The growth in the Indian steel sector has been driven by the domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India’s manufacturing output.

The Indian steel industry is modern, with state-of-the-art steel mills. It has always strived for continuous modernization of older plants and up-gradation to higher energy efficiency levels. For more details, please refer chapter titled “*Industry Overview*” on page 103 of this Prospectus.

SECTION II: RISK FACTORS

An investment in equity shares involves a high degree of financial risk. Potential investors should carefully consider all the information in this Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares of our Company. The risks described below are not the only ones relevant to us or our Equity Shares, the industry in which we operate. Additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows and/or financial condition. If any or some combination of the following risks, or other risks that are not currently known or believed to be adverse, actually occur, our business, results of operations, cash flows and/or financial condition could suffer, the trading price of, and the value of your investment in, our Equity Shares could decline and you may lose all or part of your investment. In order to obtain a complete understanding of our Company and our business, prospective investors should read this section in conjunction with “Business Overview”, “Industry Overview”, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Restated Financial Statements” on pages 116, 103, 209 and 171, respectively, as well as the other financial and statistical information contained in this Prospectus. In making an investment decision, prospective investors must rely on their own examination of us and our business and the terms of the Issue including the merits and risks involved.

Potential investors should consult their tax, financial and legal advisors about the particular consequences of investing in the Issue. Unless specified or quantified in the relevant risk factors below, we are unable to quantify the financial or other impact of any of the risks described in this section. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment, which may differ in certain respects from that of other countries.

Unless otherwise stated, the financial data in this chapter is derived from our Restated Financial Statements for the six months period ended September 30, 2023 and for the Financial Year ended on March 31, 2023, March 31, 2022 and March 31, 2021 as included in “Restated Financial Statements” on page 171 of this Prospectus.

INTERNAL RISK

- 1. Continued operations at our Manufacturing Units are critical to our business and any disruption in our Manufacturing Units would have a material adverse effect on our business, results of operations and financial condition. Further, our Manufacturing Units are not operating at optimum capacity utilization and there can be no assurance that we will be successful in achieving such utilization levels.***

We are dependent and will continue to depend on our Manufacturing Units, and thus are subject to certain risks related to our manufacturing process. Our Manufacturing Units are subject to operational risks such as the breakdown or failure of equipment, power supply or processes, lack of raw materials performance below expected levels of output or efficiency, obsolescence, production outages, natural disasters, industrial accidents and the need to comply with new directives of the relevant government authorities. For instance, in Fiscal 2019, owing to outbreak of the COVID-19 and the ensuing lockdowns, our Manufacturing Units were closed for a cumulative period of around 30 days. Any disruptions in the operations of our Manufacturing Units, technical or otherwise, may have a material adverse impact on our business, financial condition and results of operations. While we take precautions to minimize the risk of any significant operational problems at our Manufacturing Units, there can be no assurance that our business, financial condition and results of operations will not be adversely affected by disruptions caused by operational problems at our Manufacturing Units.

Presently, our Manufacturing Units are not operating at optimum capacity utilization. We have enhanced the production capacities at our Manufacturing Units in the past and we seek to maintain high-capacity utilization at each of our Manufacturing Units. However, there is no assurance that we will be able to utilize the production capacities of our Manufacturing Units to the fullest. While we seek to increase the capacity utilisation levels, there can be no assurance that demand for our products will grow at expected rates or that we will be successful in capturing this increase in demand. If we are unable to garner adequate demand for our products, may have an adverse impact on our business prospects, financial condition and results of operations. Further, we cannot assure you that the capacity utilisation will not further decrease from current utilisation levels, which may further increase the cost of production in the future, as maintenance costs increase for our plant and machinery. If we are unable to pass on this additional cost to our customers, our gross margins could decline and our revenue, results of operations and financial condition would be adversely affected.

