Adani Power emerges as India's largest private power producer

Adani Power commissions 4th unit of 660 MW at its Tiroda Power plant

Total installed capacity now stands at 8,620 MW

- **Adani Power has added 2,640 MW of capacity; 15% of India's overall power generation in FY14**
- **Adani Power's installed capacity now stands at 8,620 MW**
- **Adani Power becomes largest private power producer in India**
- **Adani Power commissions 4th unit of 660 MW at its Tiroda Power plant**
- **Adani Power operates power plants at Mundra in Gujarat, Tiroda in Maharashtra and Kawai in Rajasthan**

Ahmedabad, April 3, 2014: Adani Power Ltd, a subsidiary of Adani Enterprises Ltd and part of the Adani Group, a global integrated infrastructure player, today announced the commissioning of the fourth unit of 660 megawatts (MW) at its power plant at Tiroda in Maharashtra, thus emerging as the largest private power producer in India with an overall installed capacity of 8,620 MW.

This is an important milestone in the history of Indian power generation as Adani Power Ltd has added 2,640 MW in the last financial year, accounting for nearly 15 percent of the overall capacity addition of about 17,000 MW in the country. The company has commissioned two 660 MW units in the first quarter, one 660 MW unit in third quarter and one 660 MW unit in fourth quarter of FY14, two each at Tiroda in Maharashtra and at Kawai in Rajasthan.

"It is a proud event and a momentous occasion for everyone at Adani Power, as we are now the largest private power producer in India. This achievement is a

testimony to our efforts in increasing electricity generation in the country, and only reflects our commitment towards nation building. It is a significant milestone in the path to achieve Adani Power's target of generating 20,000 MW by 2020," said Mr. Gautam Adani, Chairman, Adani Group.

"The company's project management team has acquired and assimilated expertise that enables speedy and reliable execution of large power generation projects. This has allowed us to add capacity at the given pace, and address the nation's electricity demand." said Mr. Vneet Jaain, CEO, Adani Power Ltd.

Post commissioning of Unit 4 at Adani Power's Tiroda power plant in Maharashtra, the company added 660 MW to its existing installed thermal capacity of 7920 MW.

Apart from this, the Adani Group has also installed a 40 MW Solar power plant in Kutch district, Gujarat, taking the overall installed capacity to 8,620 MW – the highest amongst private sector producers, across all fuels.

About The Adani Group

The Adani Group is one of India's leading business houses with revenue of over \$8.7 billion.

Founded in 1988, Adani has grown to become a global integrated infrastructure player with businesses in key industry verticals - resources, logistics and energy. The integrated model is well adapted to the infrastructure challenges of the emerging economies.

We live and work in the communities where we operate and take our responsibilities to society seriously. The Group protects biodiversity in ecologically sensitive areas like Mundra and undertakes initiatives to reduce CO₂ emissions. At Adani, we deliver benefits to our customers and customers' customers.

Resources means obtaining coal from mines and trading; in future it will also include oil and gas production.

Adani is developing and operating mines in India, Indonesia and Australia as well as importing and trading coal from many other countries. Currently, we are one of the

largest coal importers in India. We also have extensive interests in oil and gas exploration. Extractive capacity is scheduled to increase from 4 MMT of thermal coal in 2013 to 200 MMT per annum by 2020.

Logistics denotes a large network of ports, Special Economic Zone (SEZ) and multi-modal logistics - railways and ships.

Adani owns and operates four ports – Mundra, Dahej, Hazira and Vishakhapatnam in India. The Mundra Port, which is the largest port in India, benefits from deep draft, first-class infrastructure and SEZ status. Adani is also developing ports at Mormugao and Kandla in India.

Energy involves power generation & transmission and gas distribution.

Adani is the largest private thermal power producer in India. Our power generation capacity presently stands at 8,620 MW.

We are currently developing six power projects across Gujarat, Maharashtra, Rajasthan and Madhya Pradesh.
