Brent futures for December climbed to fresh highs near $118 a barrel, while the more-active January contract traded near $113. The global benchmark is headed for a fourth monthly gain. The US WTI was up almost two per cent. BLOOMBERG

London: Copper prices fell and were on track to snap a three-month winning streak in October as concerns that heavy spending on AI may not generate sufficient returns. Benchmark three-month copper on the LME was down 0.9 per cent at $14,227 a tonne by 1058 GMT. Aluminium and lead were steady at $3,077.50 and $1,914.50, respectively. REUTERS

Millers bid for FCI wheat at higher rates in open sale

ROBUST OFFTAKE. Many States saw 100% offtake, with processors and millers buying the grain at over ₹3,100/quintal against the all-India average wholesale price of ₹2,910

Prabhudatta Mishra
New Delhi

A large number of buyers bid for wheat at a higher price in this week's Food Corporation of India (FCI) open market sales scheme (OMSS) auctions, designed to check prices of rice and wheat in the open market.

This comes amid tightening of supplies and also the maximum quantity that can be lifted.

Except Haryana, the average selling price of wheat in the weekly auction held on October 28 was higher in most of the States compared with the previous week.

The government reduced the overall wheat allocation for sales in the weekly auction held on October 28 by 5,000 tonnes to 1.01 lakh tonnes (lt) from the previous tender, even as processors and millers scrambled to buy grain at over ₹3,100/quintal in many States when the all-India average wholesale price ruled at ₹2,910/quintal.

ABOVE BUFFER NORMS

Experts said that a lower quantity made available in the auction was one factor for the prices to rise, while the second factor was the capping of the maximum quantity for each bidder.

"When an average flour mill requires at least 3,000 tonnes a month to run its facility, by keeping a cap of 300 tonnes, the government is not providing even half of their monthly requirement," said an industry expert, adding that the government should release more as the current stock with the Food Corporation of India is over 463 lakh tonnes (as of October 1).

The buffer norm prescribes a minimum of 205.2 lt of wheat should be in the official reserve on October 1 any year. The government had about 320 lt of wheat as of October 1, 2025.

Millers said they are now dependent on the FCI since market arrivals had dwindled, despite stock declaration imposed by the government, which is aware of how much stock lies with whom.

RECORD PRODUCTION

In Punjab, which got the maximum allocation of 25,000 tonnes, the entire quantity was intended to be lifted in the auction where processors/millers offered to buy wheat between ₹3,200/quintal and ₹2,830/quintal.

Only six bidders out of 203 quoted below ₹2,900/quintal. However, the average selling price was ₹2,992/quintal against ₹2,982/quintal in the previous week.

The offered quantity in a single depot should be decided based on the concentration of mills in the surrounding areas rather than putting a maximum cap of 500 tonnes per week, said Naresh Ghai, President of the Roller Flour Mills Association of Punjab. He demanded that the weekly auction have a minimum 40,000 tonnes.

The government procured 357.57 lt of wheat in the 2026-27 season against 299.75 lt in the previous marketing season (RMS 2025-26). Wheat production in the 2025-26 crop year rose to a record 120.66 million tonnes (mt) from 117.95 mt in the previous year.

TradeForge snags hit Kochi tea auctions

V.Sajeev Kumar
Kochi

The Tea Buyers Association has raised concerns over difficulties in Kochi during the first sale conducted through the newly introduced TradeForge auction platform, citing technical glitches that disrupted the auction and subsequent delivery processes.

Several buyers complained that delivery orders were not generated for sale 44 despite the allocation of funds. This resulted in logistical disruptions, affecting the timely lifting and delivery of purchased tea, highly placed sources in the association said.

The new system has significantly disrupted the traditional business model of many small buyers in Kochi. They typically purchase tea in small lots, take same-day delivery and sell it in the local market. This allows them to realise payments within a week and maintain regular business operations.

POSING DIFFICULTIES

However, the severely disrupted this established business model. It has almost brought it to a halt, creatingAccording to sources, the situation is adversely affecting the livelihoods and business activities of stakeholders, particularly small buyers and exporters, while disrupting their day-to-day operations.

In view of these difficulties, the Association has sought the Tea Board's urgent intervention to address the issues and resolve the operational bottlenecks at the earliest. Building buyer confidence, ensuring seamless bidding and transaction processing, and delivering a reliable user experience will be critical to securing wider adoption of the new platform, the sources added.

Meanwhile, local buying was subdued in both dust and leaf varieties.

IARI finds value in iron ore tailings' use for farming

Subramani Ra Mancombu
Chennai

"We will not see people calling iron ore tailings a waste anymore, and they will be thinking of converting them into value-added products and making money out of waste," says Bhupinder Singh, Principal Scientist and Principal Investigator at ICAR-IARI (Indian Council of Agricultural Research-Indian Agriculture Research Institute).