- 2. Activities involving our manufacturing process can be dangerous and can cause injury to people or property in certain circumstances. A significant disruption at any of our Manufacturing Units may adversely affect our production schedules, costs, sales and ability to meet customer demand.***

Our business operations are subject to hazards such as risk of equipment failure, work accidents, fire or explosion and require individuals to work under potentially dangerous circumstances or with flammable materials. Although we employ safety procedures in the operation of our Manufacturing Units and maintain what we believe to be adequate insurance, and although there have not been any instances of equipment failure, work accidents, fire or explosion or any other such accidents, there is a risk that an accident or death may occur in one of our Manufacturing Units. An accident may result in destruction of property

or equipment, environmental damage, manufacturing or delivery delays, or may lead to suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects. In particular, if operations at our Manufacturing Units were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, adverse weather conditions, labour dispute, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. Interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

3. *Developments in the competitive environment in the steel industry, such as expansion in production capacity of our competitors, consolidation among our competitors, could have a material adverse effect on our competitive position and hence our business, financial condition, results of operations or prospects.*

We believe that we are one of the leading manufacturers of steel and alloy Rolls in India having integrated steel plants and enjoying a strong brand identity and recall amongst end customers. We have derived 17.49%, 17.95%, 16.47%, and 22.55% of our gross profit from sale of our products for the six months period ended September 30, 2023 and for the Fiscal 2023, Fiscal 2022 and Fiscal 2021. Owing to the competitive nature of the steel industry, we compete with various steel producers, who manufacture wide range of steel products. We do not enter into long term contracts with our customers, therefore, any substitution of our products with that of our competitors may lead to a decline in our customers thereby affecting our revenue.

Some of our competitors may have an edge over us due to various factors, such as easy access to raw materials, greater economies of scale, a greater number of integrated Manufacturing Units and greater presence in certain markets. We believe we can compete with our competitors; however, we are not in a position to guarantee that we will be able to effectively compete and maintain our market share. Our ability to maintain and increase our market share in the competitive market depends on various factors such as, our effective marketing initiatives, our ability to enhance our production capacity and improve our manufacturing process, expansion of our product portfolio and adapt to changes in technology and customer requirements. If we fail in competing and maintaining the market share of our products, the same could have a material adverse effect on our financial condition, business and prospects. We operate in an extremely competitive environment; therefore, we may also face competition from new companies that are emerging which may attempt to obtain a share in our existing markets. Our competitors may also resort to acquisitions, mergers, and investments in product development and capacity expansion in the future. If the trend towards consolidation continues, we may be placed in a disadvantageous competitive position relative to other companies in the industry and our business, results of operations, financial condition and prospects could be materially and adversely affected.

4. *We depend on outside parties for adequate and timely supply of raw materials at commercially acceptable prices. Any disruptions, delay or increase in prices of such material may have a material adverse effect on our business.*

Our ability to remain competitive, maintain costs and profitability depend, in part, on our ability to source and maintain a stable supply of raw materials at acceptable prices. We procure some of our primary raw materials, such as steel scrap, roll scrap, pig iron, nickel, ferro molybdenum, other ferro alloys, resin coated sand and other raw materials required in manufacturing process on a purchase order basis and have not entered into long term contracts for the supply of such raw materials. Our raw materials consumed for the six months period ended as on September 30, 2023 and for the FY 2023, FY 2022 and FY 2021 was ₹ 3,109.80 lakhs ₹ 6,285.34 lakhs, ₹ 4,949.15 lakhs and ₹ 3,519.19 lakhs which, constituted 62.10% ,60.80%, 53.97% and 55.16% of our revenue from operations for such periods. While we are not dependent on any single raw material supplier, raw material supply and pricing can be volatile due to a number of factors beyond our control, including global demand and supply, transportation and labour costs, labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and any unanticipated variation in any of these factors could have a material adverse effect on our operations. As a result, the success of our business is significantly dependent on maintaining good relationships with our raw material suppliers. While we have not faced any disruption in supply of raw material from our suppliers in past, we cannot assure you that we will continue to enjoy uninterrupted relationships with our suppliers in the future. If we are unable to obtain adequate supplies of raw material in a timely manner or on commercially acceptable terms, or if there are significant increases in the prices of the raw materials, our business and results of operations may be materially and adversely affected.

