While we confirm that all the related party transactions done by our company in the past have been executed on Arm's Length Price and were in compliance with provisions of the Companies Act, 2013 as amended and other applicable laws, but we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties and there can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations. For further details in relation to transactions with related parties, please refer to the section entitled ***"Financial Statement as Restated – Annexure 29 – Restated Statement of Related Party Transaction"*** on page 249-250.

We may find additional suppliers to supply these products, any failure of our suppliers to deliver these products in the necessary quantities or to adhere to delivery schedules, credit terms or specified quality standards and technical specifications may adversely affect our business and our ability to deliver orders on time at the desired level of quality. As a result, we may lose customers which could have a material adverse effect on our business, financial condition, and results of operations.

Further our product supply and pricing may become volatile due to several factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Therefore, we cannot assure that we will be able to procure adequate supplies of our products in the future, as and when we need them on commercially acceptable terms. Further, there can be no assurance that we will be able to effectively manage relationships with our existing or new suppliers or that we will be able to enter into arrangements with new suppliers at attractive terms or at all. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected.

2. ***We may face shortage of Raw Materials because of the seasonal nature of our purchase.***

Our business is heavily reliant on raw materials sourced from the agricultural industry, which is subject to various external factors, particularly weather and monsoon conditions. The geographical diversity within our country results in differing weather patterns across regions, with some areas experiencing heavy rainfall while others may suffer from drought or inadequate rainfall. Such fluctuations in weather, including abnormal monsoons or extreme weather events, can negatively affect crop yields, damage crops, and lead to an increase in raw material prices. In these circumstances, we may be forced to purchase lower-quality raw materials to meet production needs, potentially increasing production costs as we source from alternative suppliers or regions where prices are higher. These disruptions could materially affect our results of operations, financial condition, and cash flows.

We primarily procure our raw materials during the harvest season, typically from January to April. These materials are stored in leased cold storage facilities for use throughout the year, including during off-seasons. The details of our Quarterly Purchase for the fiscal year ended on March 31, 2025, 2024 and 2023 is as follows:

(Amount in Lakhs)			
Fiscal Year	Quarters	Total Purchase	% of Total Purchase
2022-2023	Q1	947.02	18.17%

	Q3	3,008.28	29.44%
	Q4	3,242.94	31.74%
Total		10,217.65	100%

Note: Pursuant to the certificate dated August 11, 2025, issued by our Statutory and Peer Review Auditor M/s GL Dangayach and Company, Chartered Accountants.

While demand for our products remains stable throughout the year, the seasonality of raw material procurement introduces significant variability in our operations. This fluctuation in raw material availability, coupled with potential price changes, may cause considerable variations in our financial performance across fiscal quarters.

The imbalance between higher raw material costs and potential downward pressure on product prices could place significant strain on our profitability. Furthermore, the inherent seasonality in raw material availability exposes us to supply chain vulnerabilities, as we depend on uncontrollable factors like weather conditions and crop performance. Any adverse conditions impacting crop yields or raw material quality during our procurement season could have long-lasting effects on our financial performance, operational efficiency, and competitive position in the market.

- 3. We do not have any long-term contracts with any of our suppliers. Any disruption in the supply of raw materials, including shortfalls in quality or quantity, or an increase in raw material or input costs, could adversely affect our ability to manufacture geogrids at competitive prices and have an adverse effect on our business, results of operations and financial condition.**

At present our primary raw material used for manufacturing and processing of ground spices, blended spices and whole spices. The raw material consumption contribution is 87.89%, 83.12% and 73.05% of revenue from operations for the fiscal year ended March 31, 2025, 2024 and 2023 respectively based on restated financial statements. The details of the same are as under:

(Amount in Lakhs)

Particulars	As on March 31, 2025	As on March 31, 2024	As on March 31, 2023
Raw Material Consumed	10,958.02	8,943.69	4,963.66
% of Raw Material Consumed to Revenue from Operations	87.89%	83.12%	73.05%
Revenue from Operations	12,468.04	10,760.52	6,795.29

The factors affecting the price, directly or indirectly, are beyond the control of our Company. We procure our raw material from mandis, and suppliers situated across India and have not entered into any long-term supply agreements with our suppliers. We may have to face the risks associated with compensating us for or passing on such an increase in the cost of raw material consumed on account of such fluctuations in prices to our customers. If we pass on the increase in the cost of raw material consumed to our customers through a corresponding increase in the price of our products in order to maintain our historical margins, we may face the risk of our products becoming unaffordable for a particular segment of demography. Upward fluctuations in the prices of raw material may therefore affect our margins directly or indirectly and have a direct bearing on our profitability, resulting in a material adverse effect on our business, financial condition and results of operations.

- 4. We are dependent on and derive our 56.39%, 57.92% and 45.05% of revenue from our top 10 key customers during the fiscal year ended on March 31, 2025, 2024 and 2023. Decreasing the revenues we derive from them could materially and adversely affect our business, results of operations, cash flows and financial condition.**

We depend on a limited number of customers, which exposes us to a high risk of customer concentration. Our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in the normal course of business. Since our business is concentrated among relatively few significant customers, we could experience a reduction in our results of operations, cash flows and

liquidity if we lose one or more of these customers or the amount of business we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification.

The table below sets out our revenue from our largest customers, the top 5 customers and top 10 customers, on the basis of revenue contribution, for the fiscal year ended March 31, 2025, 2024 and 2023:

(Amount in Lakhs)

Particulars	As on March 31, 2025		As on March 31, 2024		As on March 31, 2023	
	Amount	% of Revenue	Amount	% of Revenue	Amount	% of Revenue
Largest Customer	3,791.48	30.41%	2,205.67	20.50%	1,630.80	24.00%
Top 5 Customers	6,108.32	48.99%	5,531.47	51.41%	2,427.27	35.72%
Top 10 Customers	7,031.08	56.39%	6,232.31	57.92%	3,060.95	45.05%

Any decline in our quality standards, growing competition and any change in the demand for our products and services by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in the normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

5. ***A significant portion of our revenue is generated by General Trade and Modern Trade. 97.89%, 98.80% and 93.42% of our revenue for the fiscal years ended on March 31, 2025, 2024 and 2023 is generated from these channels. Any disruption or loss of key trade partners could adversely impact on our financial performance.***

The table below provides a summary of our revenue generated from General Trade and Modern Trade for the fiscal years ended on March 31, 2025, 2024 and 2023:

(Amount in Lakhs)

Particulars	For the Fiscal Year ended on March 31					
	2025		2024		2023	
	Amount	% of Total Revenue	Amount	% of Total Revenue	Amount	% of Total Revenue
Revenue from General Trade	6,680.65	53.58%	7,289.50	67.74%	6318.64	92.99%
Revenue from Modern Trade	5,524.92	44.31%	3,342.46	31.06%	29.25	0.43%
Total	12,205.57	97.89%	10631.96	98.80%	6347.89	93.42%
Total Revenue	12,468.04	100%	10,760.52	100%	6,795.29	100%

Note: Pursuant to the certificate dated August 11, 2025, issued by our Statutory and Peer Review Auditor M/s GL Dangayach and Company, Chartered Accountants.

Any disruption in these business relationships, including loss of key trade partners, changes in market dynamics, or increased competition, could materially impact on our revenue and profitability. Additionally, factors such as changes in consumer preferences, supply chain disruptions, or unfavorable terms of trade with our partners may further affect our business operations.

Furthermore, we do not have long-term contracts with distributors and dealers of the General Trade channel, which makes us vulnerable to potential disruptions in our distribution network. If any key distributor in General Trade reduces or discontinues their business with us, it could adversely affect our revenue generation and overall profitability.

6. ***A significant portion of our revenue is derived from the sale of Ground Spices, which accounted for 49.68%, 51.63% and 69.07% of our revenue from operations for the fiscal years ended March 31, 2025, 2024, and 2023, respectively. If we are unable to anticipate or respond to changing consumer preferences, maintain consistent product quality, or if there is a decline in demand for these products, it could adversely impact our revenue and growth prospects.***

Our business prospects are closely tied to the demand for our products in the Indian market, where a significant portion of our revenue comes from sale of Ground Spices. The following table shows the contribution of Ground Spices to our total revenue for the periods indicated:

(Amount in Lakhs)

Particulars	For the Year ended March 31					
	2025		2024		2023	
	Amount	% of Total Revenue	Amount	% of Total Revenue	Amount	% of Total Revenue
Revenue from Ground Spices	6,193.93	49.68%	5,555.99	51.63%	4,693.84	69.07%
Total Revenue	12,468.04	100.00%	10,760.52	100.00%	6,795.29	100.00%

We cannot guarantee that we will be able to increase our market share for Ground Spices in the future. The demand for these products is influenced by several factors, including regional tastes, cultural preferences, consumer confidence, and evolving trends in the market. Consumer preferences are dynamic and can change over time. We cannot assure you that we will be able to adapt our product offerings to these changing preferences. A failure to anticipate or respond to shifts in consumer tastes could result in reduced demand, lower prices, and an adverse impact on our business, financial condition, and cash flows.

We may also face challenges in introducing new products within more rapidly growing and profitable categories. Any difficulties in expanding our product portfolio or responding to market demands could have a significant negative impact on our financial condition and operational results. We cannot assure you that we will be able to sustain our historical sales levels of Ground Spices or reduce our reliance on these products. Furthermore, we may need to invest in modernizing our processes or packaging to enhance our offerings and remain competitive in the market.

- 7. Our products are semi-perishable in nature and the shelf life of our products ranges from 4-18 months. Inaccurate demand forecasting for our semi-perishable product can result in excess inventory and waste which, in turn, could have an adverse effect on our business, financial condition, results of operations and cash flows.**

Our products are semi-perishable in nature, with self-life ranging from 4 to 18 months. We manufacture a wide variety of spices, including ground spices, whole spices, spice blends, and grocery products, each with different shelf lives. Specifically, ground and whole spices have shelf lives ranging from 4 to 12 months, blended spices range from 4 to 18 months, and grocery products range from 6 to 12 months.

Due to the semi-perishable nature of our products, there is a risk that inaccurate demand forecasting or ineffective inventory management could result in excess inventory. This excess inventory could lead to wastage, which may adversely impact our business, financial condition, results of operations, cash flows, and reputation.

While we have not encountered any material adverse effects from such risks in the past three fiscal years as certified by the statutory and peer review auditor of our Company M/s G. L. Dangayach and Company vide their certificate dated **August 19, 2025**, there can be no assurance that these risks will not affect our business in the future. As a result, any inaccuracies in demand forecasting or inventory management could have a significant negative impact on our operations and financial performance.

- 8. The strength of our brand is crucial to our success, and we may not succeed in continuing to maintain and develop our brand. Negative publicity, whether true or not, regarding our products' quality, variety, or pricing could harm our reputation and consumer trust. Even false claims or misbranding allegations could severely impact our brand value, potentially leading to a material adverse effect on our business, operations, and financial condition.**

The strength of our "SHYAM" brand is critical to our business success, and any failure to effectively maintain and enhance our brand could adversely impact our performance. Our brand's value is driven

by various factors, including the quality of our products, the materials used, the effectiveness of our marketing efforts, and public perception. Our expenditure on advertising and sales promotion for the fiscal years ending March 31, 2025, 2024, and 2023, represents the following percentages of total revenue:

(Amount in Lakhs)

Particulars	For the Fiscal Year ended on ended March 31					
	2025		2024		2023	
	Amount	% of Revenue	Amount	% of Revenue	Amount	% of Revenue
Advertisement Expense	78.65	0.63%	65.32	0.61 %	30.52	0.45 %
Sales Promotion Expense	144.68	1.16%	104.30	0.97 %	177.63	2.61 %
Total expense	223.33	1.79%	169.62	1.58 %	208.15	3.06 %
Revenue from Operations	12,468.04	100%	10,760.52	100.00%	6,795.29	100.00%

Despite our strong in-house sales and marketing team working alongside media outlets and advertising agencies to boost brand visibility, we cannot guarantee the success of these efforts in increasing sales or solidifying brand perception. Developing, promoting, and consistently positioning our brand requires ongoing investments in marketing, and its success will depend on the quality of our products and the strength of our customer relationships.

Additionally, the highly competitive market we operate in means that any failure to maintain and strengthen our brand, particularly with respect to new products or categories, could result in brand dilution. Negative publicity, whether true or not, regarding our products' quality, variety, or pricing could harm our reputation and consumer trust. Even false claims or misbranding allegations could severely impact our brand value, potentially leading to a material adverse effect on our business, operations, and financial condition.

9. ***Our company has negative cash flow from operating activity, investing activity and financing activities in the past three years, details of which are given below, sustained negative cash flow could impact on our growth and business.***

Our Company has negative Cash flow from operating activity, investing and financing activities in some of the previous year(s) as per the restated financial statement and same are summarized as under:

(Amount in Lakhs)

Particulars	As on March 31, 2025	As on March 31, 2024	As on March 31, 2023
Cash from operating activities	(616.11)	(540.45)	300.50
Cash from investing activities	(1,380.58)	(439.67)	(251.72)
Cash from financing activities	2,009.75	994.77	(61.53)

Cash flows of the company are the key indicator which shows adequacy of cash generated from operations to meet its capital expenditure, pay dividend, repay loans, make new investments without availing financial help from external sources. Inability to generate sufficient cash in future can have negative impact on business and financial operations. For further information, see “**Financial Statements as Restated**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” beginning on pages 214 and 255 respectively.

10. ***Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers’ expectations.***

Our products may, at times, contain quality issues or undetected defects, stemming from flaws in the manufacturing process or issues with the raw materials used in production. While we have implemented quality control processes for both raw materials and finished goods based on internal quality standards, we cannot guarantee that our quality control procedures will always be effective. Our Company subject to regular inspection visit from the officials of Food and Safety department for checking of the products manufactured by our Company. In past, there have been multiple instances wherein our products samples tested by the food and safety department officials and not passed as

per the standards. The details of penalty paid by our Company in period from April 01, 2024 till the date of filing of this Draft Red Herring Prospectus are as follows:

As on the date of this Draft Red Herring Prospectus, we have 1 outstanding proceeding related to food quality. For the details of the proceedings please see the chapter titled ***“Outstanding Litigation and Material Developments – Litigation Involving Our Company – Litigation Against Our Company”*** on page 283-284.

In the event of an adverse decision in the said case, our Company may be subject to a penalty of up to ₹ 5,00,000 (Rupees Five Lakh) under Section 51 (Penalty for sub-standard food) under the provisions of the Food Safety and Standards Act, 2006. Furthermore, if our products are found to be adulterated or unsafe, our Company may face penalties, including the seizure of products, fine and/or imprisonment under the relevant provisions of the Food Safety and Standards Act, 2006 and the Bhartiya Nyaya Sanhita, 2023. Such outcomes could result not only in financial liability but also have a significant adverse impact on our Company’s reputation, business operations, and future prospects.

Any shortcomings in the raw materials we procure or errors during production, including failures in our quality control processes, negligence, or human error, could result in defective products. Meeting regulatory quality standards is crucial for our business, as deviations from these standards could lead to our products being rejected by customers or regulatory authorities. Such instances could damage our reputation, market standing, and brand value. If our products are deemed substandard or defective and are returned by customers due to quality complaints, we may be required to take back the products and reimburse the costs paid by our customers. This could strain our relationships with long-standing customers and negatively affect our brand image. Additionally, customers who lose confidence in the quality of our products may refuse to continue purchasing from us, severely impacting our revenue and business operations. We also face the risk of legal proceedings or product liability claims arising from defective products sold. While we have processes in place to manage quality, we cannot assure that we will not experience material product liability losses in the future. Defending against such claims could result in significant legal and other costs. Any product liability claims or quality lapses could adversely impact our reputation, brand image, and financial performance.

11. ***Failure to comply with, or adapt to changes in safety, health, environmental laws and other relevant regulations could adversely affect our business, prospects, financial condition, and operations. Additionally, challenges may arise in renewing or maintaining the statutory and regulatory permits and approvals necessary for the continuation of our operations.***

Our daily manufacturing activities are subject to a broad spectrum of health, safety, and environmental laws and regulations. Compliance with these regulations is critical to safeguarding the well-being of our employees, protecting the environment, and ensuring the smooth functioning of our business. For more information on the key regulations applicable to our business, please refer to the section titled **"Key Industry Regulations and Policies"** beginning on page 174.

Non-compliance with these laws and regulations can result in fines, penalties, or litigation, all of which could negatively impact our business, financial health, and operational results. For instance, we are required to comply with the provisions of the Food Safety and Standards Act, 2006, which establishes scientific standards for food products and governs their manufacture, storage, distribution, and sale to ensure the safety and wholesomeness of food for human consumption. In this regard we have taken following licenses towards food safety and quality standards:

- License under FSS Act, 2006 (FSSAI) for Khasra No. 06/1067, Manpura Road, Near Delhi Bypass, Tehsil-Chomu, Jaipur, Rajasthan-303806.
- License under FSS Act, 2006 (FSSAI) for Road Number 12 Vishwakarma Industrial Area, Jaipur, Rajasthan, 302013.
- Certificate Of Authorisation (AGMARK)
- SGS ISO Certificate (ISO 22000:2018)
- Registration-Cum-Membership Certificate, Agricultural and Processed Food Products Export Development Authority

Failure to comply with licensing requirements or operating without a license under the Food Safety and Standards Act may result in legal penalties and fines.

Beyond food safety regulations, we are also bound by laws related to safety, health, and environmental protection. These include the Environmental Protection Act, 1986, the Air (Prevention and Control of Pollution) Act, 1981, the Water (Prevention and Control of Pollution) Act, 1974, and other regulations set forth by the Ministry of Environment and Pollution Control Boards. Compliance with these environmental laws is crucial to minimizing the impact of our operations on air and water quality, as well as to protect ecosystems and public health. Non-compliance could lead to penalties, legal actions, or reputational harm. For further details of the licenses and certifications please see the chapter titled **"Government Approval and Other Statutory Approvals"** beginning on page 289.

We have not encountered any such issues in the past we cannot guarantee that such incidents will not occur in the future. Non-compliance in future could result in production disruptions or significant increases in operational costs.

In addition, we must comply with labor laws concerning minimum wage, working hours, overtime, working conditions, and employee rights. Compliance with these laws incurs costs, and the regulatory landscape may become more stringent over time.

We recognize the importance of adhering to health, safety, and environmental regulations and strive to maintain a culture of compliance within our organization. We have implemented processes and procedures to ensure ongoing compliance with applicable laws and regulations. Regular monitoring, training, and internal audits are conducted to identify and address any areas of non-compliance. Any non-compliance or failure to adapt to evolving regulatory requirements could have negative consequences on our business operations, financial condition, and results of operations.

