A. Primary business of our Company

Our Company was originally incorporated on February 09, 2017 as a Private Limited Company in the name and style of “Fascinate Textiles Private Limited” under the provisions of the Companies Act, 2013 vide Certificate of Incorporation bearing CIN: U17299WB2017PTC219383 issued by the Registrar of Companies, Kolkata. Further, our Company was converted into a Public Limited Company pursuant to Special Resolution passed by the shareholders of our Company at the Extra- Ordinary General Meeting held on 25th April, 2025, and consequently the name of our Company was changed from “Fascinate Textiles Private Limited” to “Fascinate Textiles Limited” and a fresh certificate of incorporation dated May 20, 2025 pursuant to conversion from Private Limited Company to Public Limited Company was issued by the Registrar of Companies, Central Registration Centre bearing CIN: U17299WB2017PLC219383.

We are engaged in the manufacturing of readymade garments, with operations based in West Bengal. Our product range spans menswear, womenswear, and childrenswear, with a significant portion of our output focused on garments for children. Our offerings include t-shirts, joggers, vests, leggings, shorts, and infant wear, among others, catering to a variety of end-use segments and age groups.

We are an ISO 9001:2015 certified company. This certification reflects the presence of defined quality management systems and standardised operational procedures across our processes. It reinforces our ability to meet buyer specifications consistently, supports compliance with international trade norms, and contributes to the facilitation of cross-border operations, including import and export.

We develop samples both in response to themes and mood boards provided by buyers, as well as through our own in-house design initiatives. Once a sample receives approval, we undertake production at our manufacturing facility. Our garments are supplied to large-format retailers and wholesalers in the local market.

Our manufacturing activities are primarily concentrated in Barasat, North 24 Parganas, West Bengal, where we own and operate our production facility. Most operations following fabric processing including cutting, printing, stitching, and finishing are conducted in-house. We manage design development, sample creation, and production schedules internally through a team of merchandisers, each assigned to specific buyers to ensure continuity and coordination.

We procure yarn, which is then sent for knitting and dyeing through external job workers. Once the processed fabric is received, all subsequent manufacturing operations are carried out within our facility. A significant portion of our production infrastructure is automated, including the use of automatic printing and sequencing machines. This integration of technology enables us to maintain consistency, enhance efficiency, and uphold quality across our product offerings.

Primary Industry in which our Company operates

The global apparel market is now worth \$1.84 trillion and accounts for 1.6% of the world’s GDP. After taking a hit due to the COVID-19 outbreak, the markets have recovered and thrived with people buying 60% more clothes than they did a couple of decades ago.

The global apparel market size was valued at USD 1.8 trillion in 2024 and is estimated to grow at a CAGR of over 3.3% from 2025 to 2034. The factors, such as the increasing popularity of casual clothing and athleisure, changing social media trends, growth in disposable incomes, as well as the expansion of e-commerce, are all contributing to the growth of the global apparel industry.

Consumers demand more and more organic cotton from eco-friendly and sustainable brands, as well as more hemp and recycled polyester and plant-based fabric. Brands are optimizing the production process and switching to sustainable materials in an attempt to meet ecological requirements. There is an increasing trend of wanting to personalize products such as clothing and other made-to-order items, for example, with embroidery and monogramming. Brands themselves employ technology to provide tailored fits, colors, and different styles.

Based on the consumer group, the apparel market is categorized as kids, men, and women. In 2024, the women's market held almost 52% of total market share and is projected to grow at a CAGR of 3.6 between 2025 and 2034. There is also a demand for soft fabric such as cotton, fleece, and jersey employed in loungewear, sleepwear, and casual dresses, giving comfort and style in one garment. Women are also the ones shopping more for eco-friendly clothing that has been made of organic, recycled, or upcycled fabrics. Eco-friendly packaging, slow fashion, and carbon-neutral production methods are trending.

The global children’s wear market size reached USD 302.1 Billion in 2024. Looking forward, IMARC Group expects the market to reach USD 437.1 Billion by 2033, exhibiting a growth rate (CAGR) of 4.2% during 2025-2033. The keenness among people to follow fashion trends influenced by social media and celebrity endorsements, need for sustainable and health-conscious clothing, and continuous advancements in design and technology are some of the factors impelling the market growth.

The Indian textile and apparel market size was valued at USD 222.08 Billion in 2024. Looking forward, IMARC Group estimates the market to reach USD 646.96 Billion by 2033, exhibiting a CAGR of 11.98% from 2025-2033. The rising need for high-end clothes and smart textiles, increasing initiatives from the Indian government to help weavers, and growing use of ethical sustainable materials are key factors that drive the market.

The growing buying power of India's middle class is driving demand for high-end and branded apparel. Furthermore, the exponential growth in online shopping is making apparel more accessible in rural and urban markets. Brands are using digital media and AI-powered personalization to drive customer experience, which leads to higher engagement and repeat purchase. The government is also helping businesses by implementing incentives for local producers and making India a global textile export hub. With the right economic environment, India's apparel and textile sector is poised to thrive, becoming one of the world's largest and fastest-growing markets.

The Indian clothing market has significantly benefited from the rise of e-commerce platforms. Flipkart’s reach in the Indian e-commerce market is significant, with over 300 million registered users as of 2023.

The India Kids Apparel Market was valued at USD 24.56 Billion in 2024 and is projected to reach USD 29.35 Billion by 2030, rising at a CAGR of 3.01%. This growth is fueled by rising disposable incomes,

increasing urbanization, and greater awareness of children's fashion preferences. Indian parents now prioritize comfort, quality, and style, boosting demand for branded and sustainable clothing options. E-commerce platforms have expanded reach and convenience, offering broad selections and influencing purchasing behavior. Trends such as character-themed apparel, seasonal collections, and social media influence are reshaping consumer expectations. With a growing child population and aspirational middle-class families across urban and semi-urban areas, both domestic and global brands are actively investing in this expanding segment.

INTERNAL RISK FACTORS:

Business related Risk:

1. **We are dependent on our suppliers for uninterrupted supply of Raw-Materials. Any shortfall in the supply of our raw materials, or an increase in our raw material costs and other input costs, may adversely affect the pricing and supply of our products with subsequently having an adverse effect on the business, results of operations and financial conditions of our company.**

We procure our supply of raw materials from wide range of suppliers depending upon the price and quality of raw materials. However, our Top 10 suppliers contribute significantly to supply of raw materials procurement. Raw materials are subject to supply disruptions and price volatility caused by various factors such as commodity market fluctuations, the quality and availability of raw materials, currency fluctuations, change in consumer demand, changes in government policies and regulatory sanctions. The contributions of our top 5 and top 10 suppliers are as follows:

(Amount Rs. in Lakhs)

Particulars	For Financial Year ended on March 31, 2025		For Financial Year ended on March 31, 2024		For Financial Year ended on March 31, 2023	
	Amount	% of Purchases	Amount	% of Purchases	Amount	% of Purchases
Top 5	1,448.45	37.48	1,203.51	43.73	743.27	43.17
Top 10	1,822.32	47.15	1,535.74	55.81	951.30	55.25

Additionally, the expansive pool of suppliers within our industry reduces the potential impact of the loss of any individual supplier on our production processes and consequently our overall profitability. This diversified procurement strategy contributes significantly to the operational continuity and uphold the quality standards that define our business

- Our business is substantially dependent on certain key customers, from whom we derive a significant portion of our revenues. The loss of any significant customer may have a material and adverse effect on our business and results of operations.**

We derive, a substantial portion of our revenue is derived from a limited number of key customers. Our top ten customers have contributed 93.22%, 99.35% and 99.99% of our total sales for the financial year ended March 31, 2025, March 31, 2024 and March 31, 2023 on Restated Basis. The customers are concentrated that could expose us to the risk that the loss of, or a significant reduction in orders from, any of these key customers could result in a decline in sales, disrupt cash flow, and hinder our ability to sustain operations effectively. Such a loss may further compound the risk that could arise from factors like changes in customer preferences, price sensitivity, competition or even economic downturns that affect customer budgets. The inability to replace lost business in a timely manner remains uncertain could severely impact our company's profitability, operational stability and long-term growth prospects. In the Financial Year ended March 31, 2025, March 31 2024 and March 31, 2023 as per Restated Financials, the contributions of our top 5 and top 10 customers are as follows:

(Amount Rs in Lakhs)

Particulars	For Financial Year ended on March 31, 2025		For Financial Year ended on March 31, 2024		For Financial Year ended on March 31, 2023	
	Amount	% of Sales	Amount	% of Sales	Amount	% of Sales
Top 5	4,142.27	68.75	2,528.10	87.54	2,178.93	99.71
Top 10	5,616.41	93.22	2,869.30	99.35	2,185.09	99.99

To sustain and enhance our revenue, our focus is on attracting new customers and tap into untapped market segments. While we strive to ensure prompt and full payment from key contributors to our revenue stream.

- Our cost of production is exposed to fluctuations in the prices of our major raw material, especially of fabrics.**

Fabric constitutes a significant portion of our raw material costs and plays a central role in the garment manufacturing process. Any fluctuation in fabric prices whether due to changes in yarn rates, fuel and transportation costs, shifts in demand and supply, or policy changes can have a direct bearing on our cost structure. The fluctuations affecting the price directly or indirectly at which we procure such materials may vary as we do not enter into any fixed supply agreements with our suppliers and our major requirement is met in the domestic market.

The cost of raw material consumed includes Opening Stock, Purchase of Raw Material and Closing Stock amounting to Rs 3,885.73 lakhs, Rs. 2,380.33 lakhs and Rs. 1,905.26 for FY2025, FY2024 and FY2023 respectively. In terms of proportion to total income it represents 64.46%, 82.27% and 87.15% in FY2025, FY2024 and FY2023 respectively. We may at times also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of goods purchased may thereby affect our profit margins and affect our financial performance.

(Amount in Rs Lakhs except percentages)

Particulars	March 31,2025	March 31,2024	March 31,2023
Revenue from Operations	6,024.73	2,888.02	2,185.35
Cost of Production	4844.90	2,716.08	2051.14
Cost of Raw Material	3,885.73	2,380.33	1,905.26
Cost of production as % of Revenue from Operations	80.42%	94.05%	93.86%

Cost of material consumed increased by 24.93% in FY2024 due to higher production and revenue. However, its proportion to total income reduced from 87.15% to 82.27%, reflecting improved efficiency, reduced wastage, and cost savings from automation.

In FY2024-25, cost of material consumed rose by 63.24% to ₹3,885.73 lakhs due to higher production and revenue; however, its proportion to total income dropped from 82.27% to 64.46%, reflecting improved efficiency. Key drivers include increased sale prices (up to 11%), addition of new high-margin segments (menswear, yarn, processed fabric), a shift toward local market sales with higher margins, improved raw material mix reducing per kg cost by 8.2%, and 2% savings from reduced wastage through automation. Further benefits came from a full-year merger impact and relocation to an automated facility, enhancing capacity, lowering costs, and boosting profitability.

The price and availability of raw materials are influenced by factors beyond our control, such as overall economic conditions, supply levels, market demand, competition, transportation costs, duties and taxes, and trade restrictions. We engage in annual planning discussions with our suppliers, and procurement is carried out on a rolling monthly basis.

Although we maintain relationships with multiple suppliers and plan our procurement schedules to minimise price volatility, we are not fully protected from market fluctuations. In many cases, especially when orders are placed under pre-negotiated pricing with buyers, an unexpected rise in fabric cost may not be passed on, thereby impacting our margins.

4. Significant portion of our revenue has been generated from Eastern & Southern part of India, any loss of business from these states may adversely affect our revenues and profitability

Significant portion of our revenue is concentrated in West Bengal and Karnataka. Any factors relating to political and geographical changes, growing competition and any change in the demand for our service by customers of these states may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these states, and loss of business from one or more of them may adversely affect our revenues and profitability.

Particulars	March 31,2025	% of Domestic Revenue	March 31,2024	% of Domestic Revenue	March 31,2023	% of Domestic Revenue
Amount in Rs. Lakhs (except %)						

West Bengal	3,028.11	50.26%	773.47	26.78%	762.04	34.87%
Karnataka	2,304.10	38.24%	1,611.16	55.79%	1,264.57	57.87%
Rest of India	692.52	11.50%	503.39	17.43%	158.74	7.26%
Domestic Revenue Total	6,024.73	100.00%	2,888.03	100.00%	2,185.35	100.00%

Strengthening our distribution network and targeting new customer segments gradually helps in balance revenue streams. Additionally, we are tailoring products to regional needs and proactively monitoring market trends to ensure sustained growth and minimize the impact of regional revenue fluctuations.

5. Our Company operations require significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.

Our Company's business operations require a significant amount of working capital, primarily to finance our inventory, including the purchase of raw materials. In the event, we are unable to source the required amount of working capital, we might not be able to efficiently satisfy the demand of our clients in a timely manner or at all. Even if we are able to source the required amount of funds, it would be difficult for us to assure that such funds may or may not be sufficient to meet our cost estimates, which could have adverse effect on our financial conditions and results of operations. There exist substantial requirement of working capital and financing in the form of fund and non-fund based working capital facilities to meet our requirements. The details of our working capital for period ended March 31, 2025, March 31, 2024 and March 31, 2023 are Rs. 2,223.66 Lakhs, Rs 1,067.45 Lakhs and Rs 535.39 Lakhs respectively, which is showing continuous increase.

6. Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.

Our operations are exposed to risks arising from fraud, theft, employee negligence, or similar incidents that could result in financial losses, reputational damage, and operational disruptions. Such events may involve misappropriation of assets, manipulation of financial records, or lapses in adhering to established processes. For further details, please refer to the chapter titled “**Our Business – Insurance**” on page no 198 of this Draft Red Herring Prospectus.

We have availed insurance against the aforesaid incidents in order to safeguard against such loss or such incidence. Meanwhile, we have not encountered any situation like this in the past and implemented comprehensive internal controls and monitoring mechanisms to safeguard our assets and operations against fraud, theft, and employee negligence.

7. We are dependent on our Promoters, Directors and Key Managerial Personnel of our Company for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.

Our business is significantly dependent on the expertise and continued involvement of our Promoters, Directors, and Key Managerial Personnel, who possess extensive industry experience and play a vital role in strategic decision-making. The loss of any such individual could adversely impact our ability to manage and grow our business effectively. For further details, refer to “**Our Management**” on page 217 of this Draft Red Herring Prospectus.

We are focused on professionalizing our operations, implementing succession planning, and developing internal leadership. We maintain strong knowledge management systems and adopt competitive HR practices to attract and retain talent. These efforts aim to ensure management continuity and minimize disruption from potential leadership transitions.

8. We are dependent on third party transport providers for the delivery of our raw material and Finished products. Accordingly, continuing increases in transportation costs or unavailability of transportation services for them, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects.

We are dependent on third-party transport service providers for the movement of our raw materials to our manufacturing facilities and the delivery of finished products to our customers. This reliance makes our operations sensitive to external logistics and infrastructure conditions. Any increase in transportation costs whether due to rising fuel prices, regulatory changes, or increased demand can affect our cost structure. Similarly, disruptions in transport availability, such as delays, strikes, shortages of vehicles or labor, or capacity constraints, may lead to supply chain inefficiencies, delays in production schedules, or an inability to fulfill customer orders on time. The extent, quality, and reliability of transportation and logistics infrastructure in India, including roads, ports, and railways, are crucial to our operational performance. Challenges such as traffic congestion, underdeveloped or overburdened infrastructure, or adverse weather conditions can further exacerbate risks related to timely delivery and cost efficiency.

We engage with a diversified network of logistics partners to reduce reliance on any single provider and ensure continuity in transportation services. We maintain backup arrangements and flexible planning to ensure deliveries are not delayed. Our diversified logistics base allows us to negotiate better terms and maintain reliability. These measures help mitigate the transportation related disruptions and contribute to the steady flow of our operations.

9. We have taken guarantees from Promoters in relation to debt facilities provided to us.

We have taken guarantees from Promoters in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. In the event of challenges in obtaining satisfactory guarantees, we are

prepared to explore alternative solutions, including the possibility of repaying outstanding amounts under existing facilities or seeking additional sources of capital. This proactive approach positions us to address potential financial hurdles effectively, contributing to the resilience of our financial condition. For more information, please see the chapter titled “**Financial Indebtedness**” beginning on page 308 of this Draft Red Herring Prospectus.

To effectively manage the risks associated with relying on guarantees from promoters for debt facilities, we ensure that these guarantees are documented with clear terms and conditions, outlining the scope and extent of the commitments made by the promoters. Regularly reviewing and assessing the financial health and creditworthiness of the promoters helps to gauge their ability to honor these guarantees should the need arise.

