Dear Sir/Madam,

Sub: Revised Press Release – Disclosure of Material Event/Information under Regulation 30 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015

Inox Wind Limited Bags 50 MW Order from Atria Power

Dear Sir/Madam,

Pursuant to Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, we have submitted a press release dated 11.07.2016 to the Stock Exchanges that “the Company has bagged an order for a 50 MW wind power project to be deployed in the state of Gujarat from Atria Wind Power. The project is scheduled to be commissioned by March 2017 and will be executed on turnkey basis. The order comprises of supply and installation of 50 units of Inox Wind’s pioneering 113 meter rotor diameter turbine combined with the 120 meter hub height tower.”

Please note that we have inadvertently mentioned 50 units of Inox Wind’s pioneering 113 meter rotor diameter turbine combined with the 120 meter hub height tower instead of 25 units. The same is now corrected to 25 units in the press release.

We request you to kindly take record of the above Information.

Thanking You

Yours faithfully,

For Inox Wind Limited

Press Release

Inox Wind Wins 50 MW Order from Atria Power

- **Order Features Inox's Revolutionary 113 meter rotor dia Turbine with 120 meter Hub Height Tower**
- **Project Scheduled to be Commissioned by March 2017**

Noida, 11th July 2016: Inox Wind Limited, India's leading wind energy solutions provider, has bagged an order for a 50 MW wind power project to be deployed in the state of Gujarat from Atria Wind Power. Atria Wind Power is a part of the Atria Group which enjoys significant presence across a gamut of industries. The project is scheduled to be commissioned by March 2017 and will be executed on turnkey basis. The order comprises of supply and installation of 25 units of Inox Wind's pioneering 113 meter rotor diameter turbine combined with the 120 meter hub height tower. The combination of Inox Wind's presently most technologically advanced wind turbine variant together with the higher hub height makes it an outstanding choice to maximise wind resources at the site.

As part of the turnkey order, Inox Wind will provide Atria with end to end solutions from development and construction to commissioning and providing long term operations and maintenance services.

Inox Wind offers its clients total wind power solutions including wind resource assessment, acquiring land, developing the entire site infrastructure, building the power evacuation system, supplying the WTGs, erection and commissioning services, long term operations and maintenance services as well as post-commissioning support.

We are pleased to further build on the success of Inox's 2 MW platform in India and expand our portfolio of projects in the state of Gujarat. The 113 m rotor dia turbine together with the 120 m hub height tower minimizes the cost of energy and further strengthens the company's competitive position as the fastest growing wind energy solutions provider in the country." said **Mr. Kailash Tarachandani, Chief Executive Officer of Inox Wind Limited** in his statement.

DS

ABOUT INOX WIND:

Inox Wind is India's leading wind energy solutions provider servicing IPPs, Utilities, PSUs, Corporates and Retail Investors. Inox Wind is a fully integrated player in the wind energy market with three state-of-the-art manufacturing plants in Gujarat, Himachal Pradesh and Madhya Pradesh. The plant near Ahmedabad (Gujarat) manufactures Blades & Tubular Towers while Hubs & Nacelles are manufactured at the company's facility at Una (Himachal Pradesh). The new integrated manufacturing facility at Barwani (Madhya Pradesh) manufactures blades, towers and will manufacture nacelles and hubs. The facility at M.P., which will be amongst the largest in the world, will double Inox Wind's manufacturing capacity to 1,600 MW per annum.

IWL manufactures key components of WTGs in-house to maintain high quality, most advanced technology, reliability and cost competitiveness. IWL has obtained ISO 9001:2008, ISO 14001:2004, OHSAS 18001 and ISO 3834 certifications for its management systems pertaining to manufacturing, installation, commissioning and O&M of wind turbines.

IWL offers complete end to end solutions from concept to commissioning. Besides manufacturing and supply of WTGs, IWL offers services including wind resource assessment, site acquisition, infrastructure development, erection and commissioning, and long term O&M of wind power projects.