12. Our Company requires significant amounts of working capital for continued growth. Our inability to meet our working capital requirements may have an adverse effect on the results of operations. Further, failure to manage our inventory could have an adverse effect on our sales, profitability, cash flow and liquidity.

Our business is working capital intensive and requires a significant amount of working capital for smooth functioning. Summary of our working capital position based on the audited financial

Pursuant to the certificate dated August 18, 2025 issued by our statutory and peer review auditor M/s. G. L. Dangayach and Company, chartered accountants.

A significant portion of our working capital is utilized towards trade receivables and Inventories. As on March 31, 2025, March 31, 2024, and March 31, 2023, our trade receivables form 15.90%, 14.69% and 23.10% and Inventories form 75.38%, 78.05% and 67.83% respectively, of total current assets based on audited financial statements.

We intend to increase our manufacturing capacity to expand our business operations. This may result in an increase in the quantum of current assets, particularly trade receivables and inventories. The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and trade inventory accordingly. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications.

Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such a disruption of supply would materially and adversely affect our business, profitability and reputation. In addition, disruptions to the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we overstock inventory, our capital requirements will increase, and we will incur additional financing costs. If we understock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

We intend to continue growing by expanding our business operations. This may result in an increase

in the quantum of current assets, particularly trade receivables. Our inability to maintain sufficient cash flow, credit facilities and other sources of funds, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and the result of our operations. For further details regarding working capital requirement, please refer to the chapters titled “**Objects of the Issue**” and “**Management Discussion and Analysis of Financial Condition and Results of Operation**” beginning on pages 98 and 255 respectively.

13. Our operating results could be significantly impacted if we are unable to accurately forecast consumer demand for our products or effectively manage our inventory.

We aim to maintain optimal inventory levels with wholesalers, distributors, and dealers to control costs and manage working capital efficiently. To achieve this, we monitor inventory levels both based on demand projections and in real-time. Although our manufacturing facility allows us to fulfill large orders from distributors quickly, any unavailability of products due to high demand or inaccurate forecasting could result in lost sales and harm our customer relationships.

We manage our inventory by closely tracking current stock levels and keeping a reserve based on demand forecasts. However, if we fail to forecast demand accurately, we may face excess inventory or product shortages. Excess inventory could lead to write-offs, discounted sales, and a decrease in gross margins, which may also weaken our brand strength. Conversely, a shortage of products could prevent us from meeting customer demand, which could negatively impact our business operations and financial performance.

Inaccurate demand forecasts can also result in an over-supply of products, driving up inventory costs, negatively affecting cash flow, reducing inventory quality, causing shrinkage, and ultimately diminishing margins. Furthermore, some of our raw materials may become outdated and lose their natural properties over time. Any of these factors could affect our business, operations, and financial condition.

For the Fiscal Years ended on March 31, 2025, 2024 and 2023 our inventories valued at ₹ 4071.69 lakhs, ₹ 2,981.80 lakhs and ₹ 1,121.91 Lakhs respectively. Additionally, if we fail to efficiently convert purchased inventory into finished products, we may have to write down the value of our inventory or pay our suppliers without generating new purchases. This could lead to the need for additional vendor financing and an adverse impact on our income and cash flow.

14. Our inability to collect receivables from our customers or default in payment by them could result in a reduction of our profits and affect our cash flows.

In the ordinary course of business, we provide our customers with certain credit facilities as part of our payment terms. Though we limit the credit we extend to our customers depending upon their payment history and financial condition, we may still experience losses if the customer is unable to pay. Our inability to collect receivables from our customers in a timely manner or at all could adversely affect our working capital cycle and cash flows. In the Fiscal Year 2025, 2024, and 2023, our trade receivables were ₹ 859.02 Lakhs, ₹ 561.05 Lakhs and ₹ 382.07 Lakhs respectively, which represented 6.89%, 5.21% and 5.62% of our Revenues from Operations for such periods, respectively. Macroeconomic conditions could result in financial difficulties for our customers, including insolvency or bankruptcy, potentially leading to delayed payments, requests for payment modifications, or defaults. These situations could increase our receivables or affect our working capital requirements. An increase in bad debts or defaults may compel us to utilize greater amounts of our operating capital and result in increased financing costs, thereby adversely affecting our results of operations and cash flows.

Our ageing analysis is as mentioned in the following table:

Particulars	(Amount in Lakhs)		
	2024-25	2023-24	2022-23
Undisputed - -Considered Good			

Particulars	2024-25	2023-24	2022-23
a) From Directors/ Promoters / Promotor Group / Associates / Relative of Directors / Group Companies			
Less Than 6 months	124.10	4.08	0.29
Others	-	1.01	-
Total (a)	124.10	5.09	0.29
b) From Other			
Less Than 6 months	733.80	542.27	360.64
6 Months to 1 Year	1.12	-	9.04
1 Year to 2 Years	-	11.08	0.36
2 Years to 3 Years	-	0.05	11.74
More than 3 Years	-	2.56	-
Total (b)	734.92	555.96	381.78
Total (a + b)	859.02	561.05	382.07

Such aged receivables may indicate that customers are experiencing financial difficulties, or that disputes over product quality, delivery terms, or contract fulfillment have not been resolved. The longer these debts remain unpaid, the less likely they are to be collected in full, potentially leading to a deterioration in cash flow and liquidity. Additionally, these overdue accounts can increase the risk of customer insolvency, which may result in complete non-recovery of the outstanding amounts. To mitigate these risks, it is essential for the company to evaluate and review its credit policies, engage in proactive collection strategies, and consider writing off or providing for long-outstanding debts to ensure financial stability.

- 15. A major part of our total revenue from operations is generated from the States of Rajasthan and Punjab which accounts for 88.08%, 92.76% and 89.78% respectively, of our total revenue from operations for the Fiscal Years ended on March 31, 2025, 2024 and 2023. Any adverse developments affecting our operations in such region, could have an adverse impact on our business, financial condition, results of operations and cash flows.**

The sale of our products is majorly generated from the state of Rajasthan and Punjab. The following table sets forth our revenue from operations from Rajasthan and Punjab in the periods indicated:

(Amount in Lakhs)

S. No.	State	2024-25		2023-24		2022-23	
		Amount	% of revenue	Amount	% of revenue	Amount	% of revenue
1.	Rajasthan	8,574.15	68.73%	8,133.45	75.59%	6,103.16	89.62%
2.	Punjab	2,413.45	19.35%	1,848.74	17.17%	2.33	0.03%
Total		10,987.60	88.08%	9,982.19	92.76%	6,105.49	89.65%

Due to the geographic concentration of the sale of our products in Rajasthan and Punjab, our operations are susceptible to local and regional factors, such as economic and weather conditions, natural disasters, demographic changes, and other unforeseen events and circumstances. Consequently, any significant social, political or economic disruption, or natural calamities or civil disruptions in this region, or changes in policies of the state or local governments or the government of India or adverse developments related to competition in this region, may adversely affect our business, results of operations, financial condition and cash flows. While we have not experienced any of the above adverse situations that had an adverse impact on our business operations and financial conditions in the past, we cannot assure you that these adverse situations will not arise in the future.

- 16. We are dependent on Third Party Cold Storage providers for storing our raw material and products.**

Our business relies on third-party cold storage providers for the storage of both our raw materials and finished products. This dependency exposes us to various risks related to the performance and reliability of these external service providers, which are beyond our direct control.

Any disruptions in their operations—such as equipment malfunctions, power outages, or logistical

issues—could significantly impact our ability to store raw materials and products safely, potentially compromising their quality and shelf life. Additionally, we have limited control over the security, maintenance, and operational standards at these third-party storage facilities. As a result, there is a risk of damage, loss, or deterioration of our products, which could affect product availability and customer satisfaction. Although we have not encountered these issues in the past, we cannot guarantee that they will not occur in the future.

Our reliance on external cold storage providers also makes us vulnerable to changes in pricing, capacity, and availability of storage space. If storage costs increase or if there is limited capacity to meet our requirements, it could adversely affect our operational costs and inventory management. Moreover, any regulatory changes affecting these service providers could introduce additional costs or operational disruptions.

Our dependence on external parties for a critical aspect of our supply chain, such as product storage, increases our exposure to unforeseen risks and vulnerabilities. These risks could affect our ability to meet customer demand in a timely manner, maintain the quality of our products, and manage our overall operational efficiency that could have a negative impact on our business, financial condition, and results of operations.

17. Our Company is dependent on third party transportation providers for transportation of raw materials. Accordingly, any increase in transportation costs or unavailability of transportation services for our products or transportation strikes may have an adverse effect on our business.

Our company is engaged in the manufacturing and processing spices such as Ground Spices, Blend Spices and Whole Spices under the brand name “SHYAM”. In addition to our spice offerings, we are also engaged in trading and distribution of Grocery Products such as Black Salt, Rock Salt, Rice, Poha, Kasuri Methi (Dried Fenugreek) etc. and a diverse range of Herbs and seasonings which includes Organo, Peri Peri, Chilli Flakes, Mixed Herbs, Onion Flakes, Tomato Powder etc.

We procure raw materials directly from mandis and other suppliers across India. We have purchased raw material from 17 states in India in last three years. The detailed state-wise breakup of the raw material purchase of our company from outside Rajasthan as per Restated Financial Statements for the fiscal year ended on March 31, 2025, March 31, 2024, and 2023 is as follows:

(Amount in Lakhs)

Particulars	For the Fiscal Year ended March 31					
	2025		2024		2023	
	Amount	% of Total Purchase	Amount	% of Total Purchase	Amount	% of Total Purchase
Purchase from outside Rajasthan	5,570.69	54.52%	4,132.36	39.91%	3,050.70	58.54%
Total Purchase	10,217.65	100.00%	10,354.84	100.00%	5,211.67	100.00%

We completely depend on third-party transportation and logistics providers for the transportation of raw material. We do not have long-term contracts with these providers and use their services on an as-needed basis. Any disruption in logistics could hinder our ability to obtain raw materials on time, deteriorate the quality of the products, significantly affecting our business, financial condition, and operations. Further details of the expenses related to freight and loading for transportation for the fiscal year ended March 31, 2025, 2024 and 2023 are as follows:

(Amount in Lakhs)

Particulars	For the Fiscal Year ended March 31					
	2025		2024		2023	
	Amount	% of Revenue	Amount	% of Revenue	Amount	% of Revenue
Freight and Loading Charges	184.24	1.48%	126.20	1.17%	93.31	1.37%

There is no conflict of interest between the third-party service providers and our Company, our Promoters and Promoter Group, our Directors, our KMPs and our Group Company and its directors. Additionally, transportation disruptions due to weather conditions, strikes, lockouts, inadequate road infrastructure, or other events could delay our ability to procure raw materials. Such disruptions

could negatively impact our business, financial condition, and operations. Although we have not faced these issues in the past, any future transportation unavailability for these reasons may adversely affect our business and financial performance.

18. *We may not be able to protect our intellectual property rights from infringement and it could have a material impact on our goodwill, business operations, financial condition and results of operations.*

Our Company has established a brand presence under our brand name “SHYAM” and have taken measures to safeguard our identity by trademarking our brand logo under the Trademarks Act, 1999. While we have 8 trademarks registered with the Registrar of Trademarks under the Trade Marks Act, 1999, many of our trademark registration applications are pending at various stages. Details regarding our trademarks are provided in the chapters titled “*Our Business – Intellectual Property*” and “*Government and Other Statutory Approvals – Intellectual Property Related Approvals*” on pages 171-173 and 291-293, respectively. We cannot assure that the registration for pending applications will be granted or not. Recently, our application for registration of trademark ‘PAROSO SHUDH SWAAD’ under Class 35 (Application No. 5077440) was rejected by the Registrar of Trademarks. Further, our 21 trademark applications have been opposed by third parties and currently, the opposition proceedings are pending before the Registrar of Trademarks. Regarding trademark infringement, there is also an outstanding civil material litigation *Everest Food Products Pvt. Ltd. Vs Shyam Dhani Industries Pvt. Ltd. And Ors. [COMIP/178/2021]*. For further details please see the chapter titled “*Outstanding Litigation and Material Developments – Litigation Involving Our Company – Litigation Against our Company*” on page 283.

Despite these efforts, unauthorized use of our brand name or trademarks by companies operating in the unorganized sector may negatively impact on our reputation and product sales, potentially affecting our financial performance. While we rely on Indian intellectual property laws for protection, these laws may not always be sufficient to prevent infringement. Additionally, the legal framework governing intellectual property rights in India is evolving and carries inherent uncertainties and risks. Unauthorized copying or misuse of our intellectual property by third parties could harm our business, cash flows, and financial condition. Enforcing our rights may require legal action, which can be time-consuming and uncertain in outcome. Moreover, detecting and addressing such infringements promptly may not always be feasible, increasing the risk of damage to our brand and business operations.

19. *We operate in markets with intense competition where some of our competitors may have greater scale and resources, enabling them to compete more effectively. This could result in a loss of market share as well as decline in our revenues and profitability.*

The industry is fragmented, with both organized and unorganized players competing for market share. Key organized competitors include Adani Food Products Private Limited, Ramdev Food Private Limited, MDH Masala Private Limited, Baadshah Masala Private Limited, and Everest Food Products Private Limited. We also compete with publicly listed companies such as NHC Food Limited and Madhusudan Masala Limited, along with local unorganized suppliers. The growth of the industry has led to the entry of new players with innovative business models, intensifying competition.

In this competitive landscape, players may lower prices to capture market share, which presents a challenge for established businesses like ours. We face significant competition from other retailers offering similar products, with competition centered on factors such as brand recognition, product quality, pricing and supply chain efficiency. Increased competition could lead to pricing pressure, reduced profitability, and make it harder to achieve sustainable revenue growth, potentially causing us to lose market share. Additionally, competitors may employ aggressive marketing or public relations strategies that could damage our reputation and increase our own marketing costs.

Some of our current and potential competitors have substantial advantages, such as longer operating

histories, the ability to allocate marketing and sales resources across a broader product portfolio, more established supplier relationships, access to a larger customer base, stronger brand recognition, and greater financial, marketing, and distribution resources. These competitors also often possess larger intellectual property portfolios. We cannot guarantee that we will be able to compete successfully against them.

- 20. *Our company does not manufacture grocery products such as Rice, Poha, Black Salt, and Rock Salt in-house. Instead, we procure these items from third-party suppliers. Any deterioration in product quality, delays in delivery, or cost increases could adversely affect our operations and financial performance.***

Our company does not have its own manufacturing facility for certain grocery products, including Rice, Poha, Black Salt, and Rock Salt etc. Instead, we source these items from third-party suppliers. Any decline in product quality, supply delays, or cost increases could adversely affect our operations.

We do not have long-term agreements with these suppliers, and there is no assurance they will continue working with us. They may also choose to supply to our competitors at more favorable terms, potentially impacting our business and market position.

Additionally, our reliance on third-party manufacturers exposes us to external risks beyond our control. Natural disasters, labor disputes, or operational disruptions at their facilities could disrupt our supply chain, increase costs, and affect our profit margins.

- 21. *Improper handling, processing, or storage of our raw materials or products, along with any spoilage, damage, or actual or perceived contamination, could lead to regulatory actions, harming our reputation, and negative impact on our business, operations, and financial health.***

All the products we manufacture are intended for human consumption and are vulnerable to risks such as contamination, adulteration, and tampering during production, transportation, or storage. While we rigorously test our raw materials and finished products at our facilities, we cannot guarantee that these quality tests will always be accurate. Additionally, some of our raw materials and products need to be stored, handled, and transported under specific temperatures and food safety conditions. Any lapses in production or storage, due to negligence, human error, or other factors, could damage our products and lead to non-compliance with regulatory standards.

We at present meet arrangements with the five cold storage houses nearby to our manufacturing unit and packing unit for store our raw material and finished goods but our raw material and finished goods are also at our manufacturing unit or our packaging unit during manufacturing, processing, packaging and before dispatching. Any contamination, spoilage, damage in our products, could harm our reputation, decrease sales, and potentially lead to legal action.

We cannot assure you that we will be free from such product liability claims in the future. If any of our products are perceived or found to be contaminated, we may face regulatory actions, product recalls, and our reputation, business, operations, and financial standing could suffer. Although we strive to maintain high quality standards, we cannot guarantee that all our products will be of consistent quality, which could harm our brand's value and reduce our sales if associated with negative publicity.

- 22. *Our Company, our Group Company, our Promoters and our Directors other than promoters are involved in certain legal proceedings. Any adverse decision in such proceedings may render us / them liable to liabilities / penalties and may adversely affect our business and results of operations.***

Our Company, our Group Company, our Promoters and Directors other than promoters are involved in certain legal proceedings at different levels of adjudication before various courts, tribunals and appellate authorities. In the event of adverse rulings in these proceedings or consequent levy of

penalties by other statutory authorities, our Company or Directors may need to make payments or make provisions for future payments, which may increase expenses and current or contingent liabilities and also adversely affect our reputation.

In the ordinary course of business, our Company, group company, promoters and our directors are involved in certain legal proceedings, which are pending at varying levels of adjudication at different forums. The summary of outstanding matters set out below includes details of civil proceedings, criminal proceedings, tax proceedings, statutory and regulatory actions and other material pending litigation involving our company, directors, promoters and our Group company.

According to the materiality policy, any outstanding litigation, other than criminal proceedings, statutory or regulatory actions and taxation matters, is considered material if the monetary amount of claim by or against the entity or person in any such pending matter is in excess of ₹ 5,00,000 or if an adverse outcome of any such litigation could materially and adversely affect our business, prospects, operations, financial position or reputation.

We cannot assure you that any of the legal proceedings described below will be decided in favour of the company and or directors respectively. Further the amounts claimed in these proceedings have been disclosed to the extent ascertainable, excluding contingent liabilities and include amounts claimed jointly and severally. Should any new developments arise, such as change in Indian law or rulings by appellate courts or tribunals, additional provisions may need to be made by us, the promoters, directors and Group company in our respective financial statements, which may adversely affect our business, financial condition and reputation. We may incur significant expenses and management time in such legal proceedings. Decision in any such proceedings adverse to our interests may have adverse effect on our business, future financial performance and results of operations.

Decision of such proceedings which are against the interests may affect our reputation and may have a material and adverse effect on our business, results of operations and financial condition.

23. There have been discrepancies in filings with the Registrar of Companies (RoC) and other non-compliances under the Companies Act in the past, which may result in penalties.

