Business Update Release

Z-Tech (India) Secures its largest “Waste to Wonder Park (Krishna-Lok Park, Theme Park)” in Terms of Value & Size from Nagar Nigam Mathura-Vrindavan, Uttar-Pradesh (NNMV)

Delhi, 17th February 2026: Z-Tech (India) - Pioneering Sustainable Infrastructure & Environmental Solutions provider pleased to announce that it has been awarded a prestigious contract from Nagar Nigam Mathura-Vrindavan (NNMV), Uttar Pradesh for the Design, Engineering, and Development of Waste to Wonder Park (Krishan-Lok Park, Theme Park). The project will be implemented on a Revenue Share Model for a period of 20 years, with a total estimated project capital cost of **Rs. 19,01,63,446/- Crores (Rupees Nineteen Crore One Lac Sixty-Three Thousand Four Hundred Forty-Six Only), excluding GST making it the largest project in terms of value undertaken under this category.** The park will be developed on approximately **34 acres of land**, making it the **largest Waste-to-Wonder thematic park in the region in terms of size.** Under the approved CAPEX structure, 90% of the project cost will be funded by Nagar Nigam Mathura-Vrindavan, while the remaining 10% will be funded by the Z-Tech (India) Limited.

The proposed initiative—Krishna-Lok Park on Waste to Wonder Theme Park, Mathura-Vridavan— The proposed initiative, **Krishna-Lok Park**, will revitalize one of Mathura’s largest underutilized land parcels into an iconic, state-of-the-art cultural and tourism destination dedicated to **Lord Krishna**. The project aims to creatively repurpose unusable and unserviceable materials—including vehicles, furniture, equipment, machinery, metal scrap, construction and demolition waste, plastic items, and other discarded materials accumulated at various NNMV offices. The **Krishna-Lok Park** will depict the life, teachings, and divine leelas of Shri Krishna, offering visitors a spiritually enriching and culturally immersive experience.

Krishna-Lok park is envisioned as a major cultural, spiritual, and tourism hub in the Braj region. Inspired by Vedic traditions and the heritage of Braj Bhoomi, the park will feature:

- Interactive exhibits
- Real-life recreations of key episodes from Krishna’s life
- Devotional and educational experiences
- Artistic installations created from recycled materials

The development is expected to significantly enhance tourism in Mathura-Vrindavan, similar to how the Ram Mandir has boosted spiritual travel in India. By blending mythology with modern design and sustainable practices, Krishna-Lok will provide devotees and tourists with a unique opportunity to walk through the legendary journey of Lord Krishna in an eco-conscious environment.

The project strongly promotes sustainable waste management, Circular economy practices, Environmental awareness and Responsible urban beautification

Rather than discarding municipal waste, the initiative transforms it into durable, meaningful public assets. Recycled materials will be integrated into landscaping, artistic decor, and structural components—demonstrating how sustainability and cultural expression can coexist harmoniously.

Krishna-Lok stands as a landmark initiative that aligns with India’s longstanding artistic traditions of working with unconventional materials while advancing modern environmental stewardship.

Management Comment:

Commenting on this development, **Ms. Sanghamitra Borgohain, Managing Director, Z-Tech (India) Limited** said:

“We are delighted to partner with the Nagar Nigam Mathura-Vrindavan for the development of the Waste to Wonder Park (Krishan-Lok Park, Theme Park). This order reflects our capability and proven expertise in transforming waste into meaningful public assets through engineering creativity and sustainable innovation. Z-Tech has successfully delivered several landmark waste-to-art and urban rejuvenation projects across India, and we are proud to extend this expertise to the city of Mathura, Uttar-Pradesh. This project not only enhances the city’s aesthetic appeal but also reinforces our commitment to environmental stewardship and circular economy principles.”

Company Overview

Z-tech (India) limited is incorporated in 1994 with their core focus on civil construction business, providing services related to designing, supplying and building retaining structures. In addition to this, today we are actively engaged in the Sustainable Theme Park Development, where our focus involves creating theme parks through the utilization of recycled scrap materials. Simultaneously, we are dedicated to implementing innovative waste water management solutions for industrial units, employing the cutting-edge GEIST technology. This dual commitment underscores our holistic approach to sustainable practices, transforming discarded materials into recreational spaces while efficiently managing industrial wastewater through state-of-the-art technology.
