Prospective investors should carefully consider all the information in the Red Herring Prospectus, particularly the “**Financial Information of the Company**” and the related Annexures, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on page 170, 112 and 224 respectively of this Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.*

This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. INTERNAL RISK FACTORS

- 1. Our business is dependent on the sale of our services to certain key customers. The loss of any of these customers or loss of revenue from sales to these customers could have a material adverse effect on our business, financial condition, results of operations and cash flows.*

The substantial portion of our revenues has been dependent upon few customers. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, delays or cancellation of orders from our significant customers, a failure to negotiate favourable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition results of operations, cash flows and future prospects of our Company. Set out in the table below is the share of the top 1, top 5 and top 10 customers in our revenue from operations for the period ended October 31, 2025 and Fiscal Years 2024-25, 2023-24 and 2022-23:

Particulars	For the period/year ending							
	Oct. 31, 2025	% to total sales	FY 2025	% to total sales	FY 2024	% to total sales	FY 2023	% to total sales
Top 1 Customer	2329.61	43.39	6317.63	48.48	5206.05	50.86	2922.78	38.88
Top 5 Customer	3,339.79	62.21	8320.57	63.85	6576.02	66.00	5066.23	67.40
Top 10 Customer	3767.70	70.18	9654.99	74.09	7690.82	75.13	5802.41	77.19

We do not have firm commitment in the form of long-term supply agreements with our customers and instead rely on purchase orders and accordingly the success of our business is significantly dependent on maintaining good relationship with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources. Additionally, our revenues may be adversely affected if there is an adverse change in any of our customers' supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers.

We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honour their outstanding amounts in time and whether they will be able to fulfil their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

2. We depend significantly on the performance of automotive sector for sale of our automation solutions. Any adverse change in performance of automotive sector could adversely affect our business and profitability.

We are an Industrial Digital Automation Solutions provider, engaged into the business of Designing, developing, procurement, assembling, testing, installation, commissioning & engineering services related to Automated assembly lines, Material handling machines, Robotic work cells (e.g., pick-and-place, sealing) and Special Purpose Machinery tailored to meet client-specific operational requirements. We deliver customized automation solutions primarily to Automobile manufacturers, Automotive OEMs and component/sub-component manufacturers seeking to establish, expand, upgrade, modify, repair or reconfigure existing production lines, or operational set-up.

We are significantly dependent on the performance of the automotive sector in India for the sale of our automation solutions. Our revenue from automotive sector clients during the period ended October 31, 2025 and Fiscal Years 2024-25, 2023-24 and 2022-23 constituted 59.95%, 78.61%, 72.48%, and 64.32% of our revenue from operations, respectively. For details, please refer to section "**Our Business - Industry-wise revenue bifurcation**" on Page 112 of this Red Herring Prospectus.

We are therefore exposed to fluctuations in the performance of the automotive markets in India. In the automobiles segment, production and sales of the vehicles are affected by, among other things, a variety of factors that are beyond our control, including changes in government policies, changes in consumer demand, product mix shifts favouring other types of vehicles, fuel prices, economic conditions, demographic trends, employment and income levels and interest rates, disruptions in the automotive supply chain, vehicle age, labour relations, regulatory requirements, credit availability and cost of credit, interest rates and general economic and industry conditions. Any reduced demand in the automotive segment, deterioration in the automotive market, uncertainty, or changes in regulations, customs, taxes, or other restrictions affecting the automotive market, particularly in India, could adversely impact our business, operations and financial condition.

3. Our Company is dependent on limited number of suppliers, within limited geographical locations for procurement of raw materials. Any delay, interruption or reduction in the supply of raw materials required for our products may adversely affect our business, results of operations, cash flows and financial condition.

We are dependent on third party suppliers for certain primary raw materials and bought-out parts such as Allen Bolt, Spring washer, Plain washer, Button Head screw, NY lock nut, AIOI Lamp cover, Conveyor roller, Copper rod, Aluminium frames- brackets & caps, MS/GI/GP Pipe, THK LM Roll Block, Gear Box, Electric Actuator, Aluminium Profile Machined components, Control panel enclosures, Switchgear, PLCs, HMIs, VFD etc. We source raw materials majorly from various domestic suppliers. For the period ended October 31, 2025 and Fiscal year 2025, Fiscal 2024 and Fiscal 2023, purchases from our top ten suppliers amounted to Rs. 3703.24 Lakhs, Rs. 7135.20 Lakhs, Rs. 6524.09 Lakhs and Rs. 4533.70 Lakhs respectively, which represented 81.07%, 76.57%, 85.54% and 77.72% of our total raw material purchases, respectively, for the said period. We do not have any long-term supply contracts with these suppliers and therefore, we cannot assure that we shall always have a steady supply of raw material at prices favourable to us.

Any disruption of supply of raw materials from such suppliers could adversely impact our operations and business if we are unable to replace such suppliers in a timely manner. We cannot assure you that we will be able to enter into new arrangements with suppliers on terms acceptable to us, which could have an adverse effect on our ability to source raw materials in a commercially viable and timely manner, if at all, which may impact our business and profitability.

Additionally, we source our major raw materials requirement indigenously. Major portion of our purchases of raw materials for the period ended October 31, 2025 and fiscal year 2025, 2024 and 2023 is from the state of Maharashtra which is 79.45%, 70.98 %, 78.82%, and 83.83 % of the total purchases of raw material. Cost of such material purchased constituted a significant component of our expenditure and in Period ending October 31, 2025 and Fiscal year ending 2025, 2024 and 2023 and the same were Rs. 4567.96 Lakhs, Rs.9319.41 Lakhs, Rs. 7627.25 lakhs and Rs. 5833.64 lakhs respectively, which constituted, 90.93%, 83.57%, 86.24% and 85.43%, respectively, of our total expenses. For details related to purchases of raw materials, kindly refer section titled “**Financial Information of the Company**” beginning on Page 170 of this Red Herring Prospectus.

Inadequate supply of raw material caused either by a sudden change in the prices or imposition of any new taxes or loss of any of our existing major vendors for any reason or any adverse change in the policies of Central/State Government may affect the availability of such raw material which could have a material adverse effect on our business operations and profitability. Further, any materially adverse social, political or economic development, civil disruptions or changes in the policies of the state government or local governments may affect continuing operations at our Assembly unit and result in significant loss due to an inability to meet production schedules, which could materially affect our business reputation within the industry. If we cannot fully offset increases in the cost of raw materials, through increases in the prices for our products, we would experience lower margins and profitability, which would have a material adverse effect on our financial condition and results of operations. Our ability to remain competitive, maintain costs and profitability depend, in part, on our ability to source and maintain a stable and sufficient supply of raw materials at acceptable prices. Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations.

Though, we have not faced any such instance in past, there can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations.

Further, our Company has outstanding dues of trade payables for the period ending October 31, 2025 and Fiscal years ending 2025, 2024 and 2023 of Rs. 1979.94 Lakhs, Rs. 2716.65 Lakhs, Rs. 2776.32 lakhs and Rs. 1541.18 lakhs respectively out of which outstanding due to Micro and Small Enterprises amounted to Rs. 30.61 Lakhs, Rs. 175.19 lakhs, Rs. 297.55 lakhs & Rs. 43.03 lakhs respectively for the said period. In the past, we have delayed payments of Micro and Small Enterprises and any such delay in payment to our MSE creditors in future may result into demand for interest or penalty raised by the concerned authority.

For details related to outstanding trade payables, kindly refer section titled “**Financial Information of the Company**” beginning on Page 170 of this Red Herring Prospectus.

4. The industry where our Company operates is a highly skilled and technical employee intensive industry and our success depends largely upon its skilled professionals and its ability to attract and retain these personnel.

We are an Industrial Digital Automation Solutions provider, engaged into the business of Designing, developing, procurement, assembling, testing, installation, commissioning & engineering services related to Automated assembly lines, Material handling machines, Robotic work cells (e.g., pick-and-place, sealing) and Special Purpose Machinery, thus, our Company’s ability to execute projects and to obtain new customers depends largely on its ability to attract, train, motivate and retain highly skilled professionals for

providing such designing, development and engineering solutions. We invest in training human resources that we hire to perform the services we provide. These professionals are often targeted by the lateral recruitment efforts of our competitors. The performance of our Company will be benefited on the continued service of these persons or replacement of equally competent persons from the domestic or global markets. We may have difficulty in redeploying and retraining our employees to keep pace with continuing changes in technology, evolving standards and changing customer.

We have a team of 49 employees in designing and development as on January 31, 2026, playing a critical role in delivering customized, client-specific automation solutions. We incur various employee benefits expense, including salaries and bonus, contribution to provident and other funds and staff welfare expenses and for the period ended October 31, 2025 and fiscal years ending 2025, 2024 and 2023 our employee benefits expense accounted to Rs. 602.74 Lakhs, Rs. 939.99 Lakhs, Rs. 691.29 Lakhs and Rs. 546.56 Lakhs, respectively, representing for 12.00%, 8.43%, 7.82% and 8.00%, respectively, of our total expense for the respective period/year. For further details, kindly refer section titled ***“Financial Information of the Company”*** beginning on Page 170 of this Red Herring Prospectus.

We cannot assure you that we will be able to successfully retain our skilled professionals. There is intense competition for experienced skilled professionals with technical and industry expertise in our business and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realize our strategic objectives could be impaired and our business may be adversely affected if a substantial number of such personnel either perform at less-than-optimal efficiency or leave us. The loss of members of our team, particularly to competitors, could have a material adverse effect on our business and results of operations. For details related to attrition rate of employees in our Company, kindly refer section titled ***“Our Business”*** beginning on Page 112 of this Red Herring Prospectus.

5. *We are subject to strict quality requirements and any failure to comply with quality standards may lead to cancellation of existing and future orders, product recalls, product liability, warranty claims and other disputes and claims.*

All our automation solutions and processes are subject to stringent quality standards and specifications. Any failure on our part to maintain the applicable standards of our products according to prescribed specifications, may lead to loss of reputation and goodwill of our Company, cancellation of orders and even lead to loss of customers. Our customers may reject our products, cancel their orders or choose our competitors over us if we fail to perform our contractual obligations or meet the quality or performance standards set out with our customers, which may in-turn harm our reputation. Though we have not received the ISO certification as on the date of this red herring prospectus, we are in the process of aligning our operations with the ISO 9001:2015 Quality Management System. Failure by us to comply with applicable quality standards could also result in our products failing to perform as expected, or alleged to result in property damage if our products are defective or are used incorrectly by our customers. The occurrence of any such events could expose us to product warranty, product recall or product liability claims.

We may also be required to indemnify customers against losses occurring as a result of defective products and reimburse our customers for administrative, labour, material and other such costs. We may also become subject to legal proceedings and commercial or contractual disputes. Potential product recalls could cause disruption to our business and result in reputational harm and the costs and expenses associated with warranties, product recalls and product liability claims could adversely affect our results of operations and financial condition. Though no such instance is faced in past, we may incur significant liabilities for which there is no or insufficient insurance coverage and our business, financial condition and results of operations could be adversely affected.

For details related to warranty and service expenses, kindly refer section titled ***“Financial Information of the Company”*** beginning on Page 170 of this Red Herring Prospectus.

6. *If there are delays in setting up the Proposed factory unit or if the costs of setting up and the possible time or cost overruns related to the Proposed factory unit or the purchase of furniture, fixtures and laptops for the Proposed factory unit are higher than expected, it could have a material adverse effect on our financial condition, results of operations and growth prospects.*

To expand our business operations, we have already commenced establishment of new factory unit, which will be funded through the net proceeds of the IPO. Out of the total IPO proceeds, Rs. 3,777.34 lakhs will be allocated towards the establishment of the said facility. The proposed factory unit is envisaged to be set up in Pune, Maharashtra. For further details, please refer to chapter titled ***“Objects of the Issue”*** beginning on page 80 of this Red Herring Prospectus.

The completion of the setting up of the Proposed factory unit is dependent on our ability to arrange finance through Net Proceeds or otherwise, the performance of external agencies which are responsible for construction of buildings. We cannot assure you that we will be able to arrange for such finance on time. Our expansion plans remain subject to the potential problems and uncertainties that construction projects face including cost overruns or delays, labour shortages, increased costs of equipment or manpower, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving

governmental, statutory and other regulatory approvals, incremental pre-operating expenses, environment and ecology costs and other external factors which may not be within the control of our management.

There can be no assurance that our budgeted costs may be sufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. Further, we cannot assure you that the performance of external agencies will meet the required specifications or performance parameters. We may not be able to identify suitable replacement external agencies in a timely manner. If the performance of these agencies is inadequate in terms of the requirements, this may result in incremental cost and time overruns.

The estimated costs for setting up the Proposed factory unit are based on the certificate dated March 23, 2026 given by Prasad Kumbhojkar, Independent Chartered Engineers, and are based on management's estimates and current conditions which are subject to change, owing to prospective changes in external circumstances, costs and other financial conditions.

Further, we will allocate a part of net proceeds amounting to Rs. 576.46 Lakhs towards procuring of Furniture and laptops with updated configurations. The Company has already initiated pre-construction activities, including excavation and project consultancy services, for the Building and Civil Works. An amount of ₹223.53 lakhs has been incurred towards these expenses. Additionally, the Company has obtained third-party quotations for the procurement of the remaining materials required for setting up the new factory, along with furniture, fixtures, and laptops. The cost of setting up of the proposed new factory including the cost of furniture, fixtures and laptops is based on the quotations received from third party vendors and contractors and such quotations are valid for a certain period of time and may be subject to revisions. We cannot assure that we will be able to procure all the required material in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of acquisition or in the event the vendors are not able to provide the delivery in a timely manner, or at all, we may encounter time and cost overruns. Further, if we are unable to procure the required material from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the same which satisfy our requirements at acceptable prices. Our inability to procure the required material at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

Our return on our investment depends upon, among other things, successful implementation of our strategy, competition, demand of our products, government policies, interest rates and general economic conditions. If our return on investment does not meet our or market expectations, this could materially and adversely affect our business, cash flows, results of operations and financial condition.