Singh, who has been in agriculture research for over three-and-a-half decades, knows his onions.

His statement comes on the heels of a promising development with ICAR-IARI signing a memorandum of understanding (MoU) with ArcelorMittal Nippon Steel (AMNS) to conduct long-term research on the use of iron ore tailings in agriculture.

LONG-TERM PACT

Preliminary studies, done since 2024, have shown encouraging results of the use of iron ore tailings in farming of paddy, wheat and vegetables such as brinjal (eggplant) and lady's finger (*okra or bhindi*). Results showed that the crop's yield improved by 10-15 per cent, while use of chemical fertilizers was 20 per cent lower.

The signing of the long-term MoU comes after both organisations carried out studies from 2024. The long-term MoU, which will run till 2029, will enable largescale trials at ICAR-IARI and AMNS sites.

"In the second phase, we propose to work with different crops — cereals, oilseeds, non-edible flowers, tubers, particularly potato, and vegetables. We can try agroforestry too by applying the tailings without affecting the soil quality," he said.

The ICAR-IARI team first checked if valorisation of iron ore tailings from AMNS was feasible. Valorisation is turning mining waste into valuable secondary resources, reducing environmental hazards. Iron ore tailings cannot be applied directly to the soil since it may pollute it with other metals or even make it iron-heavy. "We used different organic amendments to reduce the total iron content of the tailings," said Singh in an online interaction with *businessline*.

Bhupinder Singh, Principal Scientist and Principal Investigator at ICAR-IARI

Singh's team characterised iron ore tailings received from AMNS. The team found that they did not have any toxic heavy metals.

"We characterised six batches, which were collected at different time intervals, because we wanted to be sure that our results are not based on one-time analysis," he said.

It found the tailings rich in iron. "If the tailings are valorised, we can enrich them further with various other macro and micronutrients. Based on the first phase, we have entered into a long-term partnership with AMNS, which will be on until 2029," said Singh.

HUMAN NUTRITION

The valorised tailings are rich in iron, calcium, magnesium and many other elements, which are required by plants. Almost 12 per cent of cultivable lands in the country are iron deficient, and 49 per cent of soils are zinc deficient.

From the human nutrition point of view, the ICAR-IARI and AMNS project is trying to improve iron and zinc content in the crop, including through biofortification.

"If a person requires to take iron daily, the crop will take care of dietary requirement," he said.

The scientists use biological consortia, a mix of bacteria and fungi, which have the property of nutrient solubilisation. This is because most nutrients in the tailings are in oxide forms, which are less soluble. "We need to ensure that their availability is improved. We use different iron-solubilising bacteria which promote growth, chelating iron and zinc so that their uptake by the plant is ensured," said Singh.

Experiments were conducted at the AMNS site, which has continuously been exposed to aerial precipitation of iron ore tailings. During the second phase of the project, the focus will also be on addressing iron deficiency in soil and biofortification, he said, adding that largescale trials will begin from November on ICAR-IARI plots.

"In addition, we will be conducting trials in Chhattisgarh, which is an organic State. We will use organic amendments of the tailings basically and avoid using any chemical," he said.

Cyclone relief

Cyclone Arnab's impact has improved reservoir storage in the southern region, even as overall storage in India's 178 major reservoirs declined further this week, according to data from the Central Water Commission (CWC).

The CWC's weekly reservoir bulletin showed storage at 122.001 billion cubic metres (BCM), or 66 per cent of the combined capacity of 184.762 BCM. This was 27 percentage points below the level a year ago and 18 percentage points below the 10-year normal.

Storage in the southern region rose by at least 1 BCM during the week to 24.466 BCM, or 44 per cent of its capacity of 55.879 BCM. With cyclone Arnab making landfall in Andhra Pradesh on Wednesday, storage in Andhra Pradesh and Telangana, where levels remain a concern, could improve further.

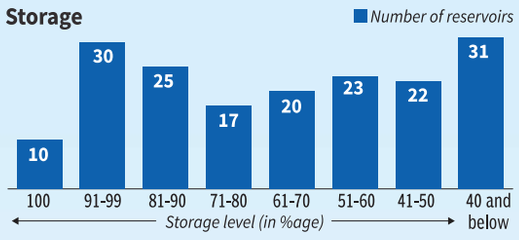

Tamil Nadu, Karnataka and Kerala have also benefited from the recent rainfall. The India Meteorological Department's forecast of more rain across the region is expected to provide a further boost to reservoir storage.

