SECTION III: RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Red Herring Prospectus including the risks and uncertainties described below, before making an investment in the Equity Shares. The risks described in this chapter are those that we consider to be the most significant to our business, results of operations and financial condition as of the date of this Draft Red Herring Prospectus. The risks described below are not the only ones relevant to us or the Equity Shares, the industry in which we operate or India and other regions we operate in. In the event that any of the following risks, or other presently unknown or currently deemed immaterial risks, materialize in the future, our business, operations, prospects, and financial results may be adversely affected. Consequently, the value of the Equity Shares could diminish, and investors may experience partial or total loss of their investment. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, the effects of certain risks may be unquantifiable, and accordingly, have not been disclosed in the applicable risk factors.

To obtain a more detailed understanding of our business and operations, prospective investors should read this section in conjunction with the sections, “Industry Overview”, “Our Business”, and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 131, 178 and 258, respectively, as well as the other financial and statistical information contained in this Draft Red Herring Prospectus. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment which may differ in certain respects from that of other countries. This Draft Red Herring Prospectus also contains forward-looking statements that involve risks and uncertainties. MATERIALITY

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered to determine the materiality:

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively;
3. Some events may not be materiality individually but may be found material collectively;
4. Some events may not be material at present but may not be having material impact in future.

INTERNAL RISK FACTOR

- The majority of our sales is concentrated in the states of Gujarat, Maharashtra and Karnataka. Any adverse developments affecting our operations in these states could have an adverse impact on our business, financial condition, results of operations and cash flows.*

The sale is majorly concentrated in the states of Gujarat, Maharashtra and Karnataka. The following table sets forth our revenue from operations from the above states in the periods indicated:

(₹ in Lakhs)

State	For the year ended					
	March 31, 2025		March 31, 2024		March 31, 2023	
	Revenue	% of Revenue from domestic operations	Revenue	% of revenue from domestic operations	Revenue	% of revenue from domestic operations
Gujarat	1,660.74	34.45%	1,299.34	43.08%	1,053.65	40.92%
Maharashtra	1,426.81	29.60%	663.44	22.00%	507.81	19.72%
Karnataka	517.48	10.74%	463.24	15.36%	637.74	24.76%
Total	3,605.03	74.79%	2,426.02	80.44%	2,199.20	85.40%

Due to the geographic concentration of the sale in Gujarat, Maharashtra and Karnataka, our operations are susceptible to local and regional factors, such as economic and weather conditions, natural disasters, demographic changes, and other unforeseen events and circumstances. Consequently, any significant social, political or economic disruption, or natural calamities or civil disruptions in these states, or changes in policies of the state or local governments or the government of India or adverse developments related to competition in these states, may adversely affect our business, results of operations, financial condition and cash flows. While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions in the last three Fiscals years, we cannot assure you that these risks will not arise in the future.

- We are dependent on third-party outsourced subcontractors for providing our services.*

We are engaged in the business of trade show and exhibition booth solutions, offering both custom-built and modular exhibition options. Our company outsources booth fabrication and related services which are carried out under the supervision of the Company, while design and conceptualization are handled in-house and through project-based collaborations with professionals. We do not have any executed registered formal arrangements with such outsourced subcontractors, which govern various matters such as, specification of products, quality standards to be maintained, sales estimates, packaging of products etc. While this approach provides flexibility and helps us manage varying levels of demand, it also exposes us to risks relating to dependency on third-party subcontractors. Any failure or delay on the part of such subcontractors to meet our quality standards, cost expectations, or delivery timelines may adversely affect our ability to service clients, which could lead to reputational damage, loss of repeat business, and financial claims.

The table below presents the revenue split based on execution method, i.e. services delivered In-house versus through subcontractors for the financial years ended 2025, 2024, and 2023:

(₹ in lakhs, unless otherwise stated)

Particulars	For the year ended March 31, 2025		For the year ended March 31, 2024		For the year ended March 31, 2023	
	Revenue	% of Total Revenue	Revenue	% of Total Revenue	Revenue	% of Total Revenue
Subcontract	4,745.26	92.11%	2,303.18	75.48%	1,668.58	64.40%

Particulars	For the year ended March 31, 2025		For the year ended March 31, 2024		For the year ended March 31, 2023	
	Revenue	% of Total Revenue	Revenue	% of Total Revenue	Revenue	% of Total Revenue
Inhouse	406.56	7.89%	748.30	24.52%	922.51	35.60%
Total	5,151.82	100.00%	3,051.48	100.00%	2,591.09	100.00%

In the event, we experience significant increase in demand, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. While the aforementioned events have not occurred in the past, occurrence of any such event in the future may adversely affect our business operations and financial conditions.

Further, any discontinuation of such outsourced subcontractors or a failure of these outsourced subcontractors to adhere to the delivery schedule or the required quality and quantity could hamper our business operations. There can be no assurance that strong demand, capacity limitations or other problems experienced by our outsourced subcontractors will not result in occasional shortages or delays in their supply of services. In the event that our subcontractors fail to adhere to agreed quality parameters or contractual obligations, our business operations, profitability, and goodwill may be materially and adversely impacted. On the occurrence of any of the aforementioned events, we may need to find a new outsourced subcontractor, which could be time-consuming and costly. We cannot assure you that any other outsourced subcontractors that we engage would be able to provide our products, compliant with our quality standards, in a timely and cost-effective manner or at all. While the aforementioned events have not occurred in the past, however any future occurrence of any such events could materially affect our financial condition, results of operations and prospects. Further there can be no assurance that such parties shall continuously provide their services or would not cater to demand of competitors. Any withdrawal of services from such outsourced subcontractors or supply of services to competitors at better rates may adversely affect our result of operations and future prospects. In addition, our Company undertakes outsourcing in foreign countries, which exposes us to additional risks such as foreign exchange fluctuations, cross-border regulatory issues, geopolitical uncertainties, and potential logistical delays. This dependency makes us vulnerable to cost escalations, supply chain disruptions, labour issues, and non-compliance with industry standards or regulatory requirements. Further we are also exposed indirectly to the risks these outsourced subcontractors face. For further details, please see “Our Business” on page 178 of this Draft Red Herring Prospectus.

We may also face the risk of being evicted in the event that our landlords allege a breach on our part of any terms under these lease agreements and there is no assurance that we will be able to identify suitable locations to re-locate our operations. Moreover, we may face significant increases in the lease rental rates. We cannot assure you that we may be able to do so in a timely manner. If we lose our rights on leased properties or are required to negotiate terms or to relocate our business operations or shut down our leased office unit and godown facilities, we may suffer a disruption in our operations or have to pay increased charges, which could have an adverse effect on our business, prospects, results of operations, cash flows and financial condition. As of the date of this Draft Red Herring Prospectus, there have been no such instances in the Fiscal Year 2025, 2024 and 2023.

4. Our funding requirements and the proposed deployment of the Net Proceeds of the Offer have not been appraised by any bank or financial institution are based on management estimates and may be subject to change based on various factors, some of which are beyond our control.

We intend to use a portion of the Net Proceeds of the Offer for the purposes described in “*Objects of the Offer*” on page 110. As on the date of Draft Red Herring Prospectus, our funding requirements are based on management estimates in view of past expenditures and have not been appraised by any bank or financial institution. The deployment of the Net Proceeds will be at the discretion of our Board. We may have to reconsider our estimates or business plans due to changes in underlying factors, including factors beyond its control such as market conditions, competition, cost of commodities and interest, and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section, may limit or delay our Company’s efforts to use the Net Proceeds to achieve profitable growth in its business. The planned use of the Net Proceeds is based on current conditions and is subject to changes in external circumstances, costs, other financial conditions or

business strategies. While we will use the Net proceeds in the manner specified in “*Objects of the Offer*” on page 110, the amount of net proceeds to be actually used will be based on our management’s discretion.

Our internal management estimates may exceed fair market value or the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our working capital needs and may have an adverse impact on our business, financial condition, results of operations and cash flows. Our Company, in accordance with the policies established by the Board from time to time, will have flexibility to deploy the net proceeds. Further, pending utilization of Net Proceeds towards the Objects of the Offer, our Company will have the flexibility to deploy the Net Proceeds and to deposit the Net Proceeds temporarily in deposits with one or more scheduled commercial banks included in Second Schedule of Reserve Bank of India Act, 1934, as may be approved by our Board. Accordingly, prospective investors will need to rely upon our management’s judgment with respect to the use of Net Proceeds.

Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “*Objects of the Offer*” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

We may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost, and other financial and operational factors. Accordingly, prospective investors in the Offer will need to rely upon our management’s judgment with respect to the use of Net Proceeds. If we are unable to deploy the Net Proceeds in a timely or an efficient manner, it may affect our business and the results of operations.

5. *We have witnessed negative cash flow from operating activities in the past. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and our financial condition.*

We have in the three preceding Fiscal Years, and may in future, experience negative cash flows from Operating activities. Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations. We experienced negative cash flows in the following periods as indicated in the table below:

(₹ in lakhs)			
Particulars	Year ended March 31, 2025	Year ended March 31, 2024	Year ended March 31, 2023
Net cash (used in)/ Generated from operating activities	14.01	(9.34)	25.42

Net cash used in operating activities for the Fiscal 2025 was ₹ 14.01 lakhs and our profit before tax that period was ₹ 842.41 lakhs. The difference was primarily attributable to change in working capital of 745.57 lakhs, Finance cost of ₹ 15.78 lakhs, Depreciation of ₹ 11.43 lakhs and Interest income of ₹ 6.91 lakhs resulting in gross cash used in operations at ₹ 127.33 lakhs. We have income tax paid of ₹ 113.33 lakhs.

We cannot assure you that our net cash flows will be positive in the future. Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, prospects, results of operations and financial condition may be materially and adversely affected. For further

details, see “Restated Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 236 and 258, respectively.

6. *We have significant working capital requirements for our smooth day to day operations of business and discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.*

Our Company’s working capital needs for a specific period are influenced by various factors, such as the size and timing of customer’s orders to be fulfilled, the size of the order backlog, and customer payment terms. Based on historical trends, we anticipate a significant increase in our working capital requirements.

The table below sets forth our working capital for the Financial Years 2025, 2024, and 2023 on the basis stated below:

(₹ in lakhs)			
Particulars	For the year ended March 31, 2025 (Audited)	For the year ended March 31, 2024 (Audited)	For the year ended March 31, 2023 (Audited)
Current Assets			
Trade receivables	604.82	174.37	273.52
Short-term loans and advances	249.89	62.54	6.88
Other Current Assets	940.96	780.80	516.24
Total Current Assets (A)	1,795.67	1,017.71	796.63
Current Liabilities			
Trade payables	114.94	185.21	205.23
Other current liabilities	416.99	451.99	499.87
Short-term provisions	104.54	4.72	0.01
Total Current Liabilities (B)	636.47	641.92	705.11
Net Working Capital Requirements (A-B)	1,159.20	375.79	91.53

Our business requires funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement, or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. For further details regarding incremental working capital requirement, please refer to the chapter titled “Objects of the Offer” beginning on page 110 of this Draft Red Herring Prospectus.

7. *A significant portion of our domestic sales are derived from the West zone, any adverse developments in this market could adversely affect our business.*

Set forth below is certain information on our geography-wise domestic revenue from operations as per restated financial statements for the periods indicated:

Particulars	For the fiscal year ended March 31,					
	2025		2024		2023	
	Amount (₹ in Lakhs)	% of Revenue from domestic sales	Amount (₹ in Lakhs)	% of Revenue from domestic sales	Amount (₹ in Lakhs)	% of Revenue from domestic sales
West	3,286.11	68.17%	2,030.67	67.34%	1,606.47	62.39%
South	808.87	16.79%	566.35	18.77%	737.87	28.65%
North	623.88	12.95%	366.23	12.13%	206.89	8.03%

Particulars	For the fiscal year ended March 31,					
	2025		2024		2023	
	Amount (₹ in Lakhs)	% of Revenue from domestic sales	Amount (₹ in Lakhs)	% of Revenue from domestic sales	Amount (₹ in Lakhs)	% of Revenue from domestic sales
East	69.38	1.44%	33.55	1.11%	17.96	0.69%
Central	31.82	0.66%	19.36	0.64%	6.00	0.23%
Revenue from Operations	4,820.06	100.00%	3,016.16	100.00%	2,575.19	100.00%

We have historically derived a significant portion of our revenue from operations in the West zone. For the Fiscal 2025, 2024 and 2023 the revenue generated from operations in West zone represented 68.17% and 67.34% and 62.39% of our revenue from domestic sales. Accordingly, any materially adverse social, political or economic development, natural calamities, civil disruptions, regulatory developments or changes in the policies of the state or local government in this region could adversely affect our services, result in modification of our business strategy or require us to incur significant capital expenditure, which will in turn have a material adverse effect on our business, financial condition, results of operations, and cash flows. Further, our sales from this region may decline as a result of increased competition, regulatory action, pricing pressures, fluctuations in the demand for or supply of our products or services, or the outbreak of an infectious disease such as COVID-19. Our failure to effectively react to these situations or to successfully introduce new products or services in these markets could adversely affect our business, prospects, results of operations, financial condition, and cash flows. The occurrence of, or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. As of the date of this Draft Red Herring Prospectus, there have been no such instances in the Fiscal Year 2025, 2024 and 2023.

8. *We are exposed to counterparty credit risk and any delay in receiving payments or non-receipt of payments may adversely impact our results of operations.*

Due to the nature of, and the inherent risks in, the informal arrangements with our clients', we are subject to counterparty credit risk and a significant delay in receiving large payments or non-receipt of large payments may adversely impact our results of operations. Our operations involve extending credit to our clients in respect of the sale of our products and consequently, we face the risk of uncertainty regarding the receipt of these outstanding amounts. For the Fiscals 2025, 2024, and 2023, our trade receivables were ₹ 604.82 Lakhs, ₹ 174.37 Lakhs, and ₹ 273.52 Lakhs, respectively. There are no instance of amount written-off in relation to non- collection of payment from clients since financial year 2025, 2024 and 2023.

There is no assurance that we will accurately assess the creditworthiness of our clients'. Further, macroeconomic conditions which are beyond our control, such as a potential credit crisis in the global financial system, could also result in financial difficulties for our business associates, including limited access to the credit markets, insolvency, or bankruptcy. Such conditions could cause our business associates to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of dues from business associates also depends on our ability to complete our contractual commitments and subsequently bill for and collect from our clients. If we are unable to meet our contractual obligations, we may experience delays in the collection of, or be unable to collect, our customer balances, which could adversely affect our results of operations and cash flows.

9. *Our business is dependent on certain major customers, with whom we do not have firm commitment agreements. The loss of such customers, a significant reduction in purchase of services by such customers, or a lack of commercial success of a particular project of which we are a supplier could adversely affect our business, results of operations and financial condition.*

We are engaged in the business of trade show and exhibition booth solutions, offering both custom-built and modular exhibition options. Although our customer base may vary each year, we are reliant on the contribution of the Top 10 customers. As a result, we are dependent on certain major customers, representing 19.25%, 37.59% and 46.42%, respectively, of our total invoice for the Fiscal 2025, Fiscal 2024 and Fiscal 2023, respectively.

The following is the revenue breakup of the top ten customers of our Company during Fiscals 2025, 2024 and 2023:

Customer 7	89.24	2.92%
Customer 8	65.88	2.16%
Customer 9	60.75	1.99%
Customer 10	48.60	1.59%

For Fiscal Year March 31, 2023:

(₹ in lakhs, unless stated otherwise)

Customer 9	71.29	2.75%
Customer 10	70.85	2.73%
Total	1,202.87	46.42%

Since we are dependent on certain key customers for a considerable portion of our sales, the loss of any one of our key customers, a significant reduction in demand from such customers or the downturn in business by such customers could have an adverse effect on our business, results of operations and financial condition. However, as on the date of Draft Red Herring Prospectus there have been no such instances in the past three Financial Years.

We do not have firm commitment long-term supply agreements with our customers and instead rely on purchase orders for our operations. However, such orders may be amended or cancelled prior to rationalization, and should such an amendment or cancellation take place, it may adversely impact our project schedules. Consequently, there is no commitment on the part of the customer to continue to place new purchase orders with us and as a result, our sales from period to period may fluctuate as a result of changes in our customers' vendor preferences. However, as on the date of Draft Red Herring Prospectus there have been no such instances in Financial Year 2025, 2024 and 2023.

10. Regulatory uncertainties arising from tariff impositions in India and other countries may contribute to heightened volatility in the Indian and international markets.

Our Company's operations are exposed to fluctuations in global trade policies, particularly those originating from the United States. The United States is our major export destination, and such tariff escalations could reduce the competitiveness of our services in international markets and adversely impact demand from downstream industries. A prolonged decline in Indian exports as a result of these measures could adversely affect our cost structures, procurement strategies, and operational efficiency. Our Company derives 47.04%, 69.03%, and nil of its export revenue from the United States for the Financial Years 2025, 2024, and 2023, respectively, making us particularly vulnerable to such developments.

In addition, U.S. tariff actions frequently invite reciprocal responses from other jurisdictions, including India. For instance, India has in the past imposed higher duties on select agricultural and industrial products imported from the United States following tariff hikes. Similar retaliatory measures in the future could restrict raw material availability, raise landed costs, and strain domestic supply chains. Further, evolving U.S. trade relations-such as conditional exemptions, shifting quotas, or the unpredictable expansion of tariff coverage-add to regulatory uncertainty. The combined effect of such developments may elevate procurement costs, impair our pricing competitiveness, delay contract execution, and restrict access to key export markets. Given our high dependence on the U.S. market and interconnected global supply chains, any adverse change in tariff regimes could materially and adversely impact our revenue, margins, and long-term business prospects.

This imposition of tariffs by the US government under its "Fair and Reciprocal Plan" has impacted Indian businesses, especially those with a substantial export presence in the US market like us. This policy has resulted in the imposition of tariffs across a diverse range of sectors, including steel, aluminium, pharmaceuticals, textiles, electronics, and many more. As a result, Indian exporters may encounter heightened costs and uncertainties, potentially constraining their market competitiveness and profitability. These developments, or the perception that any of them could occur, have had and may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. However, the overall

long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilising effects.

11. Any delays and/or defaults in payments by customers could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operations and financial condition.

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our services after taking a portion of the agreed invoice value as advance payment against the orders placed by them. We cannot assure you that payments from all or any of our customers will be received in full in a timely manner or to that extent will be received at all. If any customer defaults in making payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

12. Our Promoters have extended personal guarantee in connection with some of our debt facilities to our company. There can be no assurance that such personal guarantee will be continued to be provided by our Promoters in future or can be called at any time, affecting the financial arrangements.

Our Promoters, Prathamesh Shantaram Pusalkar and Aarti Prathamesh Pusalkar have provided personal guarantee to secure our existing borrowing which are continuing and are in force as on the date of Draft Red Herring Prospectus. As on this date, following were the bank guarantees extended by our Promoters as security for borrowing availed by our Company:

Name of the Lender	Amount of loan Sanctioned (₹ in lakhs)	Nature of Loan
Central Bank of India	200.00	CENT GST Loan- Cash Credit

In the event any of default under any of the aforesaid facilities, there is a risk that the relevant lender for such facilities may require invoke our Promoters' guarantee(s) or require additional guarantees or collateral or may enforce its rights against our Promoters. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. In addition, our Promoters may be required to liquidate their respective shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. Accordingly, our business, the financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters in connection with our Company's borrowings.

13. Our contingent liabilities as stated in our Restated Financial Statements could affect our financial condition.

The following table sets forth the details of the contingent liabilities of our Company.

(₹ in lakhs)

Particulars	For the Year Ended		
	March 31, 2025	March 31, 2024	March 31, 2023

Indirect Tax	-	-	-
Total	2.07	2.05	2.05

Our Contingent liabilities may become actual liabilities which could have an adverse effect on our business, financial condition, results of operations, and cash flows. Further there can be no assurance that we will incur similar or increased levels of contingent liabilities in the current financial year or in the future. For further information on our contingent liabilities, see “*Restated Financial Statements – Note 31 – Contingent Liabilities*” beginning on page 236 of this Draft Red Herring Prospectus.

14. We face significant competition for skilled professionals, and our success depends in large part upon our ability to attract and retain these personnel. Any inability on our part to attract and retain our key managerial personnel and/or talented professionals may adversely affect our business and results of operations.

Our ability to successfully execute orders in hand and acquire new customers depends significantly on our capacity to attract, train, motivate, and retain unskilled labors and skilled professionals. We invest considerable time and resources in training professionals. However, these professionals are frequently targeted by competitors’ hiring efforts and, in some cases, by our customers. If we are unable to attract and retain qualified talent, our ability to bid for and secure new projects may be affected, leading to potential revenue decline. Additionally, challenges in expanding our workforce efficiently could hinder our business growth, impacting both revenue and profitability.

For further details on all of our Senior Managerial Personnel please refer to paragraph titled “*Details of Key Managerial Personnel and Senior Management Personnel*” in the chapter titled “*Our Management*” beginning on page 225.

15. Failure to protect our intellectual property could harm our ability to compete effectively.

We rely on copyright, patent, and trademark laws, and other contractual regulations to establish and maintain our proprietary rights. We intend to protect our intellectual property rights very strictly. However, there can be no assurance that we will be able to protect it successfully. Our clients are spread over India as well as overseas countries; our intellectual property rights have limited jurisdiction in India, and it does not provide protection in overseas countries, so we may have to get multiple jurisdiction protection of intellectual rights, which is a very expensive and lengthy process.

We've taken steps to register our Trademark,  and the word mark contents “Propshop Events and Exhibitions with Device PS”, with the trademark authorities in India. However, extending this protection to client countries is essential. We may struggle to detect unauthorised use or enforce our intellectual property rights effectively, risking harm to our reputation, business, and profitability.

Regarding the trademark , we've initiated the registration process with the Trademark Office in Mumbai under Class 41, with application number 6788728 dated January 04, 2025. Nevertheless, there's no assurance of successful registration. At Present the remarks form the trademark office for application mentions status as Formalities Check Pass for this application.

Our Company has developed its presence in both Indian and international markets under the brand “Propshop Worldwide Expo” . However, this brand is currently unregistered, and

accordingly, our Company does not enjoy the statutory protection conferred upon registration under applicable laws.

Any failure to register or renew registration of our registered trademark may affect our right to use such trademark in future. Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third-party claim on any of our unprotected intellectual property may lead to erosion of our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered brand name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad. Further, if do not maintain our brand name and identity, which we believe is one of the factors that differentiates us from our competitors, we may not be able to maintain our competitive edge in India and abroad. If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability. Moreover, our ability to protect, enforce or utilize our brand name is subject to risks, including general litigation risks. Furthermore, we cannot assure you that such brand name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source in India and abroad. Any damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position in India and abroad. For further details, see “Government and Other Key Approvals” and “Our Business” on pages 277 and 178.