10. Trade Receivables forms a significant part of our current assets. Failure to manage our trade receivables could have an adverse effect on our sales, profitability, cash flow and liquidity.

Trade receivables constitute a significant portion of our current assets, making their effective management crucial to our operational efficiency and financial stability. Any delay or default in collection may adversely impact our cash flow, liquidity, and profitability. For the financial year ended March 31, 2025, March 31, 2024 and March 31, 2023 our trade receivables were respectively. The increase in trade receivables over the years suggests that we have been extending longer credit periods to drive sales and maintain competitive positioning. Failure to manage this effectively may impact our ability to meet our working capital needs and continue smooth operations which in turn could affect our financial performance.

15. Our labour-intensive operations, along with our reliance on third-party contract labour particularly during peak periods may expose us to operational disruptions and compliance obligations arising from workforce-related issues such as strikes, wage demands, or service dependencies.

Our operations are labour-intensive and require a substantial workforce across production, packaging, logistics, and support functions. In addition to our direct employees, we rely significantly on third-party contract labour to meet operational demands, especially during peak periods.

This dependence introduces risks related to workforce disruptions, such as strikes, absenteeism, or work stoppages, which could affect production schedules and business continuity. Rising wage pressures, changes in labour laws, or non-compliance by contractors with employment and safety regulations may result in increased costs or liabilities. Any significant disruption or regulatory lapse may adversely impact our operations, reputation, and financial performance.

19. Our business is both manpower and machine intensive. Our business may be adversely affected by strikes, work stoppages, increased wage demands by our employees, or any other kind of disputes with our employees, and if we are unable to engage new employees at commercially attractive terms.

Our operations are both manpower and machine intensive, requiring a sizable workforce for activities such as stitching, sampling, packaging, and production. Some employees are on payroll, while a significant portion of labor needs especially during peak seasons is met through third-party contractual workers.

This reliance on both direct and contractual labor exposes us to the risks including strikes, absenteeism, labor shortages, and disputes over wages or working conditions. We have maintained cordial relationships with employees and labor contractors and have not experienced any major disruptions.

Changes in wage laws, labor regulations, or contract terms with labor agencies may increase operational costs. We offer competitive compensation and benefits as part of its current employment practices. These factors have affected the margins, business continuity, and financial results. In the past, we have not come across any such occurrences.

For more information, refer to the chapter titled “Our Business” beginning on page 173 of the Draft Red Herring Prospectus.

20. The average cost of acquisition of Equity Shares by our Promoters could also be lower than the Offer Price.

We have issued Equity Shares to our Promoters, and also they have acquired Equity Shares by way of transfers, at a price which could be below the Offer Price. For more details see ‘**Capital Structure**’ on page 96 of the Draft Red Herring Prospectus.

* As certified by M/s Jain Sonu & Associates, Chartered Accountants by way of their certificate dated September 18, 2025

The aforementioned average cost of acquisition of Equity Shares by our Promoters may be lower than the Offer Price.

21. Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.

We maintain insurance policies to mitigate certain operational risks; however, such coverage may not be adequate to cover all potential losses. These policies are subject to exclusions, limitations, deductibles, and conditions, and may not fully protect against events such as natural disasters, cyber incidents, or supply chain disruptions. Claims exceeding coverage limits or falling outside the scope of

our policies could expose us to significant financial liabilities, impacting our operations and financial condition.

Additionally, failure to renew insurance policies on time or obtain adequate coverage may result in uninsured losses. While we regularly review and update our insurance programs and conduct periodic risk assessments to implement preventive measures, limitations in the insurance market and evolving risks may continue to pose challenges to comprehensive risk mitigation.

For further details, kindly refer to chapter titled “*Our Business*” beginning on Page 156 of Draft Red Herring Prospectus.

22. Our business is dependent on our manufacturing facilities and we are subject to certain risks in our manufacturing process. Obsolescence, destruction, theft, breakdowns of our machineries or failures to repair affect our business, cash flows, financial condition and results of operations.

Our manufacturing activities are carried out from our facility located in Barasat and are supported by various machines including automated printing machines, sequencing units, and stitching equipment. Given the nature of our operations, we depend on the continuous and efficient functioning of these machines to meet production timelines and maintain product quality.

Any unforeseen technical issues, equipment failures, or delays in maintenance or repairs could interrupt our production schedules. This may result in delayed deliveries potentially impacting our business relationships and credibility. Additionally, risks such as theft, fire, natural calamities, or the need to upgrade older equipment could lead to unplanned capital expenditure or extended downtime.

While we regularly service our machinery and have not faced any major disruptions in the past, we cannot rule out such possibilities in the future. Any material interruption in our manufacturing process could adversely affect our operations, cash flows, and overall financial condition.

23. Delays or defaults in customer payments could adversely affect our financial condition.

Our revenue model involves extending credit terms to customers, and therefore, our cash flows and liquidity are significantly dependent on the timely collection of receivables. Any delay or default in payment by customers—whether due to financial difficulties, contractual disputes, market volatility, or other unforeseen circumstances—may result in a strain on our working capital, increased reliance on external borrowings, and elevated finance costs.

Persistent or large-scale payment delays could impair our ability to meet our own financial obligations, disrupt operational efficiency, and adversely impact our profitability. Furthermore, in cases of non-recovery, we may be required to make provisions for doubtful debts, which could have a material adverse effect on our financial performance and position. In the past we have not come across any such occurrences.

24. Significant failure or disruption of our information technology systems could adversely impact our business, results of operations and financial condition.

We rely on various online systems for production planning, reporting, and data management across key operational areas. Although no significant IT disruptions occurred in recent years, these systems remain vulnerable to cyber-attacks, hardware failures, natural disasters, or unauthorized access. Any major disruption could affect our operational efficiency, delay deliveries, and lead to financial or reputational damage.

Unauthorized access to sensitive business or customer data could also expose us to legal liabilities. Furthermore, the inability to recruit or retain skilled personnel to maintain and service our IT infrastructure may lead to operational inefficiencies or disruptions.

We have implemented robust cybersecurity protocols, disaster recovery plans and data backup systems. However, evolving threats and system dependencies may continue to pose operational and financial risks.

25. Our business requires us to obtain and renew certain licenses and permits from government, regulatory authorities and the failure to obtain or renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and maintain a number of approvals, licenses, and registrations from central, state, and local government authorities. These may include, among others, factory licenses, environmental clearances, labour law registrations, and other operational permits that are critical to the functioning of our manufacturing facility.

While we believe that we currently possess the key licenses and approvals required to operate our business, many of these are valid for a specific period and are subject to periodic renewal. Any delay or failure in obtaining the necessary approvals, or renewing existing ones on time, may lead to regulatory action, penalties, or even temporary suspension of our operations.

Such events could lead to operational disruptions, increased compliance costs, or reputational impact, any of which may have a material adverse effect on our business, financial condition, and results of operations.

Additionally, following the change in our company's constitution from a Private Company to a Public Company, we are in the process of updating the names on all our permits, licenses, and approvals to reflect this change.

Though, we believe, that we have obtained required permits and licenses which are adequate to run our business, we cannot assure that there are no other statutory/regulatory requirements which we would be required to comply with. Further, some of these approvals are granted for fixed period and need renewal from time to time. We are required to renew such permits, licenses and approvals. While we typically apply for the renewal of any existing regulatory approvals prior to their expiry dates, failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may also have material adverse effect on our business. For details regarding pending approvals, please refer to section titled “**Government and Other Approvals**” beginning on page 314 of the Draft Red Herring Prospectus.

26. Our existing manufacturing facilities are concentrated in a single region, i.e. Barasat, West Bengal. Any slowdown or disruption in our manufacturing operations in any of our manufacturing facilities could have a material and adverse impact on our business and operations.

Our manufacturing unit is located at Barasat, West Bengal, which exposes us to risks of concentration. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Although in the past we have not experienced instances of operating risks, however our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. It is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at our facility due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

27. Inability to respond to evolving customer preferences may adversely impact our business.

Our business operates in an industry where customer preferences, particularly in the retail and fashion segments, are subject to frequent changes influenced by trends, seasons, and shifting market expectations. The ability to offer relevant designs, prints, and product categories in line with such changes is an important aspect of our operations.

In addition, advancements in textile manufacturing technologies, automation, and design tools require ongoing assessment and, where necessary, investment in updated processes or equipment. Failure to align our offerings with prevailing market preferences or to adopt relevant technological improvements in a timely manner could affect our competitiveness, result in slower inventory movement, or lead to reduced customer demand.

Our continued performance depends, in part, on our capacity to adapt to these changes efficiently. Any delays or limitations in doing so may have a material impact on our business, financial condition, and results of operations.

28. Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national

debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies.

Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

29. Our operations may be impacted by industrial accidents, physical hazards, or similar risks at our manufacturing premises, which could lead to operational disruption, financial loss, or reputational impact.

Our manufacturing facility in Barasat involves stitching, finishing, and packaging of garments, supported by a large workforce and multiple industrial machines. Although processes such as knitting and dyeing are carried out by third parties, the in-house setup carries its own operational risks, including machinery malfunction, electrical issues, minor fire incidents, or accidents involving personnel.

While we follow established safety protocols and conduct regular maintenance and training, the possibility of workplace incidents cannot be ruled out. Such events may temporarily disrupt production schedules, affect delivery timelines, and lead to unplanned expenses relating to repairs, medical costs, or compliance matters.

We continue to implement precautionary measures and monitor safety practices across our operations. However, any serious disruption at our facility may adversely affect our business performance, cash flows, and customer relationships.

30. Our estimates and forward-looking statements may prove to be inaccurate, which could adversely affect investors' perception and decision-making.

This Draft Red Herring Prospectus contains certain forward-looking statements, including but not limited to, statements regarding our future business strategies, growth prospects, financial performance, industry developments, market conditions, and other projections. These statements are based on current expectations, assumptions, and estimates, which involve inherent risks and uncertainties. Factors such as changes in market dynamics, regulatory developments, competitive pressures, operational challenges, or unforeseen external events may cause actual results to differ materially from those anticipated.

There can be no assurance that the outcomes predicted by these forward-looking statements will be realized. Any significant deviation from our projections could impact our business performance and may adversely affect investor confidence and perception of our Company. Consequently, reliance on such statements for investment decision-making may involve a high degree of uncertainty. Investors are advised to carefully consider this risk when evaluating our Company and its prospects.

31. Underutilization of capacity of our manufacturing capacities and an ability to effectively utilize our expanded manufacturing capacities may adversely affect our business, future prospects and future financial performance.

Our operations rely on the efficient use of our manufacturing facilities to meet demand from domestic retailer and distributors. If we are unable to utilize our installed capacities effectively due to lower order volumes, changes in buyer schedules, seasonal fluctuations, or delays in new market expansion it may lead to idle resources and increased per-unit production costs.

Continued underutilization can impact profitability, reduce operating efficiency, and result in suboptimal returns on our manufacturing investments. It may also affect our ability to absorb fixed overheads and limit future investment decisions.

While we aim to align our production planning with confirmed orders and forecasted demand, variations in market conditions may affect capacity utilization from time to time. Any prolonged mismatch between capacity and actual production may have an adverse impact on our financial performance and restrict our ability to scale operations in line with business goals.

32. Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.

We have not declared dividend in the past. For further information, see “**Dividend Policy**” on page 254 of this Draft Red Herring Prospectus. Our future capacity to distribute dividends will be influenced by factors such as our earnings, financial health, cash flow, working capital needs, capital expenditures, and the terms of our financing agreements. The Board of Directors will recommend dividend declarations, which will then be subject to shareholder approval, in accordance with our Articles of Association and applicable laws, including the Companies Act. We may choose to reinvest future earnings to support business operations and expansion, which could result in the decision not to declare dividends in the near term. Any future decisions regarding dividend declarations will be made at the discretion of our Board, following our dividend distribution policy and considering factors such as profitability, capital requirements, financial commitments, business expansion plans, legal restrictions, and other financing arrangements. While we cannot guarantee future dividend payments, we are committed to making decisions that support the long-term growth and success of our company

33. Our manufacturing facility is subject to operating risks, and any disruption or shutdown may adversely impact our business, financial condition, and results of operations.

Our manufacturing facility plays a central role in our operations, and any unforeseen disruption such as equipment breakdowns, power failures, labour unrest, raw material shortages, accidents, regulatory action, or natural calamities could adversely affect our ability to meet production timelines and fulfill customer orders. Such events may lead to increased operating costs, loss of revenue, delays in delivery, and reputational damage.

While we have not experienced any significant operational disruptions, shutdowns, or accidents at our manufacturing facility to date, there can be no assurance that such events will not occur in the future. Any material disruption could have a significant adverse effect on our business operations, financial condition, and results of operations.

34. We have not made any alternate arrangements for meeting our regular working capital requirements. If we are unable to manage/arrange funds (including at short notice) to meet our working capital requirements, there may be an adverse effect on our results of operations and financial performance.

As of the date of this Draft Red Herring Prospectus, we have not established any alternative arrangements to meet our working capital requirements apart from our existing sanctioned credit limits. Our business operations require substantial working capital, primarily to finance the procurement of raw materials in advance of receiving payments from customers.

We cannot assure that our budgeting and planning for working capital requirements will always be accurate or sufficient. Any shortfall or delay in arranging additional working capital may hinder the timely execution of ongoing projects, which could result in delays, loss of customer confidence, reputational damage, imposition of liquidated damages, and adverse impacts on our cash flows.

In the event of insufficient internal cash generation or an inability to secure external funding in a timely manner—or on commercially favorable terms—we may face significant constraints in executing larger-scale or time-sensitive projects. Furthermore, our borrowings are subject to fluctuations in interest rates, and any adverse movement in rates may increase our financing costs. Collectively, these factors could materially and adversely affect our business operations, growth and expansion plans, and future financial performance

35. There is no monitoring agency currently appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of monitoring agency is required only for fresh Offer size above Rs. 5,000.00 Lakhs. Since the Fresh Issue Portion of the Issue Size is less than Rs. 5,000.00 Lakhs, our Company has not appointed any monitoring agency for this Offer. Hence, we have not appointed a monitoring agency to monitor the utilization of Offer proceeds. However, Audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

36. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

The continued growth and success of our business are dependent on our ability to identify, pursue, and convert new business opportunities in a timely and efficient manner. Any failure to do so whether due to increased competition, limited market visibility, evolving customer requirements, or inefficiencies in our business development efforts could restrict our revenue generation and hamper the optimal utilization of our resources.

An inadequate pipeline of new projects or clients may limit our ability to scale operations, achieve projected financial targets, and maintain our competitive positioning in the market. Such limitations could have a material adverse effect on our business operations, future prospects, and overall financial performance.

37. Hiring unskilled labour from third-party contract labour suppliers exposes us to the risk of operational inefficiencies, reduced product quality, and potential disruptions in business operations.

Unskilled labourers may lack the necessary training, experience, and attention to detail required to maintain high standards of productivity and quality. This can lead to inefficiencies, increased error rates, and delays in production, ultimately affecting our ability to meet deadlines and customer expectations. Managing unskilled labour through third-party suppliers can make it difficult to enforce consistent work practices, monitor performance, or implement corrective actions effectively. The lack of direct control over the workforce may result in higher turnover rates, absenteeism, and potential labor disputes. These

factors can contribute to higher operational costs, reduced profitability, and damage to our brand reputation. In the worst-case scenario, such challenges may disrupt our entire supply chain or production processes, further exacerbating the risk to our business continuity and growth.

We ensure that contract workers, although unskilled, undergo job-specific training under our direct supervision before being deployed to critical operations. Our supervisors closely monitor their performance to ensure adherence to quality standards and process consistency. We also maintain a mix of permanent and contractual staff, allowing us to retain core expertise while managing labour flexibility.

38. We are subject to stringent quality and delivery requirements, and any failure to comply with such standards may lead to order cancellations, reputational harm, and adverse financial consequences.

Given the nature of our products and the sector in which we operate, our customers maintain high expectations regarding both product quality and delivery timelines. Adherence to specific quality benchmarks is integral to our operations. Any deviation from technical specifications, defects in finished garments, or inconsistencies in fabric or stitching quality may result in rejection of goods or cancellation of orders.

Further, delays in delivery or failure to supply the agreed quantity as per buyer requirements may lead to loss of existing business, reputational harm, and strained customer relationships. In certain instances, our clients may seek compensation, demand price reductions, delay payments, or shift their sourcing to alternative suppliers. Such outcomes may adversely affect our revenue, cash flows, and overall financial performance.

39. Our future success depends on our ability to build and promote our brands and protect our reputation. Any failure in these areas may affect our growth prospects.