Our Company has, in the past, experienced prolonged and continuous delays in filing certain forms and returns with the RoC, including instances where revisions were made to previously filed forms which were subsequently rectified by paying additional fees. The details of the delays in a tabular format are mentioned below:

S. No.	Description of Form	Delay ranging between	No. of instances of delays
1.	AOC-4: Financial Statements	29-31 Days	2
2.	Form- 23AC: Financial Statements for FY 2010-11, 2012-13 and 2013-14	9-37 Days	3
3.	Form- 2: Return of Allotment	185 Days	1
4.	MGT- 7: Annual Return	10-29 Days	2
5.	MGT- 14: Filing of Resolutions and agreements to the Registrar	41-143 Days	3
6.	CHG- 1: Creation of Charge	3-76 Days	8

11.	PAS- 3: Return of Allotment	34-69 Days	2
12.	Form- 66: Form for submission of compliance certificate with the Registrar	14-39 Days	2

We have filed the necessary forms after paying the required additional fees and following these submissions, the regulatory authorities approved the delayed filings. As on the date of the filing of this Draft Red Herring Prospectus, we have not received any show-cause notices or penalties from regulatory authorities regarding these delays. Further to prevent such issues in the future and ensure better compliance, our company has proactively appointed a dedicated compliance officer. Ms. Ambika Sharma was appointed as the Company Secretary and Compliance Officer in June 2025 to help reduce instances of non-compliance and delayed filings.

However, these delays did not result in any material disruptions to our day-to-day operations or have a significant adverse impact on our financial performance, it is important to note that any future penalties, fines, or regulatory actions related to non-compliance or late filings could negatively affect our operations and financial position. Such actions could lead to reputational damage, loss of investor confidence, and potential financial liabilities. Further, there is no assurance that such discrepancies will not occur in the future, and we may still be subject to regulatory actions or penalties, which could adversely affect our business operations and financial position.

24. Instances of delays in payment of employee-related statutory dues in the past may expose us to regulatory action, including imposition of penalties.

Our Company has, in the past, experienced certain delays in remitting employee-related statutory dues, including contributions towards provident fund, gratuity, and bonus, within the timelines prescribed under applicable labour laws. While all such dues have subsequently been paid and there has been no continuing default or forfeiture, such delays may be construed as non-compliance with applicable statutory requirements. As on the date of this Draft Red Herring Prospectus, no regulatory proceedings have been initiated against us in this regard. However, there can be no assurance that the relevant authorities will not initiate inquiries or proceedings or impose penalties for such past delays, which may result in financial impact on our Company.

The details of the delays in last three Fiscal Years are as follows:

(Amount in Lakhs)

Particulars	Fiscal Year 2024-25		Fiscal Year 2023-24		Fiscal Year 2022-23	
	No. of Instances of delay	Amount	No. of Instances of delay	Amount	No. of Instances of delay	Amount
The Employees Provident Fund and Miscellaneous Provisions Act, 1952	2	0.16	14	5.30	2	0.095

Income Tax Act, 1961 (TDS on Salary)	3	22.08	-	-	-	-
Goods and Service Tax	4	2.82	-	-	-	-

We cannot assure you that going forward we will be able to make payment of our statutory dues in a timely manner or at all, which could result in penal or other regulatory action including payment of interest on the delay in payment of statutory dues, which could adversely affect our business and our results of operations and financial condition.

25. ***We have in the past entered into transactions with related parties and may continue to do so in the future. These or any future-related party transactions may potentially involve conflicts of interest and there can be no assurance that we could not have achieved better terms had such arrangements been entered into with unrelated parties.***

Further all the related party transactions done by our Company are also in compliance with the Companies Act, 2013, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. It is likely that we may enter into related party transactions in the future. Although upon listing of our Equity Shares pursuant to the Issue, all related party transactions that we may enter into, will be subject to the requirements of the Companies Act, 2013 and the SEBI Listing Regulations, there can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. Such related party transactions may potentially involve conflicts of interest.

26. Our manufacturing capacities may not reach their installed capacity, and we may also be unable to effectively utilize our expanded manufacturing capacities.

Our capacity utilizations for the for the FY 2024-25, 2023-24 and 2022-23 duly certified by Chartered Engineer are as under:

Pursuant to Certificate No. BTA/IND/120/2025 dated August 05, 2025 by Hari Dutt Purohit, Chartered Engineer, Technical Associate of Bidadhar & Techno Associates.

⁽¹⁾The installed capacity of Ground Spices increased by 765 MT and enhanced capacity was operational from 01.04.2024

⁽²⁾The installed capacity of Ground Spices, Blended Spices and Whole Spices was further increased by 4320 MT, 2640 MT and 4800 MT and the enhanced capacity was operational from 29.03.2025.

The capacity utilization at our manufacturing unit is subject to various factors such as timely and adequate supply of raw material, uninterrupted power supply, efficient working of machinery and equipment and optimal production planning, technical support. While we have obtained a Chartered Engineer certificate in relation to the above installed capacity and capacity utilization of our manufacturing unit, future capacity utilization may vary significantly from the estimated production capacities of our manufacturing unit and historical capacity utilization. Under-utilization of our manufacturing capacities, over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance on account of the constant overhead costs associated with our business. For details on our manufacturing capacities, see **“Our Business – Capacity Utilization”** on page 165-166.

27. Competitive pricing pressures may impact on our ability to maintain or raise product prices, potentially leading to a decline in our revenue from product sales, gross margin, and profitability. This could significantly and negatively affect our business, cash flow, financial condition, and operational results.

We may face competitive pricing pressures that could affect our ability to maintain or increase product prices, potentially leading to a decline in revenue from product sales, gross margin, and profitability. This could have a significant adverse impact on our business, cash flows, financial condition, and operational results.

While we maintain consistent pricing across our product categories, competitive actions from rivals—such as lowering prices for similar products—could reduce our revenue and profits. Moreover, failing to adhere to our retail price guidelines could harm our brand value and public perception.

To mitigate pricing pressures, we may seek to reduce raw material costs and enhance production efficiency through negotiations with suppliers and by streamlining product designs. However, there is no guarantee that we will be able to fully mitigate future pricing pressures or offset price reductions through improvements in operational efficiency, cost-effective sourcing, new manufacturing processes, or other cost-cutting initiatives. If we are unable to maintain or improve our margins and sales revenue in the face of competitive pricing pressures, our business, financial condition, and operational results could be materially and negatively affected.

28. The markets in which we operate are influenced by consumers whose tastes and preferences change rapidly, meaning our company may be affected by any disruptions in the industry.

We manufacture and market spices and grocery products primarily for commercial and household use. Consequently, the markets we operate in are shaped by shifting consumer preferences, evolving industry standards, and ongoing improvements in product quality and variety, often resulting in short product life cycles. Additionally, we are affected by the spending habits of consumers in India. A decline in demand for our products could lead to significant fluctuations in customer orders and increased pricing pressures.

If the technologies or standards we rely on become obsolete or fail to gain widespread commercial acceptance, demand for our products may decrease, leading to lower sales and operating margins. Over time, these factors could negatively impact our business, financial condition, and results of operations.

29. Our Company has procured a significant portion of the raw materials from the State of Rajasthan, accounting for 45.48%, 60.09% and 41.46%, of our total purchases for the Fiscal Years ended March 31, 2025, 2024, and 2023, respectively. Any adverse developments affecting operations in this region could have a material impact on our business, financial condition, results of operations, and cash flows.

Our Company has procured a significant portion of the raw materials from the State of Rajasthan. The following table presents our procurement of raw materials from Rajasthan during the indicated periods:

(Amount in Lakhs)

State	2024-25		2023-24		2022-23	
	Amount	% of total Purchase	Amount	% of total Purchase	Amount	% of total Purchase
Total Purchases	10,217.65	100.00%	10354.84	100.00%	5211.67	100.00%
Raw material sourced from Rajasthan	4,646.96	45.48%	6222.48	60.09%	2160.97	41.46%

Due to the high concentration of raw material supply from Rajasthan, our operations are vulnerable to regional and local factors, including economic conditions, weather patterns, natural disasters, demographic shifts, and other unforeseen events. As a result, any significant disruption in social, political, or economic stability in this region—such as natural calamities, civil unrest, policy changes by the state or central government, or increased competition—could adversely affect our business, results of operations, financial condition, and cash flows.

While we have not experienced any of these adverse conditions affecting our operations or financial performance in the past, we cannot guarantee that such events will not occur in the future.

30. Our lenders have charged over our movable and immovable properties in respect of finance availed by us and the agreements governing our indebtedness contain conditions and restrictions on our operations, additional financing and capital structure.

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were ₹ 4,387.36 Lakhs as on August 10, 2025. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations.

Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, formulate a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Our company has obtained No Objection Certificate (“NOC”) from each of our lenders for the proposed IPO of our company vide

their letters dated December 21, 2024 and November 29, 2024 from HDFC Bank Limited and YES Bank Limited respectively. Further, we are required to maintain certain financial ratios. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consent necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future have important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that are not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. For further information, see the chapter titled ***“Financial Indebtedness”*** beginning on page 277.

Though these covenants are restrictive to some extent for us, however, it ensures financial discipline, which would help us in the long run to improve our financial performance.

31. *Our business is dependent on our manufacturing Units, and we are subject to certain risks in our manufacturing process. Any slowdown or shutdown in our manufacturing operations could have an adverse effect on our business, financial condition and results of operations.*

Our manufacturing unit is situated at Khasra No. 06/1067 Manpura Road, Jatawali, near the Delhi bypass, Tehsil – Chomu, Jaipur, Rajasthan and is subject to certain operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents, and the need to comply with the directives of relevant government and regulatory authorities.

Our business is dependent upon our ability to manage our manufacturing unit and run them at certain utilization levels, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment, industrial accidents, labour disputes or shortage of labour, severe weather conditions and natural disasters. While there have been no such instances in the past, any significant malfunction or breakdown of our machinery, our equipment, our IT systems or any other part of our systems associated with manufacturing activities (together, our ***“Manufacturing Assets”***) may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair Manufacturing Assets in a timely manner or at all, our operations may need to be suspended until we procure the appropriate Manufacturing Assets to replace the same and we cannot assure you that the new Manufacturing Assets will be procured and/or integrated in a timely manner. In addition, we may be required to carry out planned shutdowns of our facilities for maintenance, statutory inspections, testing and equipment upgrades.

As our customers rely significantly on the timely delivery of our products, uninterrupted power supply, supply of trained and skilled manpower, availability of raw materials and our ability to carry on interruption-free production of our products is critical to our business. Further, our electricity requirements for our manufacturing units are directly sourced from local utilities. We cannot assure you that we will successfully be able to prevent disruptions in our manufacturing processes in case of non-availability of an adequate supply of power. While we have backup systems, such as DG Sets, and keep spare parts on hand, we cannot guarantee that replacements will be available or of equivalent quality, which could lead to extended downtime. This may impact on our manufacturing capacity and delay fulfilling customer orders.

Further, we may be subject to manufacturing disruptions due to contraventions by us of any of the conditions of our regulatory approvals, which may require our manufacturing facilities to cease, or limit, production until the disputes concerning such approvals are resolved. While we have not experienced such instances, in the event such instances occur in the future, it may have an adverse effect on our business, financial condition and results of operations.

- 32. *The objects of the Issue include orders for plant and machinery which have been placed. In the event of any delay in delivery of such orders, the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary.***

Our Company has placed orders for plant and machinery worth ₹ 163.06 Lakhs as part of its planned operations. However, in the event of any delay in the delivery of such orders, the proposed schedule for the implementation and deployment of the Net Proceeds may be extended or may vary. This could impact the Company's ability to execute its business plans as initially projected, potentially affecting revenue generation, cost management, and overall timelines. Investors should be aware that any delay in the delivery of critical assets could result in unforeseen operational challenges or a shift in the Company's strategic deployment of the Net Proceeds.

- 33. *Our operations may be adversely affected in case of industrial accidents at our manufacturing unit.***

Usage of machinery, handling materials by labour during manufacturing process or otherwise, lifting of materials by humans, etc. may result in accidents, which could cause injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. The occurrence of accidents could hamper our manufacturing process and consequently affect our profitability.

- 34. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finances, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and the results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled "**Objects of the Issue**" beginning on page 98.

- 35. *Within the parameters as mentioned in the chapter titled 'Objects of the Issue' beginning on page 98, our Company's management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.***

We intend to use Issue Proceeds towards Purchase of machineries for Funding the incremental Working Capital Requirements of our Company, Repayment/Pre-payment, in full or in part, of certain outstanding borrowings availed by our company, Brand Creation and Marketing Expenses, Purchase of machineries for installation at existing manufacturing unit located at Khasra No. 06/1067 Manpura Road, Jatawali, near Delhi bypass, Tehsil – Chomu, Jaipur, Rajasthan, Purchase of 200 KW Solar Rooftop Grid-connected PV System, General Corporate Purposes and to meet Issue expenses. We intend to deploy the Net Issue Proceeds in FY 2025-26 and FY 2026-27. Such deployment is based on certain assumptions and strategy which our Company believes to implement in near future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled "**Objects of the Issue**" beginning on page 98.

The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the

parameters as mentioned in the chapter titled **“Objects of the Issue”** beginning on page 98, the Management of the Company will have significant flexibility in applying the proceeds received by our Company from the Issue and our company shall furnish a certificate of the statutory auditor pursuant to regulation 262 (5) of the SEBI ICDR Regulations, 2018 (as amended) for utilization of money raised through the public issue to SME exchange while filing the quarterly financial results, till the issue proceeds are fully utilized.

Our one of the objects of the issue to raise fund to meet our incremental working capital requirements in excess of ₹ 5,000 Lakhs, therefore pursuant to regulation 262 (6) of the SEBI ICDR Regulations (as amended) our Company shall furnish to the Stock Exchange a certificate of statutory auditor for use of funds as working capital in the same format as disclosed in this DRHP till the proceeds raised for the such objects are fully utilized while filing the quarterly financial results.

However, the Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard.

36. We have certain contingent liabilities that have not been provided for in our financial statements, which if they materialise, may adversely affect our financial condition, cash flows and results of operations.

Any or all of these contingent liabilities may become actual liabilities. In the event that any of our contingent liabilities become actual liabilities, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current Financial Year or in the future.

37. Our Registered and Corporate Office is taken on lease from the member of our promoter group. Disruption of our rights as lessee or termination of the agreements with our lessor (Member of our Promoter Group) may adversely impact our operations and, consequently, our business, financial condition and results of operations.

As on the date of this Draft Red Herring Prospectus, our Registered and Corporate Office is located on premises which is not owned by us and has been obtained on lease basis from the member of our promoter group. For details on properties taken on lease / rent by us please refer to the heading titled **“Our Business - Properties”** on page 170-171.

The agreements are renewable on mutually agreed terms. The rent agreements have a clause for the renewal of the same for a further period as may be mutually agreed among the parties after the expiry of the current period. While the related party lease or rent payments done by our Company

are on Arm's Length Price and our Company is in compliance with the provisions of Companies Act, 2013. We may continue to pay the lease or rent amounts to our related parties in future also but there can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favorable terms if such transactions had not been entered into with related parties. Additionally, any future increments in our lease or rent payments to our related parties could potentially involve conflicts of interest.

For the details of related party transactions ***"Financial Statements as Restated – Note 29: Restated Statement Related Party Transaction"*** on page 249-250.

- 38. Our Promoters and two members of our Promoter Group have provided personal guarantees for secured loan facilities obtained by us, and any failure or default by us to repay such loans could trigger repayment obligations on our Promoters and Promoter Group, which may also impact our Promoter's ability to effectively service its obligations as our Promoter and thereby, adversely impact our business and operations.**

As of **August 10, 2025**, the secured borrowings aggregating to ₹ 4,387.36 lakhs have been sanctioned by scheduled commercial banks to our Company. Our promoters, namely Mr. Ramawtar Agarwal, Mrs. Mamta Devi Agarwal and Mr. Vithal Agarwal and member of the Promoter Group Ms. Khushi Agarwal and Shyam Dhani Industries have provided their personal guarantee in securing these borrowings. The details of personal guarantees provided by our Promoters and members of our Promoter Group are as under:

<i>(Amount in Lakhs)</i>					
S. No.	Name of the Person	Category	Guarantee in favour of	Amount of Guarantee	Amount outstanding as on 10-08-2025

5	Shyam Dhani Industries	Promoter Group	HDFC Bank Limited	3,459.90	3,278.41

As of **August 10, 2025**, outstanding amounts from secured credit facilities personally guaranteed by our Promoter and certain members of the Promoter Group amounted to ₹ 4,274.34 Lakhs, which constituted 97.42% of our total indebtedness aggregating to ₹ 4,387.36 Lakhs as on such date. Until now there has been no instance of invocation of personal guarantees of our Promoters and our Company nor there have been any defaults in repayments of loan and interest. Any default or invocation/ failure by us to honor or repay our loans in a timely manner or at all could trigger repayment obligations on the part of our Promoter and certain members of the Promoter Group, in respect of such loans.

This could have an adverse effect on our business, results of operation and financial condition. We may not be successful in procuring guarantees to supplement/ substitute the guarantees provided by our Promoter and certain Promoter Group members satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our business prospects, financial condition, results of operations and cash flows.

- 39. Our Company has obtained unsecured loans from Promoters and bank which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.**

Our Company has availed unsecured loans from Promoters and bank aggregating to ₹ 569.60 Lakhs as of **August 10, 2025**, that are repayable on demand, and which may be recalled by such lenders at any time. Our Company has paid interest at 9.00% p.a. on these loans. Details of unsecured loans from our lenders are given in the table below:

If such a lender seeks repayment of any such unsecured loans, our Company will need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition, and results of operations. For further information on unsecured loans relating to our business and operations, see **“Financial Indebtedness”** beginning on page 277.

40. Our operations could be significantly impacted by strikes, work stoppages, or increased wage demands from our employees. Any disputes with our workforce may negatively affect our business and operational outcomes.

We cannot guarantee that our employees will not join labour unions in the future and as a result we may experience disruptions in our operations due to disputes or other problems with our workforce. Efforts by our employees to modify compensation and other terms of employment may also divert management’s attention and increase operating expenses. The occurrence of such events could materially adversely affect our business, financial condition and results of operations.

41. Our business depends upon the capabilities and performance of our Promoters, Key Managerial Personnel and Senior Management that will be crucial to determining the success and growth of our company.