16. There have been some instances of delays in filing/ incorrect filings in the past with the Registrar of Companies (RoC) and further our Company has not complied with certain statutory provisions of the Companies Act, 2013 and rules framed thereunder. Such non-compliances/ lapses may attract penalties.

Pursuant to the provisions of Section 139 and other applicable provisions of the Companies Act, 2013, our Company appointed HRJ & Associates, Chartered Accountants (FRN: 138235W) as Statutory Auditors for a term of five years at the Annual General Meeting held on December 31, 2020. However, the Company did not file Form ADT-1 with the Registrar of Companies (“RoC”) for the said appointment. Subsequently, due to an inadvertent error, the Company filed Form ADT-1 treating the appointment of HRJ & Associates as a casual vacancy for the financial year 2021–2022. Owing to this erroneous filing, the Company again appointed HRJ & Associates as Statutory Auditors at the Annual General Meeting held on September 30, 2022, for a period of six years i.e., from April 01, 2022, to March 31, 2028 - which exceeds the five-year tenure permitted under Section 139 of the Companies Act, 2013. The Company also filed ADT-1 with RoC for the six-year period. Upon being apprised of this oversight, the Board of Directors, at its meeting held on July 23, 2025, noted that the Ministry of Corporate Affairs’ V3 portal does not permit the filing of a revised ADT-1. Accordingly, the Board resolved to take on record the appointment of HRJ & Associates, Chartered Accountants, as Statutory Auditors up to March 31, 2027, and made a note of the same in the said meeting.

Further, we have obtained the search report on RoC filing from the PCS firm KNK & Co LLP vide their report dated September 20, 2025. According to that report, there have been certain discrepancies in relation to statutory filings required to be made by the company with the RoC under applicable laws as well as certain other non-compliances incurred by us under the Companies Act, the Company has sent an intimation to the ROC informing about discrepancies/ errors via email dated September 20, 2025, and no action has been taken by ROC against us for such inaccurate filings details of which are provided hereunder:

To mitigate inadvertent filings, delayed filing and relevant issues our company appointed designated employee who shall be responsible for monitoring statutory filings and submissions and ensuring timely compliance of the same. A compliance calendar has been established to track deadlines for filings, approvals, and submissions to ROC.

We have not received any show cause notice from regulatory authority regarding the above matters till date and no penalty or fine have been levied on our Company for the same. However, we cannot assure you that such instances will not occur in the future, or that our Company will not face any further delays or defaults in relation to its reporting obligations, or that any penalty or fine will not be imposed on our Company for the same. Such events may have a material impact on our business performance and financial condition.

17. We have outstanding litigation against us, an adverse outcome of which may adversely affect our business, reputation and results of operations.

In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our branding or marketing efforts or campaigns or our policies. 18. There have been instances of delays in payment of statutory dues, i.e. ESIC and EPF by the Company. In case of any delay in payment of statutory due in future by our Company, the Regulatory Authorities may impose monetary penalties on us or take certain punitive actions against our Company in relation to the same which may have adverse impact on our business, financial condition and results of operations.

In the past, there have been some instances of delays in filing statutory forms with government authorities such as returns, EPF, ESIC and GST returns. Accordingly, we have been subjected to penalty and charged with interest for delayed deposit of tax on those instances as well. Such delays were mainly on account of technical glitches in the regulatory website, delays on the company's part in the preparation of information required for filing such returns. While our Company has already regularised the aforesaid delays, however, there can be no assurance that the regulator may not initiate proceedings against us or that we will be able to sufficiently defend against any action initiated by regulators in relation to regulatory compliances for all instances and periods. Any adverse order passed or penalty imposed by regulators on us may adversely affect our business and the results of operations.

Macroeconomic conditions could result in financial difficulties, including insolvency or bankruptcy filed by our customers, and as a result could cause customers to delay payments or no payment to us, request modifications to their payment arrangements, all of which could increase our receivables or default on their payment obligations to us.

Any increase in defaults by our customers in the future may compel us to utilize greater amounts of our operating working capital, thereby adversely affecting our business, results of operations and cash flows. For information on pending legal proceedings in relation to payment defaults from our customers, see “*Outstanding Litigation and Material Developments*” on page 271 of this Draft Red Herring Prospectus.

20. We are dependent on third party transportation providers for delivery of raw materials to our godown and/or event site from our suppliers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.

To ensure smooth functioning of our business operations, we need to maintain supply and transportation of the raw materials i.e. plywood, commercial ply, nylon carpet rolls, and other construction or finish items required from the supplier to site or designated godown and transportation of some of our fabricated products from our godown to event site, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to our company and delivery of our finished products to event sites. Uncertainties and risks such as transportation strikes or delay in supply of raw materials could have an adverse effect on our supplies and deliveries to and from our godowns and event sites. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. While the aforementioned events have not occurred in the past, however occurrence of instances of failure to maintain supply of raw materials or to deliver our products to our godowns/ event sites in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long-term agreements with our transporters and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfil their obligations or would not commit a breach of the understanding with our company. In the event that the finished products or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition. While, the aforementioned events have not occurred for the Fiscal Year March 31, 2025, March 31, 2024, and March 31, 2023, however,

occurrence of any such events may have an adverse impact on our business, results of operations and financial condition.

21. Our Company has unsecured loans with a total outstanding amount of ₹ 38.20 Lakhs as of August 31, 2025, that may be recalled by the lenders at any time. In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.

As on August 31, 2025 our Company's total outstanding loans are ₹ 38.20 lakhs. The total outstanding amount of the unsecured loan as of August 31, 2025, was ₹ 38.20 lakhs. These loans may be recalled by the lenders at any time. In the event that any lenders seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all and this may affect our Company's liquidity. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations. Please refer to Chapter titled "*Restated Financial Statements*" beginning on page 236 of this Draft Red Herring Prospectus.

In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled "*Financial Indebtedness*" on page 269 of this Draft Red Herring Prospectus.

22. Our company operates in a highly competitive environment. Any failure to compete effectively could harm our business, future prospects and financial stability.

We operate in a highly competitive industry where aggressive pricing for project acquisition is common. Consequently, we may need to bid more aggressively and accept unfavourable terms. Without securing new projects, our business growth and revenues may suffer, especially when competing against larger and more resourceful firms.

New entrants willing to accept lower margins further strain industry profitability. This may intensify existing challenges, put pressure on pricing and profit margins for all. Continuous intense competition in these markets presents significant challenges, affecting our capacity to sustain growth and uphold satisfactory profit margins. Businesses must adapt to this fierce competition, where newcomers sacrifice profits for market share, impacting overall industry financial health. Failure to address these challenges effectively heightens the risk of losing market share to competitors and facing an overall decline in profits.

23. Our insurance coverage may not adequately protect us against potential risks, leading to uninsured losses or losses exceeding our coverage, which could have a material adverse effect on our business.

Our Company did not maintain any insurance coverage during Fiscal Years 2023 and 2024. However, as on the date of this Draft Red Herring Prospectus, the Company has obtained insurance coverage to

safeguard against fire and burglary for registered office and Group Medclaim. The absence of insurance coverage in the past may have a material adverse effect on our business. We do not maintain any insurance policies in respect of our business and operations which may have a material adverse effect on our business of operations and financial position.

In addition, not all risks associated with our operations may be insurable, on commercially reasonable terms or at all. To the extent that we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected. Natural disasters in the future or occurrence of any other event for which we are not adequately or sufficiently insured may cause significant disruption to our operations that could have a material adverse impact on our business and operations. The occurrence of an event for which we are not adequately or sufficiently insured could have an adverse effect on our business, results of operations, financial condition, and cash flows. If we are subject to litigation or claims or our operations are interrupted for a sustained period, we cannot assure you that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption.

Details of our total insurance coverage vis-à-vis our net assets as at March 31, 2025 is set out below:

Particulars	March 31, 2025
Insurance Coverage* (A)	420.00
Net assets** as per Restated Financial Information (B)	19.23
Net tangible assets as per Restated Financial Information*** (C)	1128.29
Insurance expenses as per Restated Financial Information	5.22
Insurance coverage times the net assets (A/B)	21.84
Insurance coverage times the net tangible assets (A/C)	0.37

Note-

* Insurance coverage = Total insurance coverage amounts by considering insurance policies of property, equipments, vehicles, stock, erection and all risk insurance

**Net assets = Property, Plant and Equipment (net block) + Capital Work in Progress + Intangibles (net block) + Investment Property (Buildings net block) + Inventories

*** 'Net Tangible Assets' means net block of Property, Plant and Equipment, capital work in progress for fixed assets (including capital advances), Current Assets, Non-current assets (other than Net block of Property, Plant and Equipment, Intangible Assets and Deferred Tax) and excludes Borrowings (secured loans and unsecured loans) and current and non-current liabilities and provisions.

As certified by our Statutory Auditors pursuant to a certificate dated September 15, 2025.

24. Our Company's failure to maintain the quality standards of the service could adversely impact our business, results of operations and financial condition.

Quality of services is a vital element for our sector. We provide distinguished services to a variety of customers which provide us a safeguard against the change of trend with any type of customer as our operational cash influxes get balanced with other type of our customer base. Any rapid change in our customers' expectation on account of changes in technology or introduction of new kind of services or any other reason and failure on our part to meet their expectation could adversely affect our business, results of operations and financial condition. Any failure on our part to successfully meet customer demand or preference may negatively affect our business, results of operation and financial condition.

25. We are exposed to casualty that may occur during Events.

An unfortunate aspect within our industry is the occurrence of casualties during events. Accidents, medical emergencies, or unforeseen circumstances can have grave consequences for both attendees and organizers. Not only do they present immediate threats to human safety and well-being, but they also carry significant financial and reputational risks. Preventing casualties necessitates careful planning, robust safety measures, and swift emergency responses. Despite best efforts, the risk of such

occurrences remains a sobering reality for event organizers and participants alike. Fortunately, as of now, we have not faced any such casualties, despite the potential risk of them occurring during events.

26. Any inefficiencies in or failure of our billing and management information systems may adversely affect our business, financial condition and results of operations.

Maintaining billing and customer management systems is critical to ensuring accurate and timely invoicing, preventing revenue loss, and supporting revenue growth. As new technologies and applications emerge, they will place increasing demands on these systems.

The complexities of billing and payment tracking can lead to challenges such as reconciliation issues, revenue recognition discrepancies, and delayed payments. To address these challenges, we must continuously expand and adapt our billing and credit control systems as we introduce new products and scale our business. The growth of new business lines may further strain these systems, placing additional pressure on our administrative, operational, and financial resources.

If adequate billing, credit control, and customer management systems are unavailable, outdated, or not upgraded and integrated in a timely manner, it could adversely impact our business, financial condition, and operational performance.

27. We rely on the availability of plywood, commercial ply, nylon carpet rolls, and other construction or finish items for the supply of these materials. We do not have continuing or exclusive arrangements with any supplier, and our top 10 suppliers contribute 51.05% of our total supply costs for Fiscal Year ended March 31, 2025. The loss of key suppliers or delays in the deliveries could adversely impact our business, financial condition, results of operations, and cash flows.

Our business, financial condition, results of operations and prospects are significantly impacted by the availability and cost of plywood, commercial ply, nylon carpet rolls, and other construction or finish items. Our cost of these materials consumed constitutes a small portion of our total expenses. Plywood, commercial ply, nylon carpet rolls, and other construction or finish items, which are our key materials for our products, is a commodity and is subject to fluctuation in commodity prices. We purchase plywood, commercial ply, nylon carpet rolls, and other construction or finish items required for our services primarily through third party suppliers. Any significant volatility in these products' prices, disruption in supply, or an inability to efficiently manage our working capital could affect our profitability, cash flows, and overall financial condition

The following table presents an indicative breakup of fabrication materials and labour as a percentage of Total Expenses for the financial years ended March 31, 2025, March 31, 2024, and March 31, 2023:

(₹ in lakhs, unless stated otherwise)

Total Expenses	4,316.31	100.00%	2,762.05	100.00%	2,465.02	100.00%

These material supply and pricing can be volatile due to a number of factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour costs, labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are uncertainties inherent in estimating such variables, regardless of the methodologies and assumptions that we may use. This volatility in commodity prices can significantly affect our material costs. Further, volatility in fuel prices can also affect commodity prices worldwide which may

increase our material costs.

We depend on third-party suppliers for supply of these materials required in our business process. Our suppliers are associated with us through purchase orders and we do not enter into any short term or long-term agreements. We rely on such suppliers to perform their conditions and deliver adequate supplies and high-quality materials in a timely manner. Our suppliers may not perform their obligations in a timely manner or at all, resulting in possible delays to our delivery schedule and adversely affecting our output, and may require us to transition our work to other suppliers.

The table below sets forth the contribution of our top 10 suppliers for the Fiscal Year March 31, 2025, March 31, 2024 and March 31, 2023, determined based on cost of raw material consumed to such suppliers for the periods stated:

While we strive to mitigate these risks by negotiating favourable terms and maintaining diversified supplier relationships, the absence of binding long-term agreements limits our ability to secure stable pricing or uninterrupted supply. Moreover, the volatility of the material and fuel prices, compounded by potential disruptions in material supply, could significantly impact our operations. Any disruption in the supply chain, increase in material costs, or failure to secure adequate and timely supplies may adversely affect our delivering capabilities, execution timelines, profitability, and overall financial condition. Furthermore, our inability to adjust customer pricing in response to material cost increases could have a material adverse effect on our business and future prospects. While we have not accounted for such situation for the Fiscal Year March 31, 2025, March 31, 2024, and March 31, 2023 we cannot assure that the same shall be continued in future.

28. Our business may expose us to potential service deficiency claims, which could adversely affect our results of operation, goodwill and the marketability of our services.

We may be exposed to potential commercial claims, and the severity and timing of such claims are unpredictable. We face the risk of loss resulting from, and the adverse publicity associated with, legal claims resulting from deficiency in services or negligence in providing services. We do not maintain any insurance associated with such service deficiency and therefore will not be able to insure or cover the risks arising out of any such claims. Any such claims would likely require us to incur substantial amounts on litigation and require our management's time and focus. Further, customers may cease availing our services. Accordingly, such legal claims may adversely affect our results of operation, goodwill and the marketability of our services. Although we have not faced such situation in the fiscal year 2025, 2024 and 2023 we cannot assure that the same situation shall not arise in future.

29. We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers/intermediaries, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or

software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

30. Our promoters were directors in other companies which are now struck off.

Our promoters Prathamesh Shantaram Pusalkar and Aarti Prathamesh Pusalkar were previously Directors in companies that has been struck off. Details of which are as follows:

Sr. No.	Name of the Company	Voluntary/ by RoC
1.	Tazaamarket Private Limited	Voluntary
2.	D Propshop India Private Limited	Voluntary
3.	Nextbrands Marketing Solutions Private Limited	Voluntary

This situation could raise concerns among stakeholders, including investors, lenders, and customers, about the historical conduct of our promoters. All the above companies have been voluntarily struck off by the promoters by filing requisite from with the Registrar of Companies, but in case of scrutiny or penal action by any regulatory authority our promoters may be held liable. Although no further notice has been received by our promoter post-strike-off of the company but there cannot be any assurance that the regulatory authority will not take any penal action against that company or our promoter. In case any such action is taken it may have an adverse effect on the operations of our Company and may affect the reputation of our Company.

31. We have in past entered into related party transactions and we may continue to do so in the future.

We have entered certain transactions with related parties may continue to do so in future. While our Company confirms that all such transactions have been conducted on arms-length basis and is in compliance with the Companies Act, 2013 and other applicable laws, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our company will enter into related party transactions also in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to “Note 24- Related Party Disclosures” under section titled “Financial Information” on page 236 of this Draft Red Herring Prospectus.

32. Conflict of interest may arise as our promoter group entity is authorized to carry on similar line of business as our Company which may lead to real or potential conflicts of interest for our Promoters or Directors.

The Memorandum of Association of the Promoter Group entity, Propshop Worldwide Holdings Private Limited (PWHPL), permits PWHPL to engage in business activities similar to ours. Therefore, there may be conflict of interest in allocating business opportunities between us. We cannot assure you that there will not be any conflict of interest between our Company and promoter group entity in future.

However, we have entered into non-compete agreement with such promoter group entity. While necessary procedures and practices will be adopted as per non-compete agreement and as permitted by law to address any instances of conflict of interest, if and when they may arise, we cannot assure you that these or other conflicts of interest will be resolved in an impartial manner.

33. Our Promoters and one of our Director hold Equity Shares in our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.

Our Promoters and one of our Director i.e. Shreyas Shrikant Rumade are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of compensation paid, re-imbursement paid, loan received, loan repaid, and to the extent of their shareholding, dividends, bonus or other distributions on such equity shares in our Company. We cannot assure you that our Promoters and Directors will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and Directors may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For further information on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see “*Our Management*” and “*Our Promoters and Promoter Group*” on pages 215 and 229 respectively of this Draft Red Herring Prospectus.

34. Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

35. We may face difficulties in implementing our strategies including our expansion and diversification plans of entering new geographical areas, development and commercialization of new products.

We may face difficulties in implementing our strategies including our expansion and diversification plans of entering into new geographical areas and expansion of our existing godowns due to various factors such as entry barriers, stringent rules and regulations, fierce competition in the new markets, inadequacy of funds for expansion, high cost of debt that may be required for expansion and diversification. Implementation of our strategies may pose significant challenges to our administrative, financial and operational resources and additional risks that our Company may not be able to foresee. Failure to successfully implement some or all of our key strategic initiatives in an effective and timely manner may adversely affect our future business prospects. For further details on our business strategies, kindly see the chapter titled “*Our Business*” beginning on page 178 of this Draft Red Herring Prospectus.

36. Our success depends heavily upon our individual Promoters, Directors, KMPs and SMPs for their continuing services, strategic guidance, and financial support.

The success of the company depends heavily upon the continuing services of individual promoters, directors Key Managerial Personnel and Senior Management Personnel who are the natural person and in control of the Company. The Company believes that the industry expertise of its promoters and directors has contributed to its growth and expansion of the company, fostering an environment of steady growth and profitability. The company benefits from its relationship with its promoters and the

success of the company depends upon the continuing services of promoters, directors, KMPs and SMPs who have been responsible for the growth of business and are closely involved in the overall strategy, direction, and management of business.

37. Our directors do not have any prior experience of being a director in any other listed company in India and this may present certain potential challenges for our Company and in the event of any material non-compliance where our directors are held liable and responsible, we may have to appoint new directors.

Our current Board comprises five directors which includes one Managing Director, one Whole Time Director, one Non-Executive Director and two Independent Directors. None of our Directors are currently a director in any other listed company in India. While our Board members are qualified and have relevant experience in their respective fields, not having any experience of being a director in any listed company in India may present certain potential challenges for our Company. In the event of any material non-compliance where our directors are held liable and responsible, we may have to appoint new directors or replace our current Directors, which could be time consuming and may involve additional costs for our Company. For further details, see “Our Management” on page 215 of this Draft Red Herring Prospectus.

38. Our inability to establish and maintain effective internal control systems, compliance frameworks, and mechanisms for tracking key operational and business metrics may have a material adverse effect on our business, results of operations, financial condition, and reputation.

We are in the process of establishing its internal control systems and compliance frameworks, including the implementation of internal systems and tools designed to monitor and track certain operational and key business metrics. As these systems and frameworks are still under development, there can be no assurance that deficiencies in compliance with applicable statutory and regulatory requirements do not currently exist or will not arise in the future. Furthermore, there can be no assurance that we will be able to implement adequate remedial measures to address any such deficiencies in a timely manner, or at all. Any failure to design, implement, monitor, or maintain effective internal controls and compliance procedures, or to accurately track and respond to key operational and business metrics, could result in operational disruptions, regulatory or legal non-compliance, reputational harm, or other adverse consequences, any of which could materially and adversely affect our business, results of operations, financial condition, and prospects.

39. If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Further, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. These licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this non-compliance. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company’s operations and

may have a material adverse effect on our business. For further details on the licenses obtained by our Company and licenses for which renewal applications have been made, kindly refer the chapter titled “Government and Other Key Approvals” beginning on page 277 of this Draft Red Herring Prospectus.

40. We may not be able to identify or effectively respond to evolving preferences, expectations or trends in a timely manner and a failure to derive the desired benefits from our service development efforts may impact our competitiveness and profitability.

The success of our business depends in part on our ability to anticipate, identify and respond promptly to evolving trends in demographics and preferences, customer’s requisitions. Our success is dependent on our ability to identify and respond to the economic, technological, and other developments that affect demographic and end-customer preferences.

We cannot assure you that our business development initiatives will be successful or be completed within the anticipated period or budget will achieve wide market acceptance from our customers. Even if these business development initiatives have been successfully implemented, there is no guarantee that they will be accepted by our customers and achieve anticipated sales targets in a profitable manner, which may affect our ability to grow our network of customers and gain market share. In addition, there can be no guarantee that the time and effort that we spend in implementing these products would be beneficial to our Company. This could also adversely affect our ability to pursue our growth strategy. Further, we cannot assure you that our existing or potential competitors will not provide similar or superior services. It is often difficult to estimate the time to market new services and there is a substantial risk that we may have to abandon a potential service that is no longer commercially viable, even after we have invested significant resources in the implementation of such service. If we fail in our implementation of services, our business, prospects, financial condition, results of operations and cash flows may be materially and adversely affected.

Further, as we continue to grow our business by expanding our service segment, offerings, and our geographic reach, maintaining quality and consistency may be more difficult and there can be no assurance that the customers’ confidence in our services will not diminish. Failure or any delay on our part to identify such trends, to align our business successfully and maintain quality could negatively affect our image, our relationship with our customers, the rate of growth of our business, our market share and our prospects.

We must, on a regular basis, keep pace with the preferences and quality requirements of our consumers, invest continuously in new technology and processes to provide products having the desired qualities and characteristics, and continually monitor and adapt to the changing market demand. An unanticipated change in consumer demand and any sudden change in Government regulations may adversely affect our liquidity and financial condition.

41. We have not identified any alternate source of financing the “Objects of the Offer”. If we fail to mobilize resources as per our plans, our growth plans may be affected.

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer may delay in the implementation schedule and could adversely affect our growth plans. For further details of object of offer and schedule of implementation please refer to the chapter titled “Objects of the Offer” on page 110 of this Draft Red Herring Prospectus.

42. The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Offer.

As the Offer size shall be less than ₹ 5,000 lakhs, under Regulation 262 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Offer. Therefore, the deployment of the funds towards the Objects of this Offer is entirely at the discretion of our Board of Directors and is not subject to

monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Offer proceeds and shall have the flexibility in applying the proceeds of this Offer. However, the management of our Company shall not have the power to alter the objects of this Offer except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Offer, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled “*Objects of the Offer*” on page 110 of this Draft Red Herring Prospectus.

43. This Draft Red Herring Prospectus contains information from an industry report prepared by Dun & Bradstreet Information Services India Private Limited, commissioned by us for the purpose of the Offer for an agreed fee.

