MEDIA RELEASE

Reliance Jio to ride on 42,000 Viom Networks' towers

~ Pan-India tower infra sharing pact will drive speedy rollout; cut capital costs, environmental impact ~

Mumbai, 17th March 2014: Reliance Jio Infocomm Limited ('Reliance Jio') will launch its services across India using telecom-tower infrastructure provided by Viom Networks.

Under a Master Services Agreement, Reliance Jio will use Viom Networks' Pan India Passive telecom infrastructure having a footprint of over 42,000 telecom towers.

"This agreement is in line with our mission of a Pan India launch spanning next-generation voice and data services and leveraging existing telecom infrastructure," said Sanjay Mashruwala, Managing Director, Reliance Jio.

"We look forward to partnering with Viom Networks for rolling out services across the country."

Reliance Jio holds a pan-India Unified License and is currently building a network to offer next generation high-speed data services. The company believes that the Indian market is highly underserviced. There's thus a deep demand undercurrent for reliable (4th generation) high speed internet connectivity, rich communication services, and various digital services on pan-India basis in key domains such as education, healthcare, security, financial services, government citizen interfaces and entertainment.

The mission therefore is to provide anytime, anywhere access to innovative and empowering digital content, applications and services, thereby propelling India into a global leadership league in the digital economy.

"From a conventional tower company, we are transforming ourselves as an innovation-driven, data-centric infra solutions provider," said Syed Safawi, CEO, Viom Networks.

"We are delighted to partner with Reliance jio and offer our countrywide network infrastructure. Our consistent delivery of high network up time, on-time reliable project delivery capability, and optimal operation and a maintenance cost offer a great value package."

About Reliance Jio Infocomm

Reliance Jio Infocomm Limited (RJIL), a subsidiary of Reliance Industries Limited (RIL), India's largest private sector company, is the first telecom operator to hold pan India Unified License. RJIL holds spectrum in1800 MHz (across 14 circles) and 2300 MHz (across 22 circles) capable of offering fourth generation (4G) wireless services.

RELIANCE INDUSTRIES LIMITED BOMBAY 400 021

RJIL is setting up a pan India telecom network to provide to the highly underserviced India market, reliable (4th generation) high speed internet connectivity, rich communication services and various digital services on pan India basis in key domains such as education, healthcare, security, financial services, government citizen interfaces and entertainment. RJIL aims to provide anytime, anywhere access to innovative and empowering digital content, applications and services, thereby propelling India into global leadership in digital economy.

RJIL entered into agreements with Reliance Communications for mutual sharing of telecom towers and optical fibre network. It has also entered into an arrangement with other telecom infrastructure providers for sharing of telecom towers and optical fibre which can be extended to other services as per mutual agreement of the two parties.

Reliance Jio is part of the "Bay Of Bengal Gateway" Cable System, planned to provide connectivity between South East Asia, South Asia and the Middle East, and also to Europe, Africa and to the Far East Asia through interconnections with other existing and newly built cable systems landing in India, the Middle East and Far East Asia.

RJIL's subsidiary has been awarded with a Facility Based Operator License ("FBO License") in Singapore which will allow it to buy, operate and sell undersea and/or terrestrial fibre connectivity, setup its internet point of presence, offer internet transit and peering services as well as data and voice roaming services in Singapore.

RJIL has finalised key agreements with its technology partners, service providers, infrastructure providers, application partners, device manufacturers and other strategic partners for the project. These strategic partners have committed significant resources, knowhow and global talent to support planning, deployment and testing activities currently underway.

From less than 700 professionals a year back, the RJIL Jio team has grown rapidly to a national footprint of over 3,000 professionals today.

About Viom Networks

Viom Networks, a Tata Teleservices and SREI Infrastructure joint venture - is India's largest independent telecommunications infrastructure company. Quietly behind the scenes, with over 90,000 tenancies on 40,000 towers spread across India, our telecom towers support communication networks that unite millions. In a world that's ever changing, we are transforming ourselves in more ways than one. Our pioneering solutions are going beyond telecom. Our DNA is green. We are wherever mobile networks are. What connects your world is where we put our heart. http://www.viomnetworks.com