Our success heavily relies on the expertise and experience of our Promoters, Directors, and Senior Management, and our ability to attract and retain skilled employees. The departure of any of our KMPs, Senior Management, or our inability to attract and retain them, as well as other skilled personnel, could negatively impact our business, financial condition, and operational results. We depend on the management capabilities and guidance of our promoters to develop business strategies, oversee their successful implementation, and address future challenges. Our future success depends on our ability to retain our management team. If any Promoter, KMP or senior management member chooses to leave their position, finding a suitable replacement may be difficult, which could disrupt the smooth operation of our business.

Additionally, the departure of a Senior Management employee could require significant time to recruit and train a replacement, and we may face increased compensation costs due to industry competition to attract and retain the skilled talent necessary for our business. Losing the services of such Senior Management could negatively affect our business, operational results, cash flow, and financial performance.

42. Employee misconduct, mistakes, or fraudulent actions could expose us to business risks or financial losses, potentially negatively impacting our business prospects, operational results, and financial condition.

The company faces the risk of employee misconduct, errors, or fraud, which could lead to significant losses, legal penalties for violations, and damage to its reputation. Such misconduct may include

breaches of confidentiality, misappropriation of funds, concealment of unauthorized activities, and failure to adhere to operational standards and processes. Detecting or preventing these actions is not always possible, and the measures taken to curb such unethical behavior may not always be effective. Additionally, losses resulting from employee misconduct or mismanagement of petty cash and advances may be unrecoverable, potentially leading to write-offs that could negatively impact operational results. Our company may also make errors that could expose us to claims of negligence or regulatory actions, which could harm our reputation, business prospects, financial condition, and operational performance.

43. *The modernization and upgrading of technology could make the current machinery and technology outdated and no longer useful.*

Change is inevitable, and modernization along with technology upgrades is crucial to deliver improved services to customers. Upgrading technology could render our current machinery and systems obsolete, necessitating significant capital investment to adopt new technologies or upgrade existing equipment. The costs associated with such upgrades and modernization could have a considerable impact on our finances and operations. Additionally, implementing new processes would require substantial capital expenditures, potentially negatively affecting our business and financial condition.

44. *We are obligated to maintain various licenses, approvals, registrations, consents, and permits as part of our regular business activities. Failure to obtain the necessary approvals may lead to non-compliance, which could negatively impact our business operations, financial condition, performance, and future prospects.*

We require various licenses, approvals, registrations, consents, and permits to operate our business. Additionally, we must periodically apply for approvals, including the renewal of expiring ones, as part of the normal course of business. When our company transitioned to a Public Limited Company, we changed our name from Shyam Dhani Industries Private Limited to Shyam Dhani Industries Limited, as approved by our shareholders at an Extraordinary General Meeting held on August 20, 2024. We have updated this change in several of our approvals, licenses, and registrations, but some are still in the process of being updated.

If we fail to obtain these necessary approvals and permits, it could negatively affect our business, operations, cash flows, and financial condition. Delays or failures in obtaining, maintaining, or renewing the required licenses and approvals may disrupt our business operations, which could have a harmful impact on our financial health and performance. Although we have secured key approvals needed for our business, we are still waiting for the grant or renewal of certain essential approvals.

Moreover, government approvals and licenses often come with various conditions, such as compliance with emission standards and regular monitoring requirements, which can be burdensome and costly. We may face significant expenses, including clean-up or remediation costs, fines, and civil or criminal penalties, due to violations of environmental or health and safety laws, which could materially affect our business or financial situation. We cannot guarantee that the approvals, licenses, registrations, and permits granted to us will not be suspended or revoked due to non-compliance or regulatory actions. Any failure to renew expired approvals, or to apply for, obtain, or maintain the required permits, or if any approvals are suspended or revoked, could seriously disrupt our operations. For more details, please refer to the section "**Government and Statutory Approvals**" beginning on page 289, which includes information on approvals currently pending with relevant authorities.

45. *We may not have sufficient insurance coverage to cover all possible losses.*

Our operations are inherently risky, with potential for personal injury, loss of life, damage to property, plant and machinery, and environmental harm. We are also exposed to various risks such as fire, theft, flooding, earthquakes, and terrorism. To mitigate these risks, we maintain insurance

coverage in amounts we deem commercially appropriate, including coverage for damage, loss of profit, business interruption, marine inland transit, and third-party liability related to our assets. Our insured assets include property, plant and equipment, furniture, fixtures, fittings, inventory, and more. Over the past three years, we have not encountered any instances of underinsurance, where our coverage did not meet the required insured value for our operations. However, we cannot guarantee that our current or future insurance will fully cover all potential losses or liabilities, particularly in cases where the loss is difficult to quantify. While we have not experienced such issues in the past three years, there is no assurance that in the future, our losses may not significantly exceed our insurance coverage, or that certain losses may not be recoverable through insurance. As a result, our business, financial condition, and operational performance could be materially and adversely impacted. For more information about our insurance, please refer to the section **"Our Business – Insurance"** on page 171.

Our operations carry inherent risks of personal injury and loss of life, damage to or destruction of property, plant and machinery and damage to the environment, and are subject to various risks such as fire, theft, flood, earthquakes and terrorism. Our insured assets primarily consist of property, plant & equipment, furniture, fixtures and fittings, inventory, etc. In the past three years, there has been no instances of under insurance i.e., where our insurance cover did not adequately cover the insured value required for our operations. However, there can be no assurance that our current and future insurance will adequately cover all losses or liabilities that may arise from our operations, including, but not limited to, when the loss suffered is not easily quantifiable. While we have not had any such instance in the past three years, there can be no assurance that in the future our losses would not significantly exceed our insurance coverage or may not be recoverable through insurance and consequently our business, financial condition and results of operations could be materially and adversely affected.

47. *Our inability to successfully implement some or all our business strategies in a timely manner or at all could have an adverse effect on our business.*

As part of our strategy aimed towards business growth and improvement of market position, we intend to implement several business strategies, which include:

1. Continued focus on diversified business model
2. Increase in advertisement and marketing activities
3. Investment in improving product quality

For further information, see ***“Business – Our Business Strategies”*** beginning on page 156.

Our strategies may not succeed due to various factors, such as our inability to enhance manufacturing capacities, failure to adapt to market preferences and trends, or failure to upgrade infrastructure, machinery, automation, equipment, and technology to meet changing demand. Our inability to respond to regular competition, and other operational and management difficulties. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Any failure on our part to implement our strategy due to many reasons as attributed aforesaid could be detrimental to our long-term business outlook and our growth prospects and may materially affect our business, financial condition and result of operations.

48. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the floor price.*

Our Promoters average cost of acquisition of Equity Shares in our Company may be lower than the Floor Price of the Price Band as may be decided by the Company in consultation with the Book Running Lead Manager. 50. We have not entered into any formal arrangement for technical support service for maintenance and smooth functioning of our equipments and machineries, which may affect our performance.

Our manufacturing processes involve daily use of technical equipment's and machineries. They require periodic maintenance checks and technical support in the event of technical breakdown or malfunctioning. Our Company has not entered into any formal technical support service agreements with a competent third-party vendor. However, Company has an in-house team for maintenance and advancement of machinery. Our failure to reduce the downtime in as such events occur may adversely affect our productivity, business and results of operations.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

53. Our ability to pay dividends in the future may depend upon our future revenues, profits, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to

the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see ***“Dividend Policy”*** beginning on page 213.

54. Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

55. All of our Directors do not have any prior experience of being a director in any other listed company in India.

Our current Board comprises of 6 directors which includes Chairman and Managing Director, 2 Whole-Time Director, 2 non-executive independent directors and 1 non-executive non-independent directors. All of our board of directors do not have any prior experience of being a director in any other listed company in India. While our Board members are qualified and have relevant experience in their respective field, not having any prior experience as being a director in any other listed company in India may present some potential challenges to our Company ineffectively meeting with good corporate governance norms and practices. Additionally, having lack of such experience amongst the board may impact our Company's credibility and reputation among the investors and other stakeholders. For further details, please see chapter titled ***“Our Management”*** beginning on page 187.

Issue Specific Risks

56. Subsequent to the listing of the Equity Shares, we may be subject to surveillance measures, such as the Additional Surveillance Measures and the Graded Surveillance Measures by the Stock Exchanges in order to enhance the integrity of the market and safeguard the interest of investors.

Subsequent to the listing of the Equity Shares, we may be subject to Additional Surveillance Measures (***“ASM”***) and Graded Surveillance Measures (***“GSM”***) by the Stock Exchange. These measures are in place to enhance the integrity of the market and safeguard the interest of investors. The criteria for shortlisting any security trading on the Stock Exchanges for ASM is based on objective criteria, which includes market-based parameters such as high low price variation, concentration of client accounts, close to close price variation, market capitalization, average daily trading volume and its change, and average delivery percentage, among others. Securities are subject to GSM when its price is not commensurate with the financial health and fundamentals of the issuer. Specific parameters for GSM include net worth, net fixed assets, price to earning ratio, market capitalization and price to book value, among others.

Factors within and beyond our control may lead to our securities being subject to GSM or ASM. In the event our Equity Shares are subject to such surveillance measures implemented by the Stock Exchange, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

57. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the EMERGE Platform of NSE in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the EMERGE Platform of NSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

58. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by designated stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

59. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

60. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

61. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by Book Built Method. This price is based on numerous factors. For further information, please refer chapter titled “*Basis for Issue Price*” beginning on page 115 and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

62. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor’s demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

63. *QIB and Non-Institutional investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting the Bid.*

Pursuant to SEBI ICDR Regulations, QIBs and Non-Institutional investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting the Bid. Retail Individual Investors can revise their Bid during the Bid Period and withdraw their Bids until Bid Closing date. While our Company is required to complete Allotment pursuant to Issue within four working days from the Bid Closing date, events affecting the Bidders decision to invest in Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, result of operations or financial condition may arise between the date of submission of the Bid and allotment. Our Company may complete the allotment of Equity shares even if such events occur, and such events limit the Bidders ability to sell the Equity Shares allotted pursuant to the Issue or cause the trading price of Equity Shares to decline on listing.

64. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS FACTORS

Industry Related Risks

65. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

66. *A slowdown in economic growth in India could have an adverse effect on our business, results of operations, financial condition and cash flows.*

Our performance and growth are, and will be, dependent to a large extent on the health of the Indian economy and consumption spending by households. Economic growth in India is affected by various factors including domestic consumption and savings, rate of inflation in India, balance of trade movements, and global economic uncertainty. Most of our assets and employees are located in India, and we intend to continue to develop and expand in India.

Inflation, measures to combat inflation and public speculation about possible governmental actions to combat inflation have also contributed significantly to economic uncertainty in India and heightened volatility in the Indian capital markets. Periods of higher inflation may also slow the growth rate of the Indian economy and increase some of our costs and expenses. To the extent that the demand for our products decreases or costs and expenses increase, and we are not able to pass those increases in costs and expenses on to our customers, our operating margins and operating income may be adversely affected, which could have a material adverse effect on our business, financial condition and results of operations.

Other Risks

67. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operation, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes.

For instance, in November 2016, the Government of India demonetized certain – high value denominations of currency. Trading and retail businesses in India were impacted for a limited period of time on account of such demonetization. Such businesses have subsequently needed to introduce additional point of sale instruments to improve their collection process.

The Government of India implemented a comprehensive national goods and service tax (“GST”) regime that combines taxes and levies by the central and state governments into a unified rate structure from July 01, 2017, which we believe will result in fundamental changes. However, given

its recent introduction, there is no established practice regarding the implementation of, and compliance with, GST. The implementation of the new GST regime has increased the operational and compliance burden for Indian companies and has also led to various uncertainties. Any future increases and amendments to the GST regime may further affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures and/or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of GST may have a material adverse effect on our business, financial condition and results of operations.

Further, the General Anti Avoidance Rules came into effect on April 1, 2017. The effect of the application of these provisions to our business in India is at present uncertain. Furthermore, the Finance Act, 2019 instituted a number of amendments to the existing direct and indirect tax regime which includes the withdrawal of long-term capital gains exemptions on equity shares, long term capital gains applicability in the hands of Foreign Institutional Investors and applicability of dividend distribution tax for certain transactions with shareholders, among others.

68. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and de-regulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

69. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which our company operates contained in the Draft Red Herring Prospectus.*

While facts and other statistics in this Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which our company operates has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled ***“Our Industry”*** beginning on page 128. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

70. *Financial instability in Indian financial markets could adversely affect our Company’s results of operations and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

71. *Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.*

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time-to-time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the EMERGE Platform of National Stock Exchange of India Limited could adversely affect the trading price of the Equity Shares.

72. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

73. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

74. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

75. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

76. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

Justification of enhanced working capital requirements

Our company operates under a multi-channel revenue model, which includes General Trade, Modern Trade, HORECA sales, Private Labelling, Quick Commerce, Exports, and Website sales. Historically our focus has been on general trade which accounted for more than 90% of our total revenue up to FY23. From FY24, our company changed its business strategy and started focusing more on revenue models having high volume trades. The volume in modern trade business segment is much higher in comparison to the one in general trade business segment. Our sales under the modern trade segment increased from ₹ 29.25 Lakhs in FY23 to ₹ 5,524.92 Lakhs in FY25. Simultaneously, the total volumes of the goods sold of our company also increased from 3,401.81 MT in FY23 to 5,133.99 MT in FY25.

Our company intends to focus more over its higher volume modern trade segment and plans to expand and cover all the modern trade players in the industry such as DMart, Reliance Retail, Dealshare and Metro Cash and Carry etc on pan India basis. This will help us to boost the revenue of our company.

Further, with the increase in the revenue generated from modern trade segment, the sale of our blended spices also increased from ₹ 1,046.61 Lakhs in FY23 to ₹ 2,099.40 Lakhs in FY25 simultaneously as this product category remains to be in high demand in these supermarket outlets.

To fulfill the demand of our product offerings generated from modern trade business segment, our company needs to maintain optimum level of inventory of raw material and finished goods, therefore working capital gap is increasing in FY26, FY27 and FY28.

Similarly, our company is also focusing on expanding its presence on quick commerce platforms and have done tie-ups with all the major quick commerce players such as Swiggy Instamart, Zepto, Flipkart minutes and Blinkit. This enables us to reach tech-savvy urban consumers who prioritize speed and convenience, further expanding our brand presence in the fast-growing digital retail space.

Additionally, our company is further enhancing its production capacity to cater to demand of our products under private labelling segment. Historically we have been doing private labelling but its contribution to our revenue from operations has been very limited. Going forward with the enhanced capacity, our company will be focusing more upon undertaking more private labelling assignments.

Further, we also want to establish our brand “SHYAM” in the market and will be undertaking advertisement and marketing campaigns including hiring of Mrs. Preity Zinta as a brand ambassador of our company. Investment in advertisement and marketing expenses will help our company to increase its visibility and establish our brand image in the market. This in turn will help us in increasing demand of our products, ultimately generating more revenue for our company.

Additionally, our company also intends to tap into new markets and increase our presence in international markets. In FY25, our export sales increased from ₹ 85.16 Lakhs in FY24 to ₹ 169.53 Lakhs in FY25. We exported our products to countries like UAE, Mongolia and Nepal. The details of the export sales made by our company during FY24 and FY25 is as under:

(Amount in Lakhs)

Countries	FY25	% of Total Revenue	FY24	% of Total Revenue
UAE	127.14	1.02%	7.30	0.07%
Nepal	17.26	0.14%	6.82	0.06%
Mongolia	25.13	0.20%	32.77	0.30%

Countries	FY25	% of Total Revenue	FY24	% of Total Revenue
Oman	-	-	38.27	0.36%
Total	169.53	1.36%	85.16	0.79%

In continuation to that, our company aims to export its products to United States of America (USA). In order to export our products to USA, our company has obtained registration with **U.S Food and Drug Administration (FDA)**, vide its registration number **15206203708**, which enables us to gain access to USA market and sell our products there.

Therefore, to continue the expansion of our international business and tap into new markets, our company needs to maintain optimum level of inventory of raw materials and finished goods to avoid any delays and ensure smooth operations.

Particulars	Justification for Holding Levels
Raw Material	<p>Our company is engaged in the manufacturing and processing of 164 types/varieties of spices which can be broadly categorized as Ground Spices, Blend Spices and Whole Spices under the brand name “SHYAM”. In addition to our spice offerings, we are also engaged in trading and distribution of Grocery Products such as Black Salt, Rock Salt, Rice, Poha, Kasuri Methi (Dried Fenugreek) etc. and a diverse range of Herbs and seasonings which includes Oregano, Peri Peri, Chilli Flakes, Mixed Herbs, Onion Flakes, Tomato Powder etc.</p> <p>In the FY23, FY24 and FY25, our Company maintained raw material inventory levels for 53 days, 96 days and 45 days respectively. Our raw material availability is seasonal and our major purchased is done at the time of crop harvesting season. Further we source from various states across India like Madhya Pradesh, Karnataka, Rajasthan etc therefore to save the transportation cost we used to maintain minimum inventory of three months in past.</p> <p>Our company has estimated inventory holdings of raw materials based on past trends and estimated holding levels to 90 days in FY26 and 91 days each for FY27, and FY 28.</p>
Work in Progress	<p>In the FY23 and FY24, our Company was maintaining Work in Progress in the raw materials inventory only. In FY25, our company started maintaining raw materials and work in progress stock separately and has estimated work in progress holding of the company for the FY 26, FY27 and FY28 at the level of 9 days level per production process of our company.</p>
Finished Goods	<p>In the FY23, FY24 and FY25, our Company maintained finished goods inventory levels for 26 days, 26 days and 92 days respectively. Historically, we have kept stock of finished goods between 25-90 days according to the type and demand pattern of our products.</p> <p>With the change in the business strategy of our company, we are planning to focus more upon the modern trade and quick commerce business segments. These segments provide higher volume trade to our company and thus to fulfill the demand of the customers in these business segments, we estimate to increase the holding period of our finished goods</p>

Particulars	Justification for Holding Levels
	inventory to 52 days in FY26, FY27 and FY28.
Trade Receivables	Our company generally provides products on credit to our customers for a credit period of 20 days, 19 days, and 25 days in the FY23, FY24, and FY25 respectively, which is as per the acceptable business practice in the similar trade. Our company has estimated holding levels of 30 days each for FY26, FY27, and FY28 respectively based on the holding levels for FY25. Our management believes that by providing additional credit period to our customers will help us to increase the volumes of trade and securing bulk orders for our company.
Trade Payables	Our company's trade payables predominantly comprise of payables towards the purchase of raw materials. The trade payable days were approximately 22 days, 36 days, and 22 days of purchases for FY23, FY24, and FY25 respectively. Our Company has proposed to utilize a part of the fresh issue proceeds towards working capital requirements which will lead to payment to creditors and reduction in the outstanding days payable. Hence trade payables days are estimated at 5 days of purchases each for FY26, FY27, and FY28 respectively which will enable our Company to get better terms from our vendors. This would help us to avail good cash discounts and negotiate with our vendors on better price to our advantage.