7. *Our Company has not adequately complied with some of the provisions of the Companies Act, 2013. There are certain discrepancies/errors noticed in some of our corporate records and forms filed with the Registrar of Companies and other provisions of the Companies Act. Any penalty or action taken by any regulatory authority in future for such non-compliance could impact the reputation and financial position of the Company to that extent.*

There are certain discrepancies, errors, and delays in filings noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of the Companies Act, 2013. Over the last ten years, our Company has been non-compliant with certain provisions of the Companies Act, 2013, including Sections 77, 129, and 137, such as non-preparation of Cash Flow Statements in the past, non-filing of certain RoC forms like Form CHG-1 for creation of charges on term loans (which are no longer outstanding as on the date of Red Herring Prospectus), and non-preparation of Consolidated Financial Statements from FY 2020-21 to 2023-24 for its associate company, Aioi Systems India Private Limited. The Company has now prepared audited Consolidated Financial Statements for FY 2020-21 to 2023-24, which were approved by the Board of Directors on September 22, 2025. Further, the Company has submitted the compounding applications for the said non-compliance.

Also, there are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, wrong attachments, unsigned attachment, incomplete disclosures and typographical errors in forms filed in ROC filing made by our company. Further, there has been delays in filing of certain statutory forms, which were subsequently filed with payment of additional fees to the RoC.

We have, however, taken steps to regularize our compliances to the extent possible and has appointed Vaibhav Nandkumar Salunke as Company Secretary and Compliance Officer for better management of compliances and to reduce the risk of non-compliance in the future. Although, there are no regulatory or legal proceedings have been initiated against us in relation to such non-compliances as on the date of this Red Herring Prospectus, we cannot assure you that the relevant regulatory authorities will not initiate any action in the future or that such records will not be required for any regulatory, legal, or corporate purposes. Any adverse regulatory action, imposition of penalties, or inability to produce requisite historical corporate records, if initiated in the future, could have an adverse effect on our business, financial condition, results of operations, and reputation.

8. The restated consolidated financial statements have been provided by peer reviewed chartered accountants who is not statutory auditor of our Company.

The restated consolidated financial statements of our Company for the period ended October 31, 2025 and Fiscal Years ended 2025, 2024 and 2023 has been provided by a peer reviewed chartered accountant who is not the statutory auditor of our Company. However, our statutory auditor holds a valid peer reviewed certificate but due to his preoccupation the restated consolidated financial statements has been provided by the said peer reviewed chartered accountant.

9. We do not own our registered office, Assembly unit and Sales & Service Support offices from where we carry out our business activities.

Our registered office, Assembly unit and two of our Sales & Service Support offices, from which we carry out our business activities, are being taken by us on rent. In the event of termination/non-renewal of said agreements, we may be required to vacate the said premises which may cause disruption in our business and impede our effective operations which could temporarily impact on our business operations until we get suitable alternative premises. For details on the duration of existing rent/lease agreements for our premises, please refer to the section titled **“Our Business- Material Properties”** beginning on page 112 of this Red Herring Prospectus.

There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our business operations which could materially and adversely affect our financial condition and results of operations.

10. We have experienced negative operating cash flows in the past. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions.

As per our Restated Consolidated Financial Statements, our cash flows are as set out below: -

(Rs. in lakhs)

Particulars	For the period/year ended			
	31-Oct-2025	31-Mar-25	31-Mar-24	31-Mar-23
Net cash flow from operating activities	1233.54	(72.47)	(641.32)	303.18
Net cash flow from investing activities	(347.72)	(484.70)	2.54	(141.22)
Net cash flow from financing activities	(966.74)	908.25	710.39	106.22

Cash flow of a company is a key indicator to show the extent of cash generated to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Any negative cash flows in the future could adversely affect our business, results of operations and financial condition. For further details, kindly refer section titled **“Financial Information of the Company”** beginning on Page 170 of this Red Herring Prospectus. Negative cash flows over extended periods or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. We cannot assure you that our net cash flows will be positive in the future. In the event we witness negative cash flows in the future, our results of operations, cash flows and financial condition may be adversely affected.

11. Providing advance and performance bank guarantees is an integral part of our business operations. Failure to obtain these guarantees, or their invocation, could adversely affect our cash flow and overall financial position.

As per the terms and conditions specified by our customers in their purchase orders, we are required to secure advanced or performance bank guarantees from scheduled commercial banks to be furnished upon receipt of purchase orders and remain valid up to successful delivery of the products and services or for such extended period as defined in the specific purchase order. Our inability to arrange such guarantees or the invocation of such guarantees may adversely affect our cash flows and financial condition. We may not be able to continue obtaining new advanced and performance bank guarantees required to match our business requirements. Though there has been no such instance in past, if we are unable to provide sufficient collateral to secure such bank guarantees, our ability to procure new purchase orders could be limited and could have a material adverse effect on our business, results of operations and financial condition. Providing security to obtain advanced and performance bank guarantees also increases our working capital requirements. There has been no invocation of such bank guarantees in past in relation to our purchase orders, however, any such invocation in future could have an adverse effect on our business, results of operation, and financial condition.

Our outstanding bank guarantee as at October 31, 2025, March 31, 2025, March 31, 2024 and March 31, 2023 is Rs. 260.14 Lakhs, Rs. 115.96 Lakhs, Rs. 125.31 Lakhs and Rs.16.50 Lakhs, respectively. For details, please refer to **“Note-29- restated consolidated statement of contingent liabilities”** under Section titled **“Financial Information of the Company”** of this Red Herring Prospectus

12. Trade receivables and Inventories form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our sales, profitability, cash flow and liquidity.

Trade receivables and Inventories form a major part of our current assets. The results of operations of our business are dependent on our ability to effectively manage our trade receivables and inventory. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. During the period ended October 31, 2025 and Fiscals 2025, 2024 and 2023 our trade receivables were Rs. 2555.53 Lakhs, Rs. 5613.24 lakhs, Rs. 4048.92 lakhs and Rs. 1373.13 lakhs respectively which accounted for 46.57%, 42.62%, 39.21% and 18.18% of total revenue from operations respectively for the said period. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations. Such situation may require an additional and consequently, higher finance cost which will adversely impact our profitability.

Further, to effectively manage our inventory, we must be able to accurately estimate customer demand / potential orders and supply requirements and purchase new inventory accordingly. However, if we misjudge expected customer demand / potential orders, it could cause either a shortage of products or an accumulation of excess inventory. During the period ended October 31, 2025 and Fiscals 2025, 2024 and 2023 our inventories were Rs. 2515.42 Lakhs, Rs. 1648.00 lakhs, Rs. 1392.35 lakhs and Rs. 917.37 lakhs respectively.

Accordingly, we may be subject to working capital risks due to delays or defaults in payment by customers or due to shortage or an accumulation of excess inventory. Our inability to meet our working capital requirements may adversely affect our results of operations. For details related to inventories, trade receivables and working capital requirements kindly refer section titled “**Financial Information of the Company**” beginning on page 170 and “**Objects of the Issue**”- To Meet Working Capital Requirements of our Company on page 80 of this Red Herring Prospectus.

13. Any disruptions or shutdown of our business operations at our existing Assembly unit could have an adverse effect on our business, financial condition and results of operations.

We conduct our business operations from our Assembly unit located at Pune, Maharashtra. Our business is dependent upon our ability to effectively manage our facility, which is subject to various operating risks, including those beyond our control, such as the machinery breakdown, failure of equipment or industrial accidents, labour disputes, severe weather conditions, fire, power interruption, natural disasters etc. While there have been no such instances during the period ended October 31, 2025 and Fiscals 2025, 2024 and 2023, any significant malfunction or breakdown of our machinery, our equipment, our production setup, our IT systems or any other part of our business processes or systems may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair or properly maintain our assets in a timely manner or at all, our operations may need to be suspended until we repair or replace them and there can be no assurance that the new assets will be repaired, procured and/or integrated in a timely manner.

We also require substantial electricity for our facilities which is sourced from state electricity board. In case, the supply is not available for any reason, our production schedule may be hampered or if our electricity suppliers increase the price for electricity, our cost of production and profitability would be materially adversely affected. Further, natural disasters or adverse conditions may occur in the geographical areas in which we operate including severe weather, tropical storms, floods, excessive rainfalls as well as other events beyond our control. If for any reason electricity is not available, we may need to shut down our plants until an adequate supply of electricity is restored. Interruptions of electricity supply can also result in production shutdowns; increased costs associated with restarting production and the loss of production in progress.

Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. While we seek to ensure a continuous supply of our products to our customers, our customer relationships, business and financial results may be adversely affected by any disruption of operations at our existing Assembly unit due to any of the factors mentioned above.

14. Our business will suffer if we fail to anticipate and develop new industrial solutions and enhance existing solutions in order to keep pace with rapid changes in technology and the industries on which we focus.

We provide Industrial Digital Automation Solutions, to automate industrial processes, by integrating the shop floor equipments and processes with the IT Layer, thus, reducing or eliminating human intervention. Such Information Technology market is characterized by rapid technological changes, evolving industry standards, changing customer preferences, and new service introductions that could result in technology obsolescence. Our future success will depend on our ability to anticipate these advances, enhance our existing offerings or develop new service offerings to meet customer needs, in each case, in a timely manner. We may not be successful in

anticipating or responding to these advances on a timely basis, or at all. If we do respond, the solutions or technologies we develop may not be successful in the marketplace. We may also be unsuccessful in stimulating customer demand for new and upgraded industrial solutions, or seamlessly managing new automations or transitions. Our failure to address the demands of the rapidly evolving IT environment, particularly with respect to emerging technologies, and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition. In addition, our success also depends on our ability to proactively manage our portfolio of technology alliances.

Additionally, during the regular course of operating our business, we may adjust our future plans as a result of our research, experience, technology evolution and market demand. Accepting unforeseen business opportunities may also result in a business model change. We cannot guarantee that any adjustment in our future plans will become successful or be more successful than our current business model. A shift in our plans may result in the use of other technologies. Other technologies may in the future prove to be more efficient and/or economical to us than our current technologies. We cannot guarantee that any change in technology will become successful or be more successful than our current technology.

15. We use third party software's for our design and developments and lack of support or enhancement of such software could adversely affect our business and operations.

We currently depend on third-party software's for designing and development. If such software products were to become unavailable for any reason, we might experience delays or increased costs in the development and delivery of our automated industrial solutions and services. For our business activities, we typically rely on software that we license from third parties. These third-party software licenses may not continue to be available to us on commercially reasonable terms or at all. The loss of the license to use, or the inability by licensors to support, maintain, or enhance any of such software could result in increased costs, lost revenues or delays until equivalent software is internally developed or licensed or taken from another third party. Such increased costs, lost revenues or delays could adversely affect our business and operations.

16. Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.

We operate through our Assembly unit located at Pune, Maharashtra. Due to the geographical concentration of our business operations in Pune district, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our business operations, significant delays in the transport of our products and raw materials, loss of key managerial personnel or senior management personnel, and/or otherwise adversely affect our business, financial condition and results of operations. While there have been no such regional disruptions during the period ended October 31, 2025 and Fiscals 2025, 2024 and 2023, however, we cannot assure you that there will not be any such disruption in the future.

In addition, we generate major domestic sales through our customers situated in Haryana and Maharashtra. For the period ended October 31, 2025 and Fiscal year ended March 2025, March 2024 and March 2023, the largest share of our revenue, accounting for 51.05%, 56.10%, 64.20% and 50.88% respectively, originated from Haryana. For details on geographical-wise revenue, please refer to section ***“Our Business – Our Business Strength - Enduring relationships with customers across geographies”*** on Page 112 of this Red Herring Prospectus. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions, which may adversely affect our business prospects, financial conditions and results of operations.

17. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.

Our operations are exposed to risks such as accidents, equipment failure, fire, natural calamities, terrorism, and other force majeure events that could cause injury, loss of life, or damage to property and equipment. For such happenings, we have availed various policies for our registered office and assembly unit like Burglary Insurance from National Insurance Company Limited covering loss or damage to property due to burglary or theft. Our Sookshma Udyam Suraksha Policy (from National Insurance Company Limited and Bajaj Allianz General Insurance Company Limited) and National Bharat Laghu Udyam Suraksha Policy (from National Insurance Company Limited) provide protection to our business premises, machinery, and stock against risks such as fire and allied perils. We also maintain Transit Insurance from Tata AIG General Insurance Company Limited covering loss or damage to goods while in transit, and Vehicle Insurance from different insurers covering risks of damage and third-party liability relating to our vehicles. The Company has also taken New India Bharat Sookshma Udyam Suraksha policy from The New India Assurance Co. Ltd., for its Sales & Service Support Office situated in Gurugram and Kolhapur to cover risks against fire and allied perils. Further, our Promoters are insured under Life Insurance policies with Max Life and Aditya Birla Sun Life to provide financial security to nominees, along with Personal Accident Insurance from Tata AIG General Insurance Company Limited covering accidental death, disability, and injury. For the welfare of our employees,

Adisoft Technologies Limited

we have taken an Accident Care Individual Insurance Policy as well as a Health Insurance Policy, providing them coverage against accidents, hospitalization, and medical expenses. While these policies provide protection against specific risks, they may not cover all potential losses, and there is no assurance that future claims will be settled fully or promptly.

While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as cash in transit etc. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that any claims under the aforesaid insurance policies will be fully honored, partially honored, or paid in a timely manner, nor can we assure that we have sufficient insurance coverage (either in terms of amount or risks covered) to address all material losses. Our insurance policies are subject to annual renewal and may include exclusions or limitations in coverage, and we cannot guarantee that we will be able to renew them on similar or acceptable terms.

In the event of a significant uninsured loss or if we face large claims exceeding our insurance coverage, changes in our insurance terms, changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, financial condition, cash flows and results of operations. Even if our insurance coverage is adequate to cover direct losses, we may not be able to take timely or effective remedial or other appropriate actions in timely manner or at all.