The perception of our brands by end consumers is a key factor in driving product demand. Our brand identity, built on consistent product quality, timely delivery, and a focus on client requirements, has evolved over time. Regular engagement with our clients provides valuable insights into shifting consumer preferences and regional market dynamics, helping us understand our competitive position.

Our reputation within the industry has been established gradually through operational discipline and client-centric practices. Any disruption that affects the perceived quality or service reliability associated with our brands may impact buyer confidence. This is particularly relevant in segments such as kids wear and infantwear, where product differentiation and brand trust are important to purchasing decisions. Given the multiple factors that influence brand perception ranging from product performance to post-sale experience maintaining consistency and reliability across all aspects of our operations remains central to sustaining market presence.

40. The highly competitive nature of the garment manufacturing industry, particularly due to the presence of numerous unorganized players, may result in pricing pressure, market share loss, and impact our profitability.

The textile and garment manufacturing sector in which we operate is fragmented and marked by intense competition from both organized and unorganized players. Several unorganized manufacturers operate with lower overheads, allowing them to offer products at lower prices. This often results in pricing pressure, especially in price-sensitive markets, and may require us to adjust our pricing strategies to remain competitive.

Such competition may impact our ability to maintain profit margins and could lead to a potential erosion of our market share. Moreover, these unorganized players may not adhere to uniform quality or labor standards, creating challenges in product differentiation based on quality alone.

While we focus on maintaining consistent quality, timely delivery, and strong client relationships, the presence of these informal players in the domestic market, especially at the lower price tiers, poses ongoing risks to our growth trajectory and financial performance.

41. NSE may not grant in- principle approval for listing of equity shares of our Company.

Our company has applied for In-principle approval to NSE for its proposed public issue. There is a risk that the National Stock Exchange of India Limited (NSE) may not grant approval for our proposed public issue. The approval process involves rigorous scrutiny of our company's financials, compliance with regulatory requirements, and overall suitability for listing. Despite our best efforts to meet all regulatory standards and provide comprehensive disclosures, there is no guarantee that the NSE will find our application satisfactory. Non-approval by the NSE would significantly impact our ability to access the capital markets and raise the necessary funds for our planned expansions and operations. This could adversely affect our financial condition and future growth prospects.

External Risk Factors

INDUSTRY RISKS

42. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. The regulatory and policy environment in which we operate is evolving and subject to change. These changes may pose challenges to our business, impacting our operational results and future prospects. It's imperative that we remain agile in our response to and compliance with any shifts in applicable laws and policies. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of these laws on a short notice or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST.

43. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and other prospects.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

44. The occurrence of Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and

it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

45. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and does not fall under any of the exceptions specified by the RBI, then the RBI's or central government's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

46. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

47. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

48. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

49. Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business and the trading price of the Equity Shares.

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or financial policy or a decrease in India's foreign exchange reserves. India's foreign exchange reserves have grown consistently in the past. (Source: Reserve Bank of India. However, any decline in foreign exchange reserves could adversely affect the valuation of the Indian Rupee and could result in reduced liquidity and higher interest rates that could adversely affect our future financial performance and the market price of the Equity Shares and could result in a downgrade of India's debt ratings. Any adverse

revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely affect our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could adversely affect our business and future financial performance and our ability to obtain financing to fund our growth, as well as the trading price of the Equity Shares.

50. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to long term capital gains tax in India if Securities Transaction Tax ("STT") is paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017. STT had been paid at the time of acquisition of such equity shares, except in the case of such acquisitions where STT could not have been paid, as notified by the Central Government. However, as on the date of this Prospectus, the Central Government has not issued any such notification. Due to uncertainty in the applicability of this provision, the shareholders may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

51. We derive majority of our income from our customers within India. Therefore, factors that adversely affect the demand for our manufacturing and services in India may adversely affect our business.

We have in the past derived and believe that we will continue to derive, a significant portion of our income from our customers within India. In addition, all of our employees are based in India. Consequently, factors that adversely affect the Indian economy or the demand for our manufacturing and services within India, may adversely affect our business and profitability.

52. A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

53. We may be affected by competition laws and any adverse application or interpretation of the Competition Act could adversely affect our business and activities.

The Competition Act, 2002, as amended (the “Competition Act”), regulates practices having an appreciable adverse effect on competition in the relevant market in India. Under the Competition Act, any formal or informal arrangement, understanding or action in concert, which causes or is likely to cause an appreciable adverse effect on competition is considered void and results in the imposition of substantial monetary penalties.

Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment or provision of services, shares the market or source of production or provision of services by way of allocation of geographical area, type of goods or services or number of clients in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an appreciable adverse effect on competition. The Competition Act also prohibits abuse of a dominant position by any enterprise. The Competition Act aims to, among others, prohibit all agreements and transactions which may have an appreciable adverse effect on competition in India. Further, the Competition Commission of India (“CCI”) has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination has an appreciable adverse effect on competition in India. The applicability or interpretation of the Competition Act to any merger, amalgamation or acquisition proposed or undertaken by us, or any enforcement proceedings initiated by CCI for alleged violation of provisions of the Competition Act may adversely affect our business, financial condition or results of operation.

54. We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”).

Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition. Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that Fiscal/period and in the corresponding (restated) Fiscal/period in the comparative Fiscal/period.

55. Financial instability in other countries may cause increased volatility in Indian Financial Markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, United States, United Kingdom, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and

regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition and results of operation. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

56. Wage pressures and increases in operating costs in India may prevent us from sustaining our competitive advantage and may reduce our profit margins.

Wage and operating expenses increase in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. Wages in India are increasing at a faster rate than in the developed economies, which could result in increased employee benefit expenses. We may need to continue to increase the levels of our employee compensation to remain competitive and manage attrition. Further, The Code on Wages, 2019 received the assent of the President of India on August 8, 2019 and proposes to subsume four existing laws namely, the Payment of Wages Act, 1936, the Minimum Wages Act, 1948, the Payment of Bonus Act, 1965 and the Equal Remuneration Act, 1976. The provisions of this code will be brought into force on a date to be notified by the Central Government. This may impact our wage structure and may lead to increased wage payments to our employees. Additionally, the cost of operating expenses is also increasing as India continues to grow. Compensation increases manifest a hike in operational costs which may result in a material adverse effect on our business and financial condition and result of operations.

Risks Related to the Equity Shares

57. The Equity Shares have never been publicly traded, and, after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price, or at all.

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares is proposed to be determined through a fixed price process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the Stock Exchanges, securities markets in other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

58. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the stock exchange may fluctuate as a result of the factors, including:

- Volatility in the India and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors;

- Adverse media reports on Company;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

59. The requirements of being a publicly listed company may strain our resources.

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by the shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business prospects, financial condition, results of operations, and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

60. There is no guarantee that the Equity Shares will be listed on stock exchange in a timely manner or at all, and any trading closures at stock exchange may adversely affect the trading price of our Equity Shares.

The listing process is subject to a number of regulatory approvals and market conditions that may cause delays or obstacles. Even if the shares are successfully listed, there is a risk that trading closures, whether temporary or prolonged, at the stock exchange could have a detrimental impact on the liquidity and trading price of our Equity Shares. These closures could result from unforeseen circumstances such as market disruptions, regulatory actions, or other factors beyond our control. Consequently, any such delays or trading interruptions could adversely affect the value and marketability of our shares, potentially diminishing investor confidence and impacting the overall performance of our company in the stock market.

61. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.

Under the Companies Act, a company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution. However, if the law of the jurisdiction that you are in does not permit

the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such preemptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be offered to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company may be reduced.

62. We cannot ensure future continuous compliance with all regulatory requirements and listing obligations, which could impact the liquidity and market performance of our Equity Shares.

Compliance with various regulatory frameworks, including those set by the stock exchanges and relevant authorities, is critical for maintaining the status of our shares in the market. Any inadvertent failure to meet these obligations, whether due to changing regulations, internal oversight, or unforeseen circumstances, could result in penalties, suspension, or delisting of our shares. Such events could significantly affect the liquidity, trading volume, and overall market value of our Equity Shares, potentially diminishing investor confidence and harming the long-term prospects of our business in the public market.

63. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Offer.

The Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited with the Equity Shares within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in this Offer and the credit of such Equity Shares to the applicant's demat account with 55 depository participants could take approximately two Working Days from the Bid Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within three Working Days of the Bid Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise any delay in commencing trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor.

* The amount utilized for general corporate purposes shall not exceed 15% of the Gross Proceeds of the Offer or Rs 1000 lakhs whichever is less in accordance with SEBI ICDR regulations.

The requirement and deployment of funds as indicated above are based on our current business plan, internal management estimates, prevailing market conditions and other commercial and technical factors, including interest rates and other charges, and the financing and other agreements entered into by our Company, and have not been appraised by any bank or financial institution. Given the dynamic nature of our business, we may have to revise our funding requirements and deployment on account of a variety of factors such as our financial condition, business strategy and external factors such as market conditions, competitive environment and interest or exchange rate fluctuations and configuration of the project, increase in input costs of construction materials and labour costs, logistics and transport costs, incremental preoperative expenses, taxes and duties, interest and finance charges, engineering procurement and construction costs, working capital margin, regulatory costs, environmental factors and other external factors which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose, at the discretion of our management, subject to compliance with applicable law. Moreover, if the actual utilization towards any of the Objects is lower than the proposed deployment such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 15% of the gross proceeds from the Fresh Offer or Rs. 1,000 lakhs in accordance with the SEBI ICDR Regulations. In case of a shortfall in raising requisite capital from the Net Proceeds or an increase in the total estimated cost of the Objects, business considerations may require us to explore a range of options including utilising our internal accruals, general corporate purposes and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Fresh Offer. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the aforementioned objects, per the estimated scheduled deployment specified above, our Company shall deploy the Net Proceeds in subsequent Fiscals towards the aforementioned Objects.

For further details of factors that may affect these estimates, see “**Risk Factors**” on page 43 of the Draft Red Herring Prospectus.

Means of Finance:

The fund requirements for the Objects above are proposed to be funded from the Net Proceeds and hence, no amount is proposed to be raised through any other means of finance. Accordingly, we are in compliance with the requirements prescribed under Paragraph 9(C)(1) of Part A of Schedule VI and

Regulation 7(1)(e) of the SEBI ICDR Regulations which require firm arrangements of finance to be made through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised through the Fresh Issue and existing internal accruals.

As certified by M/s Jain Sonu & Associates pursuant to their certificate dated September 18, 2025 (365 days in a year have been considered)

The justifications for the holding levels mentioned in the table above are provided below:

Working capital cycle of our company ranged from 59 days to 108 days over past three years. It stood at 59 days in FY2023, 108 days in FY2024 and 92 days in FY2025. We projected the working capital cycle to be stabilize at 80 days in FY2026 and FY2027. Justification for decrease in working capital cycle are as below:

Asset-Current Assets	
Trade Receivables	<p>Our trade receivables have historically ranged between 69 days to 88 days over the last three financial year. Our company generally sold goods on credit to our customers for a credit period of 88 days, 74 days and 69 days in the FY2022-23, 2023-24 and 2024-25 which is as per the acceptable business practice in the similar trade. The debtors’ days are projected to reduce to 63 days for the FY 2025-26 and FY 2026-27 respectively.</p> <p>Our company strategically improved debtor’s collection by placing early payment discount to our loyal customers, the result of which are visible in the downward trend of trade receivable days. Additionally, our trade receivables days depends on the occurrence of festivals too. As the festive season is early during the FY2026, debtors will be realized sooner and it will influence the trade receivable days. Conservatively, spreading the impact in FY2026 and FY2027 trade receivable anticipated to remain stable at 63 days in FY2026 and FY2027.</p>
Inventories	<p>The nature of our company’s business requires us to bulk purchase inventory and store the same for use in production. In the FY2022-23, 2023- 24 and 2024-25 our Company had maintained raw material inventory levels for 73 days, 124 days and 107 days respectively which is expected to reduce to 84 days in FY 2026 and FY2027.</p> <p>The inventory holding of our company stood at Rs. 441.49 lakhs in FY2023 Rs. 1,270.32 lakhs in FY2024 and Rs. 1,546.60 lakhs in 2025 which is expected to grow in line with revenue and stand at Rs. 2,627.92 lakhs in FY2026 and Rs. 2,775.89 lakhs in FY2027.</p> <p>Raw Material:</p> <p>Raw material holding days ranged from 10 days to 35 days over the last three financial years. In FY2022-23, 2023- 24 and 2024-25 our raw material holding days were 10 days, 42 days and 35 days respectively which is expected to reduce to 29 and 30 days in FY2026 and FY2027 respectively.</p>

	<p>Raw materials are majorly comprising of ready to use Fabrics, Cotton yarn, Dyes and Chemicals and other auxiliary materials such as Lubricants, detergents, binders etc. The raw material days are expected to decrease and remain stable at 30 days as our company established their local networks for cotton yarn supply which will be converted into fabric in house. This process will improve the margin and reduce the raw material of ready to use fabric to a significant level and ultimately it will help us to reduce the raw material holding days to 29 and 30 days in FY 2026 and FY2027</p> <p>WIP: For FY2022-23, 2023- 24 and 2024-25, WIP inventory days of our company were 20 days, 49 days and 45 days respectively. Our WIP holding levels is estimated to decrease to 38 days and 37 days in the FY 2025-26 and FY 2026-27 respectively.</p> <p>Our company is moving from manual production to automated process gradually through installation of automated machines. This helps us to reduce the production time and improve the efficiency. This allows us to maintain a lower WIP stock as per the orders from customers. Our WIP consist of knitted fabrics, semi stitched products which do not take much time to convert into finished products. Considering these factors, we anticipate our WIP days to reduce to 38 and 37 days in FY2026 and FY2027 respectively.</p> <p>Finished Goods: In the FY2022-23, 2023- 24 and 2024-25 our Company maintained finished goods inventory levels for 44 days, 32 days and 27 days respectively. It is anticipated to reduce and remain 17 days in FY2026 and FY2027.</p> <p>Majorly the products manufactured by our Company are based on orders from B2B customers and the finished goods are dispatched as and when they are ready for dispatch with all the formalities completed. With the growing trust and relationship with our customers we are strategically reducing the finished product holding to unblock the funds involved. Additionally, we are exploring the local markets for our finished product which will help us to clear our finished product faster. Based on these factors taken together we anticipate our finished goods days to reduce to 17 days in FY2026 and FY2027.</p>
Liabilities-Current Liabilities	
Trade Payables	<p>Company's trade payables predominantly comprise of payables towards purchase of raw materials and consumables. The trade payable days were approximately 102 days, 90 days and 84 days for FY 2022-23, 2023-24 and 2024-25 respectively. The trade payable outstanding has been estimated to reduce to 67 days in FY 2025-26 and FY2026-27.</p> <p>Our company reported trade payables of Rs. 603.63 lakhs in FY2023 Rs. 754.29 lakhs in FY2024 and Rs. 1,016.08 lakhs in FY2025 in line with the growth in revenue.</p> <p>We strategically paying our creditors early to avail the early payment discount and maintain a healthy relation to procure materials on time and priority basis. Being the price of our input material volatile, our company proposes to negotiate on terms of earlier payment, in order to avail materials at favorable rates from our trade payables.</p> <p>Based on the above factors we anticipated our trade payable days to reduce to 67 days in FY2026 and FY2027.</p>

Justification for increased working capital:

Our company as a manufacturer of readymade garments, relies heavily on working capital to facilitate the investments in Trade receivable, Inventories, payment of trade payables and meeting daily operations and sustain growth. The garment manufacturing industry requires significant inventory levels, including raw materials such as ready to use Fabrics, Cotton yarn, Dyes and Chemicals and other auxiliary materials such as Lubricants, detergents, binders etc to ensure uninterrupted production and timely delivery to customers. By maintaining a robust working capital position, we can swiftly procure these essential materials, minimizing lead times and preventing production downtimes. In many occasions company has to fulfill on demand orders in a limited time span specially during wedding seasons and festivals in different parts of India, for which we have to maintain a sufficient inventory of raw material. This proactive approach is crucial, given that any delay in sourcing raw materials can result in missed opportunities and potential losses in sales and customer satisfaction.

Moreover, the management of accounts receivable and payable is integral to our working capital requirements. As we supply readymade garments in numerous variety to various clients, timely collection of payments from debtors directly impacts our cash flow. Ensuring effective credit controls allows us to maintain healthy relationships with our clients while securing the necessary funds for our operational activities. At the same time, we must also honor our commitments to creditors by meeting payment obligations for raw materials and operational expenses in a timely manner. Adequate working capital provides the financial flexibility to manage these obligations competently, ensuring that we uphold our reputation as a reliable supplier within the industry.