2. Repayment/Pre-payment, in full or in part, of certain outstanding borrowings availed by our company

We avail a majority of our fund-based and non-fund-based facilities in the ordinary course of business from various scheduled commercial banks, financial institutions and other entities. The borrowing arrangements entered into by us include, *inter alia*, term loans and working capital loans. For further information on the financial indebtedness of our Company, see the chapter titled "**Financial Indebtedness**" beginning on page 277. As of August 10th, 2025 our Company had an outstanding total secured borrowing of **₹ 4,387.36 Lakhs**. We propose to utilise a portion of the Net Proceeds aggregating to **₹ 1,000.00 lakhs** for Repayment/Pre-payment, in full or in part, of cash credit borrowing facility availed by our company from scheduled commercial banks.

Pursuant to the terms of the borrowing arrangements, prepayment of certain indebtedness may attract prepayment charges as prescribed by the respective lender. Such prepayment charges, as applicable, will also be funded out of the Net Proceeds. Given the nature of the borrowings and the terms of repayment or prepayment, the aggregate outstanding amounts under the borrowings may vary from time to time and we may, in accordance with the relevant repayment schedule, repay or refinance some of the existing borrowings prior to Allotment or avail of additional credit facilities.

Further, the outstanding amounts under these borrowings as well as the sanctioned limits are dependent on several factors and may vary with our business cycle with multiple intermediate repayments, drawdowns and enhancement of sanctioned limits. Accordingly, our Company may utilise the Net Proceeds for repayment/prepayment of any such refinanced facilities (including any prepayment fees or penalties thereon) or any additional facilities obtained by our Company. However, the aggregate amount to be utilised from the Net Proceeds towards prepayment, repayment or redemption of borrowings (including refinanced or additional facilities availed, if any), in part or full, will not exceed **₹ 1,000.00 lakhs**. In light of the above, at the time of filing of Red Herring Prospectus, the table below shall be suitably updated to reflect the revised amounts or loans, as the case may be. Such repayment or prepayment will help reduce our outstanding indebtedness and debt servicing costs and enable utilization of the internal accruals for further investment towards business growth and expansion. In addition, repayment/prepayment of the loans will add to the profitability of our Company due to reduced finance cost and also the improvement in the debt-to-equity ratio of our Company which enable us to raise further resources in the future to fund potential business development opportunities and plans to grow and expand our business in the future.

GLOBAL ECONOMIC OVERVIEW

GLOBAL PROSPECTS

The global economy is stabilizing, following several years of overlapping negative shocks. Despite elevated financing costs and heightened geopolitical tensions, global activity firmed in early 2024. Global growth is envisaged to reach a slightly faster pace this year than previously expected, due mainly to the continued solid expansion of the U.S. economy. However, the extent of expected declines in global interest rates has moderated amid lingering inflation pressures in key economies. By historical standards, the global outlook remains subdued: both advanced economies and emerging market and developing economies (EMDEs) are set to grow at a slower pace over 2024-26 than in the decade preceding the pandemic.

A. Contributions to global growth

Domestic demand is projected to improve in many EMDEs this year, in line with a moderate cyclical recovery from the effects of high inflation, tight financial conditions, and anemic industrial activity. Aggregate EMDE growth is nonetheless poised to decelerate slightly mainly because of idiosyncratic factors in some large economies. Moreover, significant challenges persist in vulnerable economies—including in low-income countries (LICs) and those facing elevated levels of conflict and violence—where growth prospects have

deteriorated markedly since January.

Global trade growth is recovering, supported by a pickup in goods trade. Services-trade growth is expected to provide less of a tailwind this year, given that tourism has nearly recovered to pre pandemic levels. However, the trade outlook remains lackluster compared to recent decades, partly reflecting a proliferation of trade-restrictive measures and elevated trade policy uncertainty.

Aggregate commodity prices have increased since late last year. Amid fluctuations, average oil prices are expected to be slightly higher in 2024 than in 2023, underpinned by a tight demand-supply balance in a context of continued geopolitical tensions. Nonetheless, average energy prices are projected to be marginally lower this year than last—reflecting notable declines in prices for natural gas and coal—while remaining well above pre-pandemic levels. Metals prices are expected to be little changed over the forecast horizon, as demand related to metals-intensive clean energy investments and a broader pickup in global industrial activity attenuate the impact on commodity demand of declining real estate activity in China. Well-supplied markets for grains and other agricultural commodities should see edible food crop prices decline modestly.

Inflation continues to wane globally, making progress toward central bank targets in advanced economies and EMDEs, but at a slower pace than previously expected. Core inflation has remained stubbornly high in many economies, supported by rapid growth of services prices. Over the remainder of 2024, continued tight monetary policy stances and slowing wage increases should help reduce inflation further. By the end of 2026, global inflation is expected to settle at an average rate of 2.8 percent, broadly consistent with central bank targets.

The anticipated extent of monetary easing in advanced economies this year has diminished substantially since late 2023—by more than a percentage point in the case of the United States. Expected policy rate paths diverge across major economies, as the European Central Bank proceeds with policy easing while the U.S. Federal Reserve keeps rates on hold for longer. Indeed, aside from short-term fluctuations, market expectations for the path of U.S. interest rates have repeatedly moved higher since 2022. Despite this market reassessment, global financial conditions have eased this year, reflecting solid risk appetite following last year's progress on disinflation and diminished concerns about the possibility of a sharp slowdown in global growth. In particular, global equity markets have made sizable gains.

EMDE financial conditions similarly became more accommodative early this year, aided by declining domestic policy rates, improving global sentiment, and expected easing of advanced economy monetary conditions. EMDE conditions turned somewhat less accommodative in the second quarter, as a strengthening of the U.S. dollar—prompted by geopolitical tensions and firm inflation data in the United States—coincided with a bout of capital outflows. Although market perceptions of sovereign credit risk have generally eased this year, EMDE borrowing costs continue to be high, and marked divergences persist. Indeed, credit ratings and debt sustainability analyses indicate that about 40 percent of EMDEs remain acutely vulnerable to debt-related stress.

D. Share of EMDEs vulnerable to debt-related stress

E. Lower average GDP growth in 2024-25 compared to 2010-19

Deviation of output from pre-pandemic trends

F. Share of EMDEs with GDP per capita growth lower than in advanced economies

Across the forecast horizon, global growth remains lackluster by recent historical standards, at about 0.4 percentage point below the 2010-19 average. In 2024-25, growth is set to underperform its average pace in the 2010s in nearly 60 percent of economies, representing more than 80 percent of global output and population. The subdued outlook—despite the anticipated moderation of various cyclical headwinds—underscores a secular deceleration of potential growth in many large economies. Relative to pre pandemic norms, growth has weakened notably in countries that experienced high rates of inflation, much of which emanated from shocks to supply chains and commodity prices. Yet this trend is set to continue in the coming years, suggesting potentially enduring supply-side weakness. GDP per capita in EMDEs is forecast to grow at about 3 percent on average over 2024-26, well below

the average in 2010-19. Excluding China, EMDE per capita GDP growth is forecast to be lower still, averaging 2.5 percent over 2024-26. Some large EMDEs, such as India, are expected to see continued solid per capita growth. Yet the trend of the 2020s so far is one of uneven and limited progress. Nearly half of EMDEs are set to lose ground relative to advanced economies when viewed over the 2020-24 period. Although this trend is expected to improve somewhat over 2025-26 in EMDEs as a whole, per capita growth is set to remain stagnant in many LICs and FCS.

GLOBAL RISK AND POLICY CHALLENGES

Risks to the outlook have become somewhat more balanced since January, with the global economy thus far proving resilient to high financing costs. However, the balance of risks remains tilted to the downside amid elevated uncertainty. Heightened geopolitical tensions could sharply depress sentiment, disrupt trade and commodity markets, push up inflation, and hurt economic activity; in particular, a conflict-related disruption to global oil supply could push oil prices markedly higher and undermine the disinflation process. Elevated trade policy uncertainty—already at an unusually high level relative to previous years with major elections since 2000—and proliferating trade restrictions could weigh on trade prospects and economic activity. Further trade fragmentation could have adverse global repercussions via declining economic confidence, increasing trade distortions, and related financial market reactions.

A. Probability distribution around global growth forecast

B. Global trade policy uncertainty in years with major elections

Advanced-economy interest rates are at levels last seen before the 2008-09 global financial crisis, and, in light of persistently above-target inflation and tight labor markets, they are likely to remain high for some time. Over the next couple of years, policy interest rates in advanced economies are expected to be more than double their 2000-19 average. Although the global economy has withstood high interest rates better than was anticipated, interest rate-sensitive components of activity will continue to be restrained. Moreover, if further delays in the disinflation process emerge, policy rate cuts may be postponed. A higher resulting path for interest rates, relative to the baseline, could give rise to markedly tighter financial conditions and significantly weaker global growth.

C. Monetary policy interest rates in advanced economies

D. Change in global growth in alternative scenarios

Policy makers face a range of daunting challenges. Coordinated improvements in debt relief will be necessary to free up resources for growth-enhancing investments, particularly in some of the most vulnerable EMDEs, given elevated financing needs. Enhanced international cooperation is needed to tackle the threat of climate change, the fragmentation of trade networks, and mounting food insecurity and conflict. Global cooperation is also essential to leverage the benefits of new technologies such as artificial intelligence (AI), including by tapping AI solutions to address global challenges.

Fiscal space remains narrow in many EMDEs amid weak revenues and elevated debt-servicing costs. Decisive measures will be needed to boost fiscal resources for public investment. These could include reforms to mobilize domestic revenues, the harnessing of digital technologies to simplify tax payments and records management, and reform of costly and inefficient subsidies. Furthermore, even with increased public resources, improved spending efficiency will be needed to meet a wide range of development challenges. In particular, it is critical to improve infrastructure investment efficiency, where EMDEs significantly lag advanced economies.

In the case of small states, elevated exposure to external shocks poses a formidable fiscal challenge, underscoring the need to balance additional investments in human capital and climate-resilient infrastructure with the maintenance of adequate fiscal buffers.

GLOBAL TRADE

Global trade in goods and services was nearly flat in 2023—the weakest performance outside of global recessions in the past 50 years. Amid a sharp slowdown in global industrial production, the volume of goods trade contracted for most of 2023 and fell by 1.9 percent for the year as a whole. The evolution of goods trade diverged across regions, with volumes declining in advanced economies, especially in Europe, and stagnating in EMDEs as expansions in China and Europe and Central Asia (ECA) offset contractions in Latin America and the Caribbean (LAC), Sub-Saharan Africa (SSA), and Middle East and North Africa (MNA).

The value of global services trade grew about 9 percent in 2023, driven primarily by a recovery in tourism flows—exports of travel services surged by about 38 percent (WTO 2024). However, the pace of expansion in tourism was substantially below that in 2022, with recent data indicating tourism activity in line with pre-pandemic levels, suggesting a near-full recovery in most regions. Stabilization in services trade is reflected in the steadying of the global services PMI for new export orders, which has remained closer to neutral thresholds compared to last year.

E. Gross public financing needs

F. Public infrastructure investment efficiency

A. Growth of global goods trade

B. Global PMI new export orders

Global trade growth is projected to pick up to 2.5 percent this year, a significant improvement from last year but well below the average rates observed in the two decades preceding the pandemic (figure 1.3.C). The forecast entails a pickup in goods trade growth after a sluggish start to the year, supported by a rebound in global goods demand as inventory restocking resumes in the United States and the euro area, and as demand from China stabilizes. Meanwhile, services trade growth is expected to stabilize near its pre-pandemic pace. In 2025, trade growth is expected to firm to 3.4 percent, in tandem with a pickup in growth in the euro area and EMDEs excluding China, and remain steady in 2026.

C. Global trade growth

Despite the expected growth in trade this year, by the end of 2024 global trade is set to register the slowest half-decade of growth since the 1990s, mirroring subdued global GDP growth (figure 1.3.D). In the near term, the responsiveness of global trade to global output is likely to remain lower than before the pandemic, reflecting muted investment growth and the recent proliferation of trade restrictions worldwide.

D. Trade growth since 1990s

(Source: <https://www.worldbank.org/en/publication/global-economic-prospects>)

GLOBAL INFLATION

Global inflation has continued to decline, yet it remains above target in most advanced economies and in about one-fourth of inflation-targeting EMDEs. The initial phase of disinflation after the pandemic was underpinned by falling energy prices as well as waning supply chain pressures. Recently, the pace of consumer price disinflation has slowed, reflecting a partial rebound in energy prices, along with a notable slowdown in the rate of decline in core inflation.

A. Core inflation, three-month annualized

B. Goods and services inflation

In advanced economies, disinflation in consumer goods prices appears to have bottomed out, while inflation in consumer services remains elevated. In the United States, resilient economic activity, alongside rapid increases in the cost of shelter, has given rise to persistently high services and, more broadly, core inflation over the past few months. To some extent, the strength of U.S. productivity growth has mitigated these trends, likely lessening the inflationary effects of rising wages. In contrast, subdued productivity in the euro area has driven economy-wide labor costs higher, underpinning elevated core and services inflation, despite anemic euro area demand.

C. Inflation by component, three-month annualized

In EMDEs, headline inflation has generally continued to recede on a 12-month basis. Across most EMDEs in East Asia and Pacific (EAP) and LAC, headline inflation broadly continued to trend near or below pre-pandemic averages through late 2023 and early 2024, despite reaccelerating in some countries. However, progress has been slow and uneven in other regions, with elevated core price increases contributing to high headline inflation rates. As in advanced economies, persistently high core inflation in EMDEs has been driven by services prices, including for shelter.

Greater-than-anticipated inflationary pressures earlier this year have led to an upward revision to the projection for near-term global inflation. Nevertheless, aside from a small group of countries where very high inflation reflects idiosyncratic domestic challenges, global inflation is expected to decline to 3.5 percent in 2024, before easing further, to 2.9 percent in 2025 and 2.8 percent in 2026, broadly consistent with average country inflation targets. The slowdown is expected to be driven by softening core inflation, as services demand moderates and wage growth slows, in addition to a modest decline in commodity prices. Surveys of inflation expectations similarly imply gradual global disinflation over the next two years.

FINANCIAL DEVELOPMENTS

Global financial conditions have eased, on balance, since last year, primarily reflecting declines in risk premia amid still-elevated interest rates. Central banks across major advanced economies are expected to gradually lower policy rates this year, but the level of real interest rates is set to remain a headwind to economic activity—albeit a diminishing one—for some time. Policy rate projections derived from financial markets have been volatile since U.S. policy tightening started in 2022, with expectations repeatedly revised higher over time. Meanwhile, most advanced-economy central banks continue to emphasize that the pace of easing will be cautious, reflecting persistent inflationary pressures—and, in the case of the United States, robust economic activity. As such, government bond yields are well above pre-pandemic levels and are likely to remain so, absent large negative shocks to growth.

Risk appetite picked up globally early in the year—particularly in advanced economies—signaling optimism that continued steady disinflation might accompany resilient growth. With volatility subdued, advanced economy equity valuations reached elevated levels, especially in the United States, where confidence regarding potential productivity gains from AI played a key role. Sentiment briefly wilted in April, amid firm U.S. inflation data and escalating geopolitical tensions, but rebounded thereafter. Although the cost of credit remains high, perceptions of corporate credit risk appear muted—except for asset classes, such as office real estate, that have been adversely affected by structural post-pandemic shifts in activity. Corporate credit spreads remain well below 2010-19 average levels in both the United States and the euro area. Banks in these jurisdictions continue to report tightening of standards for lending to firms, but by markedly narrowing majorities.

EMDE financial conditions also eased in the first quarter of 2024, reflecting expectations of easing advanced-economy monetary conditions, improving global investor sentiment, and ongoing policy rate cuts in many large EMDEs. Conditions turned less accommodative early in the second quarter, as safe haven flows and declining expectations of U.S. rate cuts stoked a notable strengthening of the U.S. dollar and a bout of debt and equity portfolio outflows. Sovereign spreads have nonetheless trended to below 2010-19 levels in the majority of middle income EMDEs, signalling investor confidence that financial stress risks are broadly contained. In contrast, spreads remain elevated among EMDEs with weak credit ratings, even if they have declined substantially this year.

Indeed, despite some easing of global conditions, financial stress concerns remain acute in about 40 percent of EMDEs—comprising those with weak credit ratings, and those where debt sustainability analyses indicate a high risk of, or existing, debt distress. Among weakly rated countries that had market access in the 2010s, a combination of political instability, the pandemic and other external shocks, and financial crises in the 2020s has rendered non-concessional debt prohibitively expensive. Among unrated countries—many of them low-income countries—debt burdens have grown increasingly severe owing to a decade of debt build-up in the 2010s, coupled with anemic post-pandemic recoveries and rising debt-service costs.

RECENT DEVELOPMENTS AND OUTLOOK

After softening in the second half of 2023, activity in EMDEs generally stabilized in early 2024, with indicators of domestic demand, including retail sales and consumer confidence, firming somewhat. In early 2024, headline manufacturing and services sector PMIs broadly moved up, with a still greater improvement in headline manufacturing PMIs for EMDEs excluding China. Economic conditions have nonetheless continued to diverge, with ongoing weakness among vulnerable EMDEs. Growth in countries with stronger credit ratings has so far outpaced growth in weaker-rated countries, including many grappling with high debt and financing costs, and in those facing acute challenges, such as elevated levels of domestic conflict and violence.

EMDE goods trade growth has shown signs of improvement, with the manufacturing component of new export orders PMIs returning to expansionary territory in early 2024, for the first time since mid-2023. In contrast, services exports decelerated in most EMDEs, reflecting an increasingly mature tourism recovery following the pandemic. However, countries that lifted pandemic-related restrictions later, mostly in East Asia and Pacific (EAP), continue to see a rebound in tourist flows.

Aggregate growth in EMDEs is forecast to edge down from 4.2 percent in 2023 to 4 percent in 2024 and remain broadly stable over 2025-26, near estimates of EMDE potential growth for the 2020s. However, these aggregates mask notable differences in regional trends, with the expected pace of growth falling short of the 2010-19 average in EAP, ECA, and South Asia (SAR), but returning close to pre-pandemic averages in other regions over 2025-26, partly owing to still supportive commodity prices (box 1.1). Excluding China, EMDE growth is projected to inch up to a still subdued pace of 3.5 percent this year, before firming to about 3.9 percent in 2025-26, reflecting a cyclical upswing as monetary policy becomes less restrictive and demand from advanced economies gathers pace.