Please find below insurance coverage as a % of total assets for last three financial years and period ended October 31, 2025:

(Rs. In Lakhs except percentage)

18. Our automation solution is customer specific and a solution designed cannot be used for multiple customers.

We specialize in providing automation solution to our customers based on their custom and individual preferences. After receiving orders from customers, we dedicate our technically qualified team specially to design automation solution for the customers as per their requirements which are model-specific. A solution designed for a particular model for any customer cannot be used in other models of the same customer or any other customers. This nature of our business requires us to design specifically for each of our orders and we cannot generate repeated sales from one designed automation solution. This may possess operational risk to our business, as completion of any particular order is a lengthy process and requires substantial amount of working capital and human efforts. Our inability to manage them efficiently may possess serious risk to our business and can adversely impact our revenue from operations, profitability and goodwill.

19. Our Associate i.e. AIOI Systems India Private Limited may not perform as expected, and any adverse developments relating to our Associate Company may impact our financial results and reputation.

In February 2021, our Company, together with AIOI Systems Co. Ltd., Japan, and AIOI Systems India Private Limited, entered into a tripartite joint venture agreement. Under this arrangement, AIOI Systems Co. Ltd. holds the majority stake of 76%, while our Company holds 24% of the equity share capital. The associate company is not under our full control, and its performance is influenced by various factors beyond our control, including its operational, financial, and compliance capabilities.

There can be no assurance that our associate will perform in line with our expectations or business plans. Any adverse developments relating to these joint ventures—such as financial underperformance, management disputes, legal or regulatory non-compliance or reputational issues—could have a material adverse effect on our consolidated financial results. In addition, such developments could negatively impact our brand, strategic relationships and stakeholder confidence.

Furthermore, if we are required to provide financial support or absorb losses from this associate company, it may affect our liquidity position and profitability. If the associate fails to meet its obligations our investment may be impaired, and we may be required to write down or write off such investments, which could materially affect our financial condition.

For details related to Group Company kindly refer section titled ***“Our Group Company”*** beginning on Page 243 of this Red Herring Prospectus and for details related to non-current investment kindly refer section titled ***“Financial Information of the Company”*** beginning on Page 170 of this Red Herring Prospectus.

20. *We experience the effects of seasonality, which may result in our operating results fluctuating significantly and also, reduce our sales.*

We are subject to seasonal factors, which make our operational results very unpredictable and thus results of one reporting period may not be necessarily comparable with preceding or succeeding reporting periods. For instance, our revenue in first half of financial years ending March 31, 2025, 2024 & 2023 respectively is 38.45%, 28.55% & 53.49% of total revenue, whereas the same in second half for the said financial years was 61.55%, 71.45% and 46.51% respectively. During periods of lower sales activities, we continue to incur substantial operating expenses, but our revenues remain usually lower. The sales that were supposed to take place during one financial year may get added to sales of the next financial year and therefore results of even full financial year may not necessarily be comparable to the other financial year. Any inability to manage the impact of seasonality effectively could materially and adversely affect our business, results of operations and financial condition.

21. *Any failure to accurately estimate the overall risks, revenues or costs in respect of a project, may adversely affect our profitability and results of operations. Our actual cost in executing a contract may vary substantially from the assumptions underlying our contract.*

Our revenues and expenses are difficult to predict and can vary significantly from period to period. Under the terms and conditions of agreements for our projects, we generally agree to receive from the customers an agreed sum of money, subject to contract variations covering changes in the customers' project requirements. We may enter into agreements for providing services in the future that may not contain price escalation clauses covering increases in the cost of technical personnel, maintenance, and other factors and hence, factors like increase in wages for IT professionals could reduce our cash flows and profit margins. And accordingly, our actual expenses in providing our services may vary substantially from the assumptions underlying our bid. Our ability to pass on increases in costs may be limited in the case of contracts with limited or no price escalation provisions, and there can be no assurance that these variations in cost will not lead to financial losses for our Company, which could have a material adverse effect on our cash flows, business, financial condition, and results of operations and eventually, cause our share price to decline.

22. *The product trials or testing done by customers may become unsuccessful if any technical issue is identified during such trails. Further, after selling, failure to offer client support in a timely and effective manner may adversely affect our relationships with our clients and have an adverse impact on results of operations and financial conditions.*

The customer is invited to attend and witness the functional trials, which serve as a critical approval milestone. The system is evaluated for Dimensional accuracy and fitment compatibility, Functional cycle time adherence, Process flow validation, Safety, reliability and compliance with technical specifications. In the event that product trials or testing are unsuccessful, the process of remaking the product or identifying the root cause of the default may require additional time. Where the project is time-sensitive, such delays may result in cost overruns, penalties, or cancellation of the order by the customer. In such circumstances, our Company may be required to bear the associated financial burden or loss of business.

Further, our clients from time to time require our support team to assist them in using our products effectively, help them in resolving post deployment issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our clients effectively in a timely manner or at all, it could adversely affect our ability to retain existing clients and could prevent prospective clients from adopting our services. We may be unable to respond quickly enough to accommodate short-term increases in demand for client support. We also may be unable to modify the nature, scope and delivery of our client support to compete with changes in the support services provided by our competitors. Increased demand for client support, without corresponding revenue, could increase costs and adversely affect our reputation, business, results of operations and financial condition. We could become liable to customer claims, suffer adverse publicity and incur substantial costs as a result of defects in our products or services, which in turn could adversely affect our results of operations. Any failure to maintain high-quality client support, or a market perception that we do not maintain high-quality client support, could adversely affect our reputation, business, results of operations and financial condition

23. *We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.*

We have entered into various transactions with our Directors/ Promoters, group company and Promoter Group members. These transactions, inter-alia include, remuneration, loans and advances, sales, purchase etc. For details, please refer to "**Note-30- Related Party Transactions**" under Section titled "**Financial Information of the Company**" of this Red Herring Prospectus. Our Company has entered such transactions due to easy proximity and quick execution on arms-length price in compliance with provisions of Companies Act 2013 and other applicable laws. Although all related-party transactions that we may enter into in the future are subject to approval by Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

24. Registration of the trademarks which we are using for our business is under process and is yet to be received. We may be unable to protect our intellectual property or knowhow from third party infringement which could harm our brand and services.

We have not registered the trademark which we are using for our business. Even though, we have filed the application for registration of trademark before the Registrar of Trademarks, we do not have any control over the registration of the trademark and same may also be opposed by third parties that claim to have prior or superior rights. Such actions are not within our control and can severely impact business and may result in requirement to undertake rebranding exercises, all of which result in additional costs for us and could also impact our reputation. We routinely monitor third party trademarks, including domain names, by keeping a check on the use of our trademarks. However, it is possible that we are not aware of misuse of our trademarks and this could potentially cause loss of our reputation, which could impact our business and may even affect our goodwill. The use of a deceptively similar or identical third-party mark may result in a loss/injury to us. Such an action may also become a lengthy and costly exercise for us and may not always be in our favour. For further details on above and other trademarks, please refer to chapter titled “**Our Business**” beginning on page 112 of this Red Herring Prospectus.

25. Our Order Book may not be representative of our future results and our actual income may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations.

Our Order Book of Rs. 4432.61 Lakhs as on April 15, 2026 has been calculated on the basis of the aggregate value of work orders for some of our ongoing projects and estimated value of work orders awarded to us. For the purposes of calculating the Order Book value, we do not take into account any escalation or change in work scope of our ongoing projects as of the relevant date. The manner in which we calculate and present our Order Book is therefore not comparable to the manner in which our revenue from operations is accounted, which takes into account revenue from work relating to escalation or changes in scope of work of our work orders. The manner in which we calculate and present our Order Book information may vary from the manner in which such information is calculated and presented by other companies. Our Order Book does not necessarily indicate our future earnings and should not be considered as a substitute for performance measures. We may not be able to achieve our expected margins or may even suffer losses on one or more of these contracts or we may not be able to realize the revenues which we anticipated in such work orders. In addition, there can be no assurance that we will be awarded the projects that we currently expect.

We may encounter problems in execution as ordered, or executing it on a timely basis. Moreover, factors beyond our control may postpone a project or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions, and other types of difficulties or obstructions. Delays in the completion of an order can lead to clients delaying or refusing to pay the amount, in part or full. In addition, even where a project proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. Any delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default in regard to our Order Book or any other uncompleted projects, or disputes with clients in respect of any of the foregoing, could materially harm our cash flow position, revenues and earnings.

26. We are also engaged in trading of automation products, which has lower margins compared to customized automation solutions. Any increase in trading revenues relative to automation solutions may adversely affect our margins.

In addition to offering customized automation solutions, we are also engaged in the trading of automation products. While trading activities contribute to our revenue, they generally yield lower profit margins compared to our customized, value-added automation projects.

Below is the summary of our Product-wise revenue:

(₹In Lakhs)

Particulars	Pd. ended Oct. 2025	%	FY 2024-25	%	FY 2023-24	%	FY 2022-23	%
Automation solutions	3,291.79	61.31	9197.18	70.56	7746.95	75.68	5737.04	76.32
Trading of automation products	2,076.90	38.69	3837.24	29.44	2489.81	24.32	1779.72	23.68
Total	5,368.68	100.00	13034.43	100.00	10236.76	100.00	7516.76	100.00

If the proportion of our revenue derived from trading activities increases relative to our revenue from customized automation solutions, our overall gross margins and profitability may be adversely affected. This shift in revenue mix could occur due to a variety of factors,

including changes in market demand, competitive pricing pressures, delays in execution of customized projects or strategic business decisions.

A sustained or significant increase in the share of low-margin trading activities in our total revenue may dilute our profitability, affect our return on capital and result in lower earnings. This, in turn, could adversely impact investor perceptions, valuations, and our ability to reinvest in high-margin areas of our business.

27. We are subject to confidentiality obligations under Non-Disclosure Agreements (NDAs), and any breach or non-compliance may result in legal and financial liabilities.

We are required to enter into Non-Disclosure Agreements (NDAs) with certain clients, partners, vendors, and other stakeholders in the ordinary course of our business. These NDAs impose strict obligations on us and our personnel to maintain the confidentiality of sensitive and proprietary information.

Any actual or alleged breach of confidentiality obligations, whether due to inadvertent disclosure, employee negligence, cybersecurity incidents, or otherwise, may lead to claims against us for damages, termination of contracts, or reputational harm.

While we have implemented internal policies and procedures to ensure compliance with such confidentiality obligations, including employee training and restricted access protocols, we cannot assure you that there will be no violations. Any such event could adversely affect our business operations, financial condition, and prospects.

28. Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain our historical growth rates.

Our business has experienced significant growth in prior periods. Our revenue from operations has increased from Rs. 7554.27 lakhs in financial year 2022-23, to Rs. 10326.85 Lakhs and Rs. 13171.78 Lakhs in Financial Years 2023-24 and 2024-25 respectively and our Profit after tax has increased from Rs. 607.93 lakhs in FY 2022-23 to Rs. 1175.57 Lakhs and Rs. 1611.08 lakhs in FY 2023-24 and 2024-25 respectively. We cannot assure you that we will be able to sustain the levels of revenue and profit growth that we have had in the past. Further, a number of our strategic initiatives are in initial stages. While we may experience initial success with such initiatives, there is no assurance that these will succeed in the long term.

29. Our business is dependent on the capital expenditure cycles of client industries, and any slowdown or downturn in such industries may reduce demand for our solutions and adversely affect our business, revenues, and financial condition.

The demand for our automation and technology solutions is closely linked to the investment and capital expenditure cycles of the industries we serve, including automotive, pharmaceutical, white goods, manufacturing, and other industrial sectors. These industries typically undertake automation projects when they are expanding, upgrading, or modernizing their production lines. During periods of reduced economic activity, industry downturns, regulatory uncertainty, or adverse market conditions, clients may defer or cancel their investment plans, directly impacting the demand for our offerings.

Any slowdown in capital expenditure by these industries could lead to fewer projects, longer sales cycles, and pricing pressures, thereby reducing our revenues and margins. Our revenues may be particularly affected in case of adverse conditions in the automotive or manufacturing sectors, which presently contribute a significant portion of our business.

Additionally, prolonged downturns may also intensify competition as multiple solution providers chase a smaller pool of opportunities, which could force us to reduce prices or accept less favourable contract terms. In such scenarios, our ability to maintain profitability and generate adequate cash flows may be adversely affected.

Further, a decline in demand could also limit our ability to optimally utilize our workforce, infrastructure, and working capital, thereby affecting overall operational efficiency. As our business is directly tied to the cyclical investment patterns of client industries, any extended downturn in such sectors may materially and adversely impact our business operations, financial condition, and results of operations.

30. A shortage, non-availability or adverse price movement of electricity, power & fuel may affect our business operations and have an adverse effect on our business, results of operations and financial condition.

Our business operations require a continuous supply of electricity, power & fuel to carry out our business operations in our Assembly unit situated in Pune. Any adverse price movement or shortage or non-availability of electricity, power & fuel may affect our operations. We currently source our power requirements from state electricity boards. If supply is not available for any reason, we will need to rely on alternative sources, for which we may not be able to consistently meet our requirements and are high on costs, thereby adversely affecting our cost and profitability. Further, if, for any reason such electricity is not available, we may need to shut down our Assembly

unit until an adequate supply of electricity is restored. Our customer relationships, business and financial results may be affected by any disruption of business operations, including as a result of any of the factors mentioned above.