This Draft Red Herring Prospectus contains information from an industry report prepared by Dun & Bradstreet Information Services India Private Limited which we have commissioned and paid for. This Draft Red Herring Prospectus includes information that is derived from the Dun & Bradstreet Report, prepared by Dun & Bradstreet Information Services India Private Limited, a research house, pursuant to an engagement with our Company. Dun & Bradstreet has advised that while it has taken due care and caution in preparing the commissioned report, which is based on information obtained from sources that it considers reliable (Information), it does not guarantee the accuracy, adequacy or completeness of the Information and disclaims responsibility for any errors or omissions in the Information or for the results obtained from the use of the Information. Dun & Bradstreet also highlights certain industry and market data, which may be subject to estimates and/or assumptions. There are no standard data gathering methodologies in the industry in which we conduct our business, and methodologies and assumptions vary widely among different industry sources. Further, such estimates and / or assumptions may change based on various factors. We cannot assure you that Dun & Bradstreet’s estimates and / or assumptions are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Red Herring Prospectus. Additionally, some of the data and information in the Dun & Bradstreet Report are also based on discussions / conversations with industry sources, and may not, have been nor be capable of being, independently verified. Further, the Dun & Bradstreet Report is not a recommendation to invest or disinvest in our Company. Dun & Bradstreet has disclaimed all financial liability in case of any loss suffered on account of reliance on any information contained in the Dun & Bradstreet Report.

44. We may require additional equity or debt in the future in order to continue to grow our business, which may not be available on favourable terms or at all.

From time to time, our company’s plans may evolve in response to changing circumstances, new business developments, emerging challenges, investment opportunities, or unforeseen contingencies. If our plans change or if we need to adapt to shifting market conditions, we may require additional financing to meet, among other things, capital expenditure needs. This financing could take the form of debt, raised through commercial bank loans, the issuance of debentures, or other debt securities.

If we incur additional debt in the future, our interest and debt repayment obligations will increase, potentially subjecting us to new or amended covenants. These covenants could restrict our ability to access cash flow from operations or limit other financing options. Furthermore, any additional financing may come at higher costs, which could affect our profitability. Additionally, we cannot guarantee that we will be able to secure sufficient financing to meet future capital requirements on favorable terms or within the necessary time frame.

45. Our employees may engage in misconduct or other improper activities, including non-compliance with regulatory standards and requirements.

We are exposed to the risk of employee fraud or other misconduct. Misconduct by employees could include intentional failures to comply with any regulations applicable to us, to provide accurate information to regulatory authorities, or to report financial information or disclose unauthorized activities to us. The laws and regulations may restrict or prohibit a wide range of pricing, discounting, marketing and promotion, sales commission, customer incentive programs and other business arrangements. While we have not faced such instances Fiscal 2025, Fiscal 2024, and Fiscal 2023, there can be no assurance that we will be able to identify and deter such misconduct, and the precautions we take to detect and prevent this activity may not be effective in controlling unknown or unmanaged risk. If our employees engage in any such misconduct, we could face criminal penalties, fines, revocation of regulatory approvals and harm to our reputation, any of which could form a material adverse effect on our business.

46. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.

We propose to utilize the Net Proceeds for raising funds for working capital requirement and general corporate purposes. For further details of the proposed objects of the Offer, please refer the chapter titled “*Objects of the Offer*” beginning on page 110 of this Draft Red Herring Prospectus. At this juncture, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013 and other applicable laws, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Offer, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders of our Company may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity.

In light of these factors, we may not be able to vary the objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

47. The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Offer Price.

Our Promoters’ average cost of acquisition of Equity Shares in our Company may be lower than the Offer Price which is proposed to be determined through book building mechanism. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “*Capital Structure*” on page 96 of this Draft Red Herring Prospectus.

48. We have not paid any dividends in the past Financial Years. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

Our future ability to pay dividends will depend on our earnings, financial condition, and capital requirements of our company. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition, and results of operations.

49. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted stakeholders. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

50. We will continue to be controlled by our Promoters and Promoter Group after the completion of the Offer, which will allow them to influence the outcome of matters submitted for approval of our shareholders.

As on the date of this Draft Red Herring Prospectus, our Promoters and Promoter Group hold 94.55% of the issued and outstanding paid-up share capital of our Company. Following the completion of the Offer, our Promoters and Promoter Group will continue to hold together [●]% of our post-offer Equity Share capital. As a result, they will have the ability to influence matters requiring shareholders' approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders' meetings, including the Offer of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions. We cannot guarantee you that our Promoters and Promoter Group will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

For further details regarding our shareholding, please refer to chapter titled "*Capital Structure*" beginning on page 96 of this Draft Red Herring Prospectus.

51. The requirements of being a listed company may strain our resources.

We are not a listed company. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulators, and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the equity listing agreement with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management's attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

52. Our Company will not receive any proceeds from the Offer for Sale portion, and the Selling Shareholders shall be entitled to the Offer Proceeds to the extent of the Equity Shares offered by them in the Offer for Sale. Our Promoters are therefore interested in the Offer in connection with the Equity Shares offered by them in the Offer for Sale.

The Offer includes an offer for sale of such number of Equity Shares aggregating to up to 8,00,000 by the Promoter Selling Shareholders. The Promoters are therefore, interested in the Offer Proceeds to the extent of the Equity Shares offered by them in the Offer for Sale. The entire proceeds (net of offer expenses) from the Offer for Sale will be paid to the Promoter Selling Shareholders and our Company will not receive any such proceeds. Further, except for listing fees of the Offer, which will be borne by our Company, all cost, fees and expenses (including all applicable taxes) in respect of the Offer will be shared amongst our Company and the Selling Shareholders on a pro-rata basis, in proportion to the Equity Shares issued and allotted by our Company in the Fresh Issue and the Offered Shares sold by the Selling Shareholders in the Offer for Sale, upon successful completion of the Offer. See “*Capital Structure*” and “*Objects of the Offer*” on pages 96 and 110, respectively of this Draft Red Herring Prospectus.

53. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- a. any increase in Indian interest rates or inflation;
- b. any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- c. prevailing income conditions among Indian consumers and Indian corporations;
- d. volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- e. changes in India's tax, trade, fiscal or monetary policies;
- f. political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- g. occurrence of natural or man-made disasters;
- h. other significant regulatory or economic developments in or affecting India or its agrochemical industry Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

54. Our Equity Shares have never been publicly traded, and after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the Offer Price may not be indicative of the market price of the Equity Shares after the Offer

Prior to the offer, there has been no public market for the equity shares, and an active trading market on the stock exchange may not develop or be sustained after the offer. Listing and quotation do not guarantee that a market for the equity shares will develop. The offer price of the equity shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the equity shares at the time of commencement of trading of the equity shares or at any time thereafter. The market price of the equity shares may be subject to

significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

The trading volume and market price of the equity shares may be volatile following the offer.

The market price of the equity shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- a. half yearly variations in our results of operations;
- b. results of operations that vary from the expectations of securities analysts and investors;
- c. results of operations that vary from those of our competitors;
- d. changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- e. a change in research analysts' recommendations;
- f. announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations, or capital commitments;
- g. announcements by third parties / governmental entities of significant claims/ proceedings against us;
- h. new laws and governmental regulations applicable to our industry;
- i. additions or departures of key management personnel;
- j. changes in exchange rates;
- k. fluctuations in stock market prices and volume; and
- l. general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

55. There are restrictions on daily/ weekly/ monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

56. QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Individual Investors can revise their Bids during the Bid/ Offer Period and withdraw their Bids until Bid/ Offer Closing Date. While our Company is required to complete allotment pursuant to the offer within three working days from the Bid/ Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political, or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the allotment of the Equity Shares even if such events occur,

and such events may limit the Bidders ability to sell the Equity Shares allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

57. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Offer.

The Equity Shares will be listed on the Stock Exchange. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchange. The Allotment of Equity Shares in this Offer and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately two Working Days from the Bid Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchange is expected to commence within three working days of the Bid Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

58. Any future issuance of Equity Shares may dilute the shareholding of the Investors, or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. The minimum promoter contribution is subject to a minimum of 20% of our post-offer paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Offer, 50% of Promoters' holding in excess of Minimum Promoters' Contribution will be locked in for a period of two (2) years, while the remaining 50% of Promoters' holding in excess of Minimum Promoters' Contribution, will be locked in for a period of one (1) year from the date of allotment of Equity Shares in this offer. will be locked-in for a period of 1 (one) year and upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled "Capital Structure" beginning on page 96 of this Draft Red Herring Prospectus. Any future issuance or sale of the equity shares of our Company by our Promoters or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

EXTERNAL RISK FACTORS

59. A slowdown in economic growth in India could cause our business to suffer.

Our performance and the growth of our business are necessarily dependent on the health of the overall economy of India and of the countries, including but not limited to USA, Australia, Japan, UAE, Germany, Taiwan, Hongkong, Italy etc., where we have business relations. Any slowdown or perceived slowdown in these economies or future volatility in global prices could adversely affect our business. Additionally, an increase in trade deficit, a downgrading in the sovereign debt rating or a decline in the foreign exchange reserves of these countries could negatively affect interest rates and liquidity, which could adversely affect these economies and our business. Global situations such as outbreak of the COVID-19 pandemic, United States of America's Tariff fluctuations/ sanctions, full scale military invasion of Ukraine by Russia have caused a global economic downturn including in India and these

countries. Any downturn in the macroeconomic environment in India or any country(ies) where we have our business presence, could also adversely affect our business, financial condition, results of operations and prospects.

The economy of India and the countries where the Company has its business presence, could be adversely affected by a general rise in interest rates or inflation, civil unrest, adverse weather conditions affecting agriculture, commodity, and energy prices as well as various other factors. A slowdown in the economy of any of these countries could adversely affect the policy of their respective governments towards our industry, which may in turn adversely affect our financial performance and our ability to implement our business strategy.

The economy of India and various other countries where the Company has its business presence is also influenced by economic and market conditions in other countries. A decline in the foreign exchange reserves and exchange rate fluctuations may also affect liquidity and interest rates in these economies, which could adversely impact our financial condition. A loss of investor confidence in other emerging market economies or any worldwide financial instability may adversely affect these economies, which could materially and adversely affect our business, financial condition, results of operations and prospects.

Further, other factors which may adversely affect the global economy are scarcity of credit or other financing facilities, resulting in an adverse impact on economic conditions in India and the countries where the Company has its business presence, resulting in scarcity of financing of our Proposed Projects; volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges; changes in the tax, trade, fiscal or monetary policies of India or any other country where the Company has its business presence, like application of GST and/or VAT, as applicable; political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries; occurrence of natural or manmade disasters; infectious disease outbreaks or other serious public health concerns; prevailing regional or global economic conditions, and other significant regulatory or economic developments in or affecting the financial services sectors of India and/or any country where the Company has its business presence.

60. Political instability and significant changes in Government policy could adversely affect economic conditions in India generally and our business in particular.

Changes in exchange rates and controls, interest rates, Government policies, taxation, social and ethnic instability and other political and economic developments in and affecting India may have an adverse effect on our results of operations.

India has a mixed economy with a large public sector and an extensively regulated private sector. The role of the Government and that of the state governments in the Indian economy and their effect on producers, consumers, suppliers and regulators has remained significant over the years. Both state and central governments have, in the past, among other things, imposed controls on the prices of a broad range of goods and services, restricted the ability of businesses to expand existing capacity and reduce the number of their employees and determined the allocation to businesses of raw materials and foreign exchange. Since 1991, successive Governments have pursued policies of economic liberalization, including significantly relaxing restrictions in the private sector. Nevertheless, the role of the Government and state governments in the Indian economy as producers, consumers and regulators has remained significant. There can be no assurance that the Government's past liberalization policies or political stability will continue in the future. Elimination or substantial change of such policies or the introduction of policies that negatively affect our industry could have an adverse effect on our business. Any significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally and our business in particular.

61. Recent global economic conditions have been challenging and continue to affect the Indian market. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. For example, the global economy has been adversely impacted due to the tariffs that the U.S. rolled out recently.

Further, economic developments globally can have a significant impact on India. In particular, the global economy has been negatively impacted by the conflict between Russia and Ukraine, and the ongoing conflict in the Middle East. Governments in the United States, United Kingdom, and European Union have imposed sanctions on certain products, industry sectors, and parties in various countries. The conflict could negatively impact regional and global financial markets and economic conditions, and result in global economic uncertainty and increased costs of various commodities, raw materials, energy and transportation. In addition, recent increases in inflation and interest rates globally, including in India, could adversely affect the Indian economy.

In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. Any significant financial disruption could have an adverse effect on our business, results of operation, financial condition and prospects.

62. If inflation rises in India, increased costs may result in a decline in profits.

Inflation rates in India have been volatile in recent years, and such volatility may continue. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our customers, whether entirely or in part, and may adversely affect our business and financial condition. While the Government of India has previously initiated economic measures to combat high inflation rates, it is unclear whether these measures will remain in effect. There can be no assurance that inflation in India will not worsen.

63. Financial instability in other countries, particularly countries with emerging markets, could disrupt Indian markets and our business and cause the trading price of the Equity Shares to decrease.

The Indian financial markets and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause volatility in Indian financial markets and in the Indian economy. Any worldwide financial instability could also have a negative effect on the Indian economy. Accordingly, any significant financial disruption could have an adverse effect on our business, financial condition, and results of operations.

64. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition, and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Our business is subject to a significant number of state tax regimes and changes in legislations governing

them, implementing them or the regulator enforcing them in any one of those jurisdictions could adversely affect our results of operations. The applicable categories of taxes and tax rates also vary significantly from state to state, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditures incurred. Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government or State Governments that affect our industry include GST, income tax and other taxes, duties or surcharges introduced from time to time and any adverse changes in any of the taxes levied by the Government or State Governments could adversely affect our competitive position and profitability. Such changes may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

65. Challenges that affect the industry of trade show and exhibition booth solutions will have an effect on our operations.

As we are engaged in the business of trade show and exhibition booth solutions, offering both custom-built and modular exhibition options, we are impacted by challenges that affect the industry in general. These include general economic conditions and outlook, increase in operating costs, government regulation and policy and importantly, our competitive position in the market in general. These factors will impact us and our business on an ongoing basis. We will be constrained to respond to changes adequately to remain profitable, including bringing about changes to operations, cutting down on costs, and reassessing growth plans and strategies. We are unable to predict these challenges and cannot assure you that we will continue to maintain our current levels of financial performance.

66. Any adverse revision to India's debt rating by a domestic or international rating agency could adversely affect our business.

India's sovereign debt rating could be adversely affected due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

67. Compliance with applicable health, safety, environmental and other governmental regulations may be costly and adversely affect our results of operations.

Compliance with applicable health, safety, environmental and other governmental regulations is time consuming, costly and requires a number of dedicated personnel. We are subjected to payment of fees and levies on an ongoing basis with respect to a number of licenses, approvals, consents, and permissions we are required to obtain from governmental authorities. We are required to periodically maintain a number of records and registers and file a number of returns. Ensuring compliance requires that we hire trained personnel. Our compliance costs may adversely affect our revenue.

68. Any adverse application or interpretation of competition laws could adversely affect our business.

The Competition Act, 2002, as amended (the "**Competition Act**") was enacted for the purpose of preventing practices that have or are likely to have an adverse effect on competition ("**AAEC**") in certain markets in India and has mandated the Competition Commission of India (the "**CCI**") to separate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an AAEC is deemed void and attracts substantial penalties.

Further, any agreement among competitors which directly or indirectly involves determination of purchase or sale prices, limits or controls production, or shares the market by way of geographical area or number of customers in the relevant market is presumed to have an appreciable adverse effect on competition in the relevant market in India and shall be void. Further, the Competition Act prohibits abuse of dominant position by any enterprise. If it is proved that the contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and liable to be punished

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, certain agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination has an AAEC in India. The effects of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. However, since we pursue an acquisition driven growth strategy, we may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, any enforcement proceedings initiated by the CCI, any adverse publicity that may be generated due to scrutiny or prosecution by the CCI, or any prohibition or substantial penalties levied under the Competition Act, which would adversely affect our business, results of operations, cash flows and prospects.

The Government of India has also passed the Competition (Amendment) Act, 2023, which has proposed several amendments to the Competition Act, such as introduction of deal value thresholds for assessing whether a merger or acquisition qualifies as a “combination”, expedited merger review timelines, codification of the lowest standard of “control” and enhanced penalties for providing false information or a failure to provide material information.

If we pursue acquisitions in the future, we may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, any enforcement proceedings initiated by the CCI, any adverse publicity that may be generated due to scrutiny or prosecution by the CCI, or any prohibition or substantial penalties levied under the Competition Act, which would adversely affect our business, results of operations, cash flows and prospects.

69. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease, and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

70. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction.

Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

71. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further information, see “*Restrictions on Foreign Ownership of Indian Securities*” on page 359 of Draft Red Herring Prospectus.

72. Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, 2013, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value such custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced.

73. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter, or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of Equity Shares at a premium to the market price or would otherwise be beneficial to the shareholders. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the SEBI Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

74. Investors may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹ 1.25 lakh, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 01, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2024, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see chapter titled “Offer Procedure” on page 321 of this Draft Red Herring Prospectus);
- Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form;

The exemption for Central or State Governments and officials appointed by the courts and for investors residing in Sikkim is subject to the Depository Participant’s verification of the veracity of such claims of the investors by collecting sufficient documentary evidence in support of their claims.
- Ensure that the Bid cum Application Form is duly completed as per instructions given in this Draft Red Herring Prospectus and in the Bid cum Application Form;

The fund requirements, deployment of funds, and intended use of the Net Proceeds as described in this Draft Red Herring Prospectus are based on our current business plan, management estimates, market conditions, and other external commercial and technical factors. However, these fund requirements and deployment plans have not been appraised by any bank, financial institution, or independent agency. For further details, see “Risk Factors - Risk Factor 4 – Our funding requirements and the proposed deployment of the Net Proceeds of the Offer have not been appraised by any bank or financial institution are based on management estimates and may be subject to change based on various factors, some of which are beyond our control.” on page 37. We may need to revise our funding requirements and deployment due to various factors such as our financial and market conditions, business and growth strategies, ability to identify and implement inorganic growth initiatives (including investments and acquisitions), competitive landscape, general factors affecting our results of operations, financial condition, access to capital, changing concurrent technology offered by equipment manufacturers and other external factors such as changes in the business environment, regulatory climate, and interest or exchange rate fluctuations. These factors, which may not be within our management’s control, might

necessitate rescheduling the proposed utilization of the Net Proceeds and changing the allocation of funds from its planned allocation, subject to compliance with applicable laws.

Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Offer. To the extent our Company is unable to utilize any portion of the Net Proceeds towards the aforementioned objects per the estimated schedule of deployment specified above, our Company shall deploy the Net Proceeds in subsequent financial year towards the aforementioned Objects.

Moreover, if the actual utilization towards any of the Objects is lower than the proposed deployment, such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 15% of the aggregate of the gross proceeds of the Offer, in accordance with Regulation 230(2) of the SEBI ICDR Regulations. In case of a shortfall in raising requisite capital from Net Proceeds or an increase in the total estimated cost of the Objects, business considerations may require us to explore a range of options including utilizing our internal accruals and seeking debt lenders. In furtherance, such alternate arrangements would be available to fund any such shortfalls.

Details of the Objects of the Offer

1. Funding working capital requirements of the company

We are engaged in the business of trade show and exhibition booth solutions, offering both custom-built and modular exhibition options. Our services span the entire project lifecycle — from concept design and 3D visualization to fabrication, logistics, on-site supervision, installation, and post-event dismantling support. We operate across both domestic and international markets, delivering end-to-end solutions for exhibition stall design, fabrication, and execution. With a strategic focus on strengthening our position in the broader event management industry, we intend to deploy the net proceeds from this Offer to enhance our operational capabilities and expand into adjacent, higher-margin verticals. In particular, we aim to evolve from being primarily an execution partner to a full-fledged event solutions provider. This includes venturing into the organisation of business events, trade fairs, brand activations, and curated corporate experiences, thereby offering integrated services - from ideation and event curation to design, production, and on-ground execution. We believe this expansion will unlock significant cross-selling and up-selling opportunities within our existing client base, enable access to a broader segment of clients, and position us as a comprehensive partner for brand experience management.

A key requirement of this growth strategy is the enhancement and efficient utilization of working capital. Our business involves substantial working capital requirements driven by the need to manage multiple concurrent projects, pre-event preparations, vendor advances, material procurement, logistics, and client-specific demands, often under compressed timelines. To ensure timely and seamless execution of events, it is critical to maintain adequate liquidity and improve cash flow planning. Accordingly, a significant portion of the proceeds will be allocated toward strengthening our working capital base. This will allow us to:

- Enable quicker project turnaround times and reduce execution bottlenecks;
- Take on a greater volume of projects concurrently across geographies;
- Improve vendor management and execution reliability;
- Support faster execution cycles for modular and custom stand solutions;
- Invest in staffing, production resources, digital tools, and technology platforms required for complex and large-scale event delivery.

Through this strategic expansion and operational enhancement, we aim to build a scalable, high-margin, and resilient business model that delivers consistent revenue growth, improved operational efficiency, and long-term client retention.

All these factors result in increase in the quantum of our working capital requirements. Currently we fund the majority of our working capital requirements in the ordinary course of our business from our internal accruals and borrowings. The deployment of net proceeds shall be over the course of the financial year 2026 and 2027 in accordance with the working capital requirements of our Company. Our Company proposes to utilise ₹ 1,550.00 lakhs of the Net Proceeds for funding its working capital requirements.

2) Holding period level (in days) of Trade Payables is calculated by dividing average trade payables by operating expenses multiplied by number of days in the period/year (365).

