**Atmastco Defence Systems Clears Government Ballistic Tests for Bullet-Resistant Jackets**  
Bhilai – April 1, 2026

Atmastco Limited is pleased to announce that its wholly-owned subsidiary, Atmastco Defence Systems Private Limited, has successfully cleared the mandatory ballistic testing conducted by the Ballistic Research Centre & Testing Range (BRCTR) of the National Forensic Sciences University (NFSU), Gandhinagar – a Government of India authorised laboratory for certification of bullet-resistant jackets under Indian Standard IS 17051:2018.

Two evaluation reports, both dated 30th March 2026, confirm that Atmastco Defence's Soft Armor Panels (SAP) and Hard Armor Panels (HAP) have fully passed the prescribed tests under Indian Standard IS 17051:2018 – the national benchmark for bullet-resistant jackets. The panels demonstrated zero perforation and back-face deformation well within the permissible safety limit across all valid shots, including tests against high-calibre rifle ammunition at close range. Clearing NFSU testing is the last major technical hurdle before the Bureau of Indian Standards (BIS) grants product certification. The BIS certification is currently at an advanced procedural stage and is expected shortly, following which the Company plans to commence commercial production. Post certification, Atmastco Defence has initiated and is actively engaged in discussions with various government agencies, police departments, and institutional stakeholders for potential projects in the protective equipment domain, both within India and in select overseas markets.

Atmastco Defence's manufacturing facility, inaugurated on 24th January, 2026 by the Hon'ble Governor of Chhattisgarh, Shri Ramen Deka, is equipped with a robust manufacturing infrastructure and strong production capacity. The facility has been designed with scalability in mind, enabling the Company to enhance output in line with anticipated demand and future business requirements.

The Company believes that the defence and protective equipment segment represents a strategically important growth vertical, and expects it to emerge as a meaningful contributor to its business over the coming years.

**Commenting on this development, Mr. Subramaniam Swaminathan Iyer, Managing Director of Atmastco Limited, said:**

*“This is a defining moment for Atmastco Defence and for the Group as a whole. Passing NFSU's rigorous ballistic evaluation is a clear proof of the quality and credibility of what we have built. While the journey has taken several quarters and required patience & grit, we are very excited to truly begin our journey in protecting our Armed Forces while fulfilling the nations vision of Atmanirbhar Bharat”*

**About Atmastco Limited**

Atmastco Limited is a leading engineering, fabrication, and project execution company specialising in industrial structures, heavy fabrication, furnace installation, mechanical erection, and turnkey industrial solutions. Through its subsidiary Atmastco Defence Systems Private Limited, the Group is expanding into the defence sector, with a focus on bullet-resistant jackets and protective helmets. The Company continues to build a strong presence across steel, power, infrastructure, and defence sectors with an unwavering focus on quality, innovation, and shareholder trust.