31. *Technology failures or Cyber-attacks or other security breaches could have a material adverse effect on our business, results of operation or financial condition.*

IT systems are critical to our ability to manage our operations. Our IT systems enable us to coordinate our operations, from planning, raw material ordering, invoicing, delivery, customer relationship, management and decision support. If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure, we could be subject to transaction errors, processing inefficiencies, customer service disruptions and, in some instances, loss of customers. We face cyber threats, threats to the physical security of our facilities and employees, the potential for business disruptions associated with IT failures, natural disasters, or public health crises. We have installed anti-virus software to prevent our systems and infrastructure from being infected and crippled by computer viruses. All our internet facing servers installed at all our data centres as well as at all our offices are also secured with firewalls and intrusion preventions systems to prevent hacking. Even though we have always been cautious in managing our IT system and have not faced any cyber threats in past, if we are unable to protect sensitive information in future, our customers could question the adequacy of our threat mitigation and detection processes and procedures. Due to the evolving nature of these security threats, the impact of any future incident cannot be predicted.

32. *We are exposed to foreign currency fluctuation risks, particularly in relation to export and import of products, which may affect our results of operations, financial condition and cash flows.*

We present our financial statements in Indian Rupees. In FY 2024-25, we had exported our products to Bangladesh amounting to Rs. 397.45 Lakhs which accounted for 3.05% of our total revenue from operations and in the period ended October 31, 2025, we had exported our products to Bahrain amounting to Rs.2.79 lakhs which accounted for 0.05% of our total revenue from operations. We had also imported material from South Korea, China and Japan amounting to Rs. 0.13 Lakhs, Rs. 12.84 lakhs and Rs. 4.48 lakhs in period ending October 31, 2025, FY 2024-25 & 2023-24 respectively, which accounted for 0.003%, 0.14% & 0.05% of our total purchase of goods, respectively. Although we generally seek to pass exchange rate fluctuations to our customers through increases in our prices, there can be no assurance that we will be able to do so immediately or fully, which could affect our business, financial condition, results of operations and cash flows.

Thus, our global operations expose us to foreign exchange rate risks, arising primarily from our receivables and payables. There can be no guarantee that such fluctuations will not affect our financial performance in the future as we continue to expand our operations globally.

33. *Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.*

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a need basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, movement of goods encounters additional risks such as accidents, spoilage etc. and our inability to claim insurance may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

34. *We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business.*

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business,

financial condition and results of operations.

Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorized access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors. While we have not faced any major technological disruptions in the past, we cannot assure you that such disruptions will not occur in the future. Further, if our customers are unable to anticipate and rapidly adapt to technological changes, our business and results of operations will be materially and adversely affected.

35. *Any non-compliance with, and changes in, safety, health and environmental laws and labour regulations may adversely affect our business, prospects, financial condition and results of operations.*

The operations of our Company are subject to a broad range of safety, health, environmental, labour, workplace and related laws and regulations in the jurisdictions in which we operate, which impose controls on the disposal air and water discharges; on the storage, handling, discharge and disposal of waste, and other aspects of our operations. Any accidents at our Assembly unit may result in personal injury or loss of life of our workmen, substantial damage to or destruction of property and equipment resulting in the suspension of operations. Any of the foregoing could subject us to litigation claims which may increase our expenses in the event we are found liable, and could adversely affect our reputation. Additionally, the government or the relevant regulatory bodies may require us to shut down our facility, which in turn could lead to product shortages that delay or prevent us from fulfilling our obligations to customers.

Our Company is also subject to the laws and regulations governing relationships with employees such as minimum wage and maximum working hours, overtime wages, working conditions, hiring and termination of employees, contract labour and work permits. We cannot assure you that we will not be involved in non-compliances, litigation or other proceedings, or be held liable in any litigation or proceedings including in relation to safety, health and environmental matters, the costs of which could turn out to be significant. Failure to adhere to any applicable regulations could result in severe consequences, such as fines, penalties, or even operational shutdowns mandated by regulatory authorities. In addition to these financial liabilities, we could face legal actions from government bodies, non-governmental organizations, or affected communities, leading to costly and prolonged litigation. The impact of such litigations could extend beyond immediate financial costs. It could harm our Company's reputation, erode customer trust, and negatively affect our relationships with stakeholders, including investors, suppliers, and customers. The adverse publicity resulting from environmental violations could damage our brand image, making it difficult to secure new business opportunities or retain existing clients.

Moreover, the financial burden of environmental litigations could strain our resources, affecting our ability to invest in growth initiatives, innovation, or other critical areas of our business. This, in turn, could hinder our competitive position in the market and impact our future net earnings. Hence, any non-compliance with environmental laws poses a substantial risk to our business, with the potential to cause financial, legal, and reputational damage that could have long-lasting effects on our operations and financial health.

36. *Our industrial automation products and services may contain programming or configuration errors or other defects that could harm our reputation, be expensive to correct, delay revenues, and expose us to litigation.*

Our industrial automation products and services are fairly complex. Despite testing prior to the release and throughout the lifecycle of a product or service, our products may sometimes contain programming or errors that can impact their function, performance and security, and result in other negative consequences.

Errors may be found in new products or services or improvements to existing products or services after delivery to our customers. If these defects are discovered after the release of such products to our customers, we may not be able to successfully correct such errors in a timely manner. In addition, despite the extensive tests we conduct on all our products and services, we may not be able to fully simulate the environment in which our products and services will operate in the customers' ecosystem and, as a result, we may be unable to adequately detect the design defects or software errors which may become apparent only after the products are used in an end-user's environment, and users have transitioned to our services. The occurrence of errors, defects and failures in our products and services could result in the delay or the denial of market acceptance of our products and alleviating such errors and failures may require us to incur significant expenditure.

Customers often use our services for critical business processes and as a result, any defect or disruption in our products and solutions, any data breaches or misappropriation of proprietary information, or any error in execution, including human error or third-party activity such as denial-of-service attacks or hacking, may harm our quality. The errors in or failure of our products and services could also result

in us losing customer transaction documents and other customer files, causing significant customer dissatisfaction and possibly giving rise to claims for monetary damages and litigations. The harm to our reputation resulting from such product and service errors and failures may be materially damaging. For further details of our business, please refer to chapter titled “**Business Overview**” beginning on Page 112 of this Red Herring Prospectus.

37. Our Company operates under several statutory and regulatory permits, licenses and approvals. Our inability to obtain, renew or retain the statutory and regulatory licenses, permits and approvals required to operate our business may have an adverse effect on our business & operations.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

We cannot assure you that the approvals, licenses, registrations and permits required will be issued to us and those already issued will not be suspended or revoked in the event of non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any denial, suspension or revocation of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations. Also, our company is in the process of making application for change in its name in some of the required Government approvals, which are not in its name as on the date of this Red Herring Prospectus. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see “**Government and Other Approvals**” on page 237 of this Red Herring Prospectus.

38. We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realization of the price for our industrial automation products and services, which may adversely affect our business operation and financial condition.

The market for our Industrial Digital Automation Solutions is competitive on account of existence of both the organized and unorganized players. In today's rapidly changing business environment, which is marked by technological advancements, shifting government policies, increasing competitive threats and continuous market entries, sustaining operations and delivering competitive solutions to Customers is a significant challenge. The principal elements of competition in industrial automation industry are price, timely delivery & reliability safety & efficiency and most importantly our pace in keeping up with the required changing technology in the industry & after sales services. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offer their services at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

Further, new competitors may emerge at any time. Our competitors may be able to respond more quickly to new or emerging technologies or customer requirements, and may bring with them customer loyalties that may limit our ability to compete, which could decline our sales. In addition, a variety of known and unknown events could have a material adverse impact on our ability to compete. The success of our products as well as our ability to maintain or increase our sales may also depend upon the effectiveness of our marketing initiatives which may adversely affect our ability to compete effectively. New competitors may include foreign-based companies and domestic producers who could enter our markets. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability.

Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

39. Our Group Company, i.e., Kenmei Automation Private Limited, is been struck off from the register of companies.

Our Group Company, Kenmei Automation Private Limited, has been voluntarily struck off from the records of the Registrar of Companies. This strike-off is being undertaken voluntary by the company and not as a result of any regulatory action, penal proceedings, or defaults. While the past or ongoing association of our Company with an entity undergoing strike-off may be perceived unfavourably by investors, regulators, or other stakeholders, it is important to note that this voluntary strike-off has no adverse impact on our Company or its business operations.

40. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our Industrial Digital Automation Solutions and services or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products, solutions or other concerns, our reputation could be harmed and demand for our products & services could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

41. Our contingent liabilities as stated in our Restated Consolidated Financial Statements could affect our financial condition.

Our contingent liabilities as on October 31, 2025 is Rs. 260.14 lakhs. For further details of the contingent liabilities and commitments of our Company as on October 31, 2025, **Note-29 of “Restated Consolidated Financial Information”** on page 208 of this Red Herring Prospectus. If a significant portion of these liabilities materialize, fully or partly, it could have an effect on our results of operations and financial condition. Further, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

42. Certain of our investments may be subject to market risk and we have not made any provisions for a possible decline of the value of such investments.

We have made certain unquoted investments in equity shares. The value of these investments depends on several factors which are beyond our control, including the prevailing Indian and international economic conditions, inflationary expectations etc. Any decline in the value of these investments could affect our financial condition and results of operations. For details, please refer to **Note 11–Restated Statement of Non-Current Investments** under Section titled “**Financial Information of the Company**” on page 202 of this Red Herring Prospectus.

43. If we are not able to successfully manage our growth, our business and results of operations may be adversely affected.

Continued growth of our business and customer base requires us to expand our product and service portfolio, strengthen our service quality, expand and enhance our sales channels, better manage our supply chain, upgrade our information systems and technologies and devote other resources to our business expansions, among others. As we continue to grow, managing our business will become more complicated as we develop a wider product mix, some of which we may have less experience in. In addition, as we increase our service offerings, we will need to work with a larger number of business partners and maintain and expand mutually beneficial relationships with our existing and new business partners. Our inability to manage the expansion of range of our services, customer base and operational capacities, and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition.

We cannot assure you that we will be able to effectively manage our growth, that our current personnel, infrastructure, systems, procedures and controls or any measures to enhance them will be adequate and successful to support our expanding operations or that our strategies and new business initiatives will be executed successfully. Our failure to manage our anticipated growth effectively could reduce our ability to execute our business strategies, recruit and retain personnel, innovate, and manage costs all of which could adversely affect our business, results of operations, cash flows and financial condition. In addition, the availability of funds plays a crucial role for growth and expansion of the business. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. Any downgrade in our credit ratings could increase our borrowing costs and adversely affect our access to capital. Further, in case we decide to raise additional funds through the issuance of equity or equity linked instruments, the interests of our shareholders may be diluted. Further, if we decide to meet our capital requirements through debt financing, our interest obligations shall increase and we may be subject to additional restrictive covenants under our respective financing arrangements. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations and financial condition could be adversely affected.

44. Our directors have no prior experience in managing a listed company, which may pose challenges in complying with regulatory requirements.

None of our Directors possess experience of serving on the board of any listed company and accordingly, may not be adequately well-versed with the activities or industry practices undertaken by the listed company. We cannot assure you that this lack of adequate experience will not have any adverse impact on the management and operations of our Company. Further, our Company will also be subject to compliance requirements under the SEBI Listing Regulations and other applicable law post listing of the Equity Share on the Stock Exchanges. With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. Our Board

is capable of efficiently managing such compliance requirements including by engaging professionals having expertise in managing such compliances. Failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

45. *The implementation process of Industrial automation solutions may in some cases be time consuming, and any failure to satisfy our customers or perform as desired could harm our business, results of operations, and financial condition.*

Our services are complex and are deployed in a wide variety of network environments. Designing and implementing Industrial automation solutions is a complex and lengthy process since we often customize our services for customer's requirements and environment. Inability to meet these requirements of our customers may result in dissatisfaction and/or damage to our reputation, which could materially harm our business. In addition, if our customers do not use our services as intended, inadequate performance or outcomes may result. It is possible that our services may be used by customers with smaller or less sophisticated IT departments, potentially resulting in sub-optimal performance at a level lower than anticipated by the customer. As our customers rely on our services to address important business goals and challenges, the incorrect or improper use or configuration of our services, or failure to properly provide implementation or analytical or maintenance services to our customers may result in contract terminations or non-renewals, reduced customer payments, negative publicity, or legal claims against us.

46. *We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.*

Our success heavily depends on the efforts and abilities of our Promoters, along with support of our Key managerial personnel. We are dependent on our Promoters and Key Managerial Persons to manage our current business operations. The loss of any of our Promoter and/or Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoter and/or Key Managerial Personnel may lead to loss of technical knowledge which may materially and adversely impact our business, results of operations, and financial condition. For further details of our Directors and Key Managerial Personnel, please refer to Section **"Our Management"** on page 152 of this Red Herring Prospectus.

47. *We have incurred indebtedness which exposes us to various risks which may have an effect on our business and results of operations*

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on October 31, 2025, our total outstanding indebtedness was Rs. 1968.21 lakhs. Our existing operations and execution of our business strategy may require substantial capital resources and we may incur additional debt to finance these requirements in the future. However, we may be unable to obtain sufficient financing on terms satisfactory to us, or at all. If interest rates increase it will be more difficult to obtain credit. There have been instances of delays in payment of dues to financial institutions by our company in the past. While we strive to maintain sound financial practices, including timely repayment of obligations, past instances of delays may impact investor confidence and our ability to meet future financial commitments. These delays may have arisen due to various factors, including but not limited to liquidity constraints, or mismanagement of cash flows. Despite our proactive measures to address these challenges and improve our financial position, there remains a risk of defaults or continued delayed repayments, which could adversely affect our reputation and creditworthiness.

There can be no assurance that we will be able to comply with our current financing agreements or continue to access funds, including by way of short-term borrowings, on acceptable terms or at all. While we seek to mitigate against such risks by exploring favourable funding options from banks/financial institutions, there is no assurance that we will be successful in doing so. Any failure to obtain the requisite funds to meet our requirements or expand or modernize existing capabilities could result in our inability to effectively compete with other players in the industry, which could have a material adverse effect on our profitability, cash flows and results of operations.

Further, our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a shorter notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see **"Statement of Financial Indebtedness"** on page 222 of this Red Herring Prospectus.