Meanwhile, 71 per cent of India's 734 districts received deficient rainfall between October 1 and 28, according to the IMD. This follows a South-West Monsoon season that ended with a 15 per cent rainfall deficit, leaving several parts of the country facing drought-like conditions.

Storage declined in the other four regions, with only the central region remaining above its normal level. Storage in the western and eastern regions stood above 70 per cent of capacity, while the northern region was at 58 per cent.

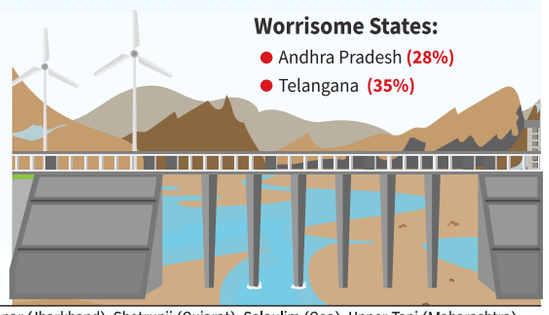

Currently, 10 reservoirs are full, while 53 are less than half full.

UP targets more paddy purchase; procurement to start from tomorrow

Our Bureau
New Delhi

The Uttar Pradesh government has set a target to buy 65 lakh tonnes (lt) of paddy, which is higher from the actual procurement of 62 lt in the 2025-26 season (October-September). The procurement will be undertaken through eight agencies across 4,500 centres, the government said.

Stating that 4,195 centres had been opened as of Friday, the government said procurement will begin in eastern Uttar Pradesh from November 1 and continue until February 28, 2027. In view of the prevailing weather conditions, Chief Minister Yogi Adityanath directed officials to ensure that farmers visiting procurement centres face no inconvenience and that all necessary arrangements are completed well in advance, an official statement said.

The Centre has fixed the minimum support price (MSP) for paddy at ₹2,441 per quintal for common variety and ₹2,461 per quintal for Grade A. The FCI buys about 85 per cent of grade A and remaining of common variety. Additionally, farmers will receive ₹20 per quintal separately towards unloading, sieving and cleaning charges.

The Chief Minister has also directed that payments to farmers be made within 48 hours through Direct Benefit Transfer (DBT). As the entire procurement system has been taken online, more than 38,000 farmers have so far registered on the official portal.

'El Nino to hit milk output growth'

Vishwanath Kulkarni
Bengaluru

India's milk production is projected to grow 2 per cent to 226.5 million tonnes (mt) in 2027, slowing from an estimated 2.5 per cent in 2026, according to the latest forecast by the USDA Foreign Agricultural Service (FAS), New Delhi.

El Nino-induced drought conditions are expected to constrain feed and fodder availability and affect animal productivity, slowing milk output growth next year.

The USDA Post forecasts butter production to rise 2.2 per cent to 7.6 mt in 2027, while skimmed milk powder (SMP) output is expected to increase 2.5 per cent to 8,10,000 tonnes. However, higher domestic prices and tight supplies are likely to curb dairy exports. SMP exports are forecast to halve to around 7,000 tonnes in 2027 amid strong domestic demand.

PROTEIN SOURCE

The slowdown follows an above-normal monsoon in 2025, which supported fodder availability and improved milk yields in 2026.

India, the world's largest milk consumer, uses most of its domestic production for consumption.

Milk and dairy products are a major source of protein, particularly for the country's vegetarian population.

Fluid milk consumption is forecast to rise slightly over 2 per cent to 95 mt in 2027, while consumption by processing units is projected to increase just under 2 per cent to 131.5 mt.

SHIFT TO CROSSBREEDS

The number of cows in milk is projected to increase 1.3 per cent to 63.3 million in 2027, as farmers increasingly shift to higher-yielding crossbred cows and indigenous buffaloes, replacing low-yielding non-descript animals.

Milk production is concentrated in Uttar Pradesh, Rajasthan, Madhya Pradesh, Gujarat, Maharashtra and Punjab, which together account for over 60 per cent of the output.

Bay 'low' gathers steam, threatens heavy rain over AP

Vinson Kurian
Thiruvananthapuram

A developing low-pressure area over the Bay of Bengal is expected to intensify into a depression by Saturday, potentially triggering a fresh spell of heavy to very heavy rainfall along the Andhra Pradesh coast.

Several parts of the country are bracing for overlapping weather systems: The weakening but still influential remnant of Arnab over Central India, the fresh Bay system that could develop into a depression and shift the focus of heavy rainfall to the East Coast and the South Peninsula, and an incoming western disturbance over north Punjab.