In 2024, the contribution to growth from domestic demand in EMDEs is expected to soften relative to 2023, before firming over 2025-26. The weaker contribution from domestic demand this year, however, largely reflects idiosyncratic developments in some of the seven largest EMDEs (EM7), following strong performance in 2023. In most of these economies, consumption growth is anticipated to decelerate in 2024, as the boost from idiosyncratic factors fades, and then stabilize over 2025-26. In contrast, in other EMDEs, domestic demand is expected to gather pace over the forecast horizon. Among these economies, private consumption is envisaged to rebound in 2024 and further strengthen over 2025-26, with declining inflation and interest rates supporting real household incomes and consumer confidence. The rebound in consumption is expected to be broad-based across most regions.

INDIAN ECONOMIC OVERVIEW

INTRODUCTION

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022-23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand

over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 173.82 lakh crores (US\$ 2.08 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at US\$ 23.2 billion for the 2023-24 compared to US\$ 67.0 billion or 2.0% of GDP in the preceding year. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In

February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Note: Conversion rate used for January 2024 is Rs.1 = US\$ 0.012

INDUSTRY OVERVIEW

Introduction

India is the world's largest spice producer. It is also the largest consumer and exporter of spices. The production of different spices has been growing rapidly over the last few years. Production in 2022-23 stood at 11.14 million tonnes compared to 11.12 million tonnes in 2021-22. During 2022-23, the export of spices from India stood at US\$ 3.73 billion from US\$ 3.46 billion in 2021-22. During 2021-22, the single largest spice exported from India was chilli followed by spice oils and oleoresins, mint products, cumin, and turmeric.

India produces about 75 of the 109 varieties which are listed by the International Organization for Standardization (ISO). FMCG Industry

The FMCG sector in India expanded due to consumer-driven growth and higher product prices, especially for essential goods. FMCG sector provides employment to around 3 million people accounting for approximately 5% of the total factory employment in India. FMCG sales in the country grew 7-9% by revenues in 2022-23. The key growth drivers for the sector include favourable Government initiatives & policies, a growing rural market and youth population, new branded products, and growth of e-commerce platforms. Resilience needs to be the key factor in the manufacturing process, daily operations, retail and logistic channels, consumer insights and communication that will help FMCG companies to withstand the test of time and create more value for consumers in the long run. India's fast-moving consumer goods (FMCG) sector grew 7.5% by volumes in the April-June 2023 quarter, the highest in the last eight quarters, led by a revival in rural India and higher growth in modern trade.

CRISIL forecasts 7-9% revenue growth for the FMCG sector in the current FY25, driven by increased volume and rural demand recovery. Fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years because of rising disposable income, a rising youth population, and rising brand awareness among consumers.

With household and personal care accounting for 50% of FMCG sales in India, the industry is an important contributor to India's GDP.

India is a country that no FMCG player can afford to ignore due to its middle-class population which is larger than the total population of USA. The Indian FMCG market continues to rise as more people start to move up the economic ladder and the benefits of economic progress become accessible to the public. More crucially, with a median age of just 27, India's population is becoming more consumerist due to rising ambitions. This has been further aided by government initiatives to increase financial inclusion and establish social safety nets.

Growing awareness, easier access and changing lifestyles have been the key growth drivers for the sector. The urban segment (accounts for a revenue share of around 65%) is the largest contributor to the overall revenue generated by the FMCG sector in India. However, in the last few years, the FMCG market has grown at a faster pace in rural India compared to urban India. Semi-urban and rural segments are growing at a rapid pace and FMCG products account for 50% of the total rural spending.

Market Size

Total revenue of FMCG market is expected to grow at a CAGR of 27.9% through 2021-27, reaching nearly US\$ 615.87 billion. In 2022, urban segment contributed 65% whereas rural India contributed more than 35% to the overall annual FMCG sales. Good harvest, government spending expected to aid rural demand recovery in FY24. The sector had grown 8.5% in revenues and 2.5% in volumes last fiscal year. In the January-June period of 2022, the sector witnessed value growth of about 8.4% on account of price hikes due to inflationary pressures. In third quarter of FY23, the FMCG sector clocked a value growth of 9.0% YoY — lower than the 9.2% YoY value growth seen in third quarter of FY22.

As per CRISIL, India's dairy industry is projected to experience a healthy revenue growth of 13-14% in FY25, driven by strong consumer demand and increased raw milk supply.

According to NielsenIQ's report, in 2024, the FMCG industry in India is expected to grow between 4.5-6.5%, owing to strength in the sector and Indian economy.

Indian food processing market size reached US\$ 307.2 billion in 2022 and is expected to reach US\$ 470 billion by 2028, exhibiting a growth rate (CAGR) of 9.5% during 2023-2028.

The Union government approved a new PLI scheme for the food processing sector, with a budget outlay of Rs. 109 billion (US\$ 1.46 billion). Incentives under the scheme will be disbursed for six years to 2026-27.

India's FMCG sector has long been the top spender in the country's advertising market, commanding nearly one third share Rs. 31,000 Crore (US\$ 3.75 billion) in 2023 of the total advertising expenditure. India includes 780 million internet users, where an average Indian person spends around 7.3 hours per day on their smartphone, one of the highest in the world. Number of active internet users in India will increase to 900 million by 2025 from 759 million in 2022. In 2022, India's consumer spending was US\$ 2,049.57 billion. Indian villages, which contribute more than 35% to overall annual FMCG sales, are crucial for overall revival of the sector. E-commerce now accounts for 17% of the overall FMCG consumption among evolved buyers, who are affluent and make average spends of about Rs. 5,620 (US\$ 677.11 million).

The Indian e-commerce market is anticipated to grow from US\$ 83 billion in 2022 to US\$ 185 billion in 2026. By 2030, it is expected to have an annual gross merchandise value of US\$ 350 billion. Fuelling e-commerce growth, India is expected to have over 907 million internet users by 2023, which accounts for 64% of the total population of the country.

The market has grown exponentially over the past five years due to the surge in internet and smartphone users, improved policy reforms, and increase in disposable income. Mobile wallets, Internet banking, and debit/credit cards have become popular among customers for making transactions on e-commerce platforms. The total value of digital transactions stood at US\$ 300 billion in 2021 and is projected to reach US\$ 1 trillion by 2026.

The India online grocery market size has been projected to grow from US\$ 4,540 million in 2022 to US\$ 76,761.0 million by 2032, at a CAGR of 32.7% through 2032.

FMCG giants such as Johnson & Johnson, Himalaya, Hindustan Unilever, ITC, Lakmé and other companies (that have dominated the Indian market for decades) are now competing with D2C-focused start-ups such as Mamaearth, The Moms Co., Bey Bee, Azah, Nua and Pee Safe. Market giants such as

Revlon and Lotus took 20 years to reach the Rs. 100 crore (US\$ 13.4 million) revenue mark, while new-age D2C brands such as Mamaearth and Sugar took four and eight years, respectively, to achieve that milestone.

GOVERNMENT SCHEMES

1. One Nation One Ration Card:

Introduction:

The implementation of nation-wide portability of ration cards through “One Nation One Ration Card (ONORC)” scheme, is an endeavour of the Department of Food & Public Distribution, Government of India to empower about 81 crore beneficiaries. This plan has been launched under the National Food Security Act (NFSA), 2013, which aims to ensure that anyone can take their share of food grains from any district of any state of the country.

Objective:

- Through this facility, while a migrant beneficiary is able to get ration at the destination he or she is working in, his/her family back home is also allowed to get their part of the entitled ration to support itself.
- This system provides flexibility to all NFSA beneficiaries to lift their foodgrains from any FPS (Fair Price Shop) of their choice.

Need:

- Owing to the defined coverage of beneficiaries under the National Food Security Act (NFSA), 2013 in each State/UT, it was difficult for migrant beneficiaries to get a new ration card issued. Even if they were able to get one issued, it introduced the ‘duplicity’ of ration cards/beneficiaries in the country’s Targeted Public Distribution System (TPDS), thereby potentially depriving many other left-out and genuinely deserving beneficiaries from getting included under the fold of NFSA.
- Now problems of getting a new ration card and duplicity of beneficiaries are solved and the government is enabling the inclusion of all genuine beneficiaries of State/UT through portability under the fold of NFSA.
- This mechanism can plug the leakage/diversion of un-lifted foodgrains in FPSs, as they can now be lifted by their rightful beneficiaries through portability and gets adjusted between States/UTs, thereby minimizing the chances of diversion.

Technology Driven Scheme:

- The scheme enables migrant beneficiaries to get their food grains from a FPS of their choice in most parts of the country, by using their same/existing ration card with biometric authentication of identity on an Electronic Point of Sale (e-PoS) device
- This system of portability is being implemented in all states and Union Territories where the system is being built upon the strong foundations of computerized Targeted Public Distribution System

(TPDS) operations. This includes the installed infrastructure of ePoS devices at the FPS and seeding of beneficiaries' Aadhaar numbers with their ration cards.

- A copy of either the Ration card or Aadhar card is acceptable. Beneficiaries can simply tell either their Ration card number or seeded Aadhar number to the FPS dealer to receive their ration.
- The Department of Food & Public Distribution, in association with NIC, has launched a Mobile Application "MERA RATION" for the benefit of NFSA beneficiaries, particularly migrant beneficiaries, to take maximum advantage of the One Nation One Ration Card (ONORC) plan.
- Currently, the 'Mera Ration' mobile application is available in 12 languages.
- On it, other information like registration of migrants, details of available entitlements, location of nearby FPS, information on past transactions, eligibility criteria, list of ONORC states, etc. can be accessed.

Outcomes of ONORC:

- The broad-based reform of portability covering nearly 81 Crore NFSA beneficiaries in all States/UTs is being achieved with minimal outlay of just Rs. 127 Crore, over a period of 4 years.
- This is a one-of- its-kind Citizen-Centric initiative in the country, swiftly implemented in 34 States/UTs in a short-span of time (as of August 2021), after being sanctioned in 2018-19 and implemented from August 2019.
- ONORC was helpful to NFSA beneficiaries in availing food grains from any location during COVID pandemic/ lockdown period.
- During the period between 01-April-2020 and 30-September-2021, about 24.32 crore portability transactions under NFSA were carried out across States/UTs, benefiting large number of NFSA beneficiaries, mostly migrants, at the Fair Price Shops (FPS) near to their location of work/temporary stay.
- Under the NSFA, almost 23.6 crore Ration cards have been digitized to cover 80 crore beneficiaries of all states/UTs.
- Almost 93.1 % Ration Cards and 90.1 % beneficiaries are Aadhar-seeded at a national level.
- Online allocation orders for food grains for all FPS has been implemented in all states/UTs, besides Chandigarh and Puducherry.
- Supply Chain Management of food grains is computerized in 31 States/UTs for online management of stocks in godowns and its in-and-out movement.

2. Mid-day meal

The National Programme of Nutritional Support to Primary Education (NP-NSPE) which is popularly known as the Mid-day Meal Scheme was launched by the Government of India in 1995. NP-NSPE states that it aims to address "classroom hunger" and encourage poor children, belonging to disadvantaged sections, to attend school regularly and help them concentrate on classroom activities. The mid-day meal programme is a multi-faceted programme of the Government of India that, among other things, also seeks to address issues of food security, lack of nutrition and access to education on a nationwide scale. The Scheme is the world's largest school feeding programme reaching out to about 12 crore children in over 12.65 lakh schools/EGS centres across the country.

The level of malnutrition is of great concern in India with over 40% of children being classified as undernourished. Anaemia affects over 3/4th of the school children due to low intake of iron and folic acid. The reasons for such high levels of malnutrition and anaemia are complex. They include poverty, gender inequity, specific dietary patterns and recurrent illness, all these acting in conjunction.

School feeding programmes are popular in the developing world and beyond, not only because of their educational but also for their nutritional benefits. Mid-day meal acts as a regular source of "supplementary nutrition" for children, which facilitates their healthy growth. To achieve the objectives of the Scheme, the guidelines prescribe specific nutritional content in the mid-day meal

On 15th August 1995, Midday Meal Scheme was launched in India for children under the name of 'National Programme of Nutritional Support to Primary Education' (NP-NSPE). Recently (September 2021), the Government renamed this scheme to Pradhan Mantri Poshan Shakti Nirman or 'PM POSHAN'. Each alteration in name brings some changes in the scheme.

Under the Midday Meal Scheme in India, around 11.80 crore children (in 11.20 lakh government and government-aided schools) will get hot cooked food.

However, under the new scheme 'PM POSHAN', 24 lakhs of children studying in pre-primary schools who are already covered under the Integrated Child Development Services will get food under the MDM scheme.

The PM Poshan will be operational initially for 5 years (2021-22 to 2025-26). Here, the Central Government will take responsibility for Rs. 54,061 crores of the total approximate expenditure of Rs. 1.3 lakh crore. On the other hand, the State Governments will pay Rs. 31,733 crores.

Note: The Central Government will release Rs. 45,000 crores as subsidies for food grains.

3. SPICED Scheme

Spices Board, under the Ministry of Commerce and Industry, has launched a transformative scheme aimed at significantly enhancing the export of spices and value-added spice products as well as improving the productivity of cardamoms and upgrading the post-harvest quality of spices across India for export.

Various programmes rolled out under the scheme 'Sustainability in Spice Sector through Progressive, Innovative and Collaborative Interventions for Export Development (SPICED)' will be implemented during the remaining period of the 15th Finance Commission cycle, till FY 2025-26, with a total approved outlay of Rs. 422.30 crore.

The SPICED scheme is expected to facilitate value addition and to drive innovation and sustainability in the spice sector by introducing new sub-components/programs like the Mission Value Addition, Mission Clean and Safe Spices, promotion of GI spices, support for entrepreneurship through Spice Incubation Centres, etc. The scheme gives thrust on farmers groups / FPOS / Farmers Clusters identified under ODOP and DEH, SC/ST community, Exporters from NE region, and SMEs.

The programs under the components such as Improving the productivity of cardamom and post-harvest quality upgradation of spices are specifically designed to empower farmer groups, including Farmer Producer Organizations (FPOs), Farmer Producer Companies (FPCs), and Self-Help Groups (SHGs) in key spice-growing regions. These groups will be prioritized for post-harvest improvement

of spices, with targeted assistance provided to enhance creation of an exportable surplus of spices, in compliance with the applicable food safety and quality standards.

The programs for cardamom focuses on increasing the productivity of both small and large cardamom through replanting efforts, production of quality planting material, developing water sources, adopting micro-irrigation systems, etc. Additionally, there are programs to promote weather-based insurance to protect farmers' interests. Similarly, post-harvest quality improvement of spices is addressed through programs such as Mission Clean and Safe Spices through post-harvest improvement by groups in identified clusters, promotion of sustainable production and certification systems and extension advisory services.

In a move to further strengthen value addition in the spice sector, the Board is introducing components such as Enhancing capacities for market expansion, Trade promotion, and Technological interventions. These components offer support for technological and infrastructural interventions for processing and value addition of spices, setting up or upgradation of in-house laboratories, product development, market development & branding, and implementation of food safety & quality assurance mechanisms, all aimed at improving India's global competitiveness in the spice sector. To strengthen trade promotion efforts, programs have been designed to support participation in international fairs, buyer-seller meets, and for promotion of GI-tagged spices in domestic and global markets. Moreover, the Board provides financial assistance for Spice Incubation Centres to foster innovation and entrepreneurship, providing a platform for startups, SMEs, and entrepreneurs to develop new products and processes within the spices sector. While exporters with a valid Certificate of Registration as Exporter of Spices (CRES) are eligible for assistance under these programs, preference will be given to first-time applicants, Small and Medium Enterprises (SMEs), etc.

Receipt and processing of applications under the scheme SPICED are online. Spices Board's officials shall support the growers in submitting the application through the online portal, if required. Scheme activities will be geo-tagged and fund availability, status of applications under different components, list of beneficiaries, etc. will be published in the Board's website for better transparency.

This multifaceted scheme underscores the Board's commitment to bolstering India's spice industry, improving farmer livelihoods, and solidifying India's position as a global leader in spice production, processing, and export.

The online submission of application for availing assistance under various programs of the SPICED scheme will commence from 20th September 2024. For more information and assistance, interested stakeholders may visit the Board's website www.indianspices.com or contact the nearest Spices Board office.

Export Development and Promotion of Spices

This initiative by the Spices Board of India aims to support the exporter to adopt high-tech processing technologies and upgrade the existing level of technology for the development of industry and to meet the changing food safety standards of the importing countries. The initiative provides benefits of infrastructure development, promoting Indian spice brands abroad, setting up infrastructure in the major spice growing centres, promoting organic spices and special programmes for north-eastern entrepreneurs.

Setting up and maintenance of infrastructure for common processing (Spices Parks)

Spices Board has launched eight crop-specific Spices Parks in key production/market centres intending to facilitate the farmers to get an improved price realization and wider reach for their produce. The purpose of the park is to have an integrated operation for cultivation, post-harvesting, processing, value-addition, packaging and storage of spices and spice products. The common processing facilities for cleaning, grading, packing, and steam sterilization will help the farmers to

enhance the quality of the produce, resulting in better price realization.

Spice Complex Sikkim

Spices Board submitted a project proposal to the state's cell for setting up a Spice Complex in Sikkim seeking financial assistance for facilitating and demonstrating common processing and value addition in spices to help farmers and other stakeholders in the state.

REVENUE MODEL

We operate on a multiple sales channel model the details of which are as under:

1. Business to Business (B2B): B2B sales involve selling our products to other businesses, which may use them or sell them to their own customers. The different type of revenue model in B2B sales is as under:

- **General Trade:** General or traditional trade can be defined as the trade conducted by local stores or shops that cater to the needs of local consumers. These typically include wholesalers and distributors. They work to satisfy the typical requirements of the end consumer and deal with small amounts of products. Our company works with a network of approximately 432 wholesalers

distributors across India as on March 31, 2025. These distributors play a key role in marketing our products through their own sales teams, while our company provides additional support via our marketing personnel. Our company sell our products to these distributors, who then resells our products to local markets and small retailers. This model generates revenue through wholesale bulk sales, with distributors marking up the products for retail.

- **Modern Trade:** Modern trade is a more structured and sophisticated system of chain retailers like mini-markets, supermarkets, and hypermarkets. They are found only in cities and are typically corporate-owned. Our company focuses on establishing relationships with large retail chains and supermarket giants like D-Mart, Metro Cash & Carry, Reliance Retail and Dealshare. Our company directly sells to these retail chains, where it places products for consumer purchase. A dedicated team of 121 sales and marketing professionals is employed to work specifically within these stores, driving visibility, sales, and ensuring the products are well-presented to consumers. In this model, revenue is earned by selling products at wholesale prices to these large retailers, while the retailers mark up prices for consumer sales. Additionally, in-store promotions and bulk discounts may be utilized to increase sales volumes.