48. Loans availed by Our Company has been secured on personal guarantees of our directors.

Our directors namely Ajay Chandrashekhar Prabhu and Preeti Ajay Prabhu has provided corporate/personal guarantee to secure a portion of our existing borrowings taken from the banks and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the guarantees provided by our Promoter and Director may be invoked, which could negatively impact the reputation of our Company. We may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation.

Furthermore, in the event that our Promoters and Directors withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. In addition, our Promoter and Directors may be required to liquidate his shareholding in our Company to settle the claims of the lenders, thereby diluting his shareholding in our Company. We may also not be successful in procuring alternate guarantees satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer **“Statement of Financial Indebtedness”** on page 222 of this Red Herring Prospectus.

49. Our Company has unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans may adversely affect our cash flows.

As a result, any such demand may materially affect our business, cash flows, financial condition and results of operations. For further details, please see the section entitled **“Statement of Financial Indebtedness”** on page 222 of this Red Herring Prospectus.

50. We are required to comply with certain restrictive covenants under our financing agreements. Any non-compliance may lead to, amongst others, accelerated repayment schedule and suspension of further drawdowns, which may adversely affect our business, results of operations, financial condition and cash flows.

The loan agreements entered into by us with banks contain specific covenants which require us to obtain the prior approval/ permission from the banks on the occurrence of certain events such as formulation of any scheme of amalgamation or reconstruction, undertaking of any new project or expansion, making any substantial change in our management set up, any change in our capital structure resulting in reduction of capital, etc. Though required NOC has already been received, there can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see **“Statement of Financial Indebtedness”** on page 222 of this Red Herring Prospectus.

The market price of the Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company’s performance. As a result of these factors, there can be no assurance that the investors will be able to resell Equity Shares at or above the Issue Price resulting in a loss of all or part of the investment.

69. *We may be subject to surveillance measures, such as the Additional Surveillance Measures (ASM) and the Graded Surveillance Measures (GSM) by the Stock Exchanges which may adversely affect trading price of our Equity Shares.*

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advise investors to be extra cautious while dealing in these securities and advise market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Offer due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation. In the event our Equity Shares are subject to such pre-emptive surveillance measures implemented by any of the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

EXTERNAL RISK FACTORS:

74. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries.

75. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or manmade disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavourable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

76. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by Centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

77. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

78. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details, please refer to the chapter **"Government and Other Approvals"** on page 237 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India's Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would influence our profitability.

The Finance Act, 2022 ("Finance Act"), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax ("DDT"), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

79. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

80. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

81. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

82. Investors may be adversely affected due to retrospective tax law changes made by the GoI affecting us.

Certain recent changes to the Income Tax Act provide that income arising directly or indirectly through the sale of a capital asset of an offshore company, including shares, will be subject to tax in India, if such shares derive indirectly or directly their value substantially from assets located in India. The term "substantially" has not been defined under the Income Tax Act and therefore, the applicability and implications of these changes are largely unclear. Due to these recent changes, investors may be subject to Indian income taxes on the income arising directly or indirectly through the sale of the Equity Shares. In the past, there have been instances where changes in the Income Tax Act have been made retrospectively and to that extent, there cannot be an assurance that such retrospective changes will not happen again.

83. *Any downgrading of India's sovereign rating by an independent agency or restrictions on ability of Indian companies to raise foreign capital may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares. Further, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under the Foreign Exchange Management Act (the "FEMA") and the rules thereunder. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals for the same will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

84. *Our business and activities are regulated by the Competition Act.*

The Competition Act, 2002 (the "Competition Act") was enacted for the purpose of preventing practices having an adverse effect on competition in India and has mandated the Competition Commission of India (the "CCI") to regulate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to adversely affect competition in India is void and may result in substantial penalties. Any agreement among competitors which directly or indirectly determines purchase or sale prices, directly or indirectly results in bid rigging or collusive bidding, limits or controls production, supply, markets, technical development, investment or the provision of services, or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or types of goods or services or number of clients in the relevant market or any other similar way, is presumed to adversely affect competition in the relevant market in India and shall be void. The Competition Act also prohibits the abuse of dominant position by any enterprise. Further, if it is proved that any contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and may be punished. Consequently, all agreements entered into by us may fall within the purview of the Competition Act. The CCI has powers to investigate any agreements, abusive conduct or combination if they adversely affect competition in India. The applicability of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, may adversely affect our business, results of operations and prospects.

Assumptions for working capital requirements

The following table sets forth the details of the holding period (with days rounded to the nearest whole number) considered for the period ended October 31, 2025 and financial years ended March 31, 2025, March 31, 2024 and March 31, 2023, as well as estimated for financial year ended March 31, 2026 and March 31, 2027.

Particulars	Unit	March 31, 2023	March 31, 2024	March 31, 2025	October 31, 2025	March 31, 2026	March 31, 2027
		Audited (Standalone Restated)				Estimated	Projected
Debtors	Days	54	96	134	159	122	108
Creditors	Days	79	103	108	110	71	55
Inventories	Days	48	59	61	120	65	72

Justification:

Debtors	The historical holding days of trade receivables has been ranging from 54 days to 134 days during Fiscal 2023 to Fiscal 2025. As per the current credit terms and prevalent trend of the industry & in order to expand company's operations, the holding level for debtors is anticipated at 122 days and 108 of total revenue from operations during Fiscal 2026 & 2027 respectively, which will contribute towards better working capital cycle in future years.
Creditors	Past trend of Trade payables holding days has been in the range of 79 days to 108 days approximately during Fiscal 2023 to 2025. However, with additional working capital funding, our Company intends to reduce trade payable to 71 days and 55 days during Fiscal 2026 and 2027 respectively, to avail competitive purchase price to increase overall profitability of our Company. By reducing the time, to settle our payables we aim to negotiate more favourable terms and conditions with our suppliers, enabling us to access competitive pricing for the goods we procure.
Inventories	Inventories include raw material and stock in trade. The historical holding days of inventories has been in range of 48 days to 61 days during Fiscal 2023 to 2025. With the perspective to increase business operations, the Company estimates inventories holding days to be around 65 days and 72 days in Fiscal 2026 and 2027 respectively. As business operations are expected to increase in Fiscal 2026 and 2027, it will additionally require higher levels of inventory to meet the required demand and achieve operational efficiency.

ANNEXURE TO THE STATEMENT OF SPECIAL TAX BENEFITS

The information provided below sets out the special tax benefits available to the Company and the Equity Shareholders under the Income Tax Act, 1961 presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

A. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE COMPANY:

- The Company is not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

B. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE SHAREHOLDERS:

- The Shareholders of the Company are not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

NOTES:

1. The above Annexure of special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
2. The above Annexure covers only the special tax benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This Annexure also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
3. The above Annexure of special tax benefits is as per the current direct tax laws relevant for the assessment year 2025-26. Several of these benefits are dependent on the Company or its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
4. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
5. A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 ('the Amendment Act, 2019') with effect from Financial Year 2019-20 granting an option to domestic companies to compute corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and cess of 4%), provided such companies do not avail specified exemptions/ incentives. The option under section 115BAA of the Act once exercised cannot be subsequently withdrawn for any future financial year. The Amendment Act, 2019 further provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax ('MAT') under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available.

In such a case, the Company is not allowed to claim any of the following deductions/ exemptions under the Act: -

- ✓ Deduction under the provisions of Section 10AA.

6. This Annexure is intended only to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of tax consequences, each investor is advised to consult his or her tax advisor with respect to specific tax consequences of his/her investment in the shares of the Company.
7. For the purpose of reporting here, we have not considered the general tax benefits available to the company or shareholders.
8. The above statement covers only certain relevant direct tax law benefits and indirect tax law benefits or benefit.

9. No assurance is given that the revenue authorities/ courts will concur with the views expressed herein. The views are based on the existing provisions of law and its interpretation, which are subject to changes from time to time. We do not assume responsibility to update the views consequent to such changes. GLOBAL ECONOMIC OVERVIEW:

Global growth is projected to remain resilient at 3.3 percent in 2026 and at 3.2 percent in 2027: rates similar to the estimated 3.3 percent outturn in 2025. The forecast marks a small upward revision for 2026 and no change for 2027 compared with that in the October 2025 World Economic Outlook (WEO). This steady performance on the surface results from the balancing of divergent forces. Headwinds from shifting trade policies are offset by tailwinds from surging investment related to technology, including artificial intelligence (AI), more so in North America and Asia than in other regions, as well as fiscal and monetary support, broadly accommodative financial conditions, and adaptability of the private sector. Global headline inflation is expected to decline from an estimated 4.1 percent in 2025 to 3.8 percent in 2026 and further to 3.4 percent in 2027. The inflation projections are also broadly unchanged from those in October and envisage inflation returning to target more gradually in the United States than in other large economies.

Risks to the outlook remain tilted to the downside. Re-evaluation of productivity growth expectations about AI could lead to a decline in investment and trigger an abrupt financial market correction, spreading from AI-linked companies to other segments and eroding household wealth. Trade tensions could flare up, prolonging uncertainty and weighing more heavily on activity. Domestic political tensions or geopolitical tensions could erupt, introducing new layers of uncertainty and disrupting the global economy through their impact on financial markets, supply chains, and commodity prices. Larger fiscal deficits and high public debt could put pressure on long-term interest rates and, in turn, on broader financial conditions. On the upside, activity could be further lifted by AI-related investment and eventually transform into sustainable growth if faster AI adoption translates into strong productivity gains and increased business dynamism. Activity could also be supported by a sustained easing in trade tensions. Policies to foster stability and sustainably lift medium-term growth prospects require a keen focus on restoring fiscal buffers, preserving price and financial stability, reducing uncertainty, and implementing structural reforms without further delay.

(Index, Dec. 2022 = 100)

Figure 3. Tech-Related Trade Flows Continue to Grow Briskly
(Percent, year over year)

Global financial conditions are still accommodative, despite some volatility and rising sovereign yields. Stock prices of major technology companies pulled further apart from prices of other stocks (Figure 2). Financial conditions, overall, changed little or tightened only moderately. The US dollar recovered slightly as the momentum of investors' hedging of exposures slowed but came briefly under renewed pressure following the initiation of an investigation into the Federal Reserve chair.

Against this backdrop of stabilizing trade tensions and supportive financial conditions, the global economy has continued to be remarkably resilient, adapting to the shifting landscape and with momentum varying across countries and sectors. In aggregate, global growth in the third quarter of 2025 decelerated to 2.4 percent on an annualized basis, above expectations but with upside

surprises in some countries offset by downside surprises in others. A boost from aerospace exports lifted growth to 2.2 percent in France, whereas falling exports continued to weigh on activity in Germany, leaving real GDP unchanged from the second to the third quarters. Japan's economy contracted by 2.3 percent, with private and government consumption offsetting some of the contraction driven by private residential investment and exports. China's growth decelerated to 2.4 percent (as per staff estimates), with weak domestic demand, especially in the housing sector, partly offset by resilient exports. Growth in the United States accelerated to 4.3 percent, with a pickup in technology investment and expenditure estimated to add about 0.3 percentage point to average annualized GDP growth in the first three quarters of 2025, offsetting the drag from the federal government shutdown in the last quarter of the year. There are also signs that technology-related investment contributed to activity in Spain and the United Kingdom, though not at the same scale as in the United States. The mirror image of soaring investment in information and technology sectors showed up as strong performance in exports of semiconductors and other equipment in Asian economies. Even as signs of moderation have started to appear in high-frequency data, **global trade** has remained relatively robust, with brisk expansion in technology-related exports offsetting slowing momentum in exports in other product categories (Figure 3).

Global inflation has been largely steady. While the global median of sequential inflation has firmed slightly, for both headline and core rates, annual inflation has been stable, surprising mildly on the downside. That said, in the United States, the high cost of living continues to be the most important concern cited in household surveys, and household expectations for one-year-ahead inflation remain elevated, as do input prices in manufacturing purchasing managers' indexes.

Global Growth

Global growth is expected to decelerate, with apparent resilience due to trade-related distortions waning. At 3.0 percent in 2025 and 3.1 percent in 2026, the forecasts are below the 2024 outcome of 3.3 percent and the prepandemic historical average of 3.7 percent, even though they are higher than the April reference forecast. The upward revision for 2025 is quite broad based, because it owes in large part to strong front-loading in international trade as well as to a lower worldwide effective tariff rate than assumed in the April reference forecast and to an improvement in global financial conditions.

Still, the revision is more pronounced in some countries, such as China, than in others. Front-loading is expected to unwind in the coming quarters, with the payback weighing on activity in 2026 but offset by other developments, so growth overall is revised slightly upward.

Figure 3. Evolution of 2025 Growth Forecasts (Percent)

Global growth is expected to remain steady, with the momentum in high-tech sectors set to slow but to continue to partly offset the drag elsewhere. While tariffs and uncertainty are projected to continue to weigh on the level of activity, the effect on growth is expected to fade during 2026 and 2027. At 3.3 percent for 2026 and 3.2 percent for 2027, the forecasts mark a slight deceleration from the estimated 3.3 percent achieved in 2025. The forecast for 2026 is revised upward by 0.2 percentage point compared with that in the October 2025 WEO, while the forecast for 2027 is unchanged (Table 1; see also Annex Table 1). There are, however, significant revisions for some countries, with the changes in different directions.

