Bulkers – Asset Prices (5-year old)

Dry Bulk asset prices at 20-year low

Source – Industry Reports

Low oil prices positively impacted tanker rates

Source – Industry Reports

Lower oil prices, leading to increased demand & refinery runs

- Crude tanker rates, although lower than Q4 2015 levels, remained healthy led by an increase of close to 1 mbpd in refinery throughput & port congestions
- Product tanker rates fell marginally on account of warm winter in the west, a blip down in refinery margins and increase in fleet during the quarter.

Rising supply, contango led to commercial stocking, SPR filling and forced storage

- Lower crude oil prices - SPR filling and increase in commercial inventory
- Forced storage of oil products due to product-specific oversupply and logistical constraints

- **YTD actual deliveries have been far lower than scheduled. Due to bleak employment scenario owners have refrained from taking delivery. A lot of deliveries due in 2016 have now been pushed back to 2017.**
 - **Going forward slippage is expected remain high.**
- **Asset utilisation levels continue to come off. For premium Jack ups, lack of contract renewals has resulted in utilisation levels coming down from around 90% at the start of 2014 to around 65% as on date.**
- **In case of PSVs and AHTSVs more than half the fleet is either idle/stacked or working in spot market at a very low utilisation.**