In this model, we supply products to the Distribution Centres (DCs) of these platforms, from where customer orders are efficiently fulfilled and delivered. We enter into contracts with these platforms for product listings and agrees on pricing terms. Sales are driven through commission-based models, where platforms charge a fee per transaction. This model enables us to reach tech-savvy urban consumers looking who prioritize speed and convenience, further expanding our brand presence in the fast-growing digital retail space

This allows our customers to offer good-quality spices without investing in production. We provide flexible packaging options like pouches, jars, and bulk packs, with customizable minimum order quantities to accommodate businesses of all sizes. This model helps us to reach new markets, increase sales volume through larger orders, and build long-term client partnerships. It also allows us to focus on our strength of producing and processing good quality spices, while our clients manage marketing and distribution, ensuring steady growth and market adaptability.
 - **HORECA Sales:** The HoReCa sector includes Hotels, Restaurants, and Catering, where we provide bulk spice solutions tailored to chefs and foodservice providers. OUR COMPETITIVE STRENGTHS

1. Integrated Pest Management (IPM)

Our company is dedicated to providing good quality natural spices while supporting sustainable and ethical practices in the sourcing and production of our products. One of the major challenges to achieving these quality standards is the widespread overuse of chemical pesticides by farmers, due to lack of awareness and knowledge. While pesticides are intended to boost crop production, their excessive use can result in harmful residues in food, soil degradation, and adverse effects on human health, wildlife, and the broader environment.

To mitigate these risks, we have adopted Integrated Pest Management (IPM). Integrated Pest Management (IPM) is a sustainable and environmentally conscious approach to control pests that minimizes the need for chemical pesticides, benefiting both human health and the environment. The core principle of IPM is prevention, employing natural methods to reduce pest damage while maintaining crop health.

MANUFACTURING PROCESS

A. Manufacturing Process of Blended Spices

Details of the Manufacturing process is as under:

- ❖ **Raw Material Procurement and Quality Control:** The process begins with the sourcing of good quality of raw spices from reliable suppliers. These raw spices can include whole spices like pepper, cumin, coriander, turmeric, and cardamom, as well as ground spices. Upon receiving the raw spices at the manufacturing unit, they undergo an inspection process. This includes checking for quality, freshness, foreign matter, and any signs of contamination or damage. Spices that meet the quality standards are then accepted for further processing. It's essential to ensure the raw materials are

fresh, free from contamination, and meet industry standards. If the materials pass Quality Control (QC), they are transferred to Raw Material Storage. If they fail QC, they are returned to the supplier.

❖ **Cleaning and Sorting:** Before processing, raw spices must be cleaned and sorted. This is done to remove dirt, stones, and other foreign impurities. Various cleaning methods may be used, such as sieving or air blowing. Sorting is performed manually or using automated systems to ensure uniformity in size and quality. After cleaning, the raw materials are mixed in precise proportions. This ensures consistency in the product, as the components need to be uniformly blended to achieve the desired quality and characteristics.

❖ **Grinding and Cooling:** The mixed raw materials are ground using specific equipment to achieve the desired particle size or consistency.

After grinding, the material is cooled to prevent it from overheating and to stabilize its texture. Cooling is essential to ensure that the material doesn't degrade or change properties, which could affect the final product quality.

❖ **Metal Detection and Inspection:** The processed material is passed through a metal detector to ensure that there are no metal contaminants. This step is essential for ensuring the safety and quality of the product.

After that a thorough inspection is carried out to check the material for any defects, inconsistencies, or issues that could compromise the final product's quality.

❖ **Storage of Grounded and Cooled Materials:** Once the materials have passed inspection, they are stored in a designated area under controlled conditions to preserve their quality.

For materials that are sensitive to temperature or require refrigeration, they are transferred to outsourced cold storage.

❖ **Packaging:** The final product (either whole or ground spices) is then packaged into appropriate containers, such as sachets, jars, bottles, or bulk packaging. Packaging is done in a hygienic environment to prevent contamination and preserve the spices' aroma and flavor. Some packaging units also use vacuum sealing or nitrogen flushing to extend shelf life.

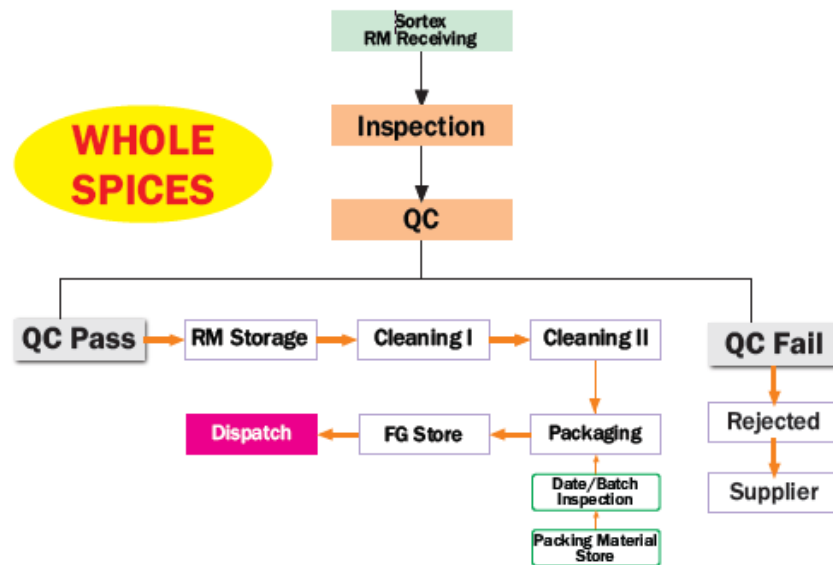

❖ **Labeling and Quality Control:** Before the packaged spices are released to the market, they undergo rigorous quality control checks. This includes testing for:

- Purity
- Expiration Date
- Date of Manufacturing
- Color
- Aroma
- Taste
- Pesticide residues etc.

Proper labeling is done on each product with details such as the name, ingredients, manufacturer's information, expiry date, and other legal information.

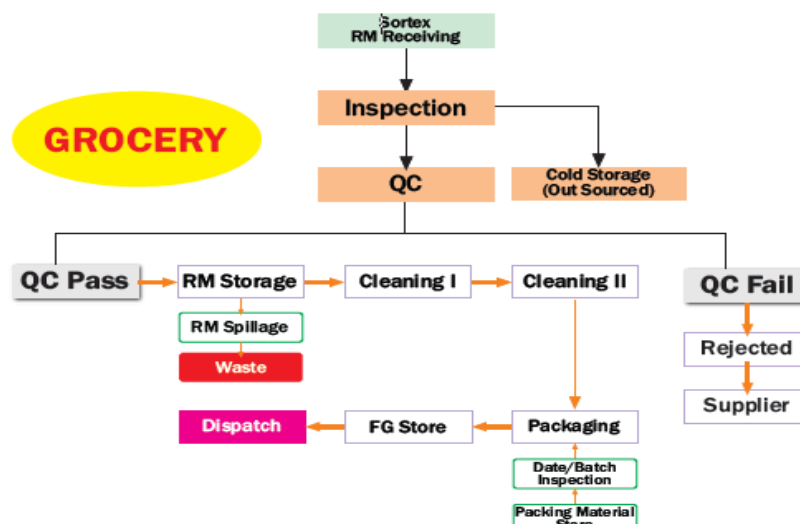

❖ **Storage and Distribution:** The final packaged spices are stored in a cool, dry, and dark environment to preserve their flavor and aroma. After storage, they are ready to be distributed to distributors, wholesalers, or directly to customers.

B. Manufacturing Process of Whole Spices:

- ❖ **Raw Material Receiving and Inspection:** The process begins with the receipt of raw materials, followed by a thorough quality inspection. If the materials meet quality standards, they are transferred to raw material storage. Any materials that fail quality control (QC) are returned to the supplier.
- ❖ **Two-Step Cleaning Process for Raw Materials:** To ensure quality and purity the raw materials undergo a Two - Step cleaning process to remove dust and impurities. The process are as follows:
Cleaning I: - Initial cleaning of the raw material to remove dust and impurities.
Cleaning II: - Secondary cleaning process to refine the material and meet stringent quality standards.
- ❖ **Packaging, Date/Batch Inspection, and Dispatch:** Once processed, the final product is carefully packaged in appropriate containers, ensuring proper sealing, labelling, and compliance with safety and quality standards. Before dispatch, a final inspection is conducted to verify batch numbers, manufacturing dates, and other essential details for traceability and compliance. The packaged goods are then moved to Finished Goods (FG) storage for inventory management.
- ❖ **Dispatch of Finished Goods:** After passing the final inspection and packaging stage, the products are prepared for dispatch to customers, distributors or wholesalers ensuring timely delivery and product integrity.

C. Manufacturing Process of Grocery Items:

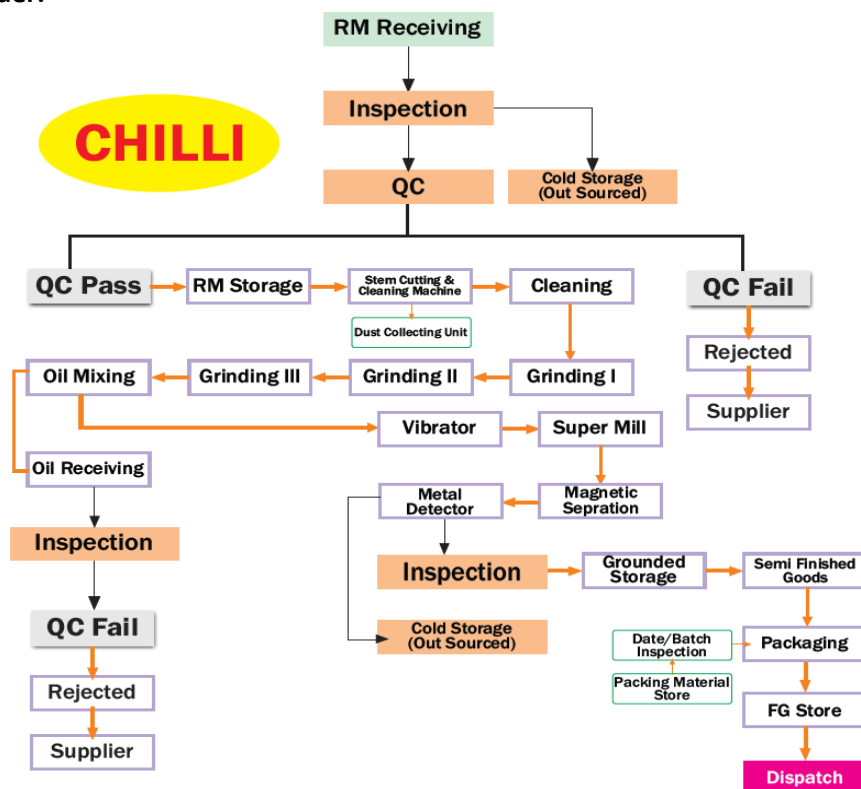

- ❖ **Receiving and Inspection of Grocery Items:** The process begins with receiving grocery items from suppliers. Each shipment undergoes a thorough inspection to verify quality, quantity, and overall condition. This check ensures that products are free from damage, spoilage, or contamination and meet safety standards. Approved items are moved to storage, while non-compliant products are either returned to the supplier or handled according to company policies.
- ❖ **Cleaning and Sorting of Grocery Items:** Certain grocery items require cleaning before they are made available for sale. This step involves removing the dirt and other impurities from the products.

Following cleaning, products are sorted based on type, size, and quality, ensuring proper organization and presentation.
- ❖ **Packaging of Grocery Item:** Grocery items are then packaged according to product-specific requirements. The packaging is designed to maintain freshness, protect against contamination, and provide essential details such as expiration dates, nutritional information, and ingredient lists. Proper labelling ensures compliance with food safety regulations, and all packages are securely sealed to preserve product integrity.
- ❖ **Finished Goods Storage and Dispatch:** After packaging, products are stored in the finished goods storage area. Upon receiving orders, items are carefully picked, packed, and dispatched to their final destination, ensuring timely and efficient delivery.

D. MANUFACTURING PROCESS OF GROUND SPICES:

➤ Chilli Powder:

Details of the processing process is as under:

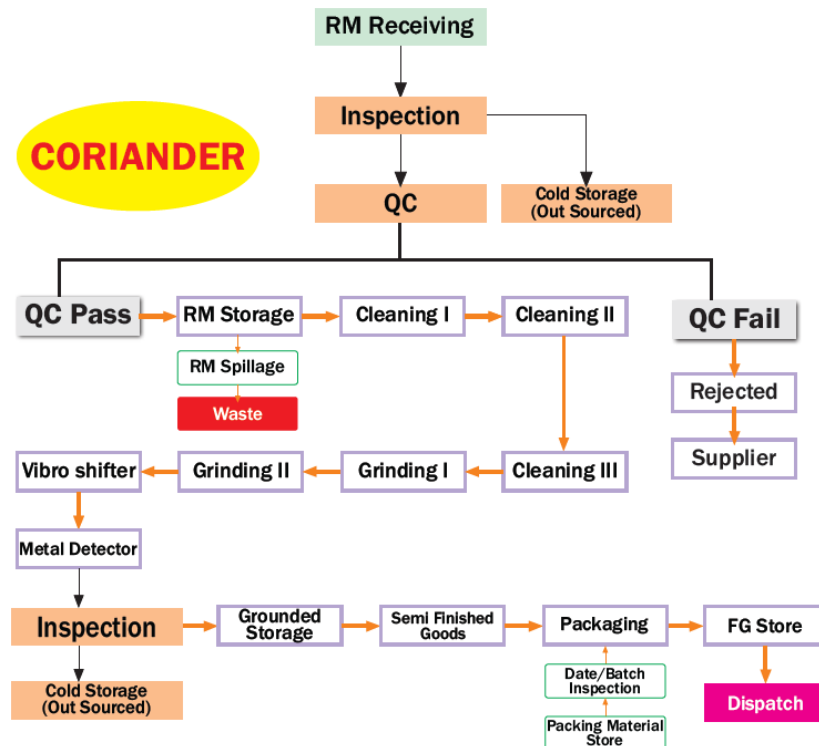

- ❖ **Raw Material Procurement and Quality Control:** The process begins with the sourcing of good quality dried chillies from reliable suppliers. Upon arriving at the manufacturing unit, the dried chillies undergo a quality inspection to check for freshness, color, pungency, moisture content, and any signs of contamination or damage. Only chillies that meet industry standards are accepted for further processing, while non-compliant batches are rejected. Approved dried chillies are then transferred to raw material storage.

- ❖ **Cleaning and Sorting:** Before processing, the stems of all the dried chillies are removed in order to preserve the colour as well as maintain the spiciness. Post this stem removal process, the dried chillies are thoroughly cleaned and sorted to remove dirt, cut stems, stones, and other foreign impurities. Various cleaning methods, such as sieving or air blowing are used to ensure purity. After cleaning, the dried chillies are sorted manually or using automated systems to separate them based on size, color, and quality. This ensures consistency in the final chilli powder.
- ❖ **Grinding and Refining of Raw Material:** After cleaning, the chillies undergo a three-step grinding process to achieve the desired fine powder consistency:
 - Grinder 1:** Initial size reduction of dried chillies.
 - Grinder 2:** Further refinement to break down coarse particles.
 - Grinding 3:** Final grinding to achieve uniform fine chili power.
- ❖ **Oil Addition and Mixing:** After the grinding process, the edible oil is received from the suppliers and undergoes a quality inspection to ensure it meets the required standards. Once approved, the oil is mixed thoroughly with the ground chili powder to achieve the desired consistency and quality.
- ❖ **Final Processing of Raw Material:** After the oil mixing stage, the chilli powder undergoes a vibration process to eliminate air pockets and ensure uniform distribution of the material. This step enhances product consistency and quality. Next, the powder is further refined using a super mill, which improves texture, smoothness, and overall finish. To ensure safety and purity, the powder then undergoes magnetic separation, effectively removing any potential metallic contaminants. This final step ensures that the chilli powder meets the quality and safety standards before packaging.
- ❖ **Storage of Grounded and Cooled Materials:** Once processed, the chilli powder is stored in a designated area under controlled conditions to maintain its color, aroma, and pungency. For temperature-sensitive batches, the powder is transferred to outsourced cold storage facilities.
- ❖ **Packaging:** The chilli powder is then packaged in various formats, such as sachets, jars, bottles, or bulk packs, depending on market requirements. Packaging is done in a hygienic environment to prevent contamination and preserve the product's freshness. Advanced techniques like vacuum sealing or nitrogen flushing may be used to extend shelf life.
- ❖ **Labeling and Quality Control:** Before market release, the packaged chili powder undergoes rigorous quality control checks. This includes testing for:
 - Purity
 - Manufacturing and Expiration Dates
 - Color and texture
 - Aroma and taste
 - Pesticide residues etc.

Each package is then labeled with essential details such as the name, ingredients, manufacturer's information, expiry date, and other legal information.

- ❖ **Storage and Distribution:** The final packaged chilli powder is stored in a cool, dry, and dark environment to maintain its vibrant color and spicy flavor. Once ready, it is distributed to wholesalers, distributors and customers, ensuring timely delivery and optimal product quality.