Growth in **advanced economies** is projected to be 1.8 percent in 2026 and 1.7 percent in 2027. In the United States, the economy is projected to expand by 2.4 percent in 2026, supported by fiscal policy and a lower policy rate, while the impact of higher trade barriers also gradually wanes. This 0.3 percentage point upward revision from the October forecast reflects a stronger-than expected GDP outturn in the third quarter of 2025, a rebound in activity in the first quarter of 2026 compared with that in the fourth quarter of 2025 following the end of the federal government shutdown, and the associated carryover. Growth is projected to remain solid at 2.0 percent in 2027, with a near-term fiscal boost from tax incentives for corporate investment under the One Big Beautiful Bill Act of 2025. Technology-driven momentum is expected to moderate but still provide some offset to lower immigration and moderating consumption. In the euro area, growth is expected to remain steady at 1.3 percent in 2026 and at 1.4 percent in 2027. The slightly faster growth in 2027 reflects projected increases in public spending, notably in Germany, alongside continued strong performance in Ireland and Spain. The forecast is broadly unchanged from that in October, with the subdued growth rate reflecting unresolved structural headwinds. The impact of the planned increase in defense spending is expected to materialize only in subsequent years, given commitments to reach target levels gradually by 2035. Compared with other regions, the euro area benefits less from the recent technology-driven investment boost. Lingering effects of the persistent rise in energy prices after Russia's invasion of Ukraine will continue to drag on manufacturing, with additional pressure from the real appreciation of the euro relative to currencies of countries exporting similar products. In Japan, growth is projected to moderate from 1.1 percent in 2025 to 0.7 percent in 2026 and to 0.6 percent in 2027. This marks a small upward revision relative to the October figure, reflecting in part the fiscal stimulus package announced by the new government.

In **emerging market and developing economies**, growth is expected to continue to hover just above 4.0 percent in 2026 and 2027. Relative to the projection in October, growth in 2025 for China is revised upward by 0.2 percentage point to 5.0 percent. The revision reflects stimulus measures and additional policy bank lending for investment. Growth for 2026 is also revised upward by 0.3 percentage point to 4.5 percent, reflecting the lower US effective tariff rates on Chinese goods as a result of the yearlong trade truce agreed to in November and stimulus measures that are assumed to be implemented over two years. The economy's growth rate is expected to decelerate to 4.0 percent in 2027 as structural headwinds assert themselves. In **India**, growth is revised upward by 0.7 percentage point to 7.3 percent for 2025, reflecting the better-than expected outturn in the third quarter of the year and strong momentum in the fourth quarter. Growth is projected to moderate to 6.4 percent in 2026 and 2027 as cyclical and temporary factors wane.

In the **Middle East and Central Asia**, growth is projected to accelerate from 3.7 percent in 2025 to 3.9 percent in 2026 and to 4.0 percent in 2027, supported by higher oil output, resilient local demand, and ongoing reforms. Growth is also expected to accelerate in sub-Saharan Africa, from 4.4 percent in 2025 to 4.6 percent in 2026 and 2027, supported by macroeconomic stabilization and reform efforts in key economies. In Latin America and the Caribbean, growth is projected to moderate to 2.2 percent in 2026 and bounce to 2.7 percent in 2027 as countries in the region approach potential from different cyclical positions. In emerging and developing Europe, a sharp slowdown in 2025 to a growth rate of 2.0 percent is expected to reverse, with economies in the region expanding at an average rate of 2.3 percent in 2026 and 2.4 percent in 2027. In most regions, the rebound also reflects the fading effect of shifting trade policies. World trade volume growth is expected to decline from 4.1 percent in 2025 to 2.6 percent in 2026 and increase to 3.1 percent in 2027. These dynamics reflect patterns of front-loading and trade flow adjustments to new policies. Over the medium term, expansionary fiscal packages in economies with current account surpluses are expected to contribute to declining global imbalances. Countering this force is the technology-driven business investment surge, which is expected to continue to attract capital flows to the United States even as it moderates.

Global inflation is projected to continue its decline, with headline inflation falling to 3.8 percent in 2026 and 3.4 percent in 2027. This is virtually unchanged from that in the October 2025 WEO, with overarching trends of softening demand and lower energy prices remaining intact. Divergence between the United States and most other countries lingers (Figure 5).

With pass-through from higher tariffs gradually materializing, US core inflation is projected to return to the country's 2 percent target during 2027. Australia and Norway are also projected to see some drawn-out persistence in above-target inflation. In the United Kingdom, inflation, which increased last year partly due to one-off regulated price changes, is expected to return to target by the end of 2026 as a weakening labor market continues to exert downward pressure on wage growth.

In Japan, inflation is expected to moderate in 2026 and converge toward the country's target in 2027, as food and commodity prices ease. In the euro area, headline inflation is projected to hover around 2 percent, with core inflation projected to decline to that level in 2027. Inflation in China is projected to start rising from low levels, whereas inflation in India is expected to go back to near target levels after a marked decline in 2025 driven by subdued food prices

OVERVIEW OF THE INDIAN ECONOMY:

India's economic journey over the past few years has been marked by remarkable growth and a steady rise in its position on the global stage. After overtaking the United Kingdom (UK) to become the fifth largest economy in Q1 FY23, India has continued this upward trajectory to surpass Japan in June 2025 to become the fourth largest economy in the world. With a nominal Gross Domestic Product (GDP) of Rs. 3,31,03,000 crore (US\$ 3.78 trillion), India's growth reflects a combination of strong domestic demand and policy reforms positioning the country as a key destination for global capital.

Further, India is projected to reach a GDP of Rs. 4,26,45,000 crore (US\$ 5 trillion) by 2027 and is on course to surpass Germany by 2028. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

India's Gross Domestic Product (current prices)

India's Real Gross Domestic Product (GDP) or GDP at Constant Prices stood at Rs. 47.89 lakh crore (US\$ 544.20 billion) in Q1 of FY26, up from Rs. 44.42 lakh crore (US\$ 504.77 billion) in Q1 FY25, registering a growth rate of 7.8%. Nominal GDP or GDP at Current Prices for the same period was estimated at Rs. 86.05 lakh crore (US\$ 977.84 billion), compared to Rs. 79.08 lakh crore (US\$ 898.64 billion) in the corresponding quarter of the previous year, showing a growth rate of 8.8%. As on October 14, 2025, India is home to 123 unicorns, with six new startups achieving unicorn status in 2025. India's current account recorded a deficit of Rs. 21,288 crore (US\$ 2.37 billion) in Q1 FY26 (April-June), compared to Rs. 76,282 crore (US\$ 8.6 billion) in the same period of FY25, according to the Reserve Bank of India (RBI).

The improvement reflects a narrower merchandise trade gap and steady growth in service exports. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With India's economy showing resilient growth, supported by strong domestic demand, policy reforms, and a healthy investment pipeline, several new projects and developments are underway across key sectors. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- On the FDI front, according to the Department for Promotion of Industry and Internal Trade (DPIIT), India's cumulative FDI inflow stood at Rs. 97,22,411 crore (US\$ 1.09 trillion) between April 2000-June 2025; with major share coming from Singapore at Rs. 12,57,392 crore (US\$ 142.88 billion) with a total share of 24%, followed by Mauritius at Rs. 11,10,692 crore (US\$ 126.22 billion) with 21%, the USA at Rs. 5,41,654 crore (US\$ 61.56 billion) with 10%, the Netherlands at Rs. 3,68,694 crore (US\$ 41.90 billion) with 7%, and Japan at Rs. 2,88,090 crore (US\$ 32.74 billion) with 6%.
- As on October 3, 2025, India's foreign exchange reserves stood at Rs. 62,14,364 crore (US\$ 701.24 billion).
- India registered 301 Private Equity (PE) deals worth Rs. 49,745 crore (US\$ 5.7 billion) in Q3 2025, recording a 7% rise over the previous quarter. India-focused PE-VC funds raised Rs. 21,576 crore (US\$ 2.47 billion) across 22 funds, a 148% YoY increase, driven by strong inflows into the IT & ITeS sector (US\$ 2.4 billion). Mumbai led in investment value, while Bangalore topped in deal volume, reaffirming their positions as India's leading investment hubs.
- Foreign Institutional Investors (FIIs) have been net sellers in the Indian equity market since July, withdrawing over Rs. 1 lakh crore (US\$ 11.36 billion) between July 1, 2025, and September 8, 2025, including Rs. 7,800 crore (US\$ 886.4 million) in September, while in August 2025, Domestic Institutional Investors (DIIs) recorded their 25th straight month of net inflows, investing Rs. 94,829 crore (US\$ 10.8 billion), the highest in 10 months. In the first five months of FY26, DIIs invested Rs. 3.24 lakh crore (US\$ 37.6 billion), already 53% of the total investment made in FY25.
- India's manufacturing sector strengthened further in August 2025, supported by firm demand that drove higher factory orders and production. Firms increased input purchases and hiring, backed by improved business confidence. Input inventories continued to rise and finished goods stocks expanded for the first time in nine months. The HSBC India Manufacturing Purchasing Managers' Index (PMI) rose from 59.1 in July to 59.3 in August, marking the strongest improvement in operating conditions in over 17 years, with moderate cost pressures and a sharper rise in selling prices.
- India's Consumer Price Index (CPI)-based inflation eased to an over eight-year low of 1.54% in September 2025, down from 2.05% in August 2025, driven by lower food and fuel prices, according to data from the Ministry of Statistics and Program Implementation (MOSPI).

- India's GST collections reached an all-time high of Rs. 2.37 lakh crore (US\$ 26.93 billion) in April 2025, rising 12.6% YoY. The growth was supported by strong domestic demand and higher imports, with domestic revenues up 10.7% and import revenues up 20.8%.
- Indian airlines carried over 1.36 crore passengers (13.6 million) in June 2025, marking an increase from the same period last year, as per official data.
- The government is focusing on renewable energy sources and has achieved a major clean energy milestone by generating 50% of its power from renewable sources, five years ahead of its 2030 target. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- In May 2025, the overall Index of Industrial Production (IIP) stood at 156.6 (base 2011–12 = 100), reflecting a YoY growth of 1.2%. The mining, manufacturing and electricity sectors stood at 136.6, 154.3 and 216 respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- India's wheat procurement for FY26 has reached 29.7 million tonnes as of May 22, 2025, the highest in four years and up 13.5% YoY. Strong production of 115.43 million tonnes, favourable weather, and bonuses above the Minimum Support Price (MSP) in key states have driven this growth. The Food Corporation of India expects procurement to hit 32.5 million tonnes by season end, raising stocks to 44 million tonnes, well above the 18.4 million tonnes needed for the Public Distribution System.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- The Ministry of Labour & Employment signed an MoU with Zomato on October 14, 2025, to enhance employment opportunities through the National Career Service (NCS) portal. Under the agreement, Zomato will list around 2.5 lakh job opportunities annually, supporting the growth of the gig economy and promoting formal, technology-enabled livelihoods across India.
- In August 2025, Prime Minister Mr. Narendra Modi launched two major agriculture schemes worth Rs. 35,440 crore (US\$ 4 billion) - the PM Dhan-Dhaanya Krishi Yojana and the Mission for Aatmanirbharta in Pulses aimed at boosting self-reliance, productivity, and farmers' income. He also inaugurated and laid foundation stones for projects worth over Rs. 6,200 crore (US\$ 709 million) across agriculture, animal husbandry, fisheries, and food processing sectors.
- On July 5, 2025, the Union Cabinet approved the Rs. 1,00,000 crore (US\$ 11.72 billion) Research, Development and Innovation (RDI) Scheme, launching long-term, low- or zero-interest funding via a special purpose fund under the ANRF to jump-start India's R&D ecosystem and support deep-tech and startup innovation.
- In March 2025, the Government announced several measures to boost industrial growth and investments, including initiatives such as Make in India, Start-up India, PM GatiShakti, and Production Linked Incentive (PLI) Schemes. The Cabinet Committee on Economic Affairs also approved 12 new projects worth Rs. 28,602 crore (US\$ 325.02 million) under the National Industrial Corridor Development Programme (NICDP), spanning 10 states, to strengthen India's manufacturing base and attract investments.
- On March 27, 2025, the Reserve Bank of India proposed doubling the investment cap for individual foreign investors in listed firms from 5% to 10%, with a combined foreign individual limit increasing to 24%, to counter Foreign Portfolio Investment (FPI) outflows.

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- The National e-Governance Division (NeGD) and the Indian Ports Association (IPA) signed an MoU on December 24, 2024, to drive digital transformation in India's maritime sector. The partnership focuses on system integration, software development, and use of emerging technologies to enhance efficiency and modernise port operations.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. Road Ahead

India's economy grew by 6.5% in FY25. With a 7.4% growth rate in Q4 FY25, the RBI has revised India's GDP growth forecast for FY26 upwards to 6.8% from earlier estimate of 6.5%. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. In 2024, India rose to 15th place globally in FDI rankings and retained its position as South Asia's top recipient.

In H1 FY25, India's growth-focused approach was underscored by the government's capital expenditure outlay of Rs. 15,02,000 crore (US\$ 176 billion), reinforcing its commitment to infrastructure-led development. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10% to Rs. 11,21,000 crore (US\$ 131 billion) over Rs. 10,18,000 crore (US\$ 119 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total goods and service exports surged by 76% over the past decade, touching Rs. 70,36,425 crore (US\$ 825 billion) in FY25, driven by strong performance in engineering goods, electronics, and pharmaceuticals. With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

- The heavy engineering and machine tools sector is a vital component of the capital goods industry. Currently, India's capital goods sector is receiving considerable focus due to its essential contribution to industrial growth and economic development. Notably, production within this sector has surged from ₹2,29,533 crore (US\$ 27.2 billion) in CY2015 to ₹4,29,001 crore (US\$ 50.7 billion) in CY2024, highlighting strong growth momentum.

AUTOMOBILE INDUSTRY

The Indian automobile industry has long been a reliable barometer of economic performance, given its critical role in both macroeconomic expansion and technological advancement. Within the sector, the two-wheeler segment dominates in terms of volume, driven by a growing middle class, a predominantly young population, and rising demand from rural markets. Demand for commercial vehicles has also strengthened, supported by the expansion of logistics and passenger transportation services. Market growth is expected to be shaped by emerging trends such as vehicle electrification, particularly in three-wheelers and small passenger cars.

India has also established itself as a prominent auto exporter with strong growth prospects in the near future. Automobile exports rose 19% in FY25 to over 5.3 million units, led by robust demand for passenger vehicles, two-wheelers, and commercial vehicles in global markets. Complementing this momentum, government initiatives such as the Automotive Mission Plan 2026, the scrappage policy, and the production-linked incentive (PLI) scheme are expected to position India as a global leader in both the two-wheeler and four-wheeler markets.