(d) Key justifications for holding levels

Particulars	Justification
Trade Receivables	Over the past three financial years, we have observed gradual increase in our trade receivables days. Our trade receivables days were 19 days in FY 2023, which has increased to 27 days in FY 2024, subsequently increasing to 28 days in FY 2025. The increase in trade receivable days is primarily attributed to the characteristics of our customer base, which includes international customers, and the nature of industry we operate in. These customers, especially corporates, often have longer payment cycles, typically ranging from 90 to 120 days after rendering services. Additionally, recent global economic conditions and fiscal tightening measures have led some customers to request extended credit periods. Given the nature of our industry and customer base, we anticipate that our trade receivables days will continue to increase to around 35 and 36 days in FY 2026 and 2027. Trade Receivables remain a key component of our working capital, and their growth reflects the scale of business expansion. While we strive to optimize our payment terms, it is

Particulars		Justification
		challenging to significantly reduce the cycle time without compromising customer relationships and business growth.
Other Assets	Current	Our Other Current Assets primarily comprise Prepaid Expenses, Advances to Suppliers, Security Deposits, and other receivables. Over the last three financial years, this category has shown a steady increase from ₹516.24 Lacs in FY 2023 to ₹780.80 Lacs in FY 2024, and ₹940.96 Lacs in FY 2025. For the projected periods FY 2026 and FY 2027, the balance is expected to further rise to ₹1,553.00 Lacs and ₹2,065.00 Lacs respectively. The constant increase is attributable to the overall growth in business operations, which necessitates higher advance payments to vendors and service providers, increased booking of venues and services in advance (prepaid expenses), and deployment of additional security deposits in line with expanded event portfolios. As we take on larger and more complex projects, the requirement to secure materials, venues, and strategic partnerships in advance becomes more critical.
Trade payables		Our trade payable days were 27 days in FY 2023, 30 days in FY 2024 and 15 days for FY 2025. Going forward also, we expect our trade payable days to be in the similar range of 15 days for FY 2026 and 2027. Given the nature of the industry in which we operate, particularly the procurement of raw materials required for fabrication before events, industry standards dictate advance payments for raw materials. To remain competitive in the international market, we prioritize cost-effective procurement of raw materials and components. Prompt payment to vendors is crucial to optimize our input costs and ensure a steady supply of materials before events. Our strong relationships with vendors, built on trust and mutual understanding, have allowed us some flexibility in payment terms. Our efficient management of payables underscores our commitment to optimizing cash flow and maintaining a healthy financial position.
Other Liabilities	Current	Our Other Current Liabilities primarily comprise Advance from Customers, TDS payable, GST payable, Salaries payable to staff, among other payables. Other Current Liabilities stood at ₹499.87 Lacs for FY 2023, ₹451.99 Lacs for FY 2024, and ₹416.99 Lacs for FY 2025. While there was a marginal decline over the past three years, they are projected to rise to ₹495.00 Lacs in FY 2026 and ₹697.00 Lacs in FY 2027. The decrease in Other Current Liabilities from FY 2023 to FY 2025 is primarily due to a temporary reduction in customer advances, as more projects were executed on tighter timelines, reducing the lead time between order booking and execution. Additionally, improved billing and collection cycles led to faster recognition of revenues, converting advances into income more quickly. However, the projected increase from FY 2026 onward is attributable to an expected growth in the order book, resulting in higher customer advances for larger and longer-duration projects, alongside an increase in payroll accruals, statutory dues, and other short-term obligations in line with the company's expanding operations.

Global Macroeconomic Scenario

Global Economic Overview

The global economy, which recorded GDP growth at 3.3% in CY 2024, is expected to show resilience at 2.8% in CY 2025. This marks the slowest expansion since 2020 and reflects a 0.5%-point downgrade from January 2025 forecast. Moreover, the projection for CY 2026 has also reduced to 3.0%. This slowdown is majorly attributed due to numerous factors such as high inflation in many economies despite central bank effort to curb inflation, continuing energy market volatility driven by geopolitical tensions particularly in Ukraine and Middle East, and the re-election of Donald Trump as US President extended uncertainty around the trade policies as well as overall global economic growth. High inflation and rising borrowing costs affected the private consumption on one hand while fiscal consolidation impacted the government consumption on the other hand. As a result, global GDP growth is estimated to moderation by 2.8% in CY 2025 as compared to 3.3% in CY 2024.

Historical and Projected GDP Growth

GDP growth across major regions exhibited a mixed trend between 2022-23, with GDP growth in many regions including North America, Emerging and Developing Asia, and Emerging and Developing Europe slowing further in 2024. In 2025, GDP growth rate in Emerging and Developing Asia (India, China, Indonesia, Malaysia, etc.) is expected to moderate further to 4.5% from 5.3% in the previous year, while in the North America, it is expected to moderate to 1.8% in CY 2025 from 2.8% in CY 2024.

Except Middle East & Central Asia, all other regions like Emerging and Developing Asia, Emerging and Developing Europe, Latin America & The Caribbean, Sub Saharan Africa and North America, are expected to record a moderation in GDP growth rate in CY 2025 as compared to CY 2024. Further, growth in the United States is expected to come down at 2.71% in CY 2025 from 2.80% in CY 2024 due to lagged effects of monetary policy tightening, gradual fiscal tightening, and a softening in labour markets slowing aggregate demand.

Global Economic Outlook

The global economy is navigating a period of exceptional uncertainty. Policy shifts, particularly those reshaping trade, have alarmed financial markets and bruised business sentiment. The U.S.'s reciprocal tariffs, which represent additional costs for businesses from almost all countries with which the U.S. trades, charge trade partners an import duty at a discounted rate of approximately half the rate that the trade partner currently imposes on the U.S. According to U.S. President Donald Trump, reciprocal tariffs, ranging from 10% to 50%, are meant to address trade barriers limiting U.S. exports. The effective tariff rate includes other tariffs imposed at an earlier date and cumulatively may now be higher than duties charged on U.S. imports. It is unclear whether the reciprocal tariffs represent a negotiating tool, and may therefore be temporary, or form part of broader long-term protectionist measures and industrial strategy.

Responses to reciprocal tariffs have been varied, with some economies promising swift countermeasures. More than 50 markets have sought negotiations with the US. While Malaysia is seeking a united response across ASEAN, the Chinese Mainland has retaliated with duties on all imports from the U.S., declaring it will “fight to the end”. In early April, the U.S. confirmed the most aggressive steps yet, with a cumulative 145% tariff on some products imported from the Chinese Mainland. Brazil has readied itself by passing a bill allowing for retaliation, Australia has ruled out retaliatory levies, and the EU remains open to negotiation while preparing a package of countermeasures.

Tariffs and their unpredictable application have weighed on consumer and business sentiment, sunk global stock markets, raised recession risks, and made a global slowdown more likely. Our latest Global Business Optimism Insights report for indicates a further decline in business optimism as firms continue to grapple with trade-related policy uncertainty and its broader economic implications. Export-driven sectors reported sharp declines in optimism. Financial risk perceptions remain elevated as businesses contend with high borrowing costs and persistent inflation expectations. More broadly, the uncertainty is reflected in delayed capital expenditure and a pullback in hiring.

Tariffs have begun to exert pressure on central banks by contributing to inflationary pressures and increasing financial market volatility. Central banks are adjusting forward guidance and policy frameworks and may begin to consider the likelihood of softer growth being a bigger priority than high inflation by starting to cut interest rates to support economies. For businesses, this uncertainty translates into unpredictable cost structures, fluctuating credit availability, and the management of operational costs through diversified supply networks.

The latest Dun & Bradstreet Global Business Optimism Insights report reveals a further decline in business optimism, though at a more moderate pace than in the prior quarter, as businesses continued to grapple with trade-related policy uncertainty and its broader economic implications. Export-driven sectors such as automotives, electricals, and metals saw sharp declines in optimism, particularly in the U.S., Mexico, South Korea, and Japan, where rising tariffs and shifting trade policies have fuelled cost pressures and demand volatility. Financial risk perceptions remain elevated.

The Government stepped spending on infrastructure projects to boost the economic growth had a positive impact on economic growth. The capital expenditure of the central government increased by average 26.52% during FY 2023-FY 2024 which slowed to 7.27% in FY 2025 which is expected to translate in moderating GDP growth of 6.5% in 2024. In the Union Budget 2025-2026, the government announced INR 11.21 billion capex on infrastructure (10.12% higher than previous year revised estimates) coupled with INR 1.5 trillion in interest-free loans to states. This has provided much-needed confidence to the private sector, and in turn, expected to attract the private investment.

Historical GDP and GVA Growth trend

As per the latest estimates, India's GDP at constant prices is estimated to grow to INR 187.95 trillion in FY 2025 (Second Revised Estimates) with the real GDP growth rates estimated to be 6.48% for FY 2025. Similarly, real Gross Value Added (GVA) growth stood is estimated to have moderated to 6.37% in FY 2025. Even amidst global economic uncertainties, India's economy exhibited resilience supported by robust consumption and government spending.

Inflation Scenario

The inflation rate based on India's Wholesale Price Index (WPI) exhibited significant fluctuations across different sectors from August 2023 to March 2025. The annual rate of inflation based on all India Wholesale Price Index (WPI) number is 2.05% (provisional) for the month of March 2025 (over March 2024). Positive rate of inflation in March 2025 is primarily due to increase in prices of manufacture of food products, other manufacturing, food articles, electricity and manufacture of textiles etc.

Growth Outlook

The Union Budget 2025-26 has laid the foundation for sustained growth by balancing demand stimulation, investment promotion and inclusive development. Inflation level is reaching within the central bank's target; the RBI may pursue further monetary easing that will support growth. The medium-term outlook is bright, fuelled by the emphasis on physical and digital infrastructure spending.

With a focus on stimulating demand, driving investment and ensuring inclusive development, the budget introduces measures such as tax relief, increased infrastructure spending and incentives for manufacturing and clean energy. These initiatives aim to accelerate growth while maintaining fiscal discipline, reinforcing India's long-term economic resilience. The expansion of tax relief i.e zero tax liability for individuals earning up to INR 12 lacs annually under the new tax regime is expected to strengthen household finances and, consequently, boost consumption.

The external sector remains resilient, and key external vulnerability indicators continue to improve. However, tariff-related uncertainty is likely to weigh on exports and investment, prompting us to cut our FY 2026 GDP growth forecast to 6.3%.

Modular Exhibition Stands

Concept and Common Types of Modular Exhibition Stands

Modular exhibition stands are adaptable and reusable structures designed for showcasing brands at trade shows, expos, and promotional events. Unlike traditional, one-time-use custom-built stands, modular stands are constructed using prefabricated parts that can be assembled and dismantled with ease. These components, typically made of lightweight aluminum or composite materials, offer a high degree of flexibility, allowing businesses to use the same framework across multiple events with different configurations and branding needs.

The core concept of modular exhibition stands revolves around versatility, efficiency, and cost-effectiveness. Companies can modify the layout, design elements, and visual displays based on the specific space and objectives of each event, without having to invest in new infrastructure every time. This not only helps in reducing costs but also supports sustainability by minimizing material waste. Modular systems are often engineered for easy, tool-free assembly, making them ideal for quick setup and breakdown by minimal staff.

In addition to being functional, modular stands are highly customizable in appearance. High-quality graphic panels, lighting systems, digital screens, and storage units can be seamlessly integrated into the modular framework. These enhancements help businesses create a strong visual impact while maintaining consistency in brand presentation. The designs can be updated or refreshed periodically with minimal effort, which is particularly beneficial for companies participating in frequent or international exhibitions.

Another major advantage of modular stands is their portability and ease of storage. The components are designed to be compact and lightweight, allowing them to be packed efficiently for transport and stored between events without occupying large warehouse spaces. Overall, modular exhibition stands are an ideal solution for modern marketers seeking a professional, flexible, and cost-effective way to build brand visibility across various platforms and venues.

Commonly Used Types of Modular Exhibition Stands

Type	Best For	Advantages
Shell Scheme Compatible	Small booths, budget displays	Cost-effective, easy setup
Pop-Up Stands	Portability, quick events	Lightweight, tool-free assembly
Panel & Pole Systems	Medium booths with structure	Customizable, modular layout
Truss Systems	Large-scale exhibits	Strong, scalable, supports heavy media
Custom Modular	Premium branding with reusability	Tailored design + modular efficiency

1. Shell Scheme Compatible Stands

These are designed to fit within the standard shell schemes offered by event organizers, usually basic, pre-built booths of specific dimensions such as 3x3 meters or 3x6 meters. While shell schemes are typically plain and uniform, modular add-ons can transform them into customized brand spaces. Businesses use modular wall panels, printed graphics, lighting, and shelving to personalize these booths.

Ideal For:

- Startups, small to mid-sized businesses
- Exhibitors participating in shared halls or budget-conscious expos

Benefits:

- Quick and easy to install within standard dimensions
- Affordable way to create a branded presence
- Lightweight components for easy transport

2. Pop-Up Display Stands

Pop-up displays are one of the most portable and user-friendly modular systems. They usually feature collapsible frames that expand into a backdrop structure, which is then covered with printed fabric or graphic panels. These are ideal for simple presentations or visual storytelling, such as showing a product lineup, brand message, or service overview.

Ideal For:

- Roadshows, small trade fairs, conferences
- Businesses needing fast setup and compact transport

Benefits:

- Extremely lightweight and portable
- Tool-free and fast assembly

3. Panel & Pole Systems

These modular systems consist of square or rectangular panels that attach to vertical poles, allowing exhibitors to create walls, partitions, or display sections in many configurations. They can incorporate shelving, lighting, monitors, and brochure holders. Panel & pole systems offer more flexibility than pop-up stands and are suitable for medium-sized booths that require semi-custom layouts.

Ideal For:

- Mid-sized businesses needing layout variety
- Product displays and information booths

Benefits:

- Configurable for different booth sizes
- Reusable and durable
- Enhances brand visibility with layered displays

4. Modular Truss Systems

Truss systems are sturdy, industrial-style frameworks made of aluminum or steel tubing that connect together to form large open structures. They can span wide areas without central supports and are ideal for large-scale events. Truss systems allow for high branding visibility and can support heavy equipment like lighting rigs, banners, monitors, or hanging signs.

Ideal For:

- Large exhibitors in open-floor or island booths
- Companies with multiple product zones or interactive installations

Benefits:

- Visually striking with an open-air feel

- Supports large signage and multimedia
- High load-bearing capacity for tech integrations

5. Custom Modular Stands

This hybrid type blends the reusability of modular components with custom-built aesthetics. It is created using a core of modular frames, but enhanced with high-end finishes, custom-built counters, LED lighting, touchscreen displays, or 3D brand elements. These stands can be scaled or modified for various events while maintaining a premium look.

Ideal For:

- Brands wanting a high-impact presence across multiple shows
- Companies needing both flexibility and a strong visual identity

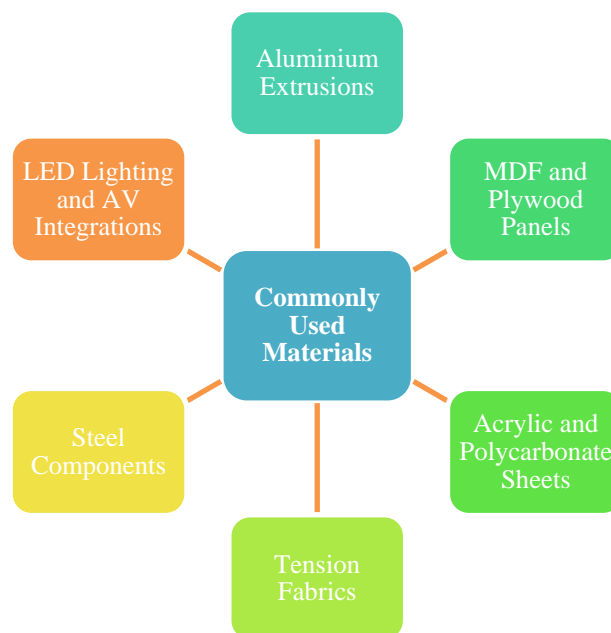

Benefits:

- Premium design with long-term cost savings
- Unique presence without rebuilding from scratch
- Can be refreshed or rebranded with ease

Key Materials Used in the Construction of Modular Exhibition Stands

Modular exhibition stands are built using lightweight, durable, and reusable materials to ensure easy transport, repeated assembly, and visual appeal. Aluminum is widely used for the framework due to its strength, corrosion resistance, and design flexibility. MDF, laminates, and composite boards serve as structural panels, often covered with printed vinyl or stretch fabric for branding. Acrylic, polycarbonate, and tempered glass enhance aesthetics in signage and partitions, while polyester-based textiles offer vibrant, portable graphic solutions. Flooring typically uses interlocking PVC, laminated wood, or carpet tiles. Growing sustainability trends are driving the adoption of eco-friendly materials like bamboo and biodegradable fabrics, ensuring both performance and environmental responsibility.

Commonly Used Materials:

1. Aluminium Extrusions

Aluminium is the backbone material for most modular exhibition stands due to its excellent balance of lightweight structure, strength, and durability. Aluminium extrusions are prefabricated hollow sections or channels that are easy to cut, transport, and assemble. These are typically anodized or powder-coated to enhance appearance and resist corrosion, ensuring a long lifecycle despite frequent handling. Aluminium systems are highly versatile and allow for tool-less or minimal-tool assembly using corner connectors, clips, and fasteners, which speeds up booth setup and dismantling. The modular nature of aluminium extrusions makes them ideal for reconfiguration and reuse across various booth sizes and layouts.

2. MDF and Plywood Panels

Medium-Density Fibreboard (MDF) and plywood are widely used for constructing solid elements such as wall panels, countertops, podiums, shelving, and flooring platforms. MDF is favored for its smooth, uniform surface, which allows for high-quality finishes and clear, bold graphics when vinyl-wrapped or laminated. Plywood, being slightly more rugged, is often used where added structural stability is required. Both materials can be custom-cut and finished to match the brand's design language and provide a premium feel. These panels are frequently coated with laminates or printed wraps to make them more visually engaging and durable for repeated use.

3. Acrylic and Polycarbonate Sheets

Acrylic (PMMA) and polycarbonate sheets are used to introduce modern, sleek design elements into exhibition stands. These materials come in transparent, translucent, or frosted finishes, making them ideal for creating partitions, signage, product showcases, and illuminated displays. Acrylic offers a glass-like clarity with excellent visual appeal, while polycarbonate provides greater impact resistance, making it suitable for environments where durability is critical. These materials can be backlit or edge-lit with LED strips, creating a dramatic visual impact and drawing attention to specific areas or products.

4. Tension Fabrics

Tension fabrics are made from stretchable polyester blends, often printed with high-resolution graphics using dye-sublimation techniques. These fabrics are used on backwalls, ceiling structures, lightboxes, and banners to provide a seamless, wrinkle-free display surface. The flexibility of the fabric allows it to be tightly pulled over a frame, creating clean lines and a contemporary look. Tension fabrics are lightweight, foldable, and easy to maintain, making them an excellent choice for exhibitors looking to minimize shipping costs while still achieving a high-impact visual presence.

5. Steel Components

Though heavier than aluminium, steel is used selectively in modular stand construction—especially in truss systems, load-bearing zones, or large-scale custom structures where rigidity and strength are paramount. Steel components are often powder-coated or chrome-finished to ensure durability and maintain visual appeal. Their use is more prevalent in large island booths, double-decker stands, or where overhead rigging and equipment like lighting grids or hanging banners are needed.

6. LED Lighting and AV Integrations

Modern modular exhibition stands increasingly incorporate integrated lighting and multimedia to enhance visitor engagement. LED downlights, backlit panels, and spotlights are commonly built into frame systems, highlighting key visuals or products. RGB lighting can also be used for dynamic effects. For digital content, video walls, interactive touchscreens, and embedded monitors are seamlessly integrated into the stand design, with cabling concealed within the aluminium structure. These features not only improve functionality but also elevate the overall aesthetic and experiential quality of the stand.

By combining these materials thoughtfully, modular exhibition stands deliver the flexibility, durability, and branding power needed for modern trade show environments—ensuring exhibitors can **reconfigure and reuse** the same components across multiple events without compromising on design or performance.

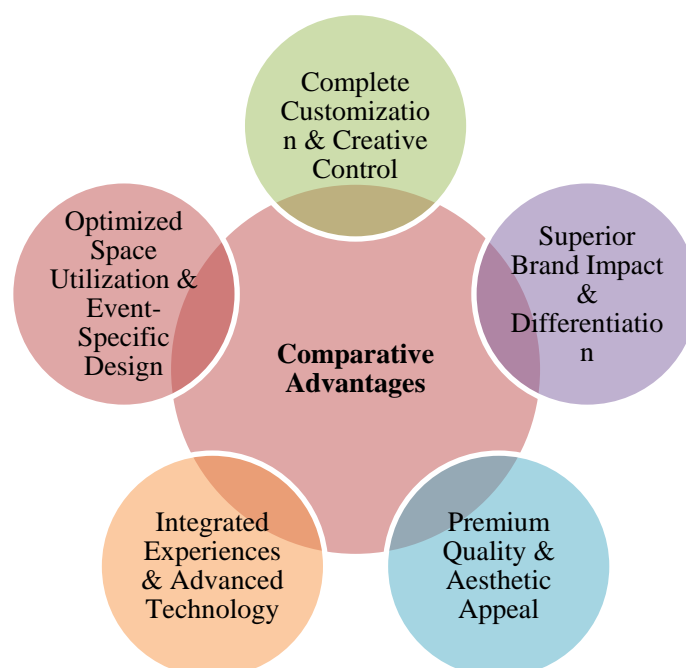

Bespoke Exhibition Stands

Bespoke exhibition stands are tailor-made display environments meticulously designed and constructed to convey a company’s distinct brand identity, communication strategy, and visitor engagement goals. Unlike modular or off-the-rack systems, which utilize pre-engineered, standardized components for rapid assembly and reuse, bespoke stands offer a blank design canvas, allowing every element, from the floorplan to the finishes, to be uniquely crafted. These stands are developed with full creative freedom to align with specific campaign narratives, product launches, or corporate values, resulting in an immersive and visually compelling presence on the exhibition floor.

The fundamental difference lies in the depth of customization and creative expression. Modular stands, while efficient and scalable, are limited by the constraints of prefabricated structures. They are typically used when cost-efficiency, fast setup, or portability is prioritized, especially across multi-city exhibitions. In contrast, bespoke stands allow unrestricted architectural and thematic innovation, supporting bold aesthetics, premium materials, and seamless integration of digital technologies such as LED walls, AR/VR experiences, touchscreens, and sensor-based interactions.

Furthermore, bespoke stands are not just about form, they are strategically designed to enhance functionality and visitor flow, ensuring that key messaging, product zones, and interaction points are precisely placed to influence visitor behaviour and maximize impact. These stands also offer advanced branding opportunities through custom lighting, suspended structures, large-format graphics, and branded furniture, creating a holistic environment that reinforces brand memory.

In essence, bespoke stands are purpose-built experiences, not just displays. They are best suited for flagship events, international trade fairs, and high-visibility exhibitions where the brand needs to stand apart, command attention, and deliver a high-touch visitor journey. While they may require a higher investment compared to modular systems, their ability to differentiate, impress, and engage often makes them the preferred choice for businesses aiming to make a bold, lasting impression.

Comparative advantage: Analysis of key factors that set bespoke exhibitions apart from modular stands

- **Complete Customization & Creative Control**

Bespoke exhibition stands offer total design freedom, enabling brands to craft a unique layout, select premium materials, and incorporate creative structural elements that reflect their distinct identity. Unlike modular systems that rely on predefined parts and templates, bespoke stands are built from scratch. This allows companies to align the space with their exact marketing objectives, storytelling approach, and visitor experience strategy, without structural limitations.

- **Superior Brand Impact & Differentiation**

In a competitive exhibition environment, standing out visually is crucial. Bespoke stands are inherently one-of-a-kind and can be designed to make a strong visual statement. Their originality enhances brand recall, draws attention from visitors, and often becomes a talking point within the event. This is especially important for first impressions at major trade shows, where being visually distinctive helps a brand establish authority and memorability.