5. *We are heavily reliant on a few customers and we derive a significant part of our revenue from selected customers. The loss of any significant customer may have a material adverse effect on our business and results of operations.*

We are engaged in the business of manufacturing of steel and alloy Rolls. Our Company served around 159 customers during the last ten years. We have also served around 48 new customers between April 1, 2022 and March 31, 2023. During the six months period ended as on September 30, 2023 and for the Fiscal 2023, Fiscal 2022 and Fiscal 2021 we served around 87 customers, 159 customers, 150 customers and 124 customers, respectively. Our top ten customers contribute 54.46%, 49.62%,

51.10% and 53.93% of our revenue from operations for the the six months period ended as on September 30, 2023 and for Fiscal 2023, Fiscal 2022 and Fiscal 2021, respectively. We have relationships spanning more than 5 years with 9 of our top ten customers by contribution to revenue from operations as of the Financial Year ended March 31, 2023.

While we have long term relationships with our customers, we do not enter into any supply agreement with them. The success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. Although, we cater to a large number of customers, we have been reliant on select customers for a significant amount of our revenues. In the six months period ended as on September 30, 2023 and for the Fiscal 2023, Fiscal 2022 and Fiscal 2021, 54.46%, 49.62%, 51.10% and 53.93% respectively, of our revenue from operations were derived from our top ten customers.

The actual sales by our Company may differ from the estimates of our management due to the absence of any supply agreements. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate favourable terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

6. ***Our commercial success depends to a large extent on the success of our customers' products with end consumers. If the demand for the products in which our products are used declines, this could have a material adverse effect on our business, financial condition and results of operations.***

We serve customers across various industries, including the manufacturers of iron and steel rolling machines ("OEM's"); and (b) aftermarket sales as a consumable product by the iron and steel rolling mills. As on September 30, 2023, below listed is our product offering, along with their application and revenue generated in terms of percentage of the operating revenue, from each of our product categories for the applicable periods:

Spheodial Graphite Iron Rolls	Roll used in Rolling Mill	81.48%	76.65%	73.37%	76.38%
Adamite Rolls	Roll used in Rolling Mill	13.59%	17.16%	21.19%	14.85%
Indefinite Chilled Rolls	Roll used in Rolling Mill	1.54%	0.91%	2.05%	4.18%
Double Pour Indefinite Chilled Rolls	Roll used in Rolling Mill	1.82%	3.00%	2.15%	2.58%
HSS Rolls	Roll used in Rolling Mill	Nil	0.35%	0.85%	0.15%
Forged Steel Rolls	Roll used in Rolling Mill	0.22%	0.81%	0.22%	0.65%

The performance of our customers in these industries could be affected by a number of macro and micro economic conditions, and other factors including government policies and the prevailing regulatory environment. Any downturn in one or more of these application industries could have a direct adverse impact on our results of operations and financial condition. For instance, supply of our product to Rashtriya Ispat Nigam Limited due to reduced demand of such Spheodial Graphite Iron Rolls. Occurrence of any of such events or other events that acutely affects the sales of our customer's end products would have an adverse effect on our business and results of operations.

7. ***Our Corporate office is situated on leased premises. Our failure to renew the leases, obtain new leases or pay higher rental fees under these leases could negatively impact our operations.***

Our Corporate office is situated on leased premise. From time to time, such leases come up for renewal, and a non-renewal of such lease agreements could disrupt our functioning of corporate office. The lease deed of our Corporate Office is valid till July 31, 2024. The non-renewal of the lease may result in temporary disruption in functioning of corporate office. Where the leases is not renewed, or renegotiated on terms that are less advantageous to us, no leases are made available to us, lease amount is increased, we may be forced to pay higher rental fees or relocate. For further details, see “**Business Overview - Properties**” on page 135 of this Prospectus.

8. ***If we do not continue to invest in new technologies and equipment, our technologies and equipment may become obsolete and our cost of processing may increase relative to our competitors, which may have an adverse impact on our business, results of operations and financial condition.***

We have over time, improved our technology by improvising on various aspects of the manufacturing methods including material handling, quality enhancement, inventory management, reducing wastage and loss and implementing efficient software to improve operational efficiency. For instance, company has improved quality assurance systems by installing latest machines like induction system, vertical CCM producing rings, tools and equipments. Further, manual handling of finished rolls has been shifted to automated cranes and storage handling systems. We believe that going forward, our profitability and competitiveness will depend in large part on our ability to maintain low cost of operations, including our ability to process and supply sufficient quantities of our products as per the agreed specifications. While we believe that we have achieved technological advancements, if we are unable to respond or adapt to changing trends and standards in technologies and equipment, or otherwise adapt our technologies and equipment to changes in market conditions or requirements, in a timely manner and at a reasonable cost, we may not be able to compete effectively and our business, financial condition and results of operations may be adversely affected.