MARKET OVERVIEW

- The automotive manufacturing industry comprises the production of commercial vehicles, passenger vehicles, three-wheelers, and two-wheelers.
- In FY2026 (April–September 2025), the total number of passenger vehicles, commercial vehicles, three-wheelers, two-wheelers, and quadricycles sold in India stood at 16.5 million units.
- The total production of passenger vehicles, three-wheelers, two-wheelers, and quadricycles in October 2025 was approximately 2.8 million units.

3. India Emerging as a Global R&D Hub

- India is rapidly positioning itself as a global research and development (R&D) hub for the automotive sector.
- This growth is supported by strong government initiatives, including the establishment of National Automotive Testing and R&D Infrastructure Project (NATRIP) centres across the country.

- Private players such as Hyundai Motor India and Maruti Suzuki have expressed keen interest in expanding their R&D presence in India.
- India accounts for approximately 40% of global engineering and R&D spending, estimated at US\$ 31 billion, while the automobile sector contributes nearly 8% of the country's total R&D expenditure.

ROAD AHEAD

The automobile industry in India benefits from factors such as the availability of skilled labour at low cost, robust R&D centres, and affordable steel production. It also provides significant investment opportunities and generates both direct and indirect employment for skilled and unskilled workers. The electric vehicle (EV) sector alone is projected to create five crore jobs by 2030, underscoring its potential as a major driver of employment and growth.

To support this expansion, the Ministry of Heavy Industries (MHI) has extended the tenure of the Production Linked Incentive (PLI) Scheme for Automobile and Auto Components by one year. The scheme now offers incentives on determined sales over five consecutive financial years from 2023-24 to 2027-28, with disbursements in the subsequent year. It has already proven highly successful, attracting proposed investments of US\$ 8.1 billion (Rs. 67,690 crore) against the original target of US\$ 5.1 billion (Rs. 42,500 crore), with US\$ 1.6 billion (Rs. 13,037 crore) invested by December 31, 2023.

Looking ahead, the government is working to overhaul the country's transportation system by creating an integrated EV mobility ecosystem with a low carbon footprint and high passenger density, especially in urban areas. Its long-term strategy and policies are designed to accelerate EV adoption in line with growing customer demand for cleaner and more efficient transportation solutions. With these initiatives, India is also well positioned to become a global leader in shared mobility by 2030, opening new avenues for electric and autonomous vehicles.

MANUFACTURING 4.0: INDIA'S AI-POWERED INDUSTRIAL REVOLUTION

The Indian manufacturing sector is undergoing a profound transformation with the integration of Artificial Intelligence (AI) and Machine Learning (ML) solutions, paving the way for the era of smart factories. According to the NASSCOM report on India Industry 4.0 Adoption, it's projected that digital technologies will account for 40% of total manufacturing expenditure by 2025 as compared to 20% of expenditure in 2021. This paradigm shift encompasses the entire spectrum of factory automation, from the initial stages of manufacturing, including raw material sourcing, to the seamless dispatch of finished products. The integration of advanced technologies promises not only increased process efficiency but also a reduction in unplanned downtimes, resulting in substantial gains for the manufacturing industry, in addition to its potential to bring disruptive changes, well reflected in India's Industrial automation market growth pegged at a CAGR of 14.26% to reach \$29.43 Bn by FY2029.

The application of AI and ML in smart factories extends across various sectors, offering unprecedented opportunities for growth and optimisation. In the automotive sector, AI-powered robotics and automation streamline manufacturing processes, are enhancing precision and speed, leading to process optimisation. From assembly line operations to quality control, smart factories in the automotive industry leverage AI for optimal production efficiency. With the AI & analytics technology implementation rate of 54%, Indian companies are revolutionising their operational methodologies using machine sensors, cloud technology, robotics and automation.

The electronics manufacturing sector is benefitting from AI-driven machine vision and image-based analysis for quality control. AI-facilitated automation, facilitated by AI, ensures the accurate and efficient assembly of intricate electronic components, reducing errors and enhancing overall product quality. This digitization digitisation will help India's electronics manufacturing industry to reach \$300 Bn by 2026.

Smart factories within the chemicals & pharmaceutical industry are leveraging AI for the precise monitoring and control of manufacturing processes. The benefits are spread across the development and commercialisation cycle of products, ranging from analysis of huge databases of molecules for drug discovery and material development to conducting quality control of products. This also includes the automated analysis of raw materials for large large-scale batches and the optimisation of production workflows, leading to increased productivity and compliance with stringent regulatory standards. The textile industry, which contributes 2.3% of India's GDP, is leveraging applications **like Computer aided design and manufacturing (CAD/CAM) in optimising** processes such as fabric cutting, stitching, and quality inspection.

Transforming the Market Dynamics

India's Industrial robotics market is growing significantly and is predicted to reach \$264.10 Mn by 2028 at a CAGR of 2.92%. Industrial robots are revolutionising manufacturing processes. These robots, powered by AI algorithms, perform tasks with precision and speed, contributing to increased production efficiency and reduced labour costs. The favourable macroeconomic environment

and demand are leading to the emergence of more industry players like Sastra Robotics, Qualitas Technologies, HWYL, and Sensovision Systems, etc offering robotic solutions to OEMs for expediting test cycles for accelerated commercial landing of products.

Industry players like Hyundai Motors are adapting advanced manufacturing processes through the implementation of AR & VR technologies like **smart sensors** for defect detection in equipment, deep learning vision systems for process quality, panel crack detection using AI and VR-based immersive trainings for employees. AR Automated machine vision, coupled with image-based analysis, ensures high levels of accuracy in quality control and assurance, reducing the downtimes.

Smart sensors, RFID, and Blockchain technologies are being utilised in various stages of manufacturing, from raw material inventory management to packaging. To avoid supply chain disruptions, the Implementation of advanced ERP systems and 3D printing has played a crucial role. These smart sensors provide real-time data, enabling proactive decision-making and minimising the risk of unplanned downtimes. Collectively, these advanced technologies are contributing to a significant reduction in unplanned downtimes and potential losses in production, fostering a more efficient and productive manufacturing ecosystem.

Supportive Policy Environment

The Indian government has recognised the transformative potential of AI in the manufacturing sector and has implemented favourable policies to promote its responsible use. The Ministry of Electronics and Information Technology has approved the implementation of the 'National Program on Artificial Intelligence.' This initiative aims to develop AI-based solutions and ensure the responsible and transformational use of AI across various sectors, including manufacturing through skilling, data management office and setting up a national centre on AI.

The Department of Science & Technology is implementing the 'National Mission on Interdisciplinary Cyber-Physical Systems', emphasising the integration of AI in manufacturing processes through smart factories to enhance efficiency and innovation.

India chaired the Global Partnership on Artificial Intelligence (GPAI) in 2023, leading to the GPAI New Delhi Declaration on Safe, Secure, and Trustworthy AI. This international collaboration underscores India's commitment to fostering a global environment that promotes responsible AI practices.

Navigating the Path Ahead

The emergence of AI, along with supportive policies, is welcoming, though it does raise initial concerns about the potential reduction in employment opportunities due to rapid process automation. However, the introduction of AI and ML will also foster economies of scale and the need for novel solutions, which will encourage an influx of human capital across the sectors. This will help Indian Manufacturers fulfil the domestic demand and exports through process efficiency and improved scale of operations.

In conclusion, the incorporation of AI and ML in smart factories is poised to revolutionise India's manufacturing sector, leading to a reduction in manual intervention and improved overall efficiency. The pace of AI implementation at scale in the manufacturing sector will be influenced by factors such as the availability of a skilled workforce, regulatory provisions, and the potential return on investment. The trajectory of progress in this domain ultimately depends on the country's adoption of digitisation and its willingness to embrace AI as the most promising alternative for the journey towards automation. As smart factories become the new norm, India stands at the forefront of a manufacturing renaissance driven by the power of artificial intelligence and machine learning.

CNG Plate Counting Machine

Tyre & RIM Inspection Machine

Case Study

For one of our automotive customers, we developed an automated CNG Compliance Plate Printing Machine to improve accuracy and eliminate manual errors in data marking. When a vehicle arrives at the designated station, the system automatically identifies it, and the operator inserts the corresponding compliance plate into the machine. The machine prints the required compliance data specific to that vehicle, which is then verified using a vision-based camera to ensure the information matches the entered data. Once validated, the machine releases the plate for fitting on the vehicle. This automation has ensured error-free marking, improved traceability, and faster cycle times during production.

❖ PIKA PIKA SYSTEMS

Poka-Yoke (often referred as "Pika Pika"), is a Japanese term meaning "**mistake-proofing**". It refers to simple design features or mechanisms in a process that prevent errors before they occur or detect them early. Poka-Yoke ensures quality at the source by eliminating human errors in manufacturing or assembly. Common examples include jigs, sensors, or checklists that guide correct operations.

Pika-Pika is a visual indicator system that confirms correct assembly through light signals, enhancing operator accuracy. **Torque Wrench** ensures fasteners are tightened to precise torque values, preventing over- or under-tightening. **Poka-yoke** is a mistake-proofing technique in automation that prevents human errors by design, ensuring process reliability.

OUR BUSINESS PROCESS

Our key business process from customer engagement to delivery of automation solution is given here below:-

1. **Customer Engagement and Requirement understanding:** The process begins with receiving a formal Request for Quotation (RFQ) or tender document either directly from the existing customer or through collection of the details during sales calls, visits and market references. Said RFQ includes Layout of site, process description and machine description wherein automation is required along with other application specifications such as technical specifications & functional requirements, performance benchmark in terms efficiency & takt time, sequence of operations, training & handover expectations, project timelines etc.

For providing an automation solution to any industrial or manufacturing process, there has to be a proper understanding of the existing process. We strive for in depth understanding of the process to provide good quality automation solution as per the requirement of our customer. Detailed technical interaction is held with various officers and stake holders.

2. **Technical Proposal Development and Customer Approval:** Post receiving project details or the request for quotation, our marketing & sales team plays a key role in converting the customer's RFQ into a comprehensive technical & commercial proposal, which includes executive summary of the background of the project, scope of work clearly defining the detailed specifications for required automation, costing & commercial requirements including pricing & payment structure, acceptance criteria, contractual clauses around warranty & AMC, liabilities and clauses for termination or dispute resolution, and supporting documents like design drawings & specifications. Before sharing such detailed specifications, a non-disclosure agreement is signed between the company and the customer.

This proposal is submitted to higher management for review & approval. If feedback is provided by higher management, the necessary changes are made & implemented in the proposal and then final techno-commercial proposal is sent to the customer for approval. If the customer raises concern or requests revisions to the commercial offer, the proposal is revised accordingly and re-approved by higher management before resubmission. Upon customer agreement with the commercial offer, a purchase order and advance payment are received, marking the conclusion of the proposal process and the initiation of the project.

3. **Project Initiation:** Following receipt of the customer's contract/ purchase order and advance payment, the order is formally acknowledged and entered into the system. The Project Department and Accounts Department are notified to initiate internal processes by sales department. A unique project code is generated by the Sales & Marketing team to enable systematic tracking and documentation. Subsequently, a Project Kick-off Meeting is convened by the Sales team, involving all relevant internal stakeholders, wherein, a comprehensive project briefing is done covering the scope of work, customer expectations, key technical requirements, delivery timelines, contractual obligations and risk factors. All necessary project documents—such as approved technical proposals, drawings, schedules etc. are formally handed over to the respective departments for downstream planning and execution.
4. **Project planning and Designing:** Following the meeting, the project team develops and shares a project timeline with both the internal team and the customer. Concurrently, Design & Engineering team initiates the conceptual and detailed design phase using design tools like CAD, E-plan, SolidWorks etc. This includes mechanical design, electrical schematics and control architecture, depending on the scope of the solution. Once the first level of design is completed, an internal design review meeting is conducted wherein the feasibility of the design is assessed from both assembly and functional perspectives. If the design is deemed infeasible, changes suggested/recommended by the team are implemented, and feasibility is reassessed in coordination with the project manager. Once the design is finalized and approved internally, it is submitted to the customer for approval. Any customer-requested changes are incorporated, and the updated design is resubmitted for final approval.

5. **Procurement of required parts & components and Quality check:** After receiving formal design approval from the customer, the Design & Engineering team proceeds with the creation of detailed 2D assembling drawings and the preparation of a comprehensive Bill of Materials (BOM). These deliverables are then released to the assembling and Purchase department to start with the procurement of required material, parts or components. Suppliers are selected based on capability, lead time, past performance and commercial terms, request for quotations are sent to selected suppliers and finalisation is done in terms of pricing, delivery terms and quality commitments. Throughout the process, the purchase and vendor teams work closely with Project Management to ensure procurement timelines align with the overall project execution schedule.

All incoming parts and components procured from suppliers undergo a rigorous quality inspection conducted by our Quality Assurance (QA) team. This inspection is performed against predefined quality benchmarks, dimensional tolerances, and specifications detailed in the approved engineering drawings. In the event of non-conformance, appropriate action is taken, which may include rejection, rework directives or supplier engagement for root cause analysis and corrective action. Only those materials that meet all quality criteria are granted quality clearance and approved for internal use. Upon clearance, the materials are formally received at our facility, where they are systematically logged, tagged and stored in designated areas as per assembly sequence and project prioritization. The storage layout is optimized for efficient material flow to the shop floor.