- **Premium Quality & Aesthetic Appeal**

Bespoke stands typically utilize high-end finishes, custom-built furniture, and specialized lighting to elevate the overall look and feel. This premium aesthetic positions the brand as professional, high-value, and forward-thinking. The attention to detail in craftsmanship, combined with quality materials, creates a polished environment that resonates with both customers and partners.

- **Integrated Experiences & Advanced Technology**

Custom-built stands are ideal for integrating experiential and interactive elements such as LED walls, product demo zones, motion sensors, touchscreens, augmented reality (AR), or virtual reality (VR). These features allow brands to engage visitors on a deeper level, offering not just information but memorable experiences. Modular stands often lack the space or design flexibility to support such complex integrations.

- **Optimized Space Utilization & Event-Specific Design**

Because bespoke stands are tailored to the exact specifications of the booth space and the goals of the exhibition, they maximize the utility of every square foot. Designers can factor in traffic flow, focal zones, product display areas, and hospitality corners, ensuring functionality and comfort. This level of spatial optimization is difficult to achieve with modular components, which must adapt to various spaces without always fitting perfectly.

Some of the factors that play a part in deciding the type of exhibition stand - bespoke/modular

Factor	Modular Stands	Bespoke Stands
Budget	Modular stands are cost-effective and ideal for exhibitors with tight budgets. They are reusable across multiple shows, which helps amortize costs over time.	Bespoke stands usually involve a higher upfront investment due to their custom-built nature, premium materials, and unique design elements. However, they deliver a stronger brand impression.

Factor	Modular Stands	Bespoke Stands
Frequency of Use	Ideal for businesses that exhibit frequently across different locations. The reusability of components helps maintain consistency while saving on setup costs.	Better suited for one-time, high-stakes events like product launches or global expos, where maximum impact and personalization are more important than reusability.
Space Flexibility	Modular systems are highly adaptable and can be configured to fit varying booth sizes and layouts, which is useful for brands participating in different-sized shows.	Bespoke stands are designed for a specific space and layout. While they can sometimes be adapted, they are generally not built with flexible reuse in mind.
Customization Potential	Offers limited customization in terms of layout and branding. Options are generally restricted to graphic panels, lighting, and accessories.	Provides complete creative freedom. Every aspect—from structure and layout to materials, finishes, lighting, and tech—can be customized to align with brand identity.
Sustainability	Environmentally friendly as components are reused across events. Many modular systems are made with recyclable or sustainable materials.	Can be sustainable if planned for reuse or repurposing. However, many bespoke stands are single-use, raising concerns about waste and resource usage.
Lead Time & Planning	Shorter production and installation timelines. Modular kits can often be shipped and installed within days.	Requires significant planning, design, fabrication, and coordination. Lead times are longer, typically several weeks to a few months, depending on complexity.
Technology Integration	Limited capability to incorporate complex tech features. Best suited for basic digital displays and lighting.	Allows full integration of interactive tech like touchscreens, AR/VR, dynamic lighting, and immersive environments to enhance visitor engagement.
Logistics & Storage	Lightweight, compact, and easy to pack and transport. Storage costs are low, and the system is easy to reassemble.	Bulkier and heavier, requiring careful handling and sometimes special packaging. Storage can be costlier and reinstallation may need expert support.
Compliance & Regulations	Generally pre-engineered to comply with exhibition norms and safety standards, reducing risk of onsite issues.	May require individual certification, safety checks, or structural approvals due to custom build and unique materials or features.
Post-Event Use	Designed specifically for exhibitions, though some parts can be reused for other marketing setups.	Can be repurposed for showrooms, product demo zones, or brand activations if designed thoughtfully, thus extending its lifecycle beyond a single event.

Use Cases and Core Components of Bespoke Exhibition Stand:

Bespoke exhibition stands are particularly well-suited for high-impact scenarios where creating a lasting impression is critical. They are ideal for international trade fairs, where standout design and scale help a brand command attention amid intense competition. For product launches or brand debuts, bespoke stands offer immersive storytelling and controlled reveal moments that align with the innovation being showcased. Luxury brands also favour bespoke formats for their ability to incorporate premium materials and elegant detailing that reflect brand prestige. In industry-specific exhibitions like tech, automotive, or real estate, such stands enable highly tailored environments that highlight technical strengths and engage key decision-makers. Additionally, bespoke stands are effective in building interactive experience zones with AR/VR, live demos, or gamified content, driving deeper audience engagement and increased dwell time.

Core Components:

- **Custom Framework & Structure**

The foundation of any bespoke stand is its unique structural build, tailored in form and scale. Constructed using a mix of materials such as metal, wood, or composite panels, these frameworks enable dynamic layouts, double-decker platforms, suspended elements, and large open zones not feasible with modular systems.

- **Cladding & Finishes**

High-end surface treatments using laminated panels, acrylic sheets, glass, and textiles are applied to cover the structure. These finishes elevate aesthetics and often reflect the brand's theme, incorporating textures, colours, or branding elements seamlessly into the architecture.

- **Graphics & Branding Integration**

Instead of being add-ons, graphics are fully embedded within the stand design. From seamless fabric prints and 3D logos to LED-lit visuals and floor-to-ceiling displays, every surface can be used to tell a compelling brand story. These designs are high-resolution and often customized for each event.

- **Technology & Interactive Features**

Cutting-edge tech is a hallmark of bespoke stands. Integrated LED walls, touchscreen interfaces, virtual/augmented reality zones, or digital product configurators help brands engage visitors more deeply. These systems are pre-planned and embedded within the structure for a polished, uncluttered experience.

- **Lighting & Atmosphere**

Intelligent lighting design helps define focal points, enhance product displays, and shape ambiance. Spotlights, LED strips, ambient ceiling lights, and colour-tunable systems are all strategically placed to create immersive zones and drive emotional impact.

- **Furniture & Fixtures**

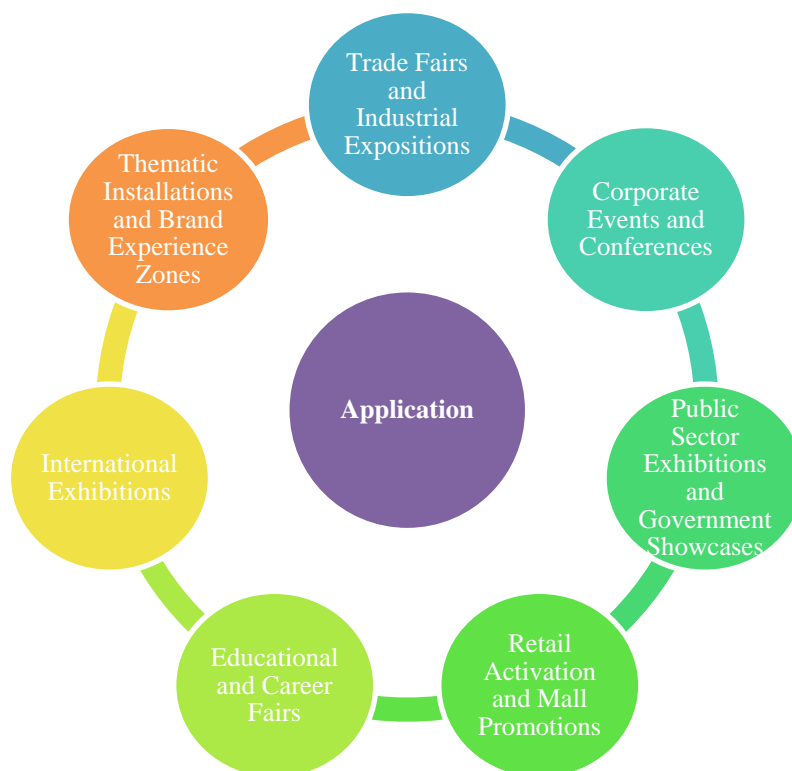

Custom-made counters, demo units, storage spaces, and seating areas are integrated into the design. These not only match the stand's aesthetics but also serve functional roles—be it for client meetings, hospitality, or showcasing physical products.

- **Utility & Infrastructure Integration**

Behind the scenes, bespoke stands incorporate hidden electrical wiring, Wi-Fi setups, ventilation, AV systems, and even private meeting pods. These features are seamlessly integrated to ensure comfort, convenience, and operational readiness during multi-day events.

Application Landscape: Major Use Cases (Both Modular and Bespoke Exhibition Stand)

Both modular and bespoke exhibition stands have carved a niche in India's expanding MICE (Meetings, Incentives, Conferences, and Exhibitions) ecosystem. While modular stands offer flexibility, cost efficiency, and ease of transport and reuse, bespoke stands are designed for high-impact, immersive brand storytelling, often with a one-time use for maximum visual and experiential value. The choice between the two depends on the event format, brand positioning, frequency of participation, and nature of audience engagement required. Below is a breakdown of how each stand type is used across major event categories:

- **Trade Fairs and Industrial Expositions:**

These are some of the most prominent platforms for B2B networking, product showcasing, and industry positioning.

Modular exhibition stands are widely favoured by mid-sized companies and recurring participants who attend multiple trade fairs annually. Their standardized design, ease of transport, and reusability across shows offer logistical and cost advantages. Exhibitors can adapt the layout to fit varying booth sizes while retaining consistent branding.

Bespoke stands, in contrast, are preferred for one-time high-visibility participation or when brands want to launch a flagship product or assert leadership. These are fully customized structures built to impress, often incorporating thematic architecture, complex installations, and high-end finishes.

Example:

At events like Plast India or IMTEX, a machinery manufacturer may use a modular setup with defined demo zones and branding panels, allowing flexible space allocation for equipment. Meanwhile, companies like Bosch or Tata Motors often opt for bespoke stands with two-story constructions, meeting lounges, LED display walls, and interactive digital content to elevate their visibility and create immersive product storytelling.

- **Corporate Events and Conferences**

Corporate events range from internal gatherings like AGMs and townhalls to external platforms like leadership summits and investor meets.

Modular stands are typically used for standardized corporate booths, registration areas, branding backdrops, or product demo pods that need to be replicated across multiple locations. Their clean, professional look aligns well with formal events and can be quickly assembled and disassembled.

Bespoke stands are employed during large-scale product launches, milestone anniversaries, or investor roadshows where high production value and brand storytelling are paramount. These stands often involve integrated AV technology, multi-sensory experiences, and dramatic lighting design.

Example:

During the Infosys Confluence, modular demo counters are deployed for product showcases, while mobile info desks are used across breakout sessions. Conversely, HCL Technologies created a bespoke “Innovation Hub” at a global digital summit, featuring custom projection mapping, immersive tunnels, and branded interactive zones.

- **Public Sector Exhibitions and Government Showcases**

Governments and public sector bodies frequently participate in trade fairs and expos to raise awareness, present developmental initiatives, or attract investments.

Modular stands are a logical choice for ministries and departments that appear across multiple events, as they offer design uniformity, budget control, and scalability. These are used to display policy information, success metrics, or infographics in a clean and approachable layout.

Bespoke pavilions, however, are often used for high-stakes platforms like global investment summits or national missions, where the goal is to present India’s development story or technological leadership in an inspiring format.

Example:

At the India International Trade Fair (IITF), departments like Skill India use modular stalls with branding panels and digital kiosks. But for events like Pravasi Bhartiya Divas or G20 India 2023, bespoke government pavilions were created with LED tunnels, immersive projection domes, and thematic spatial design representing “Digital India” or “Startup India.”

- **Retail Activation and Mall Promotions**

These are high-footfall environments where consumers can be directly engaged through brand experiences, samples, or trial zones.

Modular retail booths are used by FMCG and D2C brands looking to activate campaigns across multiple malls or public spaces. These are easy to install, reusable, and comply with mall guidelines.

Bespoke setups are used for luxury brands or high-value products where aesthetic sophistication, immersive displays, and material finishes are critical in creating aspirational value.

Example:

Himalaya Wellness uses modular kiosks with branding and product testers for campaigns in malls like Phoenix Market city. In contrast, Dyson creates fully bespoke experiential pods with premium lighting, engineered flooring, and curated demo experiences to promote its vacuum cleaners and air purifiers.

- **Educational and Career Fairs**

These events are aimed at student engagement, university branding, and course promotion.

Modular stands are the go-to option for universities, coaching institutes, and ed-tech firms participating in multi-city events, allowing consistency, ease of logistics, and cost-effectiveness.

Bespoke stands come into play when institutions want to stand out or when international schools participate in major expos targeting Indian students and parents. These stands offer advanced digital integration and a more visually striking presentation.

Example:

At the IDP Global Education Fair, modular setups by institutions like University of Melbourne include info counters, banners, and LCDs. On the other hand, Ashoka University might employ a bespoke stand with wood-grain panels, 3D campus models, and an audio-visual storytelling zone for a differentiated experience.

- **International Exhibitions**

These include prestigious overseas platforms where companies aim to establish global presence or forge new export linkages.

Modular stands are used by MSMEs and startups participating in shared pavilions, often facilitated by FIEO, ITPO, or APEDA. These are shipped as knock-down units or rented locally abroad to cut costs. Bespoke stands are typically developed by large Indian exporters or multinational subsidiaries when representing their brand at flagship international events like CES, Gulfood, or Hannover Messe.

Example:

At Gulfood (Dubai), a group of small spice exporters from Kerala used modular booths coordinated under the “India Pavilion” umbrella. Meanwhile, Mahindra Electric showcased a bespoke stand at Hannover Messe, featuring immersive driving simulators, curved LED screens, and digitally controlled lighting to reflect its R&D excellence.

- **Thematic Installations and Brand Experience Zones**

These are brand-led, thematic spaces often found in festivals, pop-ups, or public campaigns, designed for deep engagement, storytelling, or live experience.

Modular formats are used when the campaign is short-term, multi-location, or mobile, offering practical setup and mobility.

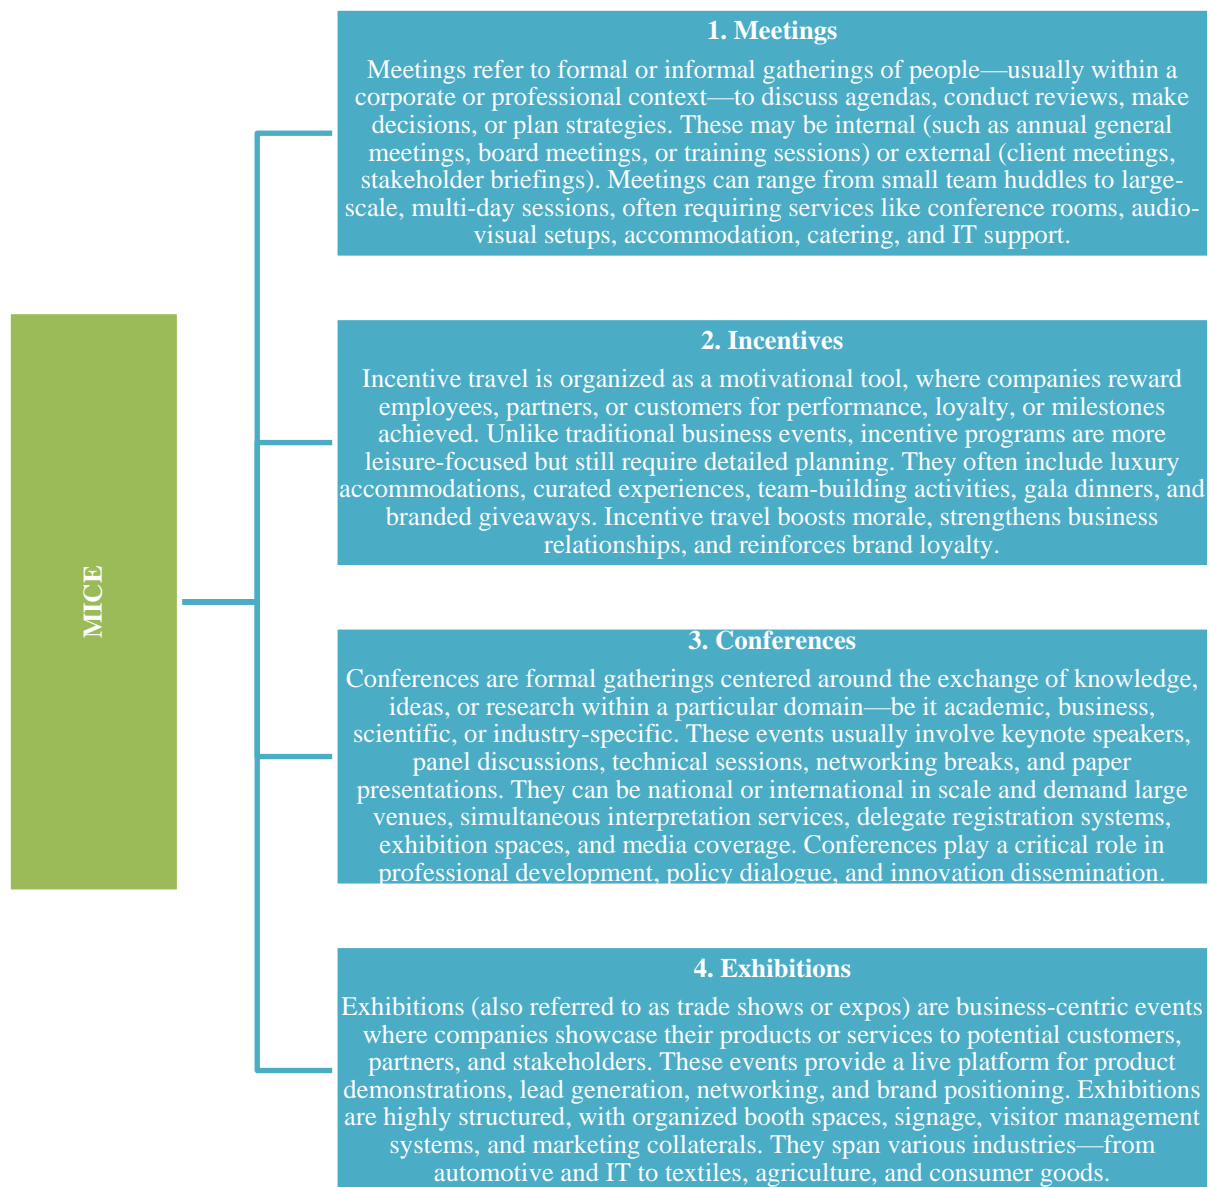

Bespoke installations are built when a brand wants to create a dramatic, one-of-a-kind space that communicates identity, vision, or innovation, often involving sensory, architectural, or artistic elements.

Example:

Zoho used modular booths during its BTL activation across tech parks, with reusable branding frames and demo counters. In contrast, **Maruti Suzuki’s “Driving Experience Zone”** at the Auto Carnival featured a bespoke, tunnel-style installation with motion simulators, layered audio-visual content, and interactive displays, aiming to create an emotional connection with visitors.

Global MICE (Meetings, Incentives, Conferences & Exhibitions) Industry**Understanding MICE: Meetings, Incentives, Conferences & Exhibitions**

The MICE industry—an acronym for Meetings, Incentives, Conferences, and Exhibitions—is a significant segment of the global tourism and business travel ecosystem. It involves the planning, coordination, and execution of large-scale professional gatherings that serve various corporate, institutional, and government objectives. MICE events are typically high-value and contribute substantially to the hospitality, travel, event management, and tourism sectors in terms of revenue, employment, and infrastructure development.

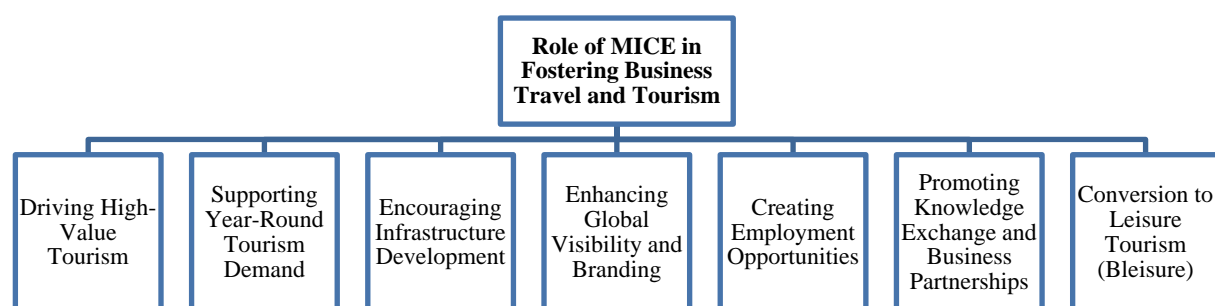

Role of MICE in Fostering Business Travel and Tourism

The MICE (Meetings, Incentives, Conferences, and Exhibitions) sector plays a pivotal role in boosting business travel by creating structured opportunities for professionals to network, collaborate, and explore new markets. It drives corporate mobility by encouraging participation in industry-specific events, trade shows, and knowledge forums, often leading to partnerships, investments, and cross-border trade. As organizations increasingly globalize, MICE activities facilitate face-to-face engagement that supports deal-making and strategic growth.

From a tourism perspective, MICE enhances a destination's appeal by attracting high-spending travelers who demand quality infrastructure, hospitality, and services. These events often convert into extended leisure trips, boosting local tourism ecosystems. Additionally, MICE encourages year-round travel demand, reducing seasonal fluctuations and promoting consistent revenue streams for hotels, transport providers, and service industries. This dual impact makes MICE a vital catalyst for both business expansion and sustainable tourism development.