In addition to covering routine operational expenses, having sufficient working capital empowers us to seize strategic growth opportunities. With our ongoing investments in automated environment and additional set up of manufacturing facility, we require liquidity not only to support these initiatives but also to sail smoothly with the working capital needs. This financial stability enables us to plan for the future, drive innovation, and foster long-term relationships with customers and suppliers alike.

Justification for increase in working capital requirement in FY 2026 and FY 2027

The working capital requirement of our company stood at Rs 535.39 lakhs in FY2023, Rs. 1,067.45 lakhs in FY2024 and Rs. 2,223.66 lakhs in FY2025, while the same is projected to Rs. 2,867.96 lakhs in FY2026 and Rs. 3,955.72 lakhs in FY2027.

Here are the reasons for the rise in the working capital requirement in FY2026 compared to FY2025

Working capital requirement of our company increased from Rs. 2,223.66 lakhs in FY2025 to Rs. 2,867.96 lakhs in FY2026. Major reasons for increase in working capital requirement are as below:

1. Trade Receivables: Trade receivables are projected to increase from ₹ 1,733.03 lakhs in Fiscal 2025 to ₹ 2,194.00 lakhs in Fiscal 2026. The Company is actively working towards strengthening its collection mechanism by introducing early payment discount, as reflected in the reduction of the trade receivables holding period from 88 days to 69 days over the last three financial year and it is further anticipated to decrease to 63 days in Fiscal in Fiscal 2026. Reasons for increase in absolute terms in trade receivables:

a. **Credit Sale to boost revenue:** Our company is entering the local markets as one of its strategies to increase the revenue. To boost the revenue company strategically extending a better credit terms to its customer, improving relationship, attracting bulk orders and grab the local market. As a result, revenue will grow and profit margin improve.

b. **Festive impact:** As the nature of our business is to get influenced by wedding seasons and festive seasons which are normally fall during 3rd and 4th quarter of the financial year accumulated debtors stand in the financial statement. This results in increase in trade receivables in line with increase in revenue.

2. Inventory: Our inventory rose from ₹ 1,546.60 lakhs in FY2025 to ₹ 2,627.92 lakhs in FY2026. The absolute increase reflects the company's strategic approach to scaling operations. In terms of days, it represents 107 days in FY2025 which is expected to reduce to 84 days in FY2026. Major reasons for increase in inventory

a. **Local market expansion:** As the company expands its presence into local markets, maintaining a higher inventory becomes essential. This expansion requires an uninterrupted supply chain and the ability to fulfil orders on time.

b. **Bulk Orders:** Our company has B2B customer base from them company receives bulk orders and expecting similar orders from new clients and local markets which requires us scaling up purchases. In the garment industry our main inputs are Cotton yarn and ready to use fabrics, to avoid frequent transportation and considering discount and favorable price bulk order is necessary.

c. **Auxiliary Accessories:** Auxiliary accessories such as Zippers, Buttons, hooks, Sewing clips or pins, Needle threader, Bobbin winders, Fabric markers, Sewing clips, Lubricants etc are consumables which forms part of inventories having longer life than average inventory days which we purchase in bulks and they remain in inventory until consumed. These consumables also contribute to increase in inventory in line with revenue.

3. Trade payables: Our company is paying its creditors early which is also reflecting in our creditors holding period, it is in down trend from 102 days in FY2023, 90 days in FY2024 and 84 days in FY2025 and the same is expected to reduce 67 days in FY2026.

Strategic Payments to Raw Material Suppliers: The company's trade payables primarily consist of dues to cotton yarn and ready to use fabric suppliers. To ensure timely delivery and better bargain. This proactive approach helps secure a stable and cost-effective supply of inputs, supporting operational continuity and margin stability.

As a result, although working capital increased significantly in absolute terms, it remains aligned with revenue growth and in terms of days the working cycle is dropped from 93 days in FY2025 to 80 days in FY2026. All these above-mentioned factors have led to an increase in the working capital requirement of our Company for FY2026.

Here are the reasons for the rise in the working capital requirement in FY2027 compared to FY2026

Our working capital requirement projected to increase from Rs. 2,867.96 lakhs in FY2026 to Rs. 3,955.72 lakhs in FY2027. This absolute increase is in line with growth in revenue however in terms of days the working capital cycle anticipated to remain same at 80 days.

Reasons for absolute increase in working capital requirements:

Increase in Inventory: Our company projected a jump in inventory of from Rs. 2,627.92 lakhs in FY2026 to Rs. 2,775.89 lakhs in FY2027. In terms of days inventory holding is anticipated to remain same as FY2026 which is at 84 days in FY2027. In terms of days, it is projected to 84 days in FY2026 which is expected to remain same in FY2027. The primary reason for increase in inventory in absolute terms is anticipated growth in revenue through the local market expansion and bulk orders from B2B customers. Additionally, company has proposed to negotiate on bulk orders which will help in avoiding price volatility and availing better discount.

Increase in trade receivable: Trade receivables are expected to increase in line with the company's revenue growth. However, the trade receivable holding period is projected to improve, reducing to 63 days in FY2026, and is planned to be maintained at the same level in FY2027. Currently, local sales account for 17% of total revenue and are expected to grow to 30–35% by FY2027. Local sales typically allow faster collections due to the early payment discounts offered, which will support timely realization of receivables and help maintain the 63 trade receivable days.

Decrease in Trade Payables: Trade payables of our company decreased from Rs. 1,907.12 lakhs in FY2026 to Rs. 1,457.54 lakhs in FY2027. In terms of days, we are expecting to maintain the creditors days at 17 days same as FY2026. By infusion of IPO proceeds company will use it to pay off its creditors early to avail the early payment discount and better bargain on pricing and priority delivery of materials.

STATEMENT OF SPECIAL TAX BENEFITS AVAILABLE TO THE COMPANY AND TO THE SHAREHOLDERS OF THE COMPANY UNDER THE DIRECT TAX LAWS

Outlined below are the special tax benefits available to the Company and to its shareholders under the Income-tax Act, 1961 ('the Act') as amended by the Finance Act (No.2) 2024, i.e., applicable for the Financial Year 2024-25 relevant to the Assessment Year 2025-26, as amended and presently in force in India (together, the "Direct Tax Laws").

A. SPECIAL DIRECT TAX BENEFITS AVAILABLE TO THE COMPANY

1. Lower corporate tax rate under section 115BAA of the Income Tax Act, 1961

A new section 115BAA has been inserted in the Act by the Taxation Laws (Amendment) Act, 2019 ("the Amendment Act, 2019") w.e.f. April 1, 2020 (A.Y. 2020-21). Section 115BAA grants an option to a domestic company to be governed by the section from a particular assessment year. If a company opts for section 115BAA of the Act, it can pay corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and education cess of 4%). Section 115BAA of the Act further provides that domestic companies availing the option will not be required to pay Minimum Alternate Tax (MAT) on their 'book profits' under section 115JB of the Act.

However, such a company will no longer be eligible to avail specified exemptions/ incentives under the Act and will also need to comply with the other conditions specified in section 115BAA. Also, if a company opts for section 115BAA, the tax credit (under section 115JAA), if any, which it is entitled to on account of MAT paid in earlier years, will no longer be available. Further, it shall not be allowed to claim set-off of any brought forward loss arising to it on account of additional depreciation and other specified incentives.

The Company has evaluated and opted for the lower corporate tax rate of 25.168% (prescribed under section 115BAA of the Act) with effect from Assessment Year 2019-20.

2. Deduction in respect of inter-corporate dividends - Section 80M of the Income Tax Act, 1961

Up to 31st March 2020, any dividend paid to a shareholder by a company was liable to Dividend Distribution Tax ("DDT"), and the recipient shareholder was exempt from tax under section 10(34) of the Act. Pursuant to the amendment made by the Finance Act, 2020, DDT stands abolished, and dividend received by a shareholder on or after 1st April 2020 is liable to tax in the hands of the shareholder. The Company is required to deduct Tax Deducted at Source ("TDS") at applicable rate specified under the Act read with applicable Double Taxation Avoidance Agreement (if any). With respect to a resident corporate shareholder, a new section 80M has been inserted in the Act to remove the cascading effect of taxes on inter-corporate dividends during FY 2020-21 and thereafter. The section provides that where the gross total income of a domestic company in any previous year includes any income by way of dividends from any other domestic company or a foreign company or a business trust, there shall, in accordance with and subject to the provisions of this section, be allowed in computing the total income of such domestic company, a deduction of an amount equal to so much of the amount of income by way of dividends received from such other domestic company or foreign company or business trust as does not exceed the amount of dividend distributed by it on or before the due date. The "due date" means the date one month prior to the date for furnishing the return of income under sub-section (1) of section 139 of the Act.

3. Buyback of shares - Section 115QA of the Income Tax Act, 1961

Any amount distributed by the Company pursuant to buyback of shares undertaken prior to October 1, 2024, from its shareholders shall be liable to buyback tax at 23.296% in the hands of the Company on distributed income (buyback price less issue price). Further, such transaction shall be exempt in the hands of the shareholders under section 10(34A) of the Act.

Pursuant to amendment in Finance Act (No.2) 2024, the provisions of section 115QA shall not apply for buy back of shares which takes place on or after October 01, 2024. Thus, there would be no tax on buy back for the Company effective from October 01, 2024.

Further, the Company is required to withhold tax at 10% provided the aggregate amount of dividend to the resident shareholders exceeds ₹ 5,000 during the financial year. Further, for non- resident shareholders tax shall be withheld at 20 %, subject to benefit under Double Taxation Avoidance Agreement.

GLOBAL ECONOMIC OVERVIEW

Global growth is slowing due to a substantial rise in trade barriers and the pervasive effects of an uncertain global policy environment. Growth is expected to weaken to 2.3 percent in 2025, with deceleration in most economies relative to last year. This would mark the slowest rate of global growth since 2008, aside from outright global recessions. In 2026-27, a tepid recovery is expected, leaving global output materially below January projections. Progress by emerging market and developing economies (EMDEs) in closing per capita income gaps with advanced economies and reducing extreme poverty is anticipated to remain insufficient. The outlook largely hinges on the evolution of trade policy globally. Growth could turn out to be lower if trade restrictions escalate or if policy uncertainty persists, which could also result in a build-up of financial stress. Other downside risks include weaker-than-expected growth in major economies with adverse global spillovers, worsening conflicts, and extreme weather events. On the upside, uncertainty and trade barriers could diminish if major economies reach lasting agreements that address trade tensions. The ongoing global headwinds underscore the need for determined multilateral policy efforts to foster a more predictable and transparent environment for resolving trade tensions, some of which stem from macroeconomic imbalances. Global policy efforts are also needed to confront the deteriorating circumstances of vulnerable EMDEs amid prevalent conflict and debt distress, while addressing long-standing challenges, including the effects of climate change. National policy makers need to contain risks related to inflation as well as strengthen their fiscal positions by raising additional domestic revenues and re-prioritizing spending. To facilitate job creation and boost long-term growth prospects in EMDEs, reforms are essential to enhance institutional quality, stimulate private investment growth, develop human capital, and improve labor market functioning.

After being buffeted by a series of adverse shocks over 2020-24, the global economy is facing another significant headwind this year, with increased trade barriers and heightened policy uncertainty leading to a notable deterioration of the outlook relative to January (figure 1.1.A). In particular, global output is expected to grow at its weakest pace since 2008, aside from outright global recessions (figure 1.1.B). The sharp increase in tariffs and the ensuing uncertainty are contributing to a broad-based growth slowdown and deteriorating prospects in most of the world's economies (figure 1.1.C). Subdued global growth prospects are unlikely to improve materially without policy actions to address increasing trade restrictions, geopolitical tensions, heightened uncertainty, and limited fiscal space.

The global outlook is predicated on tariff rates close to those of late May prevailing throughout the forecast horizon. Accordingly, pauses to previously announced tariff hikes between the Note: This chapter was prepared by Carlos Arteta, Phil Kenworthy, Nikita Perevalov, Peter Selcuk, Garima Vasishtha, and Collette Wheeler, with contributions from Mirco Balatti, Jongrim Ha, Samuel Hill, Gitanjali Kumar, Dawit Mekonnen, Alen Mulabdic, Edoardo Palombo, Shijie Shi, Naotaka Sugawara, and Takuma Tanaka. United States and its trading partners are assumed to persist. This baseline nonetheless entails the highest U.S. average effective tariff rate in nearly a century. In addition, in view of recent rapid shifts in trade policies and the potential for a return to even higher tariffs, consumers and businesses continue to grapple with unusually elevated uncertainty (figure 1.1.D). In this context, a prospective recovery in global trade and investment—two important drivers of long-term development that have been relatively subdued in recent years—has been disrupted.

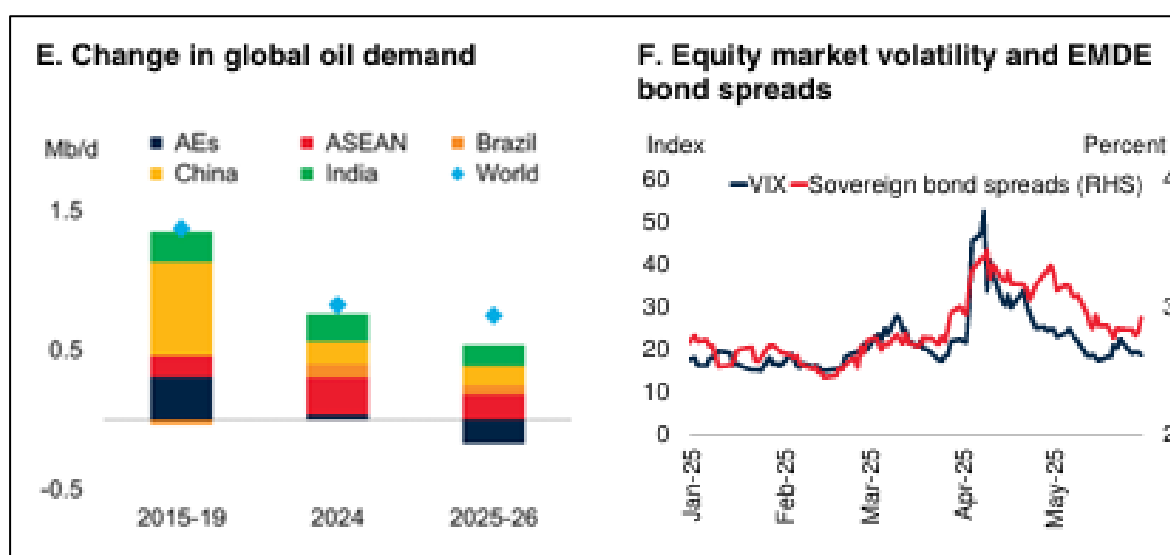

Commodity prices plunged in early April in response to deteriorating growth prospects. Oil prices posted an especially large decline, with the effects of a notable hike in oil production by OPEC+ nations compounded by a muted outlook for oil demand growth (figure 1.1.E). Base metal prices also dropped as markets priced in substantial headwinds to global manufacturing and industrial activity but have since partially recovered. Overall commodity prices are forecast to decline by 10 percent in 2025, softening further in 2026—mainly due to falling oil prices.

Global headline inflation generally remains elevated relative to central bank targets and pre-pandemic averages and has even risen in some advanced economies since late last year. Slower disinflation globally over the last six months has largely reflected continuing inflationary pressures from services prices. The recent rise in consumer inflation expectations has been influenced by the implementation of

trade restrictions. In addition, core inflation in some economies is expected to remain high due to persistent services price increases. In all, GDP-weighted global inflation is projected to average 2.9 percent in 2025 and 2026—still a little above the average inflation target—but with notable heterogeneity across economies.

Global financial conditions have been tighter this year, on average, relative to late 2024, principally reflecting trade policy uncertainty. Volatility in financial markets spiked and equity markets plunged globally as trade tensions escalated in early April; however, asset prices largely recovered after an initial 90-day tariff pause was announced and following the rollback in U.S.-China tariffs in May (figure 1.1.F). Long-term government bond yields in major advanced economies have increased since late last year, albeit with pronounced volatility. EMDE financial conditions are also somewhat tighter, on average, relative to late last year. In early April, many EMDEs saw sharp declines in equity markets amid a surge in capital outflows. Sovereign spreads rose, albeit to differing degrees based on economies' exposure to announced trade barriers. Nevertheless, EMDE equity markets regained ground and spreads narrowed again following the partial de-escalation in trade tensions.