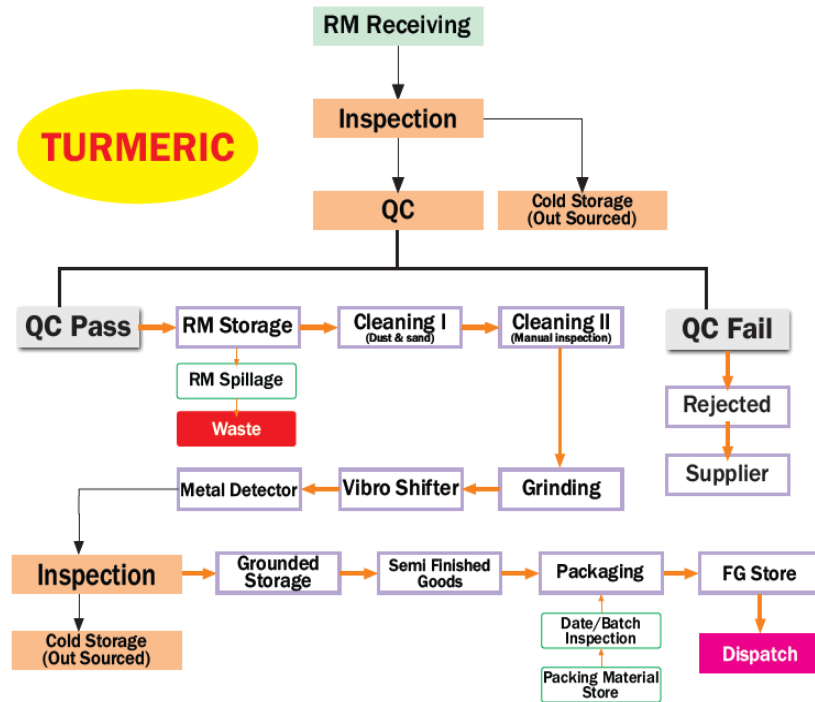

➤ **Coriander Powder:**

Details of the processing Process is as under:

- ❖ **Raw Material Procurement and Quality Control:** The process begins with the receipt of Raw Materials (RM) i.e. coriander seeds, followed by Inspection to assess their quality. If they meet the Quality Control (QC) standards, they are transferred to Raw Material Storage. If they fail QC, they are returned to the supplier.
- ❖ **Cleaning Process for Raw Materials:** To ensure the good quality, the coriander seeds undergo a three-step cleaning process:
 - **Initial Cleaning:** Removal of loose dust and debris.
 - **Inspection & Contaminant Removal:** Larger impurities and foreign materials are eliminated.
 - **Final Cleaning:** Specialized techniques are used to achieve the desired purity and cleanliness.
- ❖ **Grinding and Refinement of Raw Materials:** Once cleaned, the coriander seeds are transferred to Grinder 1, where they are ground using Hammer Mill 1. The semi-processed material is then further refined in Grinder 2 with Hammer Mill 2 for finer grinding. After this stage, the powdered coriander passes through a Vibro Sifter, ensuring uniform texture and quality.
- ❖ **Metal Detection, Storage, and Transfer to Semi-Finished Goods:** To maintain product safety, the coriander powder undergoes metal detection to identify and remove any contaminants. The refined powder is then stored in Ground Storage and Cold Storage to preserve freshness. From ground storage, it is transferred to the Semi-Finished Goods section for further processing.
- ❖ **Packaging, Storage, and Final Dispatch of Finished Goods:** In the final stage, the coriander powder is packed in appropriate packaging materials to maintain its quality and shelf life. The packaged goods are then moved to Storage and eventually Dispatch to their final destination.

➤ **Turmeric Powder:**

Details of the processing Process is as under:

- ❖ **Raw Material Handling and Quality Control:** The process begins with the receipt of Raw Materials (RM) i.e. dried turmeric rhizomes, followed by Inspection to assess their quality. If they meet the Quality Control (QC) standards, they are transferred to Raw Material Storage. If they fail QC, they are returned to the supplier or in cases of quality issues Pillage and Destruction processes are implemented for the non-compliant materials.
- ❖ **Two-Step Cleaning Process for Raw Materials:** To ensure purity and quality, the dried turmeric rhizomes undergo a two-step cleaning process:
 - **Cleaning 1:** Removal of dust, sand, and other loose particles.
 - **Cleaning 2:** Manual inspection to eliminate any remaining impurities or foreign materials.
- ❖ **Grinding and Refinement Process for Raw Materials:** After thorough cleaning, the dried turmeric rhizomes are transferred for grinding, where they are processed to achieve the desired texture. The ground material is then passed through a Vibro Sifter to ensure uniform consistency. Following this, a metal detector is used to eliminate any potential metal contaminants, ensuring product safety.
- ❖ **Final Inspection and Storage of Processed Materials:** A final quality inspection is performed before storage. The processed turmeric powder is then stored in Ground Storage and Cold Storage to maintain freshness. From Ground Storage, the materials are transferred to the Semi-Finished Goods section for further processing.
- ❖ **Packaging, Storage, and Dispatch of Finished Goods:** Once the turmeric powder meets the required standards, it is moved to the Packaging section. The packaged product is then stored in Finished Goods Storage before being dispatched to its final destination.

INDUSTRY/BUSINESS/TRADE RELATED LAWS

The Food Safety and Standards Act, 2006 (“FSSA”)

The Food Safety and Standards Act, 2006 (“FSSA”) was enacted to establish a comprehensive regulatory framework for food safety in India, replacing the Prevention of Food Adulteration Act, 1954. The Act led to the formation of the Food Safety and Standards Authority of India (FSSAI), which sets scientific standards for food products and regulates their manufacture, storage, distribution, sale, and import to ensure consumer safety. The regulatory framework mandates that all food business operators obtain necessary licenses and comply with prescribed safety and quality standards. Additionally, the Food Safety and Standards Rules, 2011 (“FSSR”) provide detailed guidelines on the registration and licensing of food businesses, enforcement mechanisms, and roles of food safety officers and analysts. The law also places liability on manufacturers, distributors, and retailers to ensure that food products meet quality and safety benchmarks and prohibits the sale of misbranded or unsafe products.

In addition to these regulations, the FSSAI has issued several guidelines to address emerging challenges in food safety, including the Guidance Note on Food Hygiene and Safety during the COVID-19 Pandemic. This Guidance Note outlines preventive measures for food businesses, including health screenings, disinfection protocols, and hygiene standards, to mitigate contamination risks. The FSSA framework plays a critical role in ensuring food safety, strengthening regulatory compliance, and fostering consumer trust in the food industry.

Legal Metrology Act, 2009 (“LM Act”)

The Legal Metrology Act, 2009 replaced the Standards of Weights & Measures Act, 1976 and the Standards of Weights & Measures (Enforcement) Act, 1985 to establish a uniform system of weights and measures in line with international standards. India, as a member of the International Organization of Legal Metrology (“OIML”), adopted the SI units to ensure accuracy and consistency in trade and commerce. The Act regulates inter-state trade, mandates the approval of weighing and measuring instruments, and establishes standards for numeration to prevent malpractices in transactions. It also provides for the Indian Institute of Legal Metrology to train enforcement officers and prescribes penalties for non-compliance.

The Legal Metrology Act is essential to ensure that all pre-packaged goods meet prescribed labelling and measurement standards. This includes accurate declaration of weight, quantity, MRP, manufacturing details, and consumer grievance information on packaging. The Act mandates registration of weighing and measuring instruments used in manufacturing and retail, ensuring transparency and fair trade practices. Non-compliance can result in penalty, making adherence to legal metrology regulations a critical aspect of business operations for consumer protection and regulatory compliance.

Legal Metrology (Packaged Commodities) Rules, 2011 (“Packaged Commodities Rules”)

The Packaged Commodities Rules were framed under Section 52(2) (j) and (q) of the Metrology Act and lay down specific provisions applicable to packages intended for retail sale, whole sale and for export

and import. A “pre packaged commodity” means a commodity which without the purchaser being present is placed in a package of a pre-determined quantity. The key provisions of the Packaged Commodities Rules are:

- It is illegal to manufacture, pack, sell, import, distribute, deliver, offer, expose or possess for sale any pre-packaged commodity unless the package is in such standard quantities or number and bears thereon such declarations and particulars as prescribed.
- All pre-packaged commodities must conform to the declarations provided thereon as per the requirement of Section 18(1) of the Metrology Act; and
- No pre-packaged commodity shall be packed with error in net quantity beyond the limit prescribed in the first schedule of the Packaged Commodity Rules.

The Board is responsible for overseeing the production, processing, and export of spices, ensuring quality control, certification, and adherence to international standards. It also provides financial and technical assistance to farmers, exporters, and other stakeholders in the spice industry.

The Board's regulatory framework ensures compliance with both domestic and international food safety standards, making it essential for companies involved in the manufacturing, processing, and export of spices.

Agricultural Produce (Grading and Marketing) Act, 1937 (Agmark)

The agricultural produce marketing legislations enacted by state governments regulate marketing of agricultural, horticultural, livestock products and certain other produce in market areas and establishes market committees for every market area in the state to regulate transactions in agricultural produce. The Essential Commodities Act, 1955

The Essential Commodities Act, 1955 (“ECA”) gives powers to the Government of India to control the production, supply and distribution of certain essential commodities for inter alia securing their equitable distribution and availability at fair prices. Using the powers under it, various ministries/ departments of the Indian government have issued control orders for regulating production, distribution, trading, quality aspects, movement and prices pertaining to commodities which are essential and administered by them, including for essential commodities such as food grains, edible oils, sugar and drugs. Penalties in terms of fine and imprisonment are prescribed under the ECA for non-compliance of its provisions.

The Essential Commodities (Amendment) Act, 2020 (“Amendment Act”), which is yet to be implemented, provides the Government of India to regulate the supply of certain food items including edible oils only under extraordinary circumstances which may include war, famine, extraordinary price rise and natural calamity of grave nature. The Amendment Act requires that imposition of any stock limit on agricultural produce must be based on price rise. Further, a stock limit may be imposed only

if there is: (i) a 100% increase in retail price of horticultural produce; and (ii) a 50% increase in the retail price of non-perishable agricultural food items. The increase will be calculated over the price prevailing immediately preceding twelve months, or the average retail price of the last five years, whichever is lower.

It determines the circumstances in which a promise made by the parties to a contract shall be legally binding on them. Each contract creates some rights and duties upon the contracting parties. The Contract Act deals with the enforcement of these rights and duties upon the parties. The Contract Act also lays down provisions of indemnity, guarantee, bailment, and agency. Provisions relating to the sale of goods and partnerships which were originally in the Act are now the subject matter of separate enactments viz., the Sale of Goods Act, 1930 and the Indian Partnership Act 1932. KEY FACTORS THAT MAY AFFECT OUR RESULTS OF OPERATION

Our results of operations have been, and will be, affected by many factors, some of which are beyond our control. Our results of operations and financial conditions are affected by numerous factors including the following:

Ability to expand the customer base and develop new products capabilities to meet evolving preferences and generate new sales.

Customer relationships are the core of our business. Our ability to grow our operations and increase sales depends upon the brand awareness of our products among the end consumers. We expect that our revenue growth will be primarily driven by the pace of adoption of our products by the end consumers. This will drive demand for our products by the end consumers from switching from their regular brand to our brand.

We have substantial opportunity to grow our customer base. We have invested, and intend to continue to invest, in order to drive sales to new customer. In particular, we have made, and plan to continue to make, investments to enhance the expertise of our sales and marketing segment. Our business from existing customers has steadily grown and contributed a significant portion of our revenue. Our ability to establish and strengthen customer relationships and expand the scope of our products and services will be an important factor in our future growth and our ability to continue increasing our profitability.

Leveraging on our present portfolio of customers and expertise in the verticals of our existing customers we aim to develop new customer relationships by identifying potential customers that operate within the same verticals as our existing customer. In addition, if we can generate healthy demand for our products, we may be able to increase our price, which would consequently lead to an increase in our revenues and profit margins. Conversely, if we are unable to provide products to our customers, either at all or at an acceptable price, or if our customers are dissatisfied with our product for any other reason, it would have an adverse effect on our revenues and our profits.

Regulatory Framework

We have obtained all regulatory permissions which are necessary to run our business, Further, some of the approvals are granted for fixed periods of time and need renewals, which are obtained in the course of business, however, there may be change in statutory regulations at any time which cannot be predicted by us. There can be no assurance that the change in regulations will not impact our operations in the future.

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

Ability to manage logistics and transportation needs

We rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our factory to our customers and other markets. Since the cost of our goods also carried by third party transporters is much higher than the consideration paid for transportation, it may be difficult for us to recover damages for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner.

Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage or shrinkage may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

Market & Economic conditions

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customer. At the time of market slowdown, the demand falls which has adverse impact on our business.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from organized and unorganized players as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc. are key factors in client decisions among competitors, however, price and quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

Changes in fiscal, economic or political conditions in India

We are incorporated in India and we conduct our corporate affairs and our business from India. Consequently, our business operations, financial performance and the market price of our Equity Shares are affected by interest rates, government policies, taxation, social and other political and economic developments affecting India.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition along with the price of the Equity Shares.

For more information on these and other factors / development which have or may affect us, please refer to chapters titled ***“Risk Factors”***, ***“Our Industry”*** and ***“Our Business”*** beginning on page 30, 128 and 149 respectively.

Justification for sale to related parties: Our Company has made sales to the related parties as mentioned above. The major part of the related party sale is made to Shyam Dhani Industries (Proprietorship firm of our Promoter Mr. Ramavtar Agarwal, hereinafter referred to as "Firm"). Initially, Shyam Dhani Industries was registered as an approved vendor with several major grocery platforms, including Avenue Super Mart Ltd (D-Mart), Reliance Retail Ltd, Aadhar Wholesale Trading & Distribution Ltd, and Metro Cash and Carry India Ltd. The firm purchased products from us to sell on these platforms, as it was approved to distribute our products.

In FY 2024 and FY 2025, our company registered directly with all the major grocery platforms, and as part of this transition, the promoter decided to discontinue operations under the Shyam Dhani Industries firm. To facilitate this shift, our company leased the entire premises of Shyam Dhani Industries (F-438A, Road No. 12, VKIA, Jaipur) in November 2024 and acquired its plant and machinery in December 2024. As a result of these changes, no further sales or purchases will occur between our company and Shyam Dhani Industries moving forward.

Everest Food Products Private Limited (formerly M/s. S. Narendra Kumar & Co.) ("Everest") filed a suit against our Company under the Trademarks Act, 1999 before the Hon'ble Bombay High Court on April 20, 2021, seeking a permanent injunction to restrain the Company from using the registered trademark 'TIKHALAL'. Everest alleged trademark infringement through the sale of the Company's product "SHYAM TIKHA LAL" and claimed ₹ 5 crore in damages or profits earned from the infringing sales, along with the delivery and destruction of all products containing 'TIKHALAL'. (i) Shyam Dhani Industries. Ltd. And Ors Vs Everest Food Products Pvt. Ltd. [COMAP/4702/2025]

Our Company has filed an appeal before the Hon'ble High Court of Bombay whereby we challenged the order dated 02.01.2025 restraining our Company from using the word "TIKHALAL". The said order also imposed a fine of ₹ 2,00,000 on our Company. The said order was passed in the Interim Application No. 1628 of 2021 filed by Everest Food Products Pvt. Ltd. in the main suit no. (COMIP/178/2021) whereby they sought a temporary injunction restraining our Company from infringing and passing off the trademark "TIKHALAL" bearing registration No. 1075818. In the appeal, our Company has contended that their product labelling is distinct from the infringed trademark, which reduces the likelihood of consumer confusion. It was also contended that using the trademark "SHYAM TIKHA LAL" has gained them a significant market reputation. The matter is currently pending for adjudication.

(i) State of Himachal Pradesh through Food Safety Officer Bilaspur (H.P.) Vs. Anwar Khan and Shyam Dhani Industries [Case No. - 1/2024 – 40123]

Shyam Dhani Industries, Sole Proprietorship firm of our Promoter Mr. Ramawtar Agarwal received two show cause notices dated May 21, 2024, and September 21, 2024, from the Court of Adjudication Officer under Section 68 read with Section 52 of the Food Safety and Standards Act, 2006, alleging that their product “Shyam Garam Masala” was found to be “misbranded” based on the Analysis Report from the Food Safety Office, Himachal Pradesh, regarding samples collected from Mr. Anwar Khan, who had purchased the product from D-MART, Zirakpur.

In response, Shyam Dhani Industries denied any connection with Anwar Khan and asserted that the misbranded product in his possession was actually some other company’s salted peanuts and not their product. The matter is currently pending adjudication.

(ii) Notice issued by Legal Metrology Officer, Rupnagar, Punjab

During an inspection conducted at The Aadhar Store, Morinda, District Rupnagar, Punjab, the Legal Metrology Officer observed non-compliance in respect of our product “Dana Methi”. The inspection revealed that the packaging did not carry the requisite declaration in the prescribed manner as required under Rule 8.1(a) of the Legal Metrology (Packaged Commodities) Rules, 2011. Specifically, the net quantity declaration on the principal display panel was not presented with the mandatory spacing requirements stipulated under the said rule.

The aforesaid non-compliance constitutes an offence punishable under Section 18 read with Section 36(1) of the Legal Metrology Act, 2009. Pursuant to this observation, a notice has been issued providing an opportunity of personal hearing on August 13, 2025. In response, the Company has clarified that the variation occurred due to technical limitations in the printing machine, there was no intent to mislead consumers, and sought exemption from personal appearance along with rescheduling of the hearing. The matter is currently pending.

(iii) Government through Narendra Sharma, Food Safety Officer, Office of the Chief Medical and Health Officer, Jaipur Vs. Shri Chand Prakash Sharma, M/s Shyam Dhani Industries [313/2025]

Office of the Chief Medical and Health Officer, Jaipur has filed a case on May 08, 2025 against M/s Shyam Dhani Industries (sole proprietorship firm of our Promoter, Mr. Ramawtar Agarwal, represented by Mr. Chandra Prakash Sharma, seller and nominee) under section 26 and 59(i) of the Food Safety and Standards Act, 2006. The matter pertains to a search conducted on 25 April 2024 at premises of M/s. Shyam Dhani Industries by the Food Safety Officer, Department of Medical & Health Services, Rajasthan.

As per Test Report No. LS/1533/Act/2024/2113 dated 5 June 2024 issued by the State Central Public Health Laboratory, Jaipur, Rajasthan, the product samples were classified as “Unsafe Food”. Based on this report, it was alleged that Mr. Chandra Prakash Sharma, nominee of M/s Shyam Dhani Industries had violated Section 26 of the Food Safety and Standards Act, 2006, by selling unsafe Garam Masala packets, making them liable for penalties under Section 59(i) of the said Act. The court granted bail to Mr. Chandra Prakash Sharma on June 17, 2025. The matter is currently pending for adjudication.

PHASED IMPLEMENTATION OF UPI FOR BIDS BY INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

SEBI has issued the SEBI UPI circulars in relation to streamlining the process of public issue of, among others, equity shares. Pursuant to the SEBI UPI Circulars, the UPI mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for Bids by UPI Bidders through designated intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment Mechanism, the SEBI UPI Circular have introduced the UPI Mechanism in three phases in the following manner:

- **Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Individual Bidder had the option to submit the ASBA Form with any of the designated intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continue to be six Working Days.
- **Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI, vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by UPI Bidders through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.
- **Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023, and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20/- to ₹ 24/- per share, Issue size of 3,000 Equity Shares and receipt of five Bid from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Applied Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

Price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the RBI and the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“DPIIT”).

The Government has from time to time made policy pronouncements on FDI through press notes and press releases.
