

Trident Limited commissioned Yarn expansion Unit with an installed capacity of 65,280 spindles

Ludhiana, February 6, 2012- Leading Textile player Trident Limited (TL), today announced the commissioning of its new Yarn Spinning Unit (TYS-5) with an installed capacity of 65,280 spindles at its Sanghera facility in Barnala (Punjab). The expansion project of the yarn spinning facilities is being implemented in a phased manner which envisages setting up of 275,904 spindles and 2,040 rotors including other balancing equipments at a total cost of Rs. 1,117 Crores; the project shall be fully completed by the third quarter of 2013.

With this commissioning, the total yarn spinning capacity of the company has increased to 2,89,728 spindles.

The new plant is equipped with latest state of the art technology and manufactures Combed Yarn in the count range of 20s to 40s. It uses the latest Link system, Automatic roving Transport & Auto Waste collection systems ensuring more productivity, process consistency & security and reduces the human touch.

With addition of new manufacturing facilities, the primary focus of the Company would be more on value added products for niche segment of high end International and Domestic markets.