Against this backdrop, global growth is set to slow this year, to 2.3 percent—substantially weaker than previously projected amid the impact of higher trade barriers, elevated uncertainty, increased financial volatility, and weakened confidence. Thereafter, growth is forecast to firm to about 2.5 percent over 2026-27, as trade flows continue adjusting to higher tariffs such that global trade edges up, while policy uncertainty moderates from record-high levels.

GLOBAL OUTLOOK

At the start of the year, WTO economists expected to see continued expansion of world trade in 2025 and 2026, with merchandise trade volume growth picking up gradually over time in line with GDP, and commercial services trade volume growing even faster. A profusion of new tariff measures announced and implemented since January prompted WTO economists to re-examine the trade landscape, resulting in a significant downgrade to the outlook for merchandise trade, and a smaller reduction in the outlook for services trade.

After adjusting baseline projections to account for the impact of recently announced tariffs and heightened trade policy uncertainty, WTO economists now foresee a -0.2% contraction in merchandise trade in 2025 – down from +2.9% in 2024 – followed by a 2.5% increase in 2026 reflecting weaker global demand. Meanwhile, growth in commercial services trade is expected to slow to 4.0% this year from 6.8% last year before ticking up to 4.1% next year.

Baseline projections suggest that merchandise trade growth could have been as high as 2.7% in 2025 and 2.9% in 2026 had tariffs and uncertainty remained low. Meanwhile, services trade growth could have reached 5.1% this year and 4.8% next year.

Risks to the forecast include the possible reinstatement of the currently suspended “reciprocal tariffs” proposed by the United States, as well as the spread of trade policy uncertainty to non-US trade relationships. If enacted, reciprocal tariffs would reduce global merchandise trade volume growth by 0.6 percentage points in 2025 while spreading trade policy uncertainty could shave off another 0.8 percentage points, posing particular risks for least developed countries (LDCs). Together, reciprocal tariffs and spreading trade policy uncertainty would lead to a 1.5% decline in world merchandise trade in 2025. These scenarios are explored in detail in the Analytical Chapter below.

The recent tariff disturbances follow a strong year for world trade in 2024 where merchandise trade grew 2.9% and commercial services trade rose 6.8%. Meanwhile, market-weighted world GDP grew 2.8%, making 2024 the first year since 2017 (excluding the rebound from the COVID-19 pandemic) where merchandise trade grew faster than output.

The US\$ dollar value of world merchandise exports in 2024 increased by 2% to US\$ 24.43 trillion, including trade within the European Union. China was the largest exporter (US\$ 3.58 trillion) while the United States remained the largest importer (US\$ 3.36 trillion). The European Union was the second largest trader on both the export side (US\$ 2.80 trillion) and the import side (US\$ 2.63 trillion).

The value of world commercial services exports in 2024 rose 9% to US\$ 8.69 trillion. The United States was both the largest exporter (US\$ 1.08 trillion) and the largest importer (US\$ 787 billion). However, if the European Union is counted as a single entity, its trade with the rest of the world was larger (US\$ 1.64 trillion for exports, US\$ 1.44 for imports).

ECONOMIC OUTLOOK 2025-26: Managing Uncertainty

- 1. The US has kicked off a full-fledged trade war: On 2 April, US president Donald Trump announced “reciprocal” tariffs that exceeded expectations, with products imported from China set to be taxed at a staggering 130% from 10 April.** The Liberation Day announcements included a universal minimum tariff of 10%, taking effect on 5 April at 12:01 a.m. President Trump also originally decided to impose individualized reciprocal higher tariffs on over 50 countries with which the US has the largest trade deficits, but ultimately announced a 90-day pause for all these countries except China. They are thus subject to only +10pps tariff hikes, while China is facing +125pps. Accounting for sectoral exclusions that were listed in the Executive Order (e.g. semiconductors, pharmaceuticals, copper, minerals), the US effective tariff rate on China now stands at 130%, while the EU faces 9%. All the tariff hikes bring the US global import tariff rate to 25.5%, the highest level since the 1890s. We assume bilateral deals could lower the US import tariff rate to 10.2% by Q4 2025.
- 2. In 2025, global GDP growth will slump to a mere +2.3%, the lowest level since the pandemic.** Global economic growth is set to decelerate by -0.6pp from +2.9% in 2024 due to the US trade war. The current level of global uncertainty is as high as it was during the Covid-19 pandemic. The US will enter a mild recession (cumulative decline of -0.5% Q1-Q3), with a weak +0.8% in 2025, due to ongoing policy disruptions, import tariff hikes and retaliation tariffs from China. Europe will not escape lower growth due to higher trade restrictions and a weaker US economy, despite the German fiscal stimulus and higher defense spending. We have cut forecasts to +0.8% in 2025 and +1.5% in 2026. Increasingly worried households are likely to increase precautionary savings, dampening consumer demand.
- 3. Reflation risks make central banks cautious.** Inflationary pressures, particularly in the US, are resurfacing, with headline inflation expected to peak at 4.3% by summer, driven by tariffs. Consequently, the Federal Reserve is expected to adopt a cautious approach, holding rates in place until October and then cutting them to 4% by end-2025 and 2.75% by mid-2026. Persistent stagflationary risks will reinforce the Fed's focus on combating inflation above promoting growth. Europe's continued disinflation contrasts sharply, suggesting divergent monetary policy responses between the two regions. The ECB is likely to bring rates down to 1.5%, -50bps more than expected.

4. **Emerging markets are dealing with the (tariff) stick and gaining from the (diversification) carrot.** Emerging markets are responding strategically by adjusting tariffs on American goods and diversifying imports. Israel, Vietnam, India and Thailand, to name a few, have opted for (resp.) cutting tariffs, seeking a trade agreement or increasing imports. Overall, countries which have the highest export dependency on the US and that are subject to the highest tariff hikes are likely to negotiate first, by committing to buy more US products, lowering import tariffs to close to 0 and increasing investments in the US when possible. Many nations in Asia (e.g. Cambodia, Vietnam, Taiwan and Thailand and South Korea) and a few in Latin America (e.g. Mexico, Colombia) are likely to do so. Like a fog of war, it is unclear what the final tariff landscape will look like, but the cost of uncertainty is high as tariff arbitrage is now off the table for most companies – until the dust settles. China has taken a harsher tone, announcing retaliation of +84pps tariffs on all US imports, effective on 10 April, and potentially more to come. China demonstrated signs of economic recovery in Q1 and is proactively promoting consumption-focused reforms. Fiscal stimulus and monetary easing are expected to support GDP growth to reach +4.5% in 2025 and +4.2% in 2026, despite lingering downside risks.
5. **Companies are adopting short-term strategies such as frontloading imports, diversifying supply chains and adjusting prices to mitigate tariff impacts, while policy uncertainty hampers investments, especially outside the US.** US companies are expected to manage over the next few months with solid balance sheets and stockpiling covering six months of demand (especially retailers and consumer electronics). However, two-thirds may pass tariff costs to consumers, varying by sector. Meanwhile, production is shifting from China to Southeast Asia, Mexico and even the US to avoid tariffs. Companies have announced nearly USD1trn in investments in the US despite higher labor costs, which could affect profitability. Strong brands like luxury and tech can absorb costs without losing market share, while low-margin sectors like retail have fewer options. Overall, global uncertainty will suppress capital expenditures, particularly in Europe. Negotiating price cuts and selectively lowering selling prices are additional tactics. Global insolvencies are projected to rise by +7% in 2025 due to the slump in global demand and geopolitical issues, with the US seeing an +16% increase and Western Europe a +5% rise.

INDIAN ECONOMIC OVERVIEW

India's economic journey over the past few years has been marked by remarkable growth and a steady rise in its position on the global stage. After overtaking the United Kingdom (UK) to become the fifth largest economy in Q1 FY23, India has continued this upward trajectory to surpass Japan in June 2025 to become the fourth largest economy in the world. With a nominal Gross Domestic Product (GDP) of Rs. 3,31,03,000 crore (US\$ 3.78 trillion), India's growth reflects a combination of strong domestic demand and policy reforms positioning the country as a key destination for global capital.

Further, India is projected to reach a GDP of Rs. 4,26,45,000 crore (US\$ 5 trillion) by 2027 and is on course to surpass Germany by 2028. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

MARKET SIZE

India's economy shows robust expansion, with real GDP for FY25 estimated at Rs. 1,87,97,000 crore (US\$ 2.20 trillion), from Rs. 1,76,51,000 crore (US\$ 2.06 trillion) in FY24 with a growth rate of 6.5%. This growth is driven by rising employment and stronger private consumption, supported by improving consumer sentiment, which is expected to keep the momentum going in the near future.

Trade remains a critical pillar of India's growth story with exports reaching Rs. 37,31,000 crore (US\$ 436.6 billion) in FY25, led by Engineering Goods (26.88%), Petroleum Products (13.86%) and Electronic Goods (8.89%). These exports helped the economy stay resilient during the pandemic when other sectors slowed. Union Minister of Commerce and Industry, Mr. Piyush Goyal projects exports to reach Rs. 85,44,000 crore (US\$ 1 trillion) by 2030.

India's ability to attract Foreign Direct Investment (FDI) has also strengthened. The country received record FDI inflows amounting to Rs. 4,21,929 crore (US\$ 49.3 billion) in FY25 a 15% increase over FY24, supported by a stable policy environment, a large domestic market and steady economic growth positioning the country as a key destination for global capital. This capital inflow also complements government plans for increased investment in infrastructure and asset-building projects to further boost economic growth.

India's external economic position is improving. The current account deficit narrowed to Rs. 1,98,726 crore (US\$ 23.30 billion), or 0.6% of GDP, in FY25 from Rs. 2,21,754 crore (US\$ 26.00 billion), or 0.7% of GDP, in FY24. This improvement was due to higher net receipts from services and secondary income, according to the Reserve Bank of India (RBI).

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, several of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- On July 5, 2025, the Union Cabinet approved the Rs. 1,00,000 crore (US\$ 11.72 billion) Research, Development and Innovation (RDI) Scheme, launching long term, low or zero interest funding via a special purpose fund under the ANRF to jump start India's R&D ecosystem and support deep tech and startup innovation.
- On March 27, 2025, the Reserve Bank of India proposed doubling the investment cap for individual foreign investors in listed firms from 5% to 10%, with a combined foreign individual limit increasing to 24%, to counter Foreign Portfolio Investment (FPI) outflows.
- On March 27, 2025, the Reserve Bank of India proposed doubling the investment cap for individual foreign investors in listed firms from 5% to 10%, with a combined foreign individual limit increasing to 24%, to counter Foreign Portfolio Investment (FPI) outflows.

ROAD AHEAD

India's economy grew by 6.5% in FY25. With a 7.4% growth rate in Q4 FY25, with RBI projecting a growth rate of 6.5% in FY26 as well. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. In 2024, India rose to 15th place globally in FDI rankings and retained its position as South Asia's top recipient.

In H1 FY25, India's growth-focused approach was underscored by the government's capital expenditure outlay of Rs. 15,02,000 crore (US\$ 176 billion), reinforcing its commitment to infrastructure-led development.

In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10% to Rs. 11,21,000 crore (US\$ 131 billion) over Rs. 10,18,000 crore (US\$ 119 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total goods and service exports surged by 76% over the past decade, touching Rs. 70,36,425 crore (US\$ 825 billion) in FY25, driven by strong performance in engineering goods, electronics, and pharmaceuticals. With a reduction in port congestion, supply networks are being restored.

With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

IMPACT OF INTERNATIONAL TRADE POLICIES AND TARIFFS

Effective August 27, 2025, the Trump administration imposed an additional ad valorem (meaning based on the value of product) 25% tariff on Indian goods, citing India's purchase of Russian oil. This measure, combined with existing tariffs, has created a cumulative US tariff burden of 50% on most affected Indian exports, altering the landscape of foreign trade between the nations.

The decision represents more than an economic policy dynamic; it signals an era of geoeconomic friction that is compelling India to reassess its trade strategies and accelerate domestic reform initiatives. While the impact appears severe, this external pressure is catalyzing India's vision of Aatmanirbhar Bharat and economic self-reliance.

Understanding the tariff structure

The current tariff regime consists of a structure that has escalated duties to levels of 50%. The 25% additional tariff supplements a pre-existing 25% "reciprocal" tariff implemented in August 2025, creating a total burden of 50% on most Indian exports to the United States.

These measures apply across sectors, though certain industries including pharmaceuticals, electronics, and petroleum products have received exemptions. The tariffs target India's labor-intensive export sectors, which form the backbone of regional economies and employ millions of workers across the country.

Economic Implication for India

India's export sectors face significant challenges as new U.S. tariffs will impact 66% of the country's total exports to the US valued at \$86.5 billion. A flagship report from the [Global Trade Research Initiative \(GTRI\)](#) shows that this includes \$60.2 billion worth of goods that will be subject to the additional tariffs starting August 27.

This is expected to cause an overall drop in merchandise exports to the US by 40-45% in fiscal year 2025-26, with severely affected sectors potentially experiencing volume collapses of up to 70%. According to Global Trade Research Initiative (GTRI) analysis, the sectors to be majorly impacted are textiles and apparel Industry, Gems and jewellery, marine products and aquaculture, agriculture, organic chemicals among others.

Micro, Small, and Medium Enterprises (MSMEs), which account for roughly 45% of India's total exports and dominate affected labor-intensive sectors with a 70% share, face disproportionate impact. These enterprises operate on thin margins and lack the financial flexibility to absorb increased costs, making them particularly vulnerable to the US tariff shock.

The broader economic impact could result in a reduction of 0.9 percentage points from India's nominal GDP growth, representing a potential economic contraction of \$7-25 billion. However, these short-term challenges must be viewed against India's robust domestic fundamentals, with over 60% of GDP driven by internal consumption.

Conclusion

The implementation of the US tariff on India marks a defining moment in bilateral trade relations, presenting short-term challenges particularly for labor-intensive sectors and MSMEs. However, in the long-term, this external pressure is catalyzing India's transformation towards greater self-reliance and economic resilience.

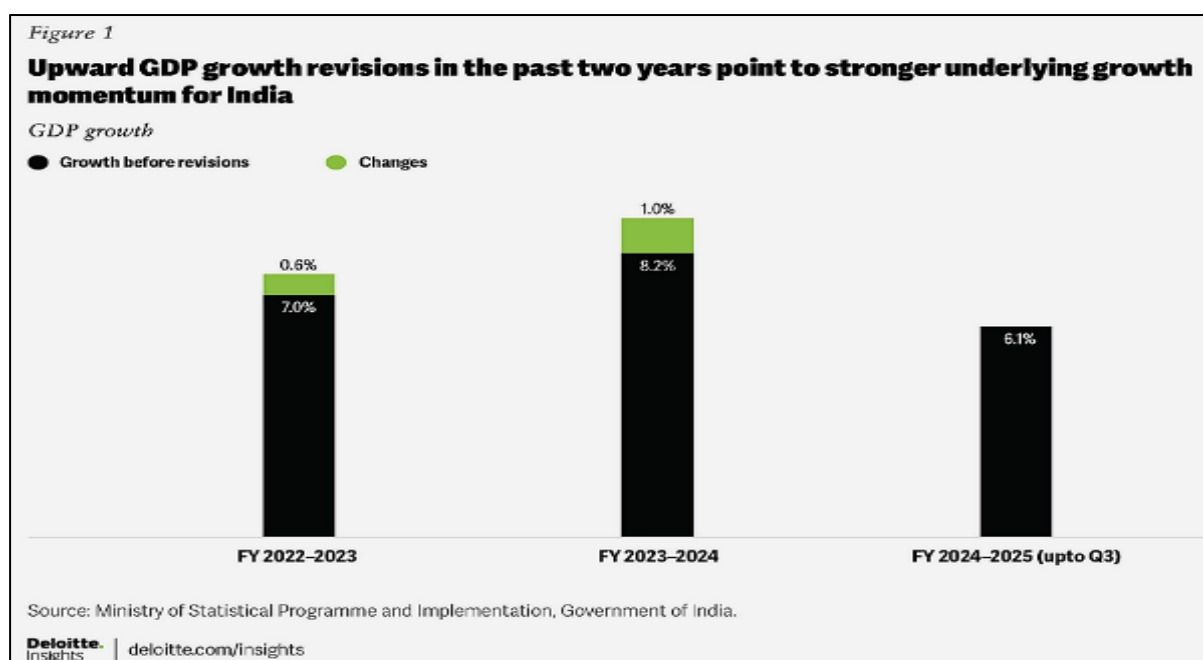

The government's measured response, focusing on domestic reform acceleration rather than retaliation, reflects a mature approach to economic statecraft. The renewed emphasis on Aatmanirbhar Bharat, the swadeshi movement, and Make in India initiatives demonstrates how external challenges can become catalysts for internal strengthening.

