Business Update Release

Z-Tech Expands Sustainability Footprint Through Acquisition of GGIPL's Proprietary Water Restoration Technologies

Acquires 76% Stake in Grace Green Infra to Strengthen Environmental Solutions Portfolio

Delhi, 21th November 2025: Z-Tech (India) - Pioneering Sustainable Infrastructure & Environmental Solutions provider announced that it has entered into a Share Purchase Agreement to acquire Grace Green Infra Private Limited ("GGIPL") as its newly acquired subsidiary.

India faces growing challenges in restoring and maintaining its water bodies due to pollution, untreated wastewater discharge, and lack of scalable scientific solutions. GGIPL is among the few companies in the country offering proprietary, government-certified, and proven technologies specifically engineered for the rejuvenation, treatment, and long-term maintenance of water bodies. These technologies will directly complement Z-Tech's existing operations and strengthen its presence in the sustainability and environmental solutions space.

Grace Green Infra Pvt Ltd (GGIPL) has developed a suite of advanced, government-certified technologies for comprehensive water body rejuvenation, including its proprietary Grace Vermi-Filtration Solution, an eco-friendly wastewater treatment system that uses microbes, natural filtration media, and vermi-culture to eliminate the need for mechanical aeration, reduce organic and nutrient loads, and deliver reusable-quality water—certified by the Ministry of Jal Shakti. The Company also offers Grace Packaged FRP STPs (1–50 KLD), modular capsule-based sewage treatment systems that can be installed both below and above ground, consume up to 80% less power than conventional systems, and are certified by IIT Bhubaneswar, making them ideal for decentralized wastewater treatment. Additionally, GGIPL's Nanobubble & Bio-Remediation Technology provides a breakthrough solution for restoring polluted lakes and water bodies by boosting dissolved oxygen levels up to tenfold, oxidizing algae, reducing organic and nutrient impurities, and enhancing sludge digestion, water percolation, groundwater recharge, and overall water quality. Further strengthening its market position, GGIPL currently has an unexecuted order book of approximately ₹22 crore, reflecting strong customer traction and revenue visibility.

This acquisition is a significant step forward in Z-Tech (India) Limited's long-term vision of becoming a leading player in sustainable infrastructure development. The Company has consistently focused on integrating advanced technologies that create measurable

environmental and social impact. By adding GGIPL's proven, government-certified water rejuvenation and wastewater treatment solutions to its portfolio, Z-Tech strengthens its ability to deliver science-driven, environmentally responsible infrastructure across its core segments. The acquisition not only expands Z-Tech's technological depth but also reinforces its commitment to supporting national priorities on water conservation, ecosystem restoration, and environmental sustainability.

Furthermore, this transaction is expected to create strong operational synergies, especially within Z-Tech's Theme Park division, where scientific water management is a critical element of project development and long-term maintenance. With access to GGIPL's technologies, Z-Tech will be able to incorporate eco-friendly water features, improve onsite environmental quality, and deploy advanced solutions for lake revival, wastewater treatment, groundwater recharge, and sustainable water circulation systems. Coupled with GGIPL's ₹22 crore unexecuted order book providing immediate revenue visibility, the acquisition positions Z-Tech for stronger growth, enhanced environmental impact, and long-term value creation.

Management Comment:

Commenting on this development, **Ms. Sanghamitra Borgohain, Managing Director, Z-Tech (India) Limited** said:

"We are extremely pleased to announce our strategic acquisition of a 76% stake in Grace Green Infra Pvt Ltd, a company that has pioneered certified and scalable technologies for water body rejuvenation and sustainable wastewater treatment. This investment is fully aligned with our long-term vision of strengthening Z-Tech's presence in environmental solutions and integrating advanced, eco-friendly technologies across our business verticals. We are also encouraged by the fact that Grace Green Infra currently has an unexecuted order book of approximately ₹22 crore, which provides immediate revenue visibility and reinforces the strong market acceptance of its solutions. GGIPL's proven innovations—ranging from vermi-filtration systems and energy-efficient FRP STPs to breakthrough nanobubble and bio-remediation technologies—will not only enhance the scientific management of water bodies within our Theme Park projects but also open up new avenues in India's rapidly growing water sustainability landscape. We believe this synergy will significantly strengthen our operational capabilities, improve environmental outcomes, and create meaningful value for our stakeholders over the long term."

Company Overview

Z-TECH (INDIA) LIMITED

Z-tech (India) limited is incorporated in 1994 with their core focus on civil construction business, providing services related to designing, supplying and building retaining structures. In addition to this, today we are actively engaged in the Sustainable Theme Park Development, where our focus involves creating theme parks through the utilization of recycled scrap materials. Simultaneously, we are dedicated to implementing innovative waste water management solutions for industrial units, employing the cutting-edge GEIST technology. This dual commitment underscores our holistic approach to sustainable practices, transforming discarded materials into recreational spaces while efficiently managing industrial wastewater through state-of-the-art technology.