6. **Assembly, Quality Validation and System Trials:** Following the completion of the procurement process, the project transitions into the assembly and integration phase, where mechanical, electrical and control systems are assembled in accordance with the approved design documentation. Once mechanical assembly is completed, a series of quality checks and performance validation steps are initiated. A critical part of this validation includes dimensional inspection using appropriate tools and any deviations from the design tolerances are flagged for correction. Upon rectification and re-verification, the system is marked as approved. Concurrently, the Sales person engages with the customer to arrange delivery of component parts required for system trials and fitment verification.
7. **Customer Witness Trials and Validation:** The customer is invited to attend and witness the functional trials, which serve as a critical approval milestone. The system is evaluated for Dimensional accuracy and fitment compatibility, Functional cycle time adherence, Process flow validation, Safety, reliability and compliance with technical specifications. If any issues are identified during these trials, the engineering team makes necessary adjustments to ensure full compliance with the customer's functional and design expectations. Upon successful completion of the system trials and customer validation, the customer issues technical acceptance and provides dispatch clearance.
8. **Commissioning and Final Project Handover:** Prior to dispatch, the Project team shares a detailed commissioning plan with the customer, outlining the timeline, resource deployment and utility requirements at the installation site. Once the system is delivered, the on-site installation and commissioning phase begins, led by our experienced field engineers which includes Mechanical and electrical installation, System calibration and tuning and trial runs under actual production conditions.

Following successful commissioning, our team conducts operator training and maintenance briefings to ensure smooth handover and operational continuity. Training typically covers system operation, troubleshooting, preventive maintenance and safety protocols. Upon conclusion of training and final sign-off, the system is formally handed over to the customer, marking the successful completion of the project lifecycle and enabling the beginning of commercial production at the customer's site.

Over the years, the Act has been amended to keep pace with technological advancements and emerging cyber threats. A significant update came with the Information Technology (Amendment) Bill, 2023, which aimed to decriminalize certain minor offenses under the IT Act to promote ease of doing business and reduce the compliance burden on startups and small enterprises. This amendment replaced several provisions that earlier involved imprisonment with

The Act defines key roles such as Data Fiduciaries (entities that decide the purpose and means of data processing), Data Principals (individuals to whom the data relates), and Data Processors (who process data on behalf of a fiduciary). Personal data under the Act can only be processed based on consent or under certain circumstances of "deemed consent," such as legal obligations or emergencies. It empowers individuals with rights including access, correction, erasure, grievance redressal, and the right to nominate a representative in case of death or incapacity. At the same time, the Act imposes several obligations on data fiduciaries, such as ensuring purpose limitation, data minimization, storage limitation, and implementation of appropriate security safeguards. Special provisions exist for processing children's data, requiring verifiable parental consent and prohibiting behavioural tracking or targeted advertising. The Act permits cross-border data transfers unless restricted by the Central Government. Compliance is overseen by the Data Protection Board of India, which functions as an adjudicatory body to handle disputes and impose penalties that can go up to ₹250 crore.

I. SIGNIFICANT ACCOUNTING POLICIES**A) BASIS OF PREPARATION OF CONSOLIDATED FINANCIAL STATEMENT**

The Restated Consolidated Financial Statements (Annexure I) comprises of Restated Consolidated Statement of Assets and Liabilities of Adisoft Technologies Limited as at October 31, 2025, March 31, 2025, March 31, 2024, March 31, 2023 and the Restated Consolidated Statement of Profit and Loss (Annexure II) and Restated Consolidated Statements of Cash Flows (Annexure III) for the same period mentioned above and the annexure thereto (collectively, the "Restated Consolidated Financial Statements") have been extracted by the management from the Audited Consolidated Financial Statements of the Company for the period ended on October 31, 2025 & for the year ended on March 31, 2025, March 31, 2024, March 31, 2023, approved by the respective Board of Directors of the companies

These Consolidated financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 ('the Act') read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act. The accounting policies have been framed, keeping in view the fundamental accounting assumptions of Going Concern, Consistency and Accrual, as also basic considerations of Prudence, Substance over form, and Materiality. These have been applied consistently, except where a newly issued accounting standard is initially adopted or a revision in the existing accounting standards require a revision in the accounting policy so far in use. The need for such a revision is evaluated on an ongoing basis. All assets and liabilities have been classified as current or non-current as per the company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and bank balances, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

B) BASIS OF CONSOLIDATION

Company Uses Equity method to record investments in associate entities as the company holds significant influence but does not have full control. Under the equity method, the initial investment is recorded at cost, and the carrying amount is subsequently adjusted to reflect the investor's share of the investee's post-acquisition profits or losses. This share is recognized in the investor's income statement, increasing the value of the investment in case of profits and decreasing it in case of losses. Dividends, if any, received from the associate reduce the carrying value of the investment but do not affect profit or loss. Additionally, adjustments are made for any unrealized gains or losses resulting from transactions between the investor and the associate to avoid double counting.

C) USE OF ESTIMATES

The preparation of Restated Consolidated Financial statements in conformity with Indian GAAP requires the management to make judgements, estimates and assumptions that affect the reported amount of assets and liabilities as at the Balance sheet date, reported amount of revenue and expenditure for the year and disclosures of contingent liabilities as at the Balance sheet date. The judgements, estimates and assumptions used in the accompanying Restated Consolidated Financial statements are based upon the Management's evaluation of the relevant facts and circumstances as at the date of the Restated Consolidated Financial statements. Actual results could differ from these judgements, estimates and assumptions. Estimates and underlying assumptions are reviewed on a year basis. Revisions to accounting estimates, if any, are recognised in the year in which the estimates are revised and in any future years affected.

D) ACCOUNTING CONVENTION

The company follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern.

Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

Summary of Significant Accounting Policies

1. Revenue recognition

Revenue from sale of projects/traded goods is recognised when the significant risks and rewards of ownership of the goods have been sold and is transferred to the customer and when there are no longer any unfulfilled obligations. The performance obligations in the contracts are fulfilled at the time of dispatch, delivery or upon formal customer acceptance depending on the customer terms.

Revenue is disclosed at fair value of the consideration received or receivable, after deduction of any trade discounts, volume rebates and any taxes or duties collected on behalf of the government such as goods and services tax, etc. Accumulated experience is used to estimate the provision for such discounts and rebates. Revenue is recognised to the extent that it is highly probable that significant reversal will not occur.

Revenue from services is recognised when services have been rendered and there should be no uncertainty regarding consideration and its ultimate collection.

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

Other items of income are recognized on receipt basis.

2. Property, plant and equipment

Property, Plant and Equipment are stated at cost of acquisition or construction less accumulated depreciation/ amortization and accumulated impairment, if any.

Cost includes purchase price, taxes and duties, labour cost and directly attributable overhead expenditure for self-constructed assets incurred up to the date the asset is ready for its intended use. Borrowing cost incurred for qualifying assets is capitalized up to the date the asset is ready for intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

Cost also includes the cost of replacing part of the plant and equipment, if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the Statement of Profit and Loss as incurred.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at regular intervals and adjusted prospectively, if appropriate.

An item of property, plant and equipment's and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognised.

Assets which are not ready for their intended use are disclosed under Capital Work-in- Progress and all the cost relating to such assets are shown under work-in-progress.

3. Depreciation

All tangible fixed asset, except capital work in progress, are depreciated on a written down value method. Depreciation is provided based on useful life of the asset as prescribed in schedule II to the companies Act, 2013. Depreciation on additions /deletion from property, plant and equipment made during the year is provided on pro- rata basis to extent of depreciable amount on Written Down Value(WDV) method from/up to the date of such addition / deletion as the case may be.

D) Intangible Assets

Intangible assets are non-physical Assets such as patent, license agreement, copyright, software. Intangible Assets must be amortized over their useful life, if possible, sum assets, such as Brand Name have indefinite life and cannot be capitalize or amortized, other intangible assets such as license agreement have useful life determined in the license agreement, item with a defined useful life must be amortized. Intangible assets purchased are measured at cost or fair value as on the date of acquisition less accumulated amortisation and accumulated impairment, if any.

Amortisation is provided on a WDV basis over estimated useful lives of the intangible assets. The amortisation period for intangible assets with finite useful lives is reviewed at least at each year-end. Changes in expected useful lives are treated as changes in accounting estimate.

Assets which are not ready for their intended use are disclosed under Intangible Assets Under Development and all the cost relating to such assets are shown under Intangible Assets Under Development.

An intangible asset is de-recognised on disposal or when no future economic benefits are expected from its use and disposal. Losses arising from retirement and gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss.

E) Impairment

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

F) Inventories

Raw material, Work in Progress and finished goods

Raw materials, Stores, consumables & Spare Parts and packing materials are valued at lower of cost and net realisable value. Cost includes purchase price, (excluding those subsequently recoverable by the enterprise from the concerned revenue authorities), freight inwards and other expenditure incurred in bringing such inventories to their present location and condition.

Finished goods and Work in progress are valued at the lower of cost and net realisable value. Cost of finished goods comprises direct material, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and the estimated costs necessary to make the sale.

Traded Goods

Traded goods are valued at Lower of cost and net realisation values.

Goods in transit

Goods in transit are stated at actual purchase cost.

G) Borrowing Costs

Borrowing cost that are directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial year of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are expensed in the year they occur.

H) Employee Benefits

Defined-contribution plans:

- 1) Short term employee benefits are recognized as an expense at the undiscounted amount in the profit and loss account of the year in which the related service is rendered.
- 2) The Company's contribution to Provident Fund and Employees State Insurance Scheme is determined based on a fixed percentage of the eligible employees' salary and charged to the Statement of Profit and Loss on accrual basis.

Gratuity is a defined benefit plan, providing for a lump sum payment equivalent to 15 days' salary for each completed year of service, payable on retirement, termination, or death, with vesting after five years.

I) Foreign Exchange Transactions

Foreign-currency denominated monetary assets and liabilities if any, are translated at exchange rates in effect at the Balance Sheet date. The gains or losses resulting from the transactions relating to purchase of current assets like Raw Material etc. are included in the Statement of Profit and Loss. Revenue, expense and cash-flow items denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction.

J) Cash Flow Statement

Cash flows are reported using Accounting Standard -3 Cash Flow Statement- indirect method, whereby net profits before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments and items of income or expenses associated with investing or financing cash flows. The cash flows from regular revenue generating (operating activities), investing and financing activities of the Company are segregated.

K) Taxes on Income

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both Income tax expenses for the year comprises of current tax and deferred tax. Current tax provision is determined on the basis of taxable income computed as per the provision of the income tax Act 1961.

Deferred tax is recognized for all timing differences, between the taxable income and accounting income that are capable of reversal in one or more subsequent periods subject to conditions of prudence and by applying tax rates that have been substantively enacted by the balance sheet. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

At each reporting date, the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized. The carrying amount of deferred tax assets are reviewed at each reporting date. The Company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available

L) Provision, Contingent Liabilities and Contingent assets

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made. Contingent Assets are neither recognized nor disclosed in the financial statements.

M) Cash and Bank Balances

Cash and Cash Equivalents: Cash and Cash Equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

Other Bank Balances: Other bank balances comprise of items such as balances with banks to the extent of held as margin money or security against borrowings etc., and bank deposits with more than three months' maturity.

N) Earnings per share

In determining the Earnings Per share, the company considers the net profit after tax before extraordinary items and after extraordinary/ exceptional item. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the period. Further the adjustment necessary for the changes in capital structure subsequent to year end but prior to approval of Restated Consolidated financials of Bonus Issue has been considered in calculation of weighted average number of Equity shares outstanding as at the end of respective year. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“**DPIIT**”) makes policy announcements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEMA. The DPIIT also issues the Consolidated Foreign Direct Investment Policy (“**FDI Policy**”) from time to time. The regulatory framework pertaining to foreign investment, over a period of time, thus, consists of acts, regulations, master circulars, press notes, press releases, and clarifications among other amendments.

India’s current FDI Policy issued by the DPIIT with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT till October 15, 2020. All the press notes, press releases, clarifications on FDI issued by DPIIT till October 15, 2020 stand rescinded as on October 15, 2020. In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

In accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the FDI Policy and the Foreign Exchange Management (Non-debt Instruments) Rules, 2019. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.

Further, the existing individual and aggregate investment limits for an FPI in our Company are not exceeding 10% of the total paid-up Equity Share capital of our Company for each FPI and the total holdings of all FPIs in the Company shall not exceed 24% of the total paid-up Equity Share capital of our Company. The RBI, in exercise of its power under the FEMA, has also notified Foreign Exchange Management (Non-debt Instruments) Rules, 2019 (“**Rules**”) and Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. SEBI registered FPIs have been permitted to purchase shares of an Indian company through the Issue, subject to total FPI investment being within the individual FPI/sub account investment limit of less than 10% of the total paid-up equity capital on a fully diluted basis of the Company subject to the total holdings of all FPIs/sub accounts including any other direct and indirect foreign investments in the Company shall not exceed 24% of the paid-up equity capital of the Company on a fully diluted basis. The aggregate limit of 24% in case of FPIs may be increased up to the sectoral cap/statutory ceiling, as applicable, by the Company concerned by passing of resolution by the Board of the Company to that effect and by passing of a special resolution to that effect by its Shareholders. With effect from April 1, 2020, the aggregate limit of 24% has increased to the sectoral cap applicable to the Indian Company which in case of the Company is 100% provided that the Company complies with conditions provided under the FDI Policy. As per the Rules, the aggregate limit as provided above was permitted to be decreased by the Company to a lower threshold limit of 24% or 49% or 74% as deemed fit, with the approval of its Board of Directors through a resolution and also of its shareholders by means of a special resolution, before March 31, 2020. The Company has passed no such Board Resolution and hence, has not revised its sectoral caps. Further, eligible NRIs and OCIs investing on repatriation basis are subject to individual investment limit of 5% of the total paid-up equity capital on a fully diluted basis subject to the aggregate paid-value of the shares purchased by all NRIs and OCIs put together on repatriation basis not exceeding 10% of the total paid-up equity capital on a fully diluted basis of the Company. The aggregate limit of 10% in case of NRIs and OCIs together may be raised to 24 % if a special resolution to that effect is passed by the shareholders of the Company. The Company has not passed such resolutions as yet.

The transfer of shares between an Indian resident and a Non-resident does not require prior approval of RBI, subject to fulfillment of certain conditions as specified by DPIIT / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.