While the tariffs represent a setback to US-India trade relations, the transformation of this crisis into an opportunity for structural reform exemplifies India's capacity for adaptive resilience in an increasingly complex global economic environment.

INDIAN ECONOMIC OUTLOOK

Previous years' GDP figures were significantly revised upward, underscoring the inherent strength in India's domestic demand, the nation's biggest growth driver. Particularly, the growth rate for fiscal 2023 to 2024 was revised upward by 1 percentage point, and it is now pegged at an impressive 9.2%—the highest in 12 years (excluding the post-pandemic rebound; figure 1).

Besides, the apparent “slowdown” in fiscal 2024 to 2025 has partly been a consequence of election-driven uncertainty (with both India and the United States going to the polls), disruptions driven by more-than-anticipated rainfall till the third quarter, and volatility in global trade networks in the last two quarters. Not to mention, the growth over the year is being compared against a significantly elevated economic base driven by revised figures for the past year.

Deloitte's forecast for India has been optimistic, compared to market consensus, and GDP data revisions in the past years reinforce confidence in the Indian economy's inherent strength, which has surpassed optimistic [Deloitte projections](#) in the past. This optimism is carried forward, as we see a good jump in high-frequency indicators such as goods and services tax, auto sales, and sales of fast-moving consumer goods in recent months. Deloitte forecasts annual growth of 6.3% to 6.5% in fiscal 2024 to 2025.

Two opposing forces are set to define India's economic trajectory in fiscal 2025 to 2026:

- **The potential positive impact of tax incentives:** The Union Budget's tax stimulus could raise GDP at least by 0.6% to 0.7% this fiscal. Besides, lower inflation, range-bound global oil prices, lower

borrowing rates, and more liquidity (due to the easier monetary policy), and a more certain global environment by the end of the year will help boost sentiment. All of these factors will considerably push domestic consumer spending and investments forward.

- **The potential negative impact of uncertainty in global trade networks:** At the time of writing, India faces an ad valorem baseline tariff rate of 10% on its goods exports to the United States. Since this rate is applicable over and above the 2023 trade-weighted average most-favored nation (MFN) tariff rate of 2.2%, the effective trade-weighted average MFN tariff rate stands at 12.2%.⁵ The remaining potential differential tariff rate imposed on India, of 16% (for a total reciprocal tariff rate of 26%, which varies across countries and is currently paused for three months), could take the effective trade-weighted average MFN tariff rate to 28.2% on India's exports to the United States by the end of the fiscal year. This may potentially shave 0.1% to 0.3% off India's growth.

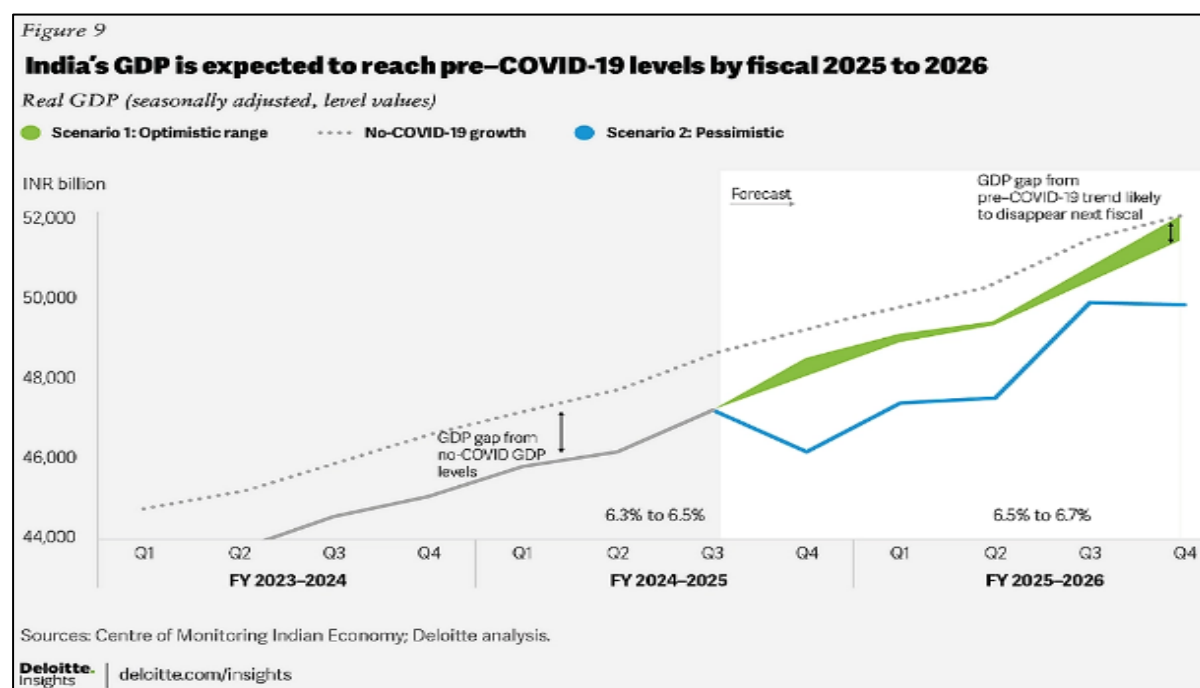

Considering the net impact of these two factors on growth (discussed at length in this edition), Deloitte remains cautiously optimistic about growth in the current fiscal (with likely growth between 6.3% and 6.5%), and forecasts growth between 6.5% and 6.7% in the next (2025 to 2026).

WHAT LIES AHEAD: Effect of Tariffs on Economic Fundamentals

In our baseline optimistic projections for this quarter, we factored in both the possible boost to consumer spending due to tax cuts and the adverse impact of global trade on India's goods trade balance (as discussed in previous sections).

The tax exemptions announced in the budget will increase consumer spending and may boost GDP by 0.6% to 0.7%. However, uncertainty around the tariff rates imposed by the United States on Indian exports could offset those gains by 0.1% to 0.3%. Deloitte's outlook remains optimistic, but cautious.

Under the baseline scenario, Deloitte predicts growth in the range of 6.3% to 6.5% in fiscal year 2024 to 2025 and between 6.5% and 6.7% in the current fiscal (figure 9).

Deloitte remains confident that trade uncertainties may settle as India and the United States reach a bilateral trade agreement by fall this year. This would lead to better visibility into global trade for the rest of the year and improve India's net exports. This, together with India's strong consumer spending levels and possibly lower inflation, may encourage investors to move on with investment decisions.

INDIAN APPAREL MARKET OVERVIEW

The Indian textile and apparel market size was valued at USD 222.08 Billion in 2024. Looking forward, IMARC Group estimates the market to reach USD 646.96 Billion by 2033, exhibiting a CAGR of 11.98% from 2025-2033. The rising need for high-end clothes and smart textiles, increasing initiatives from the Indian government to help weavers, and growing use of ethical sustainable materials are key factors that drive the market.

Worldwide market shifts provide the textile and apparel market with lucrative opportunities. Political unrest in countries, like Bangladesh, has pushed global stores to seek other sources, and they see India as a profitable option. To address this, India's government plans to boost financial support for the textile industry. This includes cutting taxes on main raw materials such as polyester and viscose staple fiber. These ideas aim to make the industry compete better worldwide. Also, India's broad range of products and cultural mix are making it a global textile leader pushed by sustainability and tech-driven initiatives.

Indian Textile and Apparel Market Trends:

- **Growth in Domestic Consumption:** The growing buying power of India's middle class is driving demand for high-end and branded apparel. Furthermore, the exponential growth in online shopping is making apparel more accessible in rural and urban markets. Brands are using digital media and AI-powered personalization to drive customer experience, which leads to higher engagement and repeat purchase. The government is also helping businesses by implementing incentives for local producers and making India a global textile export hub. With the right economic environment, India's apparel and textile sector is poised to thrive, becoming one of the world's largest and fastest-growing markets.
- **Strengthening Export Potential and Global Market Presence:** India's apparel and textile sector is consolidating its global position by expanding into new geographies and deepening trade alliances. The government's PLI scheme is promoting large-scale manufacturing of man-made fibers and technical textiles, which will position India as a player alongside global peers China and Vietnam. Furthermore, Free Trade Agreements with markets like the United Kingdom, the European Union,

and Australia are promoting the de-barring of trade as well as more export opportunities. India's technical textiles industry is expanding rapidly, serving the automotive, healthcare, and infrastructure industries. Furthermore, India is also leveraging geopolitical changes, as global brands are diversifying supply chains and looking toward India becoming a stable and competitive supply platform. With strategic investments, improved logistics, and the government's larger support, textile exports from India are headed for a healthy revival, placing it as the top supplier within the global business of textiles.

- ***Rising Focus on Sustainability and Eco-Friendly Textiles:*** Sustainability is emerging as a key driver of growth for the industry, as more and more companies adopt green practices. India is among the world's largest producers of organic cotton, with over 300 Global Organic Textile Standard (GOTS)-certified textile units, and a world leader in the production of sustainable fabrics. Recycled fibers, water-saving dyeing, and solar-powered textile mills are finding favor, as the market for eco-fashion is growing. India's leading fashion brands are now adopting circular economy designs, with minimal waste and maximum recycling of resources. The government has initiated policies to incentivize zero-liquid discharge manufacturing and reward green textile production. Leading international fashion brands are now importing sustainable fabrics from India, recognizing its ability to produce high-quality, environment-friendly products. With growing innovation, greater investment in green technology, and strong policy support, India is likely to emerge as a hub for sustainable textiles, catering to the growing global demand for responsibly produced apparel.

KIDS APPAREL MARKET IN INDIA

The India Kids Apparel Market was valued at USD 24.56 Billion in 2024 and is projected to reach USD 29.35 Billion by 2030, rising at a CAGR of 3.01%. This growth is fueled by rising disposable incomes, increasing urbanization, and greater awareness of children's fashion preferences. Indian parents now prioritize comfort, quality, and style, boosting demand for branded and sustainable clothing options. E-commerce platforms have expanded reach and convenience, offering broad selections and influencing purchasing behavior. Trends such as character-themed apparel, seasonal collections, and social media influence are reshaping consumer expectations. With a growing child population and aspirational middle-class families across urban and semi-urban areas, both domestic and global brands are actively investing in this expanding segment.

Key Market Drivers

Rising Disposable Incomes and Urbanization

A key growth driver for the kids apparel market in India is the increase in disposable incomes, particularly among middle-class households in urban and semi-urban areas. India's per capita disposable income rose from USD 2.11 thousand in 2019 to USD 2.54 thousand in 2023, empowering families to spend more on quality children's clothing. Urbanization is transforming consumption patterns, with lifestyle upgrades and increased access to modern retail formats influencing parents to opt for stylish and branded kidswear. Exposure to global fashion trends, driven by metropolitan living, has shifted buying behavior from basic needs to occasion-specific and premium apparel choices. Additionally, dual-income households now have greater spending power, leading to higher demand across categories such as festive wear, premium outfits, and custom-designed clothing. These developments signal continued demand growth as economic and urban trends evolve.

We are engaged in the manufacturing of readymade garments, with operations based in West Bengal. Our product range spans menswear, womenswear, and childrenswear, with a significant portion of our output focused on garments for children. Our offerings include t-shirts, joggers, vests, leggings, shorts, and infant wear, among others, catering to a variety of end-use segments and age groups.

We are an ISO 9001:2015 certified company. This certification reflects the presence of defined quality management systems and standardised operational procedures across our processes. It reinforces our

ability to meet buyer specifications consistently, supports compliance with international trade norms, and contributes to the facilitation of cross-border operations, including import and export.

We develop samples both in response to themes and mood boards provided by buyers, as well as through our own in-house design initiatives. Once a sample receives approval, we undertake production at our manufacturing facility. Our garments are supplied to large-format retailers and wholesalers in the local market.

Our manufacturing activities are primarily concentrated in Barasat, North 24 Parganas, West Bengal, where we own and operate our production facility. Most operations following fabric processing including cutting, printing, stitching, and finishing are conducted in-house. We manage design development, sample creation, and production schedules internally through a team of merchandisers, each assigned to specific buyers to ensure continuity and coordination.

We procure yarn, which is then sent for knitting and dyeing through external job workers. Once the processed fabric is received, all subsequent manufacturing operations are carried out within our facility. A significant portion of our production infrastructure is automated, including the use of automatic printing and sequencing machines. This integration of technology enables us to maintain consistency, enhance efficiency, and uphold quality across our product offerings.

OUR JOURNEY AND LEADERSHIP

We began our journey in 2017, when our founder, Mr. Vishal Nahar, established Fascinate Textiles Private Limited with the objective of creating a cost-effective and a quality-focused garment manufacturing setup. Mr. Nahar has been associated with a family run proprietorship firm operating in the apparel sector, he brought with him a practical understanding of buyer expectations, production processes, and market dynamics.

In the initial phase, we operated with a small setup, catering to the domestic market. From the beginning, our approach was to ensuring timely deliveries, and staying closely aligned with client requirements. Between 2018 and 2019, we gradually expanded our capacity and added in-house printing tables, which allowed us greater control over production timelines and consistency. It was also during this period that we started building long-term relationship with one of the retail brand with multiple outlets.

In 2021, the Company expanded its manufacturing capabilities through investments in machinery and consolidated operations by merging with the existing family-run proprietorship business.

In 2022, we started building a new, consolidated manufacturing facility on land which we had recently acquired. During this time, we also achieved SEDEX certification. Additionally, another retail client commenced business with us during this period.

By 2023, we had shifted our main operations into the new facility while retaining the previous unit to support overflow and peak season orders. This allowed us to enhance production capacity and service a wider range of requirements. In 2024, we undertook further automation initiatives, acquired two partnership firms, and added automatic printing and cutting equipment. We also laid the foundation for our own brand and applied for its trademark.

In 2025, we formally launched our local sales operations. Work on brand development also progressed during this time, as we diversified our presence across market segments.

Throughout this journey, we have remained focused on building stable systems, strengthening our internal capabilities, and staying aligned with buyer needs. Under the continued leadership of Mr. Nahar, our team remains committed to delivering consistent, compliant, and quality-driven production.

OUR STRENGTHS

1. End-to-End Manufacturing Capability

We follow an integrated approach to garment manufacturing, where most key operations are carried out in-house. Only knitting and dyeing are undertaken through external job work.

This setup allows us to maintain control over quality and timelines, enabling a smoother flow of production and a more coordinated response to client requirements. Having dedicated merchandisers for each buyer ensures close monitoring of every stage from tracking fabric availability and aligning with seasonal trends to final execution making the process more efficient and structured.

Our primary focus has been on kids wear, which often involves fast-changing designs, multiple print variations, and seasonal collections. The in-house model gives us the flexibility to respond quickly once

a design is approved. Over time, this structure has supported our growth in production volumes across categories, as shown below:

These figures reflect our evolving capacity and ability to cater to growing demand across different garment segments. Our integrated manufacturing model not only streamlines operations but also helps ensure that we are well-positioned to meet client expectations.

2. Versatile Product Range with Customisation Capabilities

We produce a wide range of garments including t-shirts, joggers, co-ords, kids wear, and casualwear. These are made using different types of fabrics and finishes, which helps us cater to a variety of customer preferences and seasonal needs.

Our production setup is designed to handle different kinds of designs and details such as prints, embroidery, special washes, and custom trims. This makes it easier for us to work with specific requests from buyers without major changes to our process.

Because of this flexibility, we can support both bulk and small-batch orders, respond to design trends, and develop collections across different age groups and product types. It also allows us to keep our production lines active throughout the year, supporting steady utilisation and timely delivery.

3. Quality Control Framework

We have implemented a structured, multi-stage quality control process to ensure consistency in every production cycle. This process is managed by a third-party partner and includes checks at the raw material stage, in-line inspections during stitching and finishing, and final audits based on the Acceptable Quality Limit (AQL) before dispatch.

Our third-party quality assurance partner follows standardized procedures that are aligned with buyer specifications and industry norms. We facilitate these inspections according to our clients' protocols. This system helps us identify and resolve issues early, which in turn reduces rejection rates and ensures that the final garments meet the expectations set during the initial sampling and approval stages.

4. Business Model – Order Driven Approach

We operate on an order-driven production model, with the majority of our sales generated through B2B transactions with large retail clients and a smaller proportion derived from B2C sales under our own brand. Manufacturing commences only upon prior approval of product samples from buyers and receipt of a confirmed purchase order. This process ensures that each production batch is customised to client specifications, thereby enhancing customer satisfaction and minimizing production errors. By aligning manufacturing closely with actual demand, the risk of overproduction and unsold inventory reduces, raw material procurement is optimised, and plant capacity is utilized efficiently. This approach also enables better working capital management and supports consistent on-time delivery, as production schedules are planned in advance based on confirmed requirements.