The India Meteorological Department (IMD) has forecast isolated very heavy rainfall of 11.5-20 cm over coastal Andhra Pradesh and Yanam on Monday and Tuesday as the Bay system advances. Isolated heavy rainfall of 7-11 cm is also likely over Rayalaseema, Tamil Nadu, Puducherry and Karaikal on Monday and Tuesday, Telangana on Sunday and Monday, and coastal Andhra Pradesh and Yanam on Sunday and Wednesday.

South interior Karnataka is likely to receive heavy rainfall for four consecutive days from Monday, while Kerala and Mahe could see heavy rain for three days from Sunday. Coastal Karnataka is likely to receive heavy rainfall from Wednesday, while north interior Karnataka may experience it on Tuesday and Wednesday.

FARM CONCERNS. A farmer inspects banana plants flattened by Cyclone Arnab in Guntur district of Andhra Pradesh. More rain in key agricultural belts could damage standing kharif crops GN RAO

BAY SYSTEM STRUGGLES

The developing Bay system has so far struggled to gain strength, competing for moisture with the remnant of Cyclone Arnab over Central India. On Friday, the fresh low-pressure area moved only to the South Andaman Sea and the adjoining Andaman and Nicobar Islands.

The IMD, however, maintained its outlook that the system would consolidate into a depression over the south-east Bay and adjoining Andaman Sea and islands by Saturday. Its prospects for further intensification remain less certain as it moves towards the Andhra Pradesh coast over the next two days.

MORE RAIN FORECAST

Though considerably weakened, the remnant could trigger further rainfall in combination with the western disturbance over north Punjab, elongated troughs across central and western India, and adjoining cyclonic circulations.

Further rainfall is particularly consequential for agricultural belts where kharif crops are ready for harvest, raising concerns over crop damage and disruption to harvesting operations.

Gold hits 1-year low on persistent inflation concerns

Reuters

Gold fell to a one-year low on Friday and silver slid below $50 an ounce for the first time since November 2025 as persistent inflation concerns strengthened expectations that US interest rates will stay high.

Spot gold was down 2.7 per cent at $3,910.53 per ounce by 1405 GMT, its lowest since October 2025. US gold futures for December delivery fell 2.8 per cent to $3,919.60. Silver lost 5.8 per cent at $49.34 per ounce.

Data on Thursday showed US inflation accelerated in September as consumers paid more for gasoline and other goods, bolstering economists' expectations of a rate hike in December.

Platinum dropped four per cent to $1,428.35 and palladium fell 3.1 per cent to $975.25.

ಪ್ರಕರಣದ ತನಿಖೆಯನ್ನು ಆರಂಭದಲ್ಲಿ ಸ್ಥಳೀಯ ಪೊಲೀಸರು ನಡೆಸಿದ್ದರು. ಬಳಿಕ ಸಿಐಡಿ ಮತ್ತು ಸಿಬಿಐ ತನಿಖೆ ನಡೆಸಿದ್ದವು. ಪ್ರಕರಣದ ವಿಚಾರಣೆ ಬಳಿಕ ಆರೋಪಿಯಾಗಿದ್ದ ಸಂತೋಷ್ ರಾವ್ ಅವರನ್ನು ನ್ಯಾಯಾಲಯ ಖುಲಾಸೆಗೊಳಿಸಿತ್ತು. ಸುಮಾರು 14 ವರ್ಷಗಳ ಬಳಿಕ ಸುಪ್ರೀಂ ಕೋರ್ಟ್ 2026ರ ಸೆಪ್ಟೆಂಬರ್ 21ರಂದು ಪ್ರಕರಣದ ಹೊಸದಾಗಿ ತನಿಖೆ ನಡೆಸುವಂತೆ ನಿರ್ದೇಶನ ನೀಡಿತ್ತು. ಅದರಂತೆ ರಚನೆಯಾದ ಎಸ್‌ಐಟಿ ಇದೀಗ ಹಿಂದಿನ ತನಿಖೆಯ ದಾಖಲೆಗಳು, ಸಾಕ್ಷ್ಯಗಳು, ಅಧಿಕಾರಿಗಳ ಹೇಳಿಕೆಗಳು ಹಾಗೂ ಘಟನಾ ಸ್ಥಳದ ಪರಿಶೀಲನೆಗೆ ಆದ್ಯತೆ ನೀಡಿದೆ.ಪ್ರಕರಣದ ಮರುತನಿಖೆಯಲ್ಲಿ ಲಭ್ಯವಿರುವ ಸಾಕ್ಷ್ಯಗಳ ಮರುಪರಿಶೀಲನೆ ಮತ್ತು ಹೊಸ ಮಾಹಿತಿಗಳ ಸಂಗ್ರಹಕ್ಕೆ ಎಸ್‌ಐಟಿ ಮುಂದಾಗಿದೆ.