9. ***We are subject to various laws and regulations. If we fail to obtain, maintain or renew the licenses, permits and approvals required to operate our business, or fail to comply with applicable laws, our business, results of operations and financial condition may be adversely affected.***

We operate in a highly regulated industry and our operations are subject to extensive laws and regulations. Our business requires us to obtain and renew from time to time, certain approvals, licenses, registrations and permits. Certain of our approvals are subject to expiry and once they expire, we cannot guarantee that we will receive the renewed approvals in a timely manner or at all. We cannot give any assurance that we will receive the renewed certificate in a timely manner. In addition, we require certain approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by the Government of India, the State Governments and certain other regulatory and government authorities, for operating our business. See “**Government and Other Statutory Approvals – Material approvals obtained in relation to our business and operations**” on page 234 of this Prospectus for further details. We are unable to trace copies of certain licenses obtained by us such the consent to establish for our Manufacturing Unit 1, Manufacturing Unit 2 and Manufacturing Unit 3. Further, our professional tax registration and enrolment certificates are still in the old name of the Company i.e. Deem Roll-Tech Private Limited. Our Company is in the process of making an application for change in name of the same. Our Company based on legal opinion, have formed a view that certain intimation/ licenses / approvals are not required. However, in case, the regulatory authorities deem that our Company ought to have obtained such approvals, our Company may have to obtain such licences/approvals and may also be subject to certain penalties or fines, if any. Further, there has been instance of delay payment to statutory authority with respect to GST, PF and ESIC.

Failure by us to renew, maintain or obtain the required permits or approvals at the requisite time may result in the interruption of our operations and may have an adverse effect on our business, financial condition and results of operations. Further, the approvals, licenses, registrations and permits issued to us may be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Further, any violation of the environmental laws and regulations may result in fines, criminal sanctions, revocation of operating permits, or shutdown of our manufacturing facility. While there have been no instances in the past where any approvals, licenses, registrations and permits issued to us were suspended or revoked, we cannot assure you that the relevant authorities would not suspend or revoke any of our approvals, licenses, registrations and permits. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, may impede our operations. In the event that we are unable to obtain such approvals in a timely manner or at all, our business operations may be materially and adversely affected.

10. ***Any defect in our products may result in our orders being cancelled and we could become liable to customers, suffer adverse publicity and incur substantial costs which in turn could affect us adversely.***

Any defect in our products could result in cancellation of our orders for manufacturing and selling the products. In case our products are found to be defective, the same could result in a claim against us for damages. Although, we attempt to maintain quality standards, and although there have not been any instances of cancellation of our orders due to defects, we cannot assure that all our products would be of uniform quality. Any defect in our products and claims by our customers against our products could adversely affect the value of our brand, and our sales could diminish. Further, our business is dependent on the trust of our customers in the quality of our products and delivery of services. Any negative publicity regarding our Company, brand, or

products, including those arising from a drop in quality of materials from our vendors, mishaps resulting from the use of our products could affect our reputation and our results from operations. In the event the products sold by us are defective or sub-standard for any reason, including due to human errors at any stage of manufacturing, our customers may pursue claims or actions against us within the warranty period, which could materially and adversely affect our business, financial conditions and results of operations.

11. Delays or defaults in client payments could affect our operations. We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due.

In the ordinary course of business, we extend credit to our customers typically up to 45 days as part of our standard payment terms. Consequently, we are exposed to the risk of the uncertainty regarding the receipt of the outstanding amounts. Set out below are the details of our Trade Receivables and Trade Receivables Turnover ratio as at for the six months period ended as on September 30, 2023 and as on March 31, 2023, March 31, 2022 and March 31, 2021:

Trade Receivables Turnover Ratio*	2.71	5.90	6.46	2.09

*Trade Receivables Turnover Ratio = Revenue from operations / Average trade receivables.