Our in-house production is supported by a technically trained workforce, including pattern masters, stitching operators, merchandisers, and quality assurance personnel. This enables us to meet buyer specifications, manage order volumes efficiently, and uphold quality standards.

6. Locational Advantage

Our manufacturing facility is strategically located in Barasat, West Bengal, a region that provides significant practical advantages for our business. This location has been a meaningful contributor to our growth and continued operations over time.

Our proximity to Kolkata gives us smooth access to the city's major road, rail, and port infrastructure. This is essential for the timely movement of raw materials into our unit and for the efficient dispatch of finished goods. The ease of access to these transport networks helps us maintain consistent delivery timelines and coordinate effectively with our buyers. An additional benefit is that our facility is situated approximately 250 km from a major port, providing us support for our logistics operations.

This region has a concentration of workers in the garment manufacturing sector. We have engaged workforce, with many from local communities familiar with stitching and related processes. This has supported our ability to manage production volumes while adhering to product specifications. The location also provides access to raw materials and cheaper labour, which supports our production costs and supply chain.

The road and rail infrastructure links us to markets in Eastern, Northeastern, and Central India. This has enabled us to serve domestic demand and sustain supply chains. The industrial environment provides access to urban infrastructure and a workforce, which supports our production and operations.

7. Existing Relationships with Clients

We place emphasis on cultivating and sustaining long-term relationships with both our clients. These relationships form a critical part of our business model, particularly in the business-to-business (B2B) segment, where consistency, reliability, and trust are essential.

We have built partnerships since years with our clients, several of whom have maintained continuous associations over multiple years. These associations have significantly contributed to revenue stability, high client retention rates, and consistent order volumes. The table below highlights select key customers and their years of association with us:

No of Customers	Association Since
1	2019
2	2022
3	2023

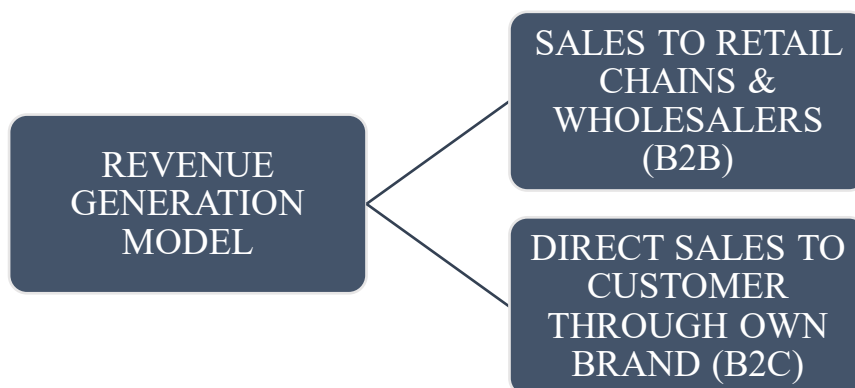

These existing relationships not only support recurring business but also reinforces industry credibility, often resulting in referrals and expansion of its client base.

REVENUE GENERATION MODEL

Our revenue generation model is structured around the Domestic segment, which includes both business-to-business (B2B) manufacturing and business-to-consumer (B2C) sales under our own brand. Each channel operates with tailored strategies to effectively serve its market.

Sales to Retail Chains and Wholesalers (B2B)

In the B2B segment, garments are supplied directly to retail chains operating across multiple locations and wholesalers. These clients place repeat orders based on established relationships and prevailing market demand.

Our sales activities include engaging buyers through curated sample presentations and negotiating commercial terms such as pricing, delivery schedules, and payment conditions. We tailor our product offerings through custom and trend-driven samples to meet specific client preferences.

Our pricing is competitive, reflecting the efficiencies and scale we achieve through in-house manufacturing. To support ongoing revenue, we maintain post-sales communication by collecting feedback and developing samples for upcoming collections, encouraging repeat business and long-term client retention.

Direct Sales to Consumers – Own Brand (B2C)

Sales under our own brand are conducted through direct communication with consumers. We manage the entire customer journey, encompassing order processing, payment handling, and direct shipping. This direct-to-consumer model facilitates competitive pricing, a direct feedback mechanism, and brand engagement.

Our geographical presence:

Our manufacturing activities are primarily carried out in one state, with products supplied to customers across several regions in India. Through these operations, we have built a presence in multiple states, and our revenue reflects contributions from a range of markets.

RAW MATERIAL PROCURMENT STRATEGY

We procure a wide range of raw materials including yarn, fabric, threads, chemicals, accessories, and packaging materials from various states across India, depending on the nature of the material, availability, and supplier capabilities. The selection of suppliers is driven by consistency in quality, delivery timelines, and cost-effectiveness, allowing us to maintain stable production schedules and meet the quality expectations of our buyers.

A significant portion of yarn and fabric which are the primary raw materials for garment manufacturing is sourced from West Bengal, where our manufacturing unit is located. This proximity allows us to reduce lead time and logistics costs while ensuring better control over procurement cycles.

In addition to core materials, we procure threads, ribs, zippers, and other accessories from multiple locations, including Tamil Nadu, Maharashtra, Gujarat, and Delhi, depending on supplier specialisation. Chemicals used in fabric printing and processing are mainly procured from West Bengal, with occasional purchases from Delhi and Haryana.

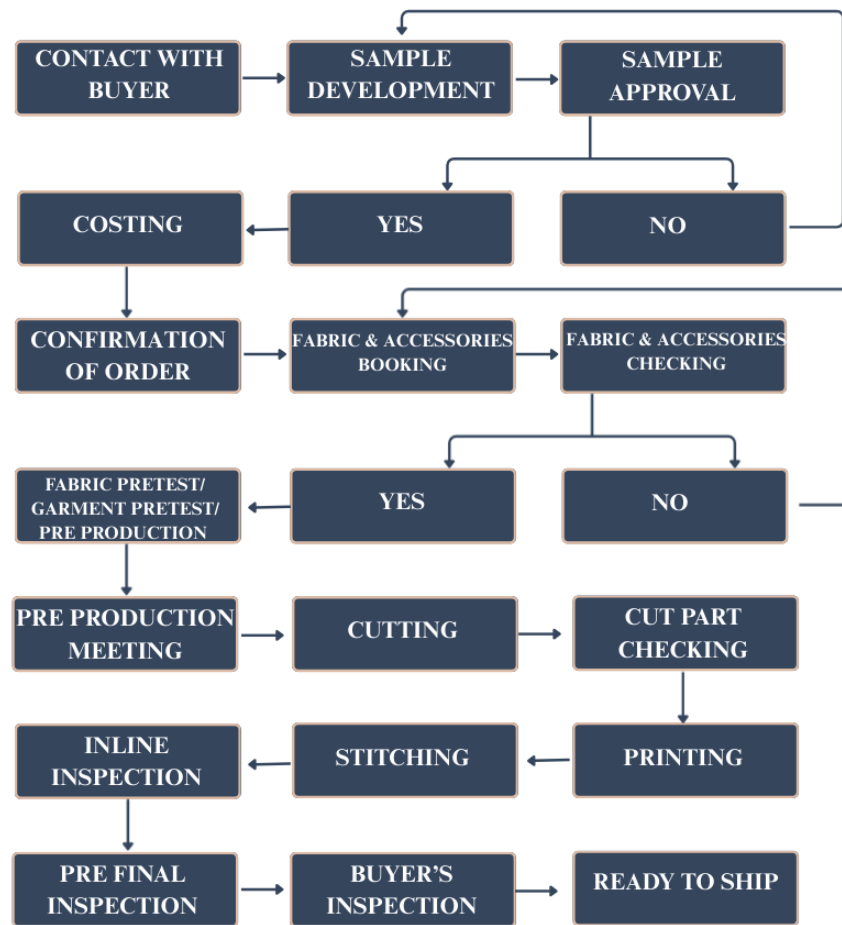

Our procurement strategy is built around timely availability, regional supplier strengths, and maintaining quality across multiple categories.

A summary of raw material purchases by state and category over the past three fiscal years is tabulated below:

MANUFACTURING PROCESS

1. Contact with Buyer:

The process begins with initial contact, either through existing networks or new inquiries. Every buyer is assigned a dedicated merchandiser who becomes the single point of contact for all communications. This merchandiser is responsible for:

- Understanding the buyer's seasonal themes, product requirements, and volume expectations.
- Aligning internal capabilities with client timelines and budget.

By doing this clarity, responsiveness, and efficient decision-making is ensured. Merchandisers maintain detailed client folders and CRM (Customer Relationship Management) logs to track correspondence, feedback, and approvals, ensuring traceability and accountability.

2. Sample Development:

Once the buyer's requirements are clearly defined, the product development team begins working on initial samples. This involves a multi-disciplinary effort across design, sourcing, and production functions:

- Fabric base selection: Based on seasonality, design complexity, and target pricing, the appropriate knit or woven base is chosen (e.g., single jersey, interlock, rib, fleece).

- **Print and embellishment development:** Using a combination of proprietary print libraries, AI tools, and buyer references, unique print layouts are developed. Special finishes such as glitter, foil, or puff are also integrated where needed.
- **CAD patterning and sampling:** Patterns are drafted and graded in CAD (Computer Aided Design) systems for accuracy. Samples are stitched with proper trims and accessories to mimic final production.
- **Cross-functional validation:** Internal review of the sample by design, Quality Assurance, and merchandising teams before submission to the buyer.

3. Sample Approval

The buyer evaluates the sample on multiple parameters including:

- Alignment with mood board.
- Fit, fall, and finish.
- Print alignment and embellishment detailing.
- Construction quality and workmanship.
- Compliance with their internal benchmarks.

If modifications are needed, the sample is returned to the development stage and the changes are made according to the specifications. The revised sample is then resubmitted for final approval. Once approved, this sample is finalized and becomes the standard against which all bulk production is benchmarked. This is shared across relevant departments to ensure uniformity.

4. Costing

The costing process begins after the buyer approves the sample. At this stage, the merchandising and accounts teams work together to prepare a detailed costing sheet. This includes the cost of fabric and yarn, trims and accessories, stitching and finishing operations, printing and other value additions, packaging materials, freight and forwarding charges, as well as general overheads.

Once the costing is prepared, it is reviewed by senior management to ensure it aligns with the margin requirements. The final costing is then shared with the buyer, and both parties engage in pricing discussions. These negotiations are based on actual input costs and the expected order size, allowing us and the buyer to arrive at a mutually acceptable price.

5. Order Confirmation

Once the buyer approves the sample and both parties agree on the commercial terms, a formal purchase order is issued. This document confirms the product specifications, quantities, delivery timelines, and pricing.

Upon receipt of the order, internal preparations are initiated to ensure timely execution. A work order is created, and the relevant teams are informed so that material procurement and production planning can begin. Each department aligns its tasks to meet the agreed timelines.

6. Fabric and Accessories Booking

Once the purchase order is confirmed and the sample is approved, the procurement process begins based on the Bill of Materials (BOM). The BOM outlines all raw materials required for the order, including fabric specifications, trims, and accessories.

Yarn is either drawn from in-house inventory or sourced from pre-approved vendors, depending on the requirement. The yarn is then sent to external units for knitting and dyeing, as per the fabric quality and construction specified in the approved sample. The procurement of accessories such as buttons, labels,

tags, elastics, and packaging materials are also initiated in parallel, in alignment with buyer standards and order volume.

7. Fabric and Accessory Checking

Upon receipt of raw materials, a dedicated Quality Control (QC) team conducts structured inspections:

- **Fabric Inspection:** Fabrics are tested for key parameters such as GSM, shrinkage, colour fastness, and any visual or structural defects.
- **Accessory Inspection:** Trims and accessories are checked for functional quality, color matching, tensile strength, and safety parameters especially where products are meant for children's wear.

If any material fails to meet the required standards, it is rejected and returned to the vendor for either replacement or for corrective action. Only materials that pass inspection are moved to the next step for production use. This ensures that only compliant inputs proceed to the next stage in the manufacturing process.

8. Fabric Pretest / Garment Pretest / Pre-Production

- **Fabric Pre-Test (FPT):** Laboratory testing of fabric for shrinkage, wash fastness, pilling, colorfastness, lead content, and azo-dye restrictions.
- **Garment Pre-Test (GPT):** A garment made with final trims is tested for construction strength, sizing accuracy, wear and wash durability.
- **Pre-Production (PP):** A full, production-ready sample using all approved inputs is made and sent to the buyer for sign-off. This acts as the final benchmark.

9. Pre-Production Meeting (PPM)

Before commencing bulk production, a Pre-Production Meeting (PPM) is conducted to bring together key departments involved in executing the order. The purpose of this meeting is to ensure that all teams are aware of the buyer's requirements and that any important instructions are clearly communicated.

The PPM provides an opportunity for internal alignment and serves as a reference point before initiating the cutting and stitching process. Any pending clarifications from the buyer, if any, are also discussed and noted at this stage.

10. Cutting

Bulk cutting is initiated post-PPM. Key steps include:

- **Marker making:** Using CAD (Computer Aided Design) to optimize fabric usage.
- **Layering:** Spreading fabric in multiple layers with minimal tension.
- **Cutting:** Manual or semi-automatic cutting machines used for accuracy.
- **Bundling:** Pieces are tagged with size, color, and style for tracking.

11. Cut-Part Checking

Every bundle undergoes part inspection for:

- Holes, stains, weave flaws.
- Mislabeling or size mismatch.
- Accurate alignment of prints or stripes.

Defective parts are segregated and re-cut immediately to avoid delays.

12. Printing & Embroidery

Once the cut parts are ready, they move to the printing or embroidery stage, depending on the specific requirements of the order.

Printing is carried out in-house using automatic printing machines. Managing this process internally allows better coordination, helps maintain consistency in output, and supports timely execution. Designs are printed as per the approved sample, and attention is given to color matching and print placement.

For orders that require embroidery or other forms of value addition, the relevant processes are undertaken at this stage. These could include embellishments or detailing based on the buyer's specifications. Each step is carried out in accordance with the approved design to ensure the final garment meets the desired look and feel.

All materials are handled carefully during this stage to preserve quality before moving forward in the production line.

13. Stitching

In the sewing stage, individual garment components are assembled according to the specifications outlined in the approved tech pack. Each piece is stitched to match the construction details, measurements, and finishes defined during sampling.

Throughout the process, attention is given to seam strength, stitch accuracy, and overall assembly quality. Consistent monitoring helps ensure that the finished product aligns with buyer expectations and meets internal quality benchmarks before moving on to inspection and finishing.

14. Inline Inspection

Dedicated quality checkers perform inline inspections at critical points:

- Seams, hems, labels, and trims.
- Measurement and specification adherence.
- Cleanliness and stitching accuracy.

Early-stage detection ensures defect rectification before value-addition stages, thus reducing cost of rework.

15. Pre-Final Inspection

After stitching and basic finishing (ironing, thread removal):

- 100% garments are inspected against a checklist.
- Acceptable quality limit (AQL) sampling is also conducted to assess bulk quality.
- Final measurement verification and barcode cross-checks are done.
- Approved garments are moved to final packing.

Any rejected items are logged, corrected, and re-inspected before clearance.

16. Buyer's Inspection

Once the goods are ready, a final quality inspection is conducted as per the buyer's requirements. The inspection may be carried out either by the buyer or as directed by them.

This process checks that the shipment meets the approved specifications, size sets, labeling, and packaging guidelines. Any findings from the inspection are addressed before the goods are cleared for dispatch.

17. Ready to Ship

Once final approval is received:

- Garments are poly-packed, sorted by size, style, and color.
- Cartons are barcoded, sealed, and weighed.
- Shipment documents are prepared.
- Third-party logistics partners are coordinated for pick-up and delivery.