The MICE industry contributes significantly to the economy, not just through direct revenue but by stimulating various support sectors and enhancing the destination's brand value. Its role includes:

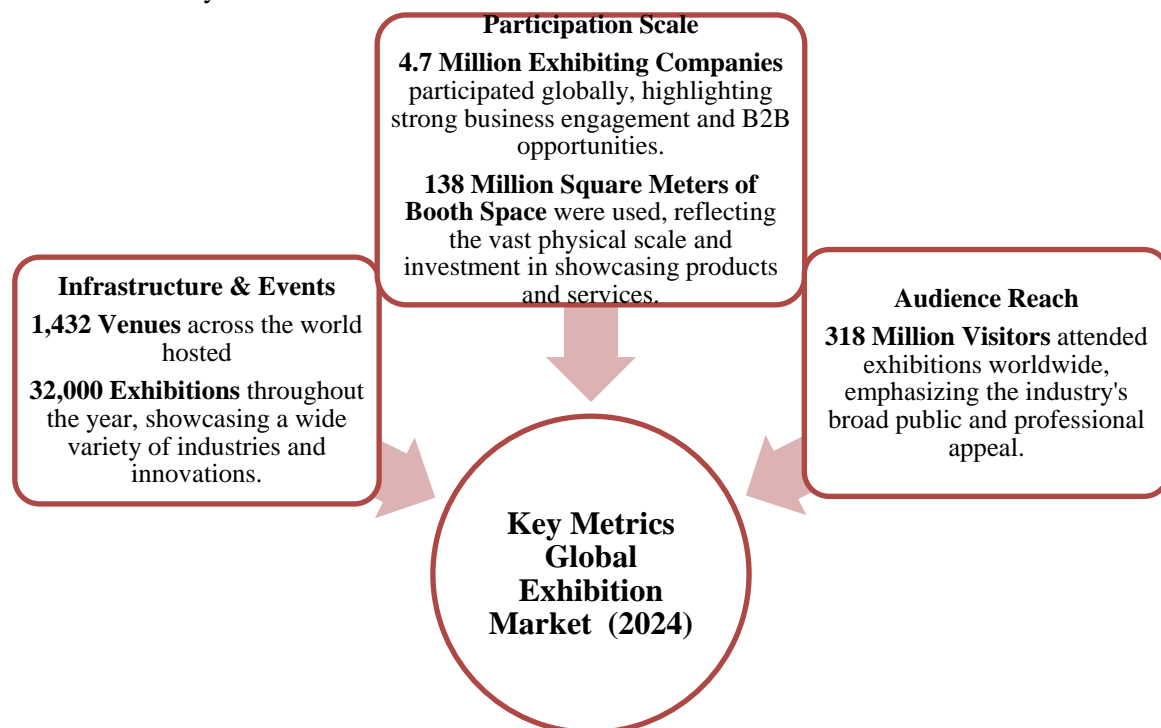

- a) **Driving High-Value Tourism:** MICE travelers represent a high-spending segment within the tourism industry. Unlike typical leisure tourists, they often stay in premium hotels, use private transportation, dine at upscale restaurants, and avail themselves of customized services. Globally, it is observed that MICE delegates spend two to three times more per day than leisure tourists. This higher per capita expenditure significantly boosts the local economy by increasing foreign exchange earnings, enhancing revenue for local businesses, and generating greater tax collections for municipal and national authorities.
- b) **Supporting Year-Round Tourism Demand:** Leisure tourism is often seasonal, peaking during holidays and vacation periods, which leads to fluctuations in demand and employment. MICE tourism, on the other hand, occurs throughout the year, with events organized across different sectors and timelines. This consistent flow helps service providers such as hotels, restaurants, and transportation companies maintain stable operations and income. It also enables more predictable employment patterns in tourism related sectors, supporting full-time and long-term jobs rather than seasonal or temporary work.
- c) **Encouraging Infrastructure Development:** To attract international MICE events, cities and countries must invest in world-class infrastructure. This includes expanding airport capacity, building or upgrading metro systems, enhancing road networks, and developing large-scale convention and exhibition centers. These developments improve not only the experience for event attendees but also the overall quality of life for residents. A prime example is the Yashobhoomi (India International Convention Centre) in Delhi, which has spurred local infrastructure upgrades and positioned India as a competitive destination in the global MICE landscape.
- d) **Enhancing Global Visibility and Branding:** Hosting global MICE events significantly enhances the host city or country's international profile. These events attract delegates from across the world, including industry leaders, policymakers, media personnel, and influencers. As a result, the destination receives valuable media coverage and social media attention, helping build its image as a modern, investment-friendly, and culturally rich location. For instance, the G20 Summit held in India in 2023 not only showcased the country's hospitality and infrastructure but also served as a strategic platform to promote its tourism potential to global stakeholders.
- e) **Creating Employment Opportunities:** The MICE industry creates a wide range of job opportunities across both formal and informal sectors. Direct employment arises in event management, catering, hospitality, audio-visual services, logistics, and venue operations. Indirect employment is generated in supporting areas like transportation, printing, merchandising, decor, and cultural entertainment. Additionally, MICE events offer business for MSMEs that provide local excursions, handicrafts, or performances, thus broadening economic participation and supporting inclusive growth in the tourism ecosystem.

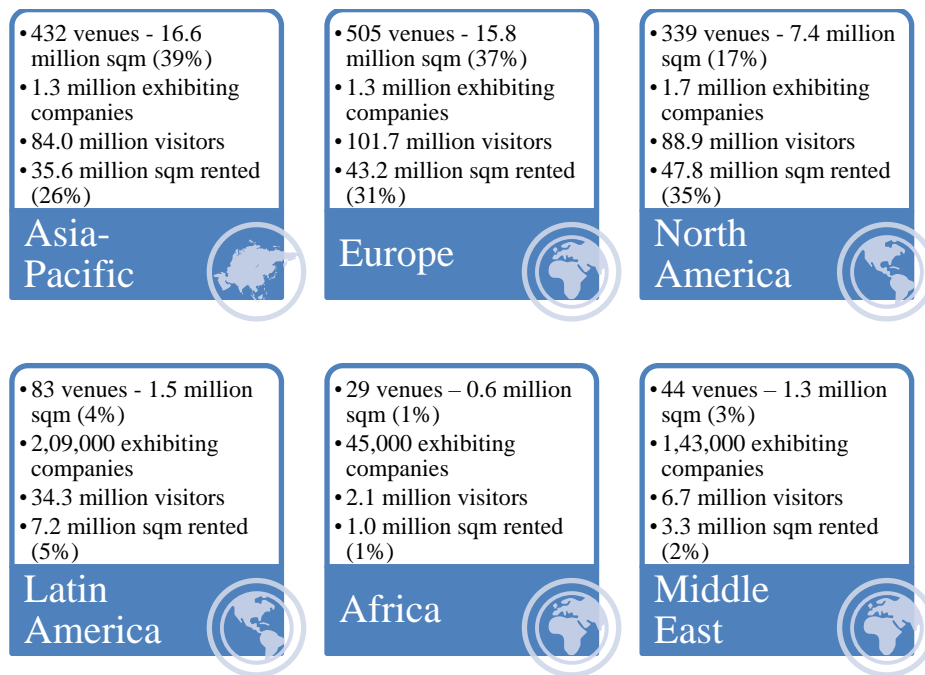

- f) **Promoting Knowledge Exchange and Business Partnerships:** MICE events serve as powerful platforms for networking, collaboration, and innovation. Conferences, exhibitions, and forums bring together participants from business, government, academia, and civil society to discuss emerging trends, policy frameworks, and new technologies. These events often lead to strategic partnerships, investment deals, and cross-border business opportunities. For example, India Energy Week provided a platform for domestic and international energy companies to collaborate on clean energy initiatives and future-ready infrastructure, reflecting how MICE fosters sectoral advancement.
- g) **Conversion to Leisure Tourism (Bleisure):** An increasing number of MICE travelers are extending their business trips to include leisure experiences, a trend known as “bleisure.” Delegates may stay longer to explore the host city’s culture, heritage, or tourist attractions, sometimes accompanied by family members. This behavior not only increases their length of stay and overall spending but also creates lasting impressions that may encourage repeat visits as leisure tourists. Bleisure travel thus reinforces the host city’s tourism cycle, creating long-term value beyond the duration of the business event.

Estimated Total Number of In-Person Meetings & Spread across Key Geographies

In-person meetings have long been a cornerstone of global business, diplomacy, and professional collaboration, serving as vital platforms for trust-building, strategic decision-making, and relationship development. Despite the rise of virtual communication tools, physical meetings offer unparalleled value through face-to-face engagement, non-verbal communication, and spontaneous interactions that foster deeper connections and more effective negotiations. In sectors such as trade, healthcare, technology, and policymaking, in-person gatherings often catalyze innovation, partnerships, and investment. The global return to physical meetings reflects both the limitations of digital-only engagement and the enduring human preference for tactile, immersive experiences. Moreover, as economies continue to stabilize post-pandemic, in-person meetings are being increasingly recognized not just as operational necessities, but as strategic assets that drive organizational resilience, global networking, and regional cooperation in a more interconnected world.

Analysis of Key Factors Driving the Global MICE Industry

Key Factors Driving the Global MICE (Meetings, Incentives, Conferences & Exhibitions) Industry

The MICE industry has become an integral part of global economic and business ecosystems, driven by several key structural and strategic factors. These drivers vary by region but collectively contribute to the steady expansion and evolution of MICE markets around the world.

- **Globalization and Expansion of Business Networks**

In an increasingly interconnected global economy, businesses, governments, and institutions rely on MICE platforms to foster cross-border relationships, enter new markets, and promote international trade. Conferences and exhibitions allow companies to showcase innovations, network with global peers, and engage with buyers and investors.

International trade expos and summits act as key entry points for global business.

Corporate incentive programs are used to strengthen distribution networks and sales teams worldwide.

- **Supportive Government Policies and Strategic Promotion:**

Many governments recognize MICE as a high-value tourism and investment generator. As a result, they actively support the development of the sector through targeted policy frameworks, infrastructure incentives, and promotional campaigns.

Countries like **Singapore, UAE, Thailand, and South Korea** have established national MICE bureaus and offer bidding support, financial subsidies, and streamlined event approvals.

In India, the Ministry of Tourism launched the “**Meet in India**” initiative to promote Indian cities as world-class MICE destinations and develop city-level MICE promotion bureaus.

- **Investment in Infrastructure and Venues**

Modern, well-equipped venues are critical to hosting large-scale meetings and exhibitions. The global growth of the MICE sector is supported by ongoing investments in:

Convention and exhibition centres, often integrated with nearby hotels and transport hubs

Airport and rail connectivity for efficient access

Digital infrastructure (Wi-Fi, AV tech, hybrid capabilities) for enhanced delegate experience

Cities such as **Las Vegas, Barcelona, Singapore, and Dubai** have emerged as global leaders due to their world-class infrastructure and capacity to host mega-events.

Key Growth Drivers for the MICE Industry in India

India's MICE (Meetings, Incentives, Conferences, and Exhibitions) industry is gaining strong momentum, supported by a combination of **policy interventions**, **infrastructure investments**, **economic expansion**, and **digital transformation**. These growth enablers align with the country's broader objectives of promoting high-value tourism, enhancing international competitiveness, and fostering balanced regional development. The key drivers shaping India's MICE trajectory are elaborated below:

- **Government Policy & Institutional Support:**

Policy-level interventions have played a foundational role in formalizing and promoting the MICE industry in India. The **National Strategy for MICE (2022)**, released by the Ministry of Tourism, lays out a structured roadmap to establish India as a globally competitive MICE destination. It advocates for cohesive branding, capacity building, global outreach, and regional development.

As a part of this initiative, the **“Meet in India” campaign** was launched to unify promotional efforts across states and stakeholders. The campaign focuses on:

- ❖ Positioning India as a preferred destination for international conferences and exhibitions
- ❖ Showcasing India's regional diversity through localized MICE offerings
- ❖ Creating a collaborative platform for government bodies, tourism boards, and industry associations

Additionally, the central and state governments are extending **financial and non-financial incentives** to support event organizers. These include:

- ❖ **Bid support** for international events
- ❖ **Single-window clearance mechanisms** to streamline permissions
- ❖ **Venue and marketing subsidies** to attract marquee conferences and exhibitions

This institutional backing is creating a stable and enabling environment for large-scale MICE investments and event hosting.

- **Infrastructure Development:**

India has made significant strides in physical infrastructure, which is vital to hosting large-scale, multi-day, and international MICE events. The past decade has seen rapid enhancement in the following areas:

- ❖ Over **1.5 lakh kilometers of roadways**, improving inter-city and intra-city connectivity
- ❖ More than **150 operational airports**, including international terminals in Tier II and III cities
- ❖ **New railway terminals and semi-high-speed train corridors**, offering efficient mobility for delegates
- ❖ A growing **hospitality base**, with **approximately 2.48 million hotel rooms** ranging from luxury to business-class and budget accommodations

Noteworthy **MICE venues** include:

- ❖ **Yashobhoomi (India International Convention Centre), Delhi** – One of the largest modern MICE facilities in Asia
- ❖ **Hyderabad International Convention Centre (HICC)** – A key venue for pharmaceutical and IT-based conventions
- ❖ Newly developed or upgraded convention centers in **Kochi, Khajuraho, Varanasi, and Bhubaneswar**, catering to regional and spiritual tourism-based MICE

The combined impact of these developments is significantly improving India's capability to host domestic and international events across diverse sectors.

- **Economic Growth and Sectoral Demand**

India's robust economic growth, supported by its status as the world's fastest-growing major economy, is fostering increased demand for professional events and business gatherings. This has led to a rise in:

- ❖ **Industry-specific conferences**, such as those focused on pharmaceuticals, defence, aerospace, green energy, education, and financial technologies
- ❖ **Training seminars and corporate retreats** across urban and destination locations
- ❖ **B2B networking platforms**, exhibitions, and trade fairs aimed at MSMEs and start-up's

The increasing complexity and globalization of Indian enterprises are encouraging greater participation in industry forums, knowledge-sharing platforms, and global trade shows hosted within the country.

Start-up's, especially those supported by initiatives like **Start-ups India** and **Make in India**, are also contributing to the growth of regional events, showcasing innovations and creating demand for affordable, scalable exhibition infrastructure.

- **Hosting of Global Events and International Visibility:**

India's successful hosting of **high-profile international events** has significantly elevated its global standing in the MICE domain. Notably, India's **G20 Presidency in 2023**, which included over **200 meetings held across 60 Indian cities**, showcased the country's ability to manage large, decentralized, and protocol-driven events. This unprecedented exposure helped:

- ❖ Strengthen India's image as a credible and logistically capable host
- ❖ Promote lesser-known cities as viable venues for international business gatherings
- ❖ Create global awareness about India's event infrastructure, security standards, and hospitality

Additionally, India's consistent presence at **global exhibitions and trade forums** such as **ITB Berlin, Arabian Travel Market, and World Economic Forum (Davos)** is reinforcing its appeal as both an event host and originator.

- **Digital and Hybrid Capabilities**

The COVID-19 pandemic accelerated the integration of **digital technologies** into event planning and execution. India has emerged as a strong adopter of **hybrid event models**, enabling events to be simultaneously hosted **onsite and online**, thereby expanding their reach and improving delegate convenience.

- ❖ Digital enablers that have become integral to MICE events include:
- ❖ **Online registration and delegate management platforms**
- ❖ **Live-streaming and video-on-demand solutions**
- ❖ **AI-driven attendee engagement tools** and personalized content
- ❖ **Virtual exhibition booths** and **interactive AR/VR experiences**

This transformation is especially beneficial for mid-sized conferences, industry meets, and regional expos, which can now operate more cost-effectively and inclusively.

- **State-Level Initiatives and Regional MICE Promotion**

Several Indian states are proactively supporting the MICE ecosystem through their own tourism and trade policies. These states are:

- ❖ Developing **dedicated MICE strategies**
- ❖ Investing in **state-of-the-art convention infrastructure**
- ❖ Providing **subsidies or land allotments** for private sector MICE venue operators
- ❖ Actively **bidding for international events**

For example:

- ❖ **Rajasthan** has positioned itself as a vibrant MICE destination by leveraging its heritage tourism and building convention centers in Jaipur and Udaipur.
- ❖ **Gujarat** has integrated MICE development with industrial corridors and the Gujarat International Finance Tec-City (GIFT City).
- ❖ **Kerala, Tamil Nadu, and Uttar Pradesh** are promoting event tourism in alignment with spiritual circuits and wellness themes.

These regional efforts are diversifying the MICE footprint beyond metro cities, creating a more **inclusive and geographically balanced industry landscape**.

Expected Growth of the MICE Industry in India

India's MICE industry is on a strong growth trajectory, with a projected CAGR of 13% between CY 2024 and CY 2030, as highlighted at the 2025 Meet in India Conclave. This momentum is supported by a blend of macroeconomic stability, increased business travel, and government-backed initiatives aimed at enhancing the country's competitiveness as a global MICE destination. The rise of India-based global enterprises and its active participation in international forums have led to a greater influx of high-profile events and summits across the country.

Complementing this growth are significant improvements in supporting infrastructure—such as upgraded transport networks, modernized venues, and integrated digital services—which are enabling seamless event execution. Competitive pricing, paired with India's cultural richness and expanding hospitality sector, is making it an attractive destination for blended travel experiences. As MICE

organizers increasingly prioritize value, scale, and immersive experiences, India is well-positioned to meet evolving demands and emerge as a key player in the global MICE landscape.

Projected Growth of India's MICE Market (2024–2030):

Source: Ministry of Tourism, Government of India, Federation of Indian Chambers of Commerce & Industry (FICCI)

India's MICE market generated a revenue of USD 49.4 billion in CY 2024 and is projected to more than double (103.7 billion) by CY 2030, driven by the rapid emergence of new MICE-ready destinations such as Varanasi, Khajuraho, and Kochi. These cities are being actively developed to cater to the growing demand for culturally rich yet professionally equipped venues. Over the past decade, India has witnessed remarkable infrastructure advancements, including the construction of over 1,50,000 km of roads, modernization of railway stations, introduction of semi high-speed trains, development of inland waterways, expansion to more than 150 operational airports, and a hotel inventory exceeding 2.48 million rooms. India's successful hosting of G20 meetings further demonstrated the country's expanding venue capabilities and highlighted the potential of regional cities in supporting international business tourism.

Key Growth Drivers:

- **Expansion Beyond Metro Cities:**

Emerging destinations such as **Varanasi, Khajuraho, Kochi, Bhubaneswar, and Indore** are being positioned as **MICE-ready cities**, supported by new convention centers, tourism circuits, and improved air/rail connectivity.

- **Surge in Domestic Corporate Events**

Indian companies are increasingly organizing **domestic conferences, offsites, training programs, and incentive tours**, especially as business travel rebounds post-pandemic. This trend is encouraging investment in mid-sized venues and regional event services.

- **Redirection of Outbound MICE**

India has traditionally witnessed significant outbound MICE travel to destinations like Dubai, Thailand, and Singapore. There is now a focused effort to **retain this segment** by offering **competitive facilities and value-driven domestic alternatives**, reducing forex outflow.

- **Rise in Private Sector Investment**

Private players are investing in **large-scale convention facilities, integrated hotel-event zones, and event-tech platforms** that enable seamless delegate experience—from booking to feedback analytics. Examples include multi-city venue chains and digital registration software providers.

Key Threats and Challenges Facing the MICE Industry in India

The Meetings, Incentives, Conferences, and Exhibitions (MICE) sector in India, while steadily gaining prominence, continues to grapple with several structural and operational challenges. These issues collectively restrict the country’s ability to emerge as a globally competitive MICE destination, despite its inherent advantages in terms of cultural diversity, economic growth, and business potential.

1) Intensifying Regional Competition:

India operates in a highly competitive regional environment for MICE tourism. Countries such as Singapore, Thailand, the UAE, China, and Malaysia have already positioned themselves as leading MICE destinations. These countries benefit from advanced infrastructure, proactive government policies, focused MICE bureaus, and strong global brand recognition. Compared to these, India is yet to reach a comparable level of visibility and global perception. While India has made improvements in ease of doing business and connectivity, it lags in terms of international association rankings (ranked 28th globally in ICCA rankings as of 2019), and its cities remain underrepresented in global MICE event listings.

2) Concerns Around Safety and Security Perception

The perception of India as a safe and secure destination for international travelers remains a challenge. While sporadic incidents may not reflect the general environment, they adversely impact India's attractiveness in the international MICE segment. As per the National Strategy for MICE Industry (2022), India ranked 122nd on the global safety and security index. This affects the confidence of international organizations and delegates in choosing India as a preferred location for hosting major events.

3) Absence of Institutional Support Structures

A critical gap in India's MICE ecosystem is the lack of dedicated and professionally managed city-level convention bureaus. Globally, such bureaus play a vital role in bidding for events, facilitating coordination between stakeholders, and positioning cities as MICE-ready. In India, efforts remain fragmented, and bidding responsibilities fall largely on private organizers without institutional support. The absence of a national bid-support mechanism and lack of data-driven strategies further impede India's ability to attract international conventions.

4) High Taxation and Limited Incentives

The Indian MICE sector continues to be burdened by a high tax structure, especially GST on hotels and event-related services. While countries competing for international events often offer subsidies, cost rebates, and infrastructure status benefits to convention centers and hotels, similar support mechanisms are largely absent in India. Although the National Strategy recommends granting 'Industry' and 'Infrastructure' status to MICE facilities to improve financing options, these are yet to be widely implemented at the state level.

5) Fragmentation and Lack of Standardisation

Another persistent challenge is the fragmented nature of the industry and the lack of standardisation in service quality across stakeholders—ranging from venue providers and decorators to event managers and transport services. International MICE events require a high degree of professionalism, technological integration, and seamless service delivery across all touchpoints. In the absence of certified training programs and minimum quality benchmarks, India's MICE ecosystem struggles to meet global expectations consistently.

6) Inadequate Information and Event Intelligence

India lacks a robust system for capturing, analyzing, and responding to opportunities related to global MICE events. Currently, there is no centralized platform or national bidding authority that tracks upcoming international events or provides support to Indian organizers in securing such opportunities. Consequently, individual Professional Convention Organisers (PCOs) must operate in silos, without broader institutional coordination or strategic backing. This often leads to missed opportunities and underrepresentation in global event portfolios.

7) Underdeveloped MICE Branding and Promotion

Despite India's rich cultural assets and improving infrastructure, it has not yet been successfully positioned as a leading MICE destination in global markets. The proposed "Meet in India" brand under the Incredible India initiative is a step in the right direction, but sustained promotional efforts, global roadshows, partnership programs with Indian missions abroad, and industry engagement are needed. Without aggressive outreach and brand-building campaigns, India's share of the global MICE market remains limited (under 1% as per the Ministry of Tourism).

Competitive Landscape

India's MICE industry is marked by growing competition among cities, private operators, and sectoral stakeholders vying to capture a larger share of the domestic and international event market. While metros like Delhi NCR, Mumbai, and Hyderabad remain dominant due to their established infrastructure, global air connectivity, and reputation, the entry of newer cities such as Kochi, Varanasi, and Bhubaneswar is intensifying regional competition. These emerging destinations are being promoted aggressively with state support, infrastructure investments, and targeted branding strategies, aiming to diversify India's MICE geography and reduce reliance on metro-centric events.

Among private stakeholders, competition is rising between leading hotel chains, event management firms, and venue operators to provide integrated, tech-enabled, and customizable solutions. Players are increasingly differentiating themselves through bundled service offerings, flexible venue formats, hybrid event capabilities, and destination-specific experiences. This shift reflects growing client expectations for seamless planning, innovative formats, and cost-efficiency—all of which are driving service-level competition across the value chain.

At the policy level, states are actively positioning themselves with individual MICE promotion boards, subsidies, and partnerships with international organizers. This inter-state rivalry is fostering innovation in marketing strategies, venue development, and incentive schemes, particularly among tourism-forward states like Gujarat, Rajasthan, Kerala, and Telangana. The result is a more fragmented but dynamic market, where competitiveness is no longer limited to infrastructure but extends to quality of service, operational agility, and global outreach.

Furthermore, global event organizers are increasingly exploring Indian destinations, compelling domestic players to elevate standards to meet international expectations. This is pushing competition towards specialization, with companies focusing on niche segments such as medical conferences, tech summits, or sustainability expos. As India integrates deeper into the global MICE ecosystem, the competitive landscape will continue to evolve, prioritizing scale, differentiation, and global alignment.

Key Factors Shaping Competition in the MICE Sector

Several interrelated factors determine the competitive dynamics of the MICE sector in India:

- **Venue Infrastructure and Capacity**

The availability of modern, purpose-built venues significantly influences a city's ability to attract and host large-scale events. India has around 25 specialized exhibition venues with limited geographical spread, mainly concentrated in Tier-I cities. A shortfall in large, multi-functional convention centers in Tier-II and Tier-III cities restricts decentralization of MICE activity.

- **Availability of Professional Services**

The presence of skilled Professional Convention Organisers (PCOs), Destination Management Companies (DMCs), and vendors offering turnkey services such as design, logistics, and technology support is critical. Locations with a robust ecosystem of reliable service providers are more likely to attract high-value MICE events, especially those with international participation.

- **Destination Branding and Global Visibility**

Global branding plays a pivotal role in the success of a MICE destination. Countries like Singapore and Thailand actively market themselves through targeted campaigns and partnerships. India's MICE branding initiatives are still in nascent stages, with the proposed "Meet in India" campaign yet to achieve global traction.

- **Cost Competitiveness and Incentives**

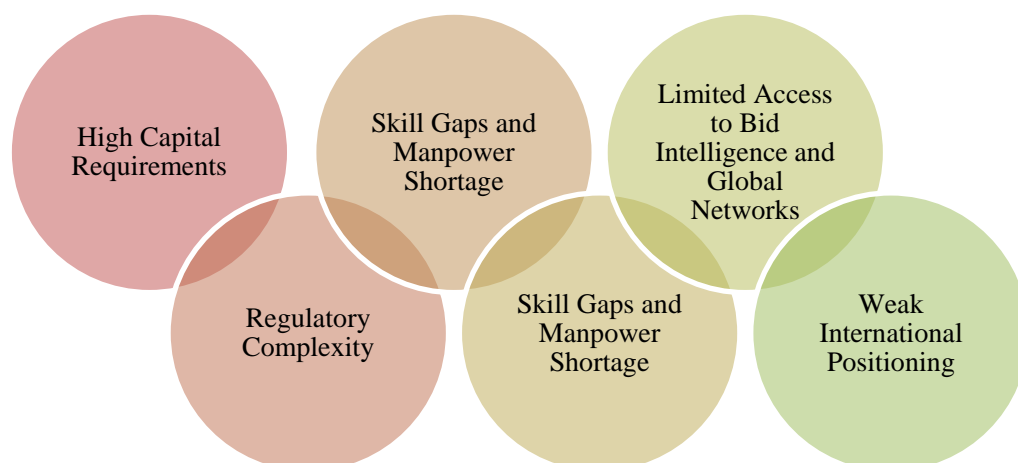

India's pricing advantage in terms of hospitality and logistics is often offset by high tax rates on event services and the lack of fiscal incentives for organisers. In contrast, competing nations often provide subsidies, tax benefits, or concessional infrastructure rates, making them more attractive for international event planners.

- **Institutional Coordination and Support**

Cities with established MICE bureaus that facilitate permissions, logistics, and bidding tend to attract more events. India's limited institutional support especially the absence of fully operational city-level convention bureaus reduces its ability to compete effectively in the international bidding ecosystem.

Entry Barriers and Other Influencing Factors

The Indian MICE industry presents multiple hurdles for new entrants, both domestic and international, which include the following:

- **High Capital Requirements**

Developing MICE-specific infrastructure such as convention centres or integrated event spaces involves substantial investment. The long gestation period and challenges in land acquisition, particularly in urban areas, deter new entrants without public-private support.

- **Regulatory Complexity**

Organising MICE events in India involves navigating through multiple layers of approvals and clearances from different authorities. In the absence of single-window clearance mechanisms, especially at the city level, the process remains time-consuming and uncertain.

- **Skill Gaps and Manpower Shortage**

There is a notable shortage of skilled professionals trained specifically for MICE services such as event operations, AV management, international client servicing, and safety compliance. This limits the ability of newer or regional players to scale effectively.

- **Limited Access to Bid Intelligence and Global Networks**

There is no centralised, government-supported mechanism to track and bid for international events. In many countries, convention bureaus actively pursue and support such bids; in India, these responsibilities are often left to individual PCOs with limited institutional backing.

- **Weak International Positioning**

India's relatively low ICCA ranking and minimal share in global MICE tourism hamper its visibility on the international event map. This reduces inbound opportunities and makes it harder for new entrants to establish a viable MICE business model solely focused on international clientele.

Our company “Propshop Events And Exhibitions Private Limited” was incorporated in 2019 by Prathamesh Pusalkar in Mumbai, India. It was later converted into a public limited company on 10.02.2025. As of today, we’ve grown into a full-fledged global enterprise, with strategic expansions marking our presence in key markets including India, Dubai, US, UK, Germany, and beyond.

We operate from our registered office located in Mumbai, Maharashtra which anchors our administrative and coordination activities, and two rented godown facilities located in Vasai, Maharashtra and Bengaluru, Karnataka, which serve as our base for storage, logistics, and fabrication support within and around the regions. To ensure smooth execution and logistics at event sites, we temporarily rent godowns or storage spaces at or near event locations as needed. This flexible infrastructure, combined with our PAN India presence and international operational ties, enables us to efficiently manage projects across geographies while maintaining control over execution and timelines.

Project Execution Methodology

We operate through a dual execution model consisting of outsourcing (subcontracting) and in-house project execution. This dual approach enables us to balance quality control, scalability, and cost efficiency across a wide spectrum of projects. In the outsourcing model, we follow a two-step process: Vendor Screening and Project Execution through selected external subcontractors, while in the in-house model, we carry out the entire project execution internally.

Detailed description of the step-by-step execution process is as follows:

Outsourcing (Subcontracting) model

1) Vendor Screening

i. Define Project Requirements

We start by clearly defining the project scope, objectives, timelines, deliverables, and key performance indicators. Based on the requirements, we determine the nature of outsourcing needed, whether it involves specific trades such as carpentry or painting, or the entire project execution.

ii. Identify Potential Vendors

Potential vendors are identified through industry referrals, online platforms, and professional directories. We shortlist candidates based on their relevant experience, range of services offered, pricing structures, and demonstrated quality standards.

iii. Pre-Screening Checklist

A thorough evaluation is conducted covering regulatory compliance documents such as GST and PAN registrations, financial stability through analysis of recent financial statements, relevant project experience, workforce capacity, and the availability of necessary infrastructure and technology.

iv. Request for Proposal (RFP)/ Request for Quotation (RFQ)

Shortlisted vendors receive detailed RFPs or RFQs outlining the project scope, pricing expectations, and deadlines for submission. This enables them to submit comprehensive proposals tailored to our requirements.

v. Evaluate Proposals

Submitted proposals are carefully reviewed for technical competence, cost-effectiveness, and feasibility of the delivery timelines proposed by the vendors.

vi. Conduct Vendor Interviews

We engage with the leading candidates through interviews or presentations to clarify any doubts, assess communication skills, and evaluate team competencies, including the involvement of senior personnel.

vii. Due Diligence & Background Checks

Comprehensive due diligence is performed to verify statutory registrations, tax compliance, and to check for any history of litigation or blacklisting that could impact the vendor's suitability.

viii. Final Selection & Contracting

Vendors are selected based on an overall assessment of their capabilities, pricing, and reliability. A detailed contract is executed that specifies the scope of work, delivery schedules, payment terms, termination clauses, and dispute resolution mechanisms.

ix. Onboarding & Governance

Following contract signing, project managers are appointed on both sides, communication protocols are established, and regular review meetings are scheduled to ensure ongoing governance and performance monitoring.

2) **Project Execution**

i. **Set Up Project Management Tools**

At the start of each outsourced project, we establish a basic yet effective project management setup to ensure clarity and coordination. Communication tools are used for real-time updates and collaboration, and task lists are created with clear ownership and timelines. Initial meetings are conducted to align expectations, discuss deliverables, and agree on the best way to stay connected throughout the project.

ii. **Define Detailed Work Plan with Milestones**

A structured work plan is developed, breaking the project into manageable phases with defined deliverables. Each milestone is assigned a start and end date, along with designated owners accountable for its execution. This detailed planning ensures all stakeholders are aligned on expectations and timelines from the outset.

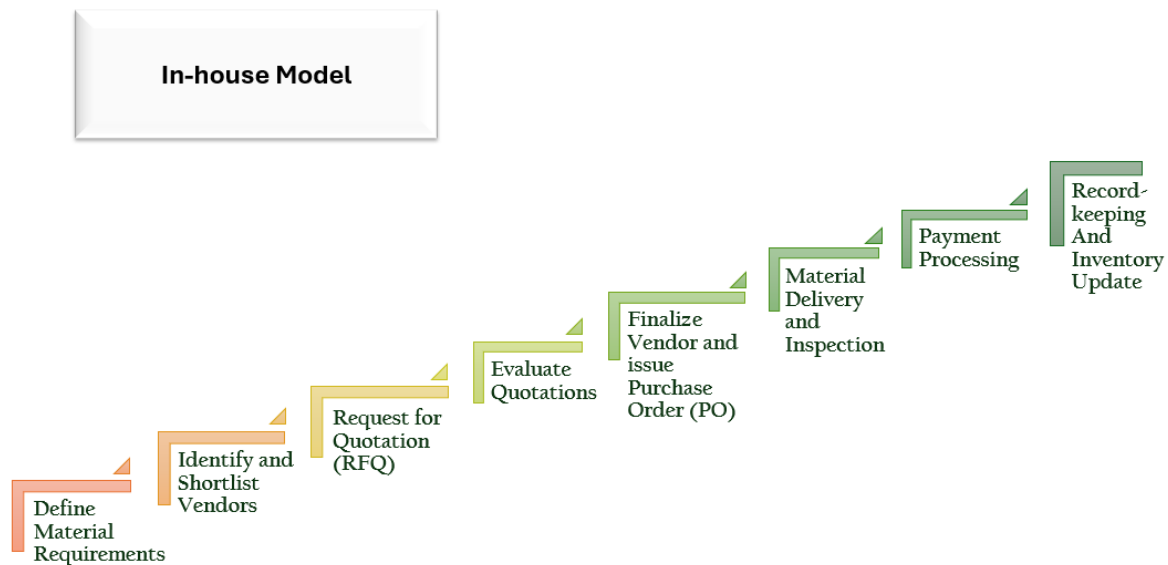

iii. **Monitor Progress and Quality**

Throughout the execution phase, we implement regular review mechanisms to ensure quality control and adherence to agreed timelines. Daily status calls are conducted. Importantly, our supervisors are physically present on-site for the full duration of the project. Their presence enables real-time monitoring, quicker issue resolution, and consistent enforcement of quality and safety standards.

iv. **Final Delivery and Handover**

Upon completion, all final deliverables are thoroughly reviewed by our internal team. Once all work is verified as complete and compliant with the agreed scope, final approvals are issued and the project is formally handed over. At this stage, final invoices are also reviewed and processed for payment, closing out the subcontracted engagement.

In-house Model

1) Define Material Requirements

The in-house process begins with a clear and detailed definition of the material requirements specific to the project. This includes identifying the exact materials needed such as plywood, commercial ply, nylon carpet rolls, and other construction or finish items. For each material, we define key specifications including grade, thickness, dimensions, colour, brand preferences, estimated quantity, delivery location, expected timeline, and budget range. This clarity at the outset ensures accurate sourcing and prevents delays.

2) Identify and Shortlist Vendors

Once material requirements are established, suitable vendors are identified using a mix of local suppliers, authorized dealers, and trusted contacts from previous projects. Each vendor's credentials are verified to ensure compliance, including valid GST registration and a reputation for reliability in terms of delivery and quality.

3) Request for Quotation (RFQ)

An RFQ is sent to shortlisted vendors, outlining the detailed material specifications, required quantities, delivery schedules, payment terms, and expectations related to warranty or return policies. This step ensures that all vendors are quoting based on the same parameters.

4) Evaluate Quotations

All received quotations are compiled into a comparison sheet, allowing us to evaluate vendors across multiple factors such as material rates, applicable taxes, delivery timelines, credit terms, and any specific remarks. Past reliability and service history are also taken into account. Wherever possible, commercial terms are negotiated to optimize value.

5) Finalize Vendor and Issue Purchase Order (PO)

The vendor offering the best overall value, not necessarily the lowest cost is selected. A formal purchase order is then issued, including a comprehensive material list, agreed pricing, delivery location, GST and tax details, payment terms, and the point of contact for coordination.

6) Material Delivery and Inspection

Materials are delivered directly to the site or designated godown as per the agreed schedule. Upon arrival, they are inspected thoroughly to confirm that specifications match the PO, quantities are accurate, and quality standards are met. Delivery challans and invoices are collected for documentation.

7) Payment Processing

Invoices are processed in accordance with the payment terms agreed upon in the PO. All payments are made through authorized banking channels and records are maintained in compliance with internal accounting and audit practices.

8) Recordkeeping and Inventory Update

Once materials are received and verified, the stock or inventory register is updated. Copies of the purchase order, vendor invoice, delivery challan, and payment confirmation are filed systematically for accounting, reconciliation, and future audit reference.

Competitive Strengths**Established track record in a fragmented industry**

Operating in the traditionally unorganised and fragmented sector of exhibition & trade show services, we have established ourselves as a structured and process-driven service provider by offering consistently high-quality, full-stack booth solutions. While most players in the industry operate regionally with limited-service scope, we provide integrated offerings that span design, fabrication, logistics, installation, and post-event dismantling support – delivered under a unified project management framework.

This end-to-end execution capability, supported by established ways of working and in-house teams has allowed us to bring reliability, quality control, and professionalism to an otherwise informal ecosystem. As a result, we have built long-term relationships with clients across sectors such as building materials, pharmaceuticals, IT, real estate, and consumer goods, many of whom have partnered with us across multiple trade show cycles and international markets.

Given the nature of our business, purchase orders are typically raised only a few weeks to 1–2 months prior to the scheduled event or exhibition. This necessitates agile execution, high responsiveness, and robust operational readiness, all of which are integral to our delivery model. Our structured processes and in-house capabilities enable us to meet these condensed timelines without compromising on quality or customer experience, a key differentiator in a segment where lead times are often short and expectations are high.

Since our inception in 2019, we have scaled from a domestic operation to a global service provider, executing projects across markets including the US, UK, Dubai, Germany, Singapore, and India. Our ability to deliver consistent outcomes across geographies through a mix of internal capabilities and collaborations with local teams positions us among a select group of firms equipped to manage complex, multi-country exhibition requirements.

Our growing international presence and recognition at leading trade shows reflect not only the scale of our operations but also our differentiation in a sector still dominated by transactional, unorganised players.

The table below summarizes our growth, market participation, and industry standing:

Particulars	For the year ended (not cumulative)		
	March 31, 2025	March 31, 2024	March 31, 2023
Number of international markets served	17	12	11
Number of sectors served	22	20	17
Number of trade shows/exhibitions participated in	163	133	79
Number of clients served	313	177	145

Agile, asset-light business model enabling scalable growth

Our business is intentionally structured to be asset-light, focusing on flexibility and scalability without the need for heavy capital investment. Instead of owning fixed assets such as fabrication machinery, or permanent event spaces, we strategically rent godowns, fabrication equipment, raw materials, and temporary project sites on a project-by-project basis. This keeps our fixed costs low and helps optimize working capital, which is essential given the seasonal and location-specific nature of trade show and exhibition events.

This asset-light model enables us to scale rapidly in response to evolving client demands and market opportunities. Over the last three years, we have increased our international client base by 245%, growing from 20 to 69 international clientele and expanded into international markets including the US, UK, Dubai, Germany, Singapore, and Spain – all without incurring significant fixed capital expenses.

This operational agility has enabled a compound annual growth rate (CAGR) of 30.13% over the past 2 years, i.e. from FY23 to FY25 in the total number of booths delivered globally, reflecting our ability to scale project execution capacity efficiently and respond swiftly to rising demand.

Furthermore, minimizing asset ownership improves our working capital efficiency and cash flow, allowing us to reinvest in talent, and vendor relationships. This lean structure supports competitive pricing while maintaining the high quality and reliability our clients expect.

In essence, our asset-light approach, combined with rented infrastructure and trusted local collaborations, forms a scalable and cost-effective operational framework. This flexibility has been fundamental to our international growth and positions us well to seize new opportunities in the dynamic trade show and exhibition industry.

Global execution framework enabled by established practices and local integration

Our execution is built on a structured, process-driven framework guided by tried-and-tested methods, ensuring uniform quality, operational efficiency, and on-time delivery across geographies. With over 100 trained professionals on our payroll and specialised teams dedicated to design, execution, vendor management, and marketing, we maintain firm control over every stage of the project lifecycle – from concept to dismantling.

We operate a hybrid delivery model that combines in-house capabilities such as fabrication, warehousing, and project management, with a curated network of local teams in global markets, all functioning under our direct on-ground supervision to ensure consistency and control. Our Vendor Management Team has established long-term relationships with trusted subcontractors and suppliers across key markets, including the US, UK, Dubai, Germany, Singapore, and Spain.

This model allows us to source materials locally, reduce logistics dependencies, and stay aligned with regional compliance and cultural nuances – resulting in competitive pricing, faster turnarounds, and greater adaptability. Serving a broad mix of industries also reduces sectoral risk and allows us to apply cross-sector insights to booth design and strategy.

Brand-led booth design by skilled in-house marketing & branding team

Brand storytelling plays a central role in our design process, guiding how we translate brand values into booth experiences. Our in-house marketing and branding team collaborates closely with clients' brand, communications, and product teams to understand their core messaging, positioning strategy, visual identity, and target audience expectations. This collaboration enables us to create booth designs that not only meet spatial and functional requirements but also serve as immersive brand environments.

We integrate marketing strategy with creative spatial design, ensuring that each booth reflects the brand's personality, values, and business goals – be it launching a new product, building brand recall, or engaging with key stakeholders. From colour psychology and layout dynamics to interactive installations and digital integrations, our design team ensures that every detail reinforces the client's brand narrative. This brand-led approach goes beyond traditional fabrication, allowing us to deliver booths that attract footfall, retain interest, and drive engagement.

By combining design thinking with strategic brand insights, we help our clients stand out in crowded trade show environments – enhancing visibility, credibility, and brand recall through powerful physical experiences.

Strong financial foundation for future growth

We have consistently demonstrated strong financial performance, reflecting the strength and scalability of our business model. Our revenue from operations grew at a compound annual growth rate (CAGR) of approximately 41.70%, increasing from ₹ 2,591.09 lakhs in FY 2023 to ₹ 5,151.82 lakhs in FY 2025. This growth underscores our ability to expand market presence while maintaining focus on core business drivers.

During the same period, our Profit After Tax (PAT) grew at a CAGR of approximately 157.10%, rising from ₹ 96.84 lakhs to ₹ 632.30 lakhs. PAT margins improved significantly from 3.74% to 12.28%, supported by effective cost management and operational efficiencies. This is further reflected in the decline of our total expense ratio from 94.74% to 83.78%, demonstrating improved cost control as we scaled our operations.

Experienced Promoters and senior management team

We are led by an experienced and diverse leadership team with strong industry knowledge and a proven track record. Promoter and Chairman & Managing Director, Prathamesh Pusalkar, brings over one decade of experience in marketing, project management, and entrepreneurship. He is supported by co-promoter Aarti Pusalkar, who has over 11 years of expertise in Human Resource and Administration. The Executive Director, Shreyas Rumade, has hands-on experience managing projects and client relationships since the company's inception. Additionally, the Board includes qualified professionals with backgrounds in finance, banking, and chartered accountancy, adding strategic depth to the company's governance and decision-making. The collective expertise of the leadership team is a key driver of the company's sustained growth and operational excellence.

The knowledge and experience of our Promoters, along with Key Managerial Personnel, Senior Management and team of skilled personnel, provides us with a significant competitive advantage as we seek to expand our capacities and service portfolio in our existing markets and new markets. We continue to leverage the experience of our Promoters, Directors, Key Managerial Personnel and senior management team to further grow our business and strategically target new market opportunities. Our Business Strategies

Diversifying service offerings through exhibition and corporate event organisation

We plan to broaden our service portfolio by entering into complementary verticals, with event organisation being a strategic and operationally synergistic extension of our existing expertise in exhibitions, brand activations, and spatial planning. Our strong foundation in logistics, vendor coordination, on-ground execution, and project management aligns closely with the core requirements of successful event organisation. By offering services such as venue coordination, vendor sourcing,

scheduling, and execution support for corporate events, conferences, and launches, we can enhance the lifetime value of our clients while leveraging existing relationships across sectors like pharmaceuticals, technology, and consumer goods.

To effectively launch and scale this new vertical, we will formalize and deepen our existing relationships by partnering with established event organisers and logistics providers with whom we already collaborate, enabling us to leverage their expertise and expand our service offerings efficiently. These partnerships will enable us to quickly access domain-specific operational capabilities while continuing to focus on what we do best – precise execution and client servicing. Over time, we plan to build a dedicated events team within our company, allowing us to handle end-to-end event organisation independently. This measured, partnership-led approach ensures low capital risk and high scalability as we expand our service portfolio.

Accelerate International expansion through empanelment and local partnerships

We are actively investing in the expansion of our international operations by undertaking on-ground market development initiatives led directly by our Promoter and senior professionals. These efforts include frequent international travel to key markets such as the United States, the United Kingdom, the United Arab Emirates, Germany, and Singapore to assess local market conditions, evaluate operational infrastructure, and identify potential workshop facilities for rental or long-term partnership.

By personally visiting these markets, we aim to build a robust ecosystem of execution partners and workshop alliances that can support our project delivery with region-specific compliance, faster turnaround times, and reduced logistical dependencies. This hands-on approach allows us to maintain service consistency while adapting to regional client needs and event formats. These investments are intended to lay the foundation for sustainable international growth by strengthening our delivery capabilities outside India without the need for significant fixed asset investments.

In parallel, we are also focused on expanding our empanelment with reputed event organisers, both domestically and globally. Being empanelled with a larger network of organisers will enable us to access a broader client base, participate in a wider range of events, and enhance our visibility in new and existing markets. This dual approach of strengthening local partnerships and broadening our empanelment footprint is aimed at driving sustainable international growth while minimizing capital expenditure and preserving operational flexibility.

Strengthen relationships with our existing customers and expand customer base

We have established long-term relationships with our customers, which has led to recurring business engagements with such customers. We intend to continue to focus on strengthening our existing relationships with our customers with a view of entering into more sophisticated, higher-value product ranges with them. We believe that our quality product offerings will enable us to increase our share of business amongst our existing customers as well as increase our customer base. We intend to acquire customers that can provide higher value contracts, increase the wallet share with our existing customers through a combined means of marketing strategies and improvement of our facility. We will continue to leverage our existing customer relationships to expand into new product categories.