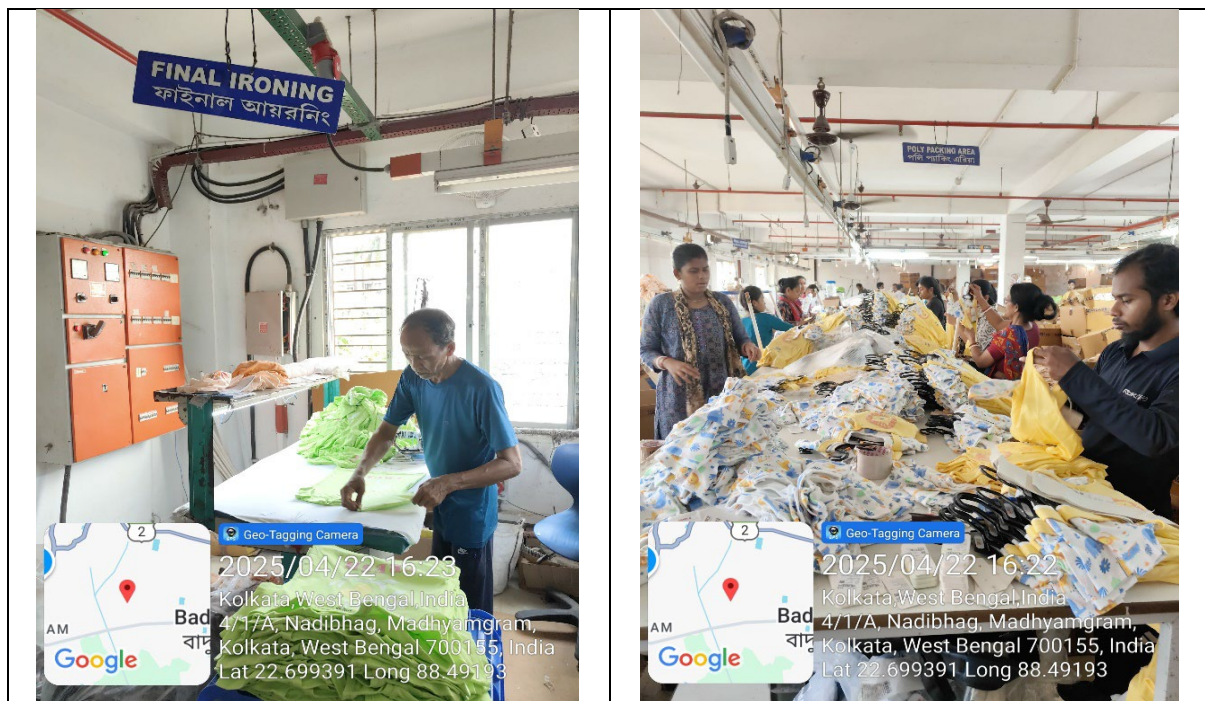

The order is then dispatched.

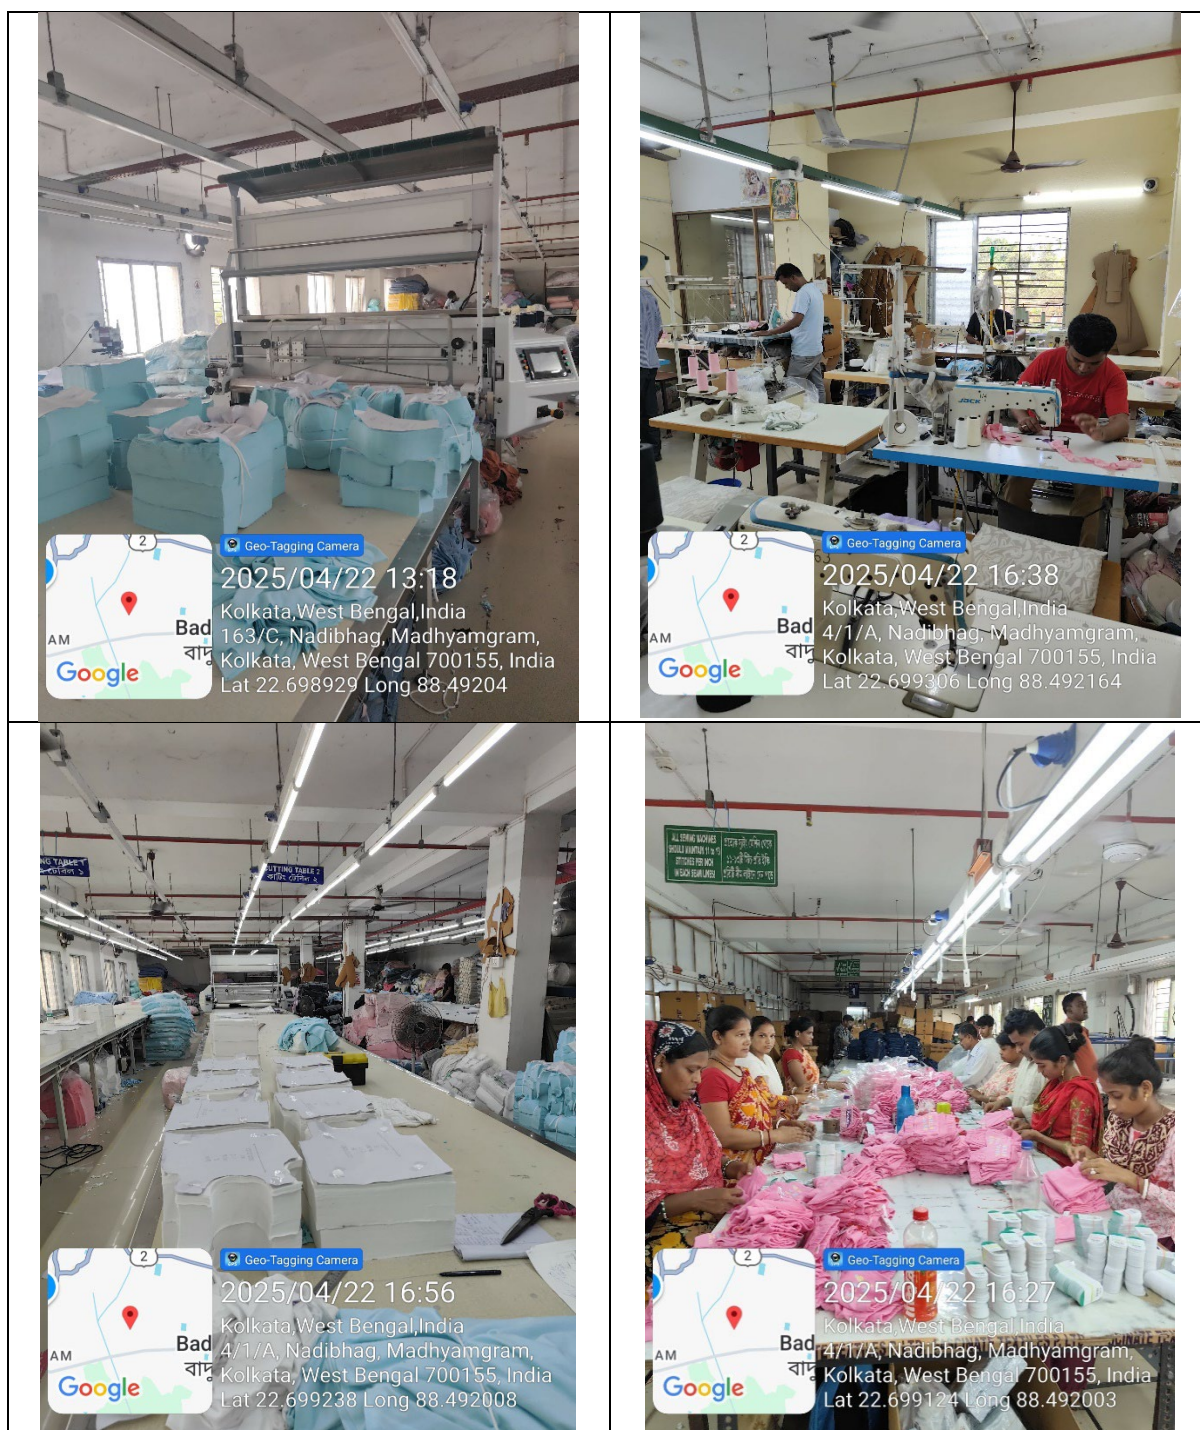

Our Manufacturing Infrastructure

We own our garment manufacturing facility equipped with modern machinery and infrastructure to produce a wide range of kids wear, menswear, and womenswear. The facility is designed to ensure operational efficiency, product consistency, and adherence to defined quality standards. Our production processes are supported by multi-stage quality control systems and certified under ISO 9001:2015. Strategically located in Barasat, the plant supports smooth coordination across sourcing, production, and dispatch.

Our Manufacturing Unit

Our unit spans multiple sections, including fabric inspection, cutting, stitching, printing, embroidery, finishing, and packing. Workflow within the unit follows a sequential layout, enabling smooth material movement and minimizing handling time. UTILITIES & INFRASTRUCTURAL FACILITY

Availability of power

We operate our manufacturing facility at Barasat, West Bengal, with a sanctioned contract demand of 199 KVA under the B-IDIT industrial tariff category. Power is supplied by the West Bengal State Electricity Distribution Company Limited (WBSEDCL), a Government of West Bengal enterprise.

The facility receives electricity at a supply voltage of 0.40 KV (kilovolt). This arrangement is used for our operations in the textile and cotton manufacturing sector. It supports the electrical requirements necessary for our production processes.

The table below sets out our power expenses for the last three Financial Years:

Total Amount Incurred on Electricity (Amt in Rs Lakhs)	
Period	Amount
FY 2025	40.08
FY 2024	35.19
FY 2023	18.33

Availability of water

Our manufacturing facility also benefits from adequate and dependable water supply, which is essential for key processes such as fabric washing, dyeing, and printing. The region's water quality and accessibility contribute to the efficiency and consistency of these operations, particularly in segments like kids wear where vibrant prints and finishes are critical. The availability of sufficient water resources has been an important enabler in maintaining product quality and production timelines.

Transportation

We work with third-party transporters to facilitate the movement of our finished products to customers across various regions and to procure raw materials from our suppliers. By partnering with reliable transporters, we align dispatch schedules with customer requirements while managing logistics efficiently. Our team closely coordinates with transport partners and enter into agreements to support timely deliveries and careful handling of our products, helping us ensure that our customers receive their orders in good condition and as per committed timelines.

Transportation Charges	51.41	41.05	17.57
Total	53.28	43.24	17.64

RESEARCH AND DEVELOPMENT

For certain buyer-specific we are required to carry out product testing and certifications through third-party laboratories nominated by our clients. These tests are generally conducted to ensure that the garments meet the applicable quality, safety, and regulatory standards of the buyer's target market.

While we have established our own internal quality control protocols and carry out various in-house tests for fabric and garment performance, certifications for select orders are issued by the nominated laboratories, as per client requirements. We coordinate closely with these external agencies to manage the submission of samples, documentation, and timelines, in order to ensure compliance with the stipulated norms without affecting our production schedules.

This process forms an important part of our operational workflow for fulfilling orders, and we remain aligned with buyer expectations throughout the testing and approval cycle. The expenses incurred towards research and development in the last three financial years is given below.

Total Expense Incurred (Amt in Rs Lakhs)

We are engaged in the manufacturing of readymade garments, with operations based in West Bengal. Our product range spans menswear, womenswear, and childrenswear, with a significant portion of our

output focused on garments for children. Our offerings include t-shirts, joggers, vests, leggings, shorts, and infant wear, among others, catering to a variety of end-use segments and age groups.

We are an ISO 9001:2015 certified company. This certification reflects the presence of defined quality management systems and standardised operational procedures across our processes. It reinforces our ability to meet buyer specifications consistently, supports compliance with international trade norms, and contributes to the facilitation of cross-border operations, including import and export.

We develop samples both in response to themes and mood boards provided by buyers, as well as through our own in-house design initiatives. Once a sample receives approval, we undertake production at our manufacturing facility. Our garments are supplied to large-format retailers and wholesalers in the local market.

Our manufacturing activities are primarily concentrated in Barasat, North 24 Parganas, West Bengal, where we own and operate our production facility. Most operations following fabric processing including cutting, printing, stitching, and finishing are conducted in-house. We manage design development, sample creation, and production schedules internally through a team of merchandisers, each assigned to specific buyers to ensure continuity and coordination.

We procure yarn, which is then sent for knitting and dyeing through external job workers. Once the processed fabric is received, all subsequent manufacturing operations are carried out within our facility. A significant portion of our production infrastructure is automated, including the use of automatic printing and sequencing machines. This integration of technology enables us to maintain consistency, enhance efficiency, and uphold quality across our product offerings.

Primary reasons for increase in PAT margin are as below:

- 1. Rise in sale price:** As the demand of our product rose in FY2025 we strategically increased our sale price with no increase in cost of material consumed which resulted into increase in total income and decrease in proportion of cost of material consumed. Sale price increase attributed to Kids garment price increased by 11%, Women Garment by 2.5% and Knitted fabric by 2.91%.
- 2. Additional segment introduction:** We have introduced three segments namely menswear, processed knitted fabric and yarn in FY2025 which contributed Rs. 1643.70 lakhs in revenue which represents 27% approx. of total revenue in FY2025 with incremental margin. This additional revenue ultimately resulted in improved PAT margin.
- 3. Local market sales:** Our company targeting local market with higher sale price ultimately resulting into higher margin with constant cost. Since the sale price of the products increased with the flat cost of raw material as a result in proportion to total income cost of material consumed decreased. Currently we have a sales mix of 17% from local market and 83% from corporate brands with a contribution margin of more than 100% in local market and 25%-30% in corporate brands.
The higher margin in local sales is due to use lower intensity fabric which reduces the cost of raw material.
- 4. Raw material mix:** We improved our raw material mix by blending polyester up to 8.5% to optimize the cost, which resulted into a drop in average cost of material from Rs. 347.66 per kg to Rs. 321.32 per kg. representing a drop of 8.20%.
- 5. Wastage control:** By introduction of automated machines, we reduced the manual processing and cutting of fabrics and to some extent eliminated the wastage from manual cutting. This contributed into savings in cost of material by 2% in purchase volume.
- 6. Synergy from merger of entity:** We took over 2 enterprises towards end of the FY2024 namely S R Creations and Raiment Lifestyle. The benefit of merger for full year was available in FY2025 and contributed an incremental PAT of Rs. 116.20 lakhs representing 14.20% of total PAT.
- 7. Benefit from moving to new automated facility:** In the mid of the FY2024 we relocated to our new manufacturing facility with automated equipment which boosted our capacity and efficiency. This shifting to new facility helped us achieving revenue of Rs. 6024.70 lakhs in FY2025 by utilizing 2 automatic printing machines, 1 cutting spreader, and AutoCAD machine. The efficiency of printing doubled by reducing cutting and stitching time. This saved us proportionate labor cost and reduced wastage.

The above-mentioned factors combined together end up in increase in PAT margin from 1.65% % in FY2024 to 9.64% in FY2025.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%

1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on Foreign Direct Investments (**FDI**) through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“**DPIIT**”), issued the Consolidated FDI Policy Circular of 2020 (“**Consolidated FDI Policy**”), which, with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT, which were in force and effect prior to October 15, 2020. The Consolidated FDI Policy will be valid and remain in force until superseded in totality or in part thereof and shall be subject to FEMA Non-Debt Instruments Rules. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

As per the Consolidated FDI Policy, FDI in companies engaged in electronics hardware manufacturing, which is the sector in which our Company operates, is permitted up to 100% of the paid-up share capital of such company under the automatic route. However, investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that: (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. For further details of the aggregate limit for investments by NRIs and FPIs in our Company, please see chapter titled “**Offer Procedure – Application by Eligible NRIs**” and “**Offer Procedure – Application by FPIs**” on page 374 and 374 respectively of the Draft Red Herring Prospectus.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer. For further details, see chapter “**Offer Procedure – Who can apply?**” beginning on page 366 of the Draft Red Herring Prospectus.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, notified the FEMA NDI Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Offer shall be on the basis of, and in accordance with the FEMA NDI Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (Restricted Investors), will require prior approval of the Government, as prescribed in the

Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Nondebt Instruments) (Fourth Amendment) Rules, 2020 which came into effect on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.

In terms of the FEMA NDI Rules and Consolidated FDI Policy, a person resident outside India may make investments into India, subject to certain terms and conditions. For further details, see chapter titled ***“Offer Procedure”*** beginning on page 356 of the Draft Red Herring Prospectus. Each Bidder should seek independent legal advice about its ability to participate in the Bid/Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Offer Period.

The Equity Shares offered in the Offer have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States and, unless so registered, may not be issued or sold within the United States or to, or for the account or benefit of, “U.S. persons” (as defined in Regulation S under the U.S. Securities Act), except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act. Accordingly, such Equity Shares are only being issued and sold (i) outside the United States in ‘offshore transactions’ in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdictions where such offers and sales occur; and (ii) within the United States only to persons reasonably believed to be “qualified institutional buyers” (as defined in Rule 144A under the U.S Securities Act and referred to in this Prospectus as “U.S. QIBs”, for the avoidance of doubt, the term U.S. QIBs does not refer to a category of institutional investor defined under applicable Indian regulations and referred to in this Prospectus as “QIBs”) in transactions exempt from, or not subject to, the registration requirements of the U.S Securities Act. The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Bidders. Our Company and the Book Running Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Red Herring Prospectus. Bidders are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under the laws and regulations.