Operational Inputs

While we are a service-oriented company and do not consume raw materials in the traditional manufacturing sense, our business is significantly dependent on a range of operational inputs that are critical to the delivery of our services. These inputs form a substantial part of our operating costs and are essential to the execution of exhibition stalls, event setups, and fabrication projects across various locations. The primary input cost relates to fabrication materials, including wood, plywood, laminates, paints, lighting, textiles, and other display elements required for both custom-built and modular stands. Labour is another key component of our cost structure, consisting of both skilled and semi-skilled

personnel engaged in design execution, fabrication, installation, and dismantling activities. We also incur expenses on rented premises, including workshops and warehouses, which support our production and storage requirements. Transportation and logistics are critical to our operations, involving the movement of fabricated elements, equipment, and personnel to event venues, both domestically and internationally. In addition, we use cleaning materials and engage housekeeping services to ensure that our stalls and setups meet the required standards of hygiene and presentation. Equipment rentals and utility costs, including electricity and fuel, also contribute to our overall input costs.

The following table presents an indicative breakup of these key inputs as a percentage of Total Expenses for the financial years ended March 31, 2025, March 31, 2024, and March 31, 2023:

Office and Technical Equipment

Our Company is a service-oriented organization and does not operate any manufacturing facilities. Our business model primarily relies on basic infrastructure, including but not limited to laptops, communication devices, and office equipment. Wherever specialized equipment such as cranes, scaffolding, trussing systems, lighting rigs, or sound infrastructure is required, we engage third-party vendors and service providers on a project-specific basis. Accordingly, we do not own or maintain any capital-intensive plant and machinery assets.

Quality Control

We follow a quality management process that begins with setting clear, project-specific standards across materials, design accuracy, finish quality, and structural durability. Specifications for key materials, such as plywood, carpets, laminates, and metals are defined in detail, including grade, dimensions, colour, and brand preferences. Design intent is translated into execution through validated drawings, material approvals, and feasibility checks. Quality is monitored at every stage: from pre-production

planning and workshop fabrication to on-site installation. Our supervisors are present throughout the project to oversee alignment, structural fitment, aesthetic finish, and electrical safety, ensuring real-time issue resolution and full compliance with the approved scope.

Each project is assigned a dedicated quality lead responsible for maintaining documentation, verifying control checkpoints, and liaising with the client for any last-mile adjustments. Our execution practices are governed by consistent internal practices for all core activities – fabrication, painting, vinyl application, alignment, and carpet laying, ensuring consistency across sites. Before final handover, we conduct a formal walkthrough with the client using a predefined checklist that covers branding placement, cleanliness, functionality, and visibility.

Our commitment to excellence is supported by multiple ISO certifications, including ISO 9001:2015 (Quality Management), ISO 14001:2015 (Environmental Management), ISO 45001:2018 (Occupational Health & Safety), ISO/IEC 27001:2022 (Information Security), and SA 8000:2014 (Social Accountability), which collectively reinforce our operational integrity and sustainability practices.

Inventory Management

We take a practical and minimalistic approach to inventory management, focusing on efficiency and control. Most materials are sourced as needed, with only a small percentage of reusable items maintained in-house for future use, tracked using Excel or other digital formats. Reusable items are returned to the company’s warehouse (godown) for use in future booths. On average, these materials are fully consumed after being reused across 2–3 subsequent projects. Non-reusable or booth-specific items are discarded after the completion of each exhibition.

Our Marketing Strategy

We follow a multi-pronged marketing approach focused on building direct relationships with potential clients, strengthening our visibility in target sectors, and supporting sustainable lead generation across geographies. We are empanelled with well-known event organisation companies, who list us as a trusted partner for event execution. These associations help build our credibility, enhance our brand visibility, and improve recognition in the market. Through our active engagement with these organisers, we gain access to a wider client base and receive regular business opportunities. This strategy helps us strengthen client trust, expand our reach in the industry, and position Propshop as a dependable and preferred provider of event and exhibition services.

In addition to the above, the key elements of our marketing strategy include the following:

1. Exhibitions and Trade Shows

We actively participate in leading industry exhibitions and trade shows such as ACETECH, Matecia, and World of Coffee, which serve as core platforms for brand visibility and client engagement. Our presence at these events is marked by self-designed booths that reflect our creative and fabrication capabilities.

These events support lead generation through live interactions and onsite registrations, while also enabling us to reinforce brand positioning among key decision-makers. Leads captured during events are nurtured through structured follow-ups, often culminating in project discussions and conversion.

2. Seminars and Workshops

We conduct and participate in workshops, speaker sessions, and educational seminars on topics relevant to exhibitors and marketing teams, including booth ROI (Return on Investment) optimization, audience engagement strategies, and cross-cultural booth design approaches. These initiatives are often timed with major trade shows and delivered in collaboration with exhibition organizers and industry associations, ensuring access to a focused and relevant audience. During these events, we distribute marketing materials, collect attendee details, and engage in direct conversations that support both lead generation and brand positioning. By sharing actionable insights and design expertise, we establish thought leadership, build early-stage trust, and strengthen our brand visibility among key decision-makers.

3. Door-to-Door and Direct Sales Outreach

Direct client outreach remains a high-conversion channel for us, particularly for high-value or recurring exhibitors. We identify target companies well in advance of key exhibitions and initiate communication through tailored proposals, case studies, brochures, and one-on-one consultations. Our business development team focuses on understanding the marketing objectives of each client and recommending spatial design strategies that are aligned with their brand narrative. This consultative selling approach has helped us build long-term relationships with leading corporates across sectors like Industrial Machinery & Equipment, Building Materials, Furnishing and Décor, Chemicals, Media & Entertainment, etc.

4. Social Media Marketing

We maintain an active and growing presence on professional platforms like LinkedIn, Instagram, and YouTube, which we use to showcase recent projects, highlight behind-the-scenes execution, share testimonials, and post industry updates. Our content strategy is curated to reflect both our creative process and our global reach. In addition to organic content, we run targeted campaigns aimed at decision-makers in key sectors and geographies. These efforts help us stay top-of-mind, drive traffic to our website, and convert interest into inquiries.

5. Partnerships and Referrals

We leverage a strong network of industry partners, including exhibition organizers, event marketing firms, and past clients, to generate referrals and repeat business. Our reputation for reliability, design quality, and timely execution has enabled us to become a preferred vendor for many event stakeholders. We have also introduced incentive-based referral programs in select cases, which help amplify our reach through trusted networks.

6. SEO and Website Optimization

As part of our digital marketing strategy, we leverage Search Engine Optimization (SEO) to attract targeted traffic from businesses actively seeking exhibition stall and trade show booth design services. By optimizing for relevant keywords such as “*exhibition stall design India*,” “*trade show booth designers*,” and “*Propshop Events*,” we maintain strong visibility across major search platforms. We invest consistently in content development, including case studies, project galleries, and blog posts to boost organic reach and engage prospective clients during their research and consideration phases. This combined focus on strategic content and technical SEO enables steady inbound lead generation. Additionally, the website functions as a key validation touchpoint for clients who discover us through referrals, search, or digital advertising.

7. Email Marketing

Email marketing serves as a key channel for nurturing leads and strengthening client relationships. Through targeted newsletters featuring design updates, project highlights, and industry insights, we keep our audience consistently engaged. Mailing lists are strategically segmented by client type such as startups, corporates, and agencies to enable customized messaging that aligns with each segment’s business priorities. This personalized, ongoing communication reinforces brand recall, supports repeat business, and drives referrals from satisfied clients.

8. Telecalling

Our telecalling program supports lead conversion by engaging warm leads and reactivating dormant prospects through structured outbound campaigns. Using Customer Relationship Management (CRM) tools, we prioritize outreach, track interactions, and tailor communication based on each lead’s history, industry, and location. This personalized approach helps maintain client interest, supports the sales team, and keeps our sales pipeline active and well-qualified.

Information Technology

We use a combination of accounting and design software to support our key business operations. For financial management, we rely on Tally ERP, which helps us efficiently manage accounts, invoicing, taxes, and inventory. For design-related work, we make use of freely available online tools to create layouts, 3D visuals, branding materials, and technical drawings.

Logistics

We operate in the event and exhibition industry, with a significant portion of logistics activities executed through a trusted network of third-party vendors. As a result, we do not maintain our own transportation fleet or dedicated logistics infrastructure. Our logistics operations are coordinated on a project-specific basis. Vendors typically handle the transportation of materials, on-site delivery, setup, and, when required, the provision of temporary handling equipment such as cranes, trolleys and forklifts. Our internal teams focus on project management – overseeing timelines, coordinating vendor activities, and ensuring that all components are delivered and installed in line with client specifications and event schedules. To ensure efficient execution, our teams also travel to event sites as needed to supervise on-ground operations, manage last-mile execution, and resolve any issues in real time. We do not engage in long-term contracts with third-party logistics providers. Instead, we adopt a flexible, demand-driven approach, arranging logistics support based on the specific needs and timelines of each project.

This lean, vendor-dependent logistics model allows us to remain agile, control costs, and scale efficiently across multiple projects and locations without maintaining significant fixed infrastructure.

The revenue increase stems from two primary drivers: sustained growth in established markets, which demonstrated consistent year-over-year expansion, and successful penetration into previously untapped markets across both domestic and international territories.

This rise in other expenses was primarily attributed to several factors, including ₹ 26.15 lakhs increase in Business Development Expenses, ₹ 18.58 lakhs increase in Advertisement & Website Expenses, ₹ 6.95 lakhs increase in Insurance expenses.

Tax Expenses

Tax expenses increased by 179.57%, reaching a total of ₹ 210.11 lakhs in the financial year 2024-25, in contrast to the ₹75.15 lakhs in the financial year 2023-24.

Profit after Tax (PAT)

Due to the aforementioned factors, the profit experienced an upswing, primarily driven by the growth in total income and a consequent increase in total expenses as a percentage of total income. The Profit After Tax (PAT) for the financial year 2024-25 reached ₹632.30 lakhs, marking an increase from ₹219.46 lakhs in the financial year 2023-24. In the financial year 2024-25, PAT constituted 12.26% of the total income, in contrast to 7.18% in the fiscal year 2023-24. This enhancement can be primarily attributed to increased revenue from operations during the year, though the revenue growth was largely offset by proportional increases in operating costs.

Rationale for increase in Profit After Tax (PAT) compared to total income

Revenue has increased from ₹3,051.48 lakhs to ₹ 5,151.82 lakhs, representing 68.83% change in revenue. Moreover, there is an increase in PAT from ₹ 219.46 lakhs to ₹ 632.30 lakhs, representing 188.12% change. The reason for this growth is attributable to company's strategic increase of focus in international market. Since international assignments generally provide better pricing and margins as compared to domestic projects, positively impacting profitability.

Below is the revenue bifurcation which represent increase in focus from Domestic market to Export market over the past 3 years.

Particulars	Fiscal 2025		Fiscal 2024		Fiscal 2023	
	Revenue from operations	% of Total Revenue from Operations	Revenue from operations	% of Total Revenue from Operations	Revenue from operations	% of Total Revenue from Operations
Export	331.76	6.44%	35.32	1.16%	15.91	0.61%
SEZ	35.98	0.70%	49.41	1.62%	-	0.00%
Domestic sales	4,784.08	92.86%	2,966.75	97.22%	2,575.18	99.39%
Total	5,151.82	100.00%	3,051.48	100.00%	2,591.09	100.00%

The significant increase in PAT margin in FY 2025 can be attributed to several factors that have collectively contributed to improved profitability for the company:

- **Increase in High margin Export Contract**

A primary driver of the growth in Profit After Tax (PAT) has been the 334.01% increase in international sales i.e. from ₹84.73 Lakhs in FY 2024 to ₹ 367.74 Lakhs in FY 2025, while domestic sales also registered robust growth of 61.26%, reaching ₹ 4,784.08 Lakhs in FY 2025 as compared to ₹2,966.75 Lakhs in FY 2024. This strategic diversification and expansion in market reach have materially contributed to enhanced profitability. The revenue mix reflects this shift, with export orders accounting for 6.44% of total revenue in FY 2025, up from just 1.16% in FY 2024. Notably, international contracts typically afford greater pricing flexibility, enabling the company to secure higher realizations for its services. Such contracts often involve larger volumes and more complex engagements, generating superior value compared to domestic contracts, which remain subject to fixed pricing and competitive tendering.

- **Operational Efficiency & Cost Optimization**

The company has enhanced operational efficiency by streamlining service delivery and optimizing resource utilization, resulting in a significant improvement in profitability. Through refined processes and tighter cost controls, the PAT margin increased from 7.19% to 12.27%, reflecting lower cost per engagement and expanded margins alongside revenue growth.

Finance Costs

Finance Costs in the Financial Year 2023-24 increased by 707.20%, reaching ₹14.54 lakhs in comparison to the ₹ 1.80 lakhs incurred in the Financial Year 2022-23. This rise in finance costs primarily increases in bank charges, which went up by ₹ 10.13 lakhs and increases in Interest on Cash Credit and Bank Overdraft Facility account which went up by ₹ 2.60 lakhs.

Depreciation and amortization expenses

Depreciation and amortization in the Financial Year 2023-24 increased by 71.77% reaching ₹ 3.05 lakhs in comparison to the ₹ 1.78 lakhs incurred in the Financial Year 2022-23. The increase in depreciation was primarily due to addition in assets.

Other Expenses

Other expenses in the Financial Year 2023-24 increased by 184.99%, reaching ₹ 78.48 lakhs in comparison to the ₹ 27.54 lakhs incurred in the Financial Year 2022-23. This rise in other expenses was primarily attributed to several factors, including ₹ 34.68 lakhs increase in rent, ₹ 4.96 lakhs increase in travelling expenses, ₹ 2.73 lakhs increase in Power & Fuel expenses.

Tax Expenses

Tax expenses increased by 139.63%, reaching a total of ₹75.15 lakhs in the financial year 2023-24, in contrast to the ₹ 31.36 lakhs in the financial year 2022-23.

Profit after Tax (PAT)

Due to the aforementioned factors, the profit experienced an upswing, primarily driven by the growth in total income and a consequent increase in total expenses as a percentage of total income. The Profit After Tax (PAT) for the financial year 2023-24 reached ₹ 219.46 lakhs, marking an increase from ₹ 96.84 lakhs in the financial year 2022-23. In the financial year 2023-24, PAT constituted 7.18% of the total income, in contrast to 3.73% in the fiscal year 2022-23. Company had achieved a PAT margin of 7.19% in FY 2024 as compared to 3.74% in FY 2023. This resulted in a margin increase of 3.45% in FY 2024 as compared to FY 2023. Reason for this margin increase in FY 2024 is increase in export sale, domestic income and other income

Rationale for increase in Profit After Tax (PAT) compared to total income

Revenue has increased from ₹2,591.09 lakhs to ₹ 3,051.48 lakhs, representing 17.77% change in revenue. Moreover, there is an increase in PAT from ₹ 96.84 lakhs to ₹ 219.46 lakhs, representing 126.63% change. The reason for this growth is attributable to company's strategic increase of focus in international market. Since international assignments generally provide better pricing and margins as compared to domestic projects, positively impacting profitability.

Particulars	Fiscal 2024		Fiscal 2023	
	Revenue from operations	% of Total Revenue from Operations	Revenue from operations	% of Total Revenue from Operations
Export	35.32	1.16%	15.91	0.61%
SEZ	49.41	1.62%	-	0.00%
Domestic sales	2,966.75	97.22%	2,575.18	99.39%
Total	3,051.48	100.00%	2,591.09	100.00%

- **Increase in High margin Export Contract**

A primary driver of the growth in Profit After Tax (PAT) has been the 432.56% increase in international sales i.e. from ₹15.91 Lakhs in FY 2023 to ₹84.73 crore in FY 2024, while domestic sales also registered robust growth of 15.21%, reaching ₹ 2,966.75 Lakhs in FY 2024 as compared to ₹2,575.18 Lakhs in FY 2023. This strategic diversification and expansion in market reach have materially contributed to enhanced profitability. The revenue mix reflects this shift, with export orders accounting for 2.78% of total revenue in FY 2024, up from just 0.61% in FY 2023. Notably, international contracts typically afford greater pricing flexibility, enabling the company to secure higher realizations for its services.

Such contracts often involve larger volumes and more complex engagements, generating superior value compared to domestic contracts, which remain subject to fixed pricing and competitive tender

- **Operational Efficiency & Cost Optimization**

The company has enhanced operational efficiency by streamlining service delivery and optimizing resource utilization, resulting in a significant improvement in profitability. Through refined processes and tighter cost controls, the PAT margin increased from 3.74% to 7.19% reflecting lower cost per engagement and expanded margins alongside revenue growth.

PAT Growth & Margin Improvement:

Increase in PAT:

As a result of the increase in focus toward international market, the company's Profit After Tax (PAT) has seen a substantial increase. The PAT has grown from ₹96.84 lakhs in FY 2022-23 to ₹ 219.46 lakhs in FY 2023-24, reflecting a major improvement in profitability.

PAT Margin:

Correspondingly, the PAT margin has significantly improved. In FY 2022-23, the PAT margin was 3.74% indicating poor profitability due to focus in domestic market only. By FY 2023-24 the PAT margin surged to 7.19%, showcasing the positive impact of the higher-margin international market contracts.

Phased implementation of UPI for Bids by IBs as per the UPI Circulars

SEBI has issued the UPI Circulars in relation to streamlining the process of public offer of, inter alia, equity shares and convertibles by introducing an alternate payment mechanism using UPI. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by IBs through Designated Intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced and implemented the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 01, 2019, until March 31, 2019, or floating of five main board public offers, whichever was later. Subsequently, the timeline for implementation of Phase

I was extended till June 30, 2019. Under this phase, an IB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public offer closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 01, 2019, and was to initially continue for a period of three months or floating of five main board public offers, whichever is later. SEBI, vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019, has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020.

Subsequently, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, extended the timeline for implementation of UPI Phase II until further notice. Under this phase, submission of the ASBA Form by IBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public offer closure to listing continues to be six Working Days during this phase.

Phase III: Pursuant to SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023, Phase III has been notified, and accordingly the revised timeline of T+3 days has been made applicable in two phases i.e., (i) voluntary for all public offers opening on or after September 01, 2023; and (ii) mandatory on or after December 01, 2023. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Circular, once Phase III becomes applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 issued by SEBI, as amended by the SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 02, 2021 and the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated April 20, 2022 (the “UPI Streamlining Circulars”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post – offer BRLM will be required to compensate the concerned investor.

The processing fees for applications made by UPI Bidders may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 02, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 NPCI vide circular reference no. NPCI/UPI/OC No. 127/ 2021-22 dated December 09, 2021, inter alia, has enhanced the per transaction limit in UPI from more than ₹0.20 million to ₹0.50 million for UPI based ASBA in initial public offers.

- The Designated Stock Exchange (DSE), post verification approves the basis and generates drawal of lots wherever applicable, through a random number generation software.
- The RTA uploads the drawal numbers in their system and generates the final list of allottees as per process mentioned below:

Process for generating list of allottees

- Instruction is given by RTA in their Software System to reverse category wise all the application numbers in the ascending order and generate the bucket/batch as per the allotment ratio. For example, if the application number is 78654321 then system reverses it to 12345687 and if the ratio of allottees to applicants in a category is 2:7 then the system will create lots of 7. If the drawal of lots provided by Designated Stock Exchange (DSE) is 3 and 5 then the system will pick every 3rd and 5th Application in each of the lot of the category and these applications will be allotted the shares in that category.
- In categories where there is proportionate allotment, the Registrar will prepare the proportionate working based on the over subscription times.
- In categories where there is undersubscription, the Registrar will do full allotment for all valid applications.
- On the basis of the above, the RTA will work out the allottees, partial allottees and non-allottees, prepare the fund transfer letters and advice the SCSBs to debit or unblock the respective accounts.

Allotment will be made in consultation with NSE (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth here:

- a) The total number of Shares to be allocated to each category as a whole shall be arrived at on proportionate basis i.e., the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category X number of Shares applied for).

- b) The number of Shares to be allocated to the successful applicants will be arrived at on a proportionate basis in marketable lots (i.e., Total number of Shares applied for into the inverse of the over subscription ratio).

For applications where the proportionate allotment works out to less than [●] Equity shares the allotment will be made as follows:

- i. Each successful applicant shall be allotted [●] Equity shares; and
 - ii. the successful applicants out of the total applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.
- c) If the proportionate allotment to an applicant works out to a number that is not a multiple of [●] Equity shares, the applicant would be allotted Shares by rounding off to the nearest multiple of [●] Equity shares subject to a minimum allotment of [●] Equity shares.
- d) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the applicants in that category, the balance available Shares for allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising of applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of [●] Equity shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the offer specified under the Capital Structure mentioned in this Draft Red Herring Prospectus.
- e) The above proportionate allotment of shares in an offer that is oversubscribed shall be subject to the reservation for small individual applicants as described below:

 - The balance net offer of shares to the public shall be made available for allotment to Individual applicants other than individual investors and other investors, including Corporate Bodies/ Institutions irrespective of number of shares applied for.

CALLS

Directors may make Calls

- 32 Subject to the provisions of Section 49 of the Companies Act, 2013, the Board of Directors may, from time to time, by a Resolution passed at a meeting (and not by a Circular Resolution), make such calls as it thinks fit upon the members in respect of all monies unpaid on the shares held by them (whether on account of the nominal value of the shares or by way of premium), and not by conditions of allotment thereof made payable at fixed time. Each member shall pay the amount of every call so made on him to the person or persons and at the time and place appointed by the Board of Directors. A call may be made payable by instalments. A call may be postponed or revoked as the Board may determine.

Notice of Calls

- 33 At least fourteen days' notice in writing of any call shall be given by the Company specifying the time or times and place of payment, and the person or persons to whom such call shall be paid.

Call to date from resolution

- 34 A call shall be deemed to have been made at the time when the resolution authorizing such call was passed at a meeting of the Board of Directors and may be made payable by the members whose names appear on the Register of Members on such date or at the discretion of the Directors on such subsequent date as shall be fixed by the Board of Directors.

Directors may extend time

- 35 The Board of Directors may, from time to time at its discretion, extend the time fixed for the payment of any call, and may extend such times as to all or any of the members who on account of residence at a distance or other cause, the Board of Directors may deem fairly entitled to such extension; but no member shall be entitled to such extension as of right except as a matter of grace and favour.

When interest on call or instalment payable

Payment in anticipation of calls may carry interest

Any such lien shall extend to all dividends payable and bonuses declared from time to time declared in respect of shares/debentures. Fully paid-up share shall be free from all lien and in the case of partly paid-up shares the Company's lien shall be restricted to moneys called or payable at a fixed time in respect of such shares.

As to enforcing lien by sale