We have not written off any bad debts in Fiscal 2023. Our results of operations and profitability depend on the credit worthiness of our customers. We cannot assure that these counterparties will always be able to pay us in a timely fashion, or at all. While there have been no instances of major delays or major defaults in payments by the Company’s customers in the last three Fiscals, or in the current Fiscal until the date of this Prospectus, that have materially impacted the Company’s business and operations, we cannot assure you that we will not face a situation in the future which would materially impact us. Any adverse change in the financial condition of our customers may adversely affect their ability to make payments to us. Default or delays in payments by a significant portion of our customers may have an adverse effect on our business, results of operations, financial condition, cash flows and future prospects.

In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

12. The success of our business depends substantially on a number of key management personnel, management team, and on our operational workforce. Our inability to retain them or to recruit highly skilled technical personnel that are necessary for our business could adversely affect our businesses.

Our success substantially depends on the continued service and performance of the members of our senior management team and other key personnel in our business for the management and running of our daily operations and the planning and execution of our business strategy. Our Key Managerial Personnel are experienced in managing our businesses and are difficult to replace. They provide expertise which enables us to make well informed decisions in relation to our businesses and our future prospects. For details of our senior management team and other key personnel, see “*Our Management*” on page 149 of this Prospectus. We cannot assure that we shall continue to retain any or all of the key members of our management. The loss of one or more members of our senior management team could severely impact our ability to execute our growth strategy and grow our revenues.

While we believe that our future success depends largely on our continued ability to hire, assimilate, retain and leverage the skills of qualified and skilled personnel, we may not be as successful as our competitors at recruiting, assimilating, retaining and utilizing the skills of such personnel which may adversely affect our ability to realise our growth strategy. Further, our ability to sustain our growth depends significantly upon training these employees effectively. If we are unable to recruit and retain personnel with the requisite experience, our growth and competitive position maybe adversely affected.

13. We may face several risks associated with the proposed expansion in our Manufacturing Unit 2, which could hamper our growth, prospects, cash flows and business and financial condition.

We intend to utilize a portion of the Net Proceeds of the Issue for financing the proposed expansion of our Manufacturing Unit 2. For additional details in respect of the foregoing, see “*Objects of the Issue*” on page 80 of this Prospectus.

in input costs of construction materials and labour costs, incremental preoperative expenses, taxes and duties, start-up costs, interest and finance charges, EPC and non-EPC costs, working capital margin, environment and ecology costs and other external factors which may not be within the control of our management. If any of the plants that we propose to set up at our Manufacturing Unit 2, are not completed in a timely manner, or at all, our business, prospects and results of operations may be adversely affected. Further, the budgeted cost may prove insufficient to meet the requirements of the proposed capital expenditure due to, among other things, cost escalation, which could drain our internal cash flows or compel us to raise additional capital, which may not be available on terms favourable to us or at all.

We cannot assure that we will be able to complete the aforementioned expansion of our Manufacturing Unit 2 in accordance with the proposed schedule of implementation and any delay in expansion of such plants in a timely manner, or at all, could have an adverse impact on our growth, prospects, cash flows and business and financial condition

14. We are subject to various laws and regulations. If we fail to obtain, maintain or renew the licenses, permits and approvals required to operate our business, or fail to comply with applicable laws, our business, results of operations and financial condition may be adversely affected.

Our business requires us to obtain and renew from time to time, certain approvals, licenses, registrations and permits. Certain of our approvals are subject to expiry and once they expire, we cannot guarantee that we will receive the renewed approvals in a timely manner or at all. We cannot give any assurance that we will receive the renewed certificate in a timely manner. In addition, we require certain approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by the Government of India, the State Governments and certain other regulatory and government authorities, for operating our business. 16. ***We are dependent on third party transportation and logistics service providers. Any increase in the charges of these entities could adversely affect our business, results of operations and financial condition.***

Our Company procures raw materials from domestic and international vendors, which are brought to our Manufacturing Units through third party logistics providers including shipping companies and overland transport companies. Similarly, our finished products are transported from our Manufacturing Units to our customers by using third party logistics and transportation vehicles which are not owned or controlled by us. The logistics service providers are, therefore, integral to our business operations. We have over the years engaged the services of logistics service providers for our business operations. We do not, however, have any contractual arrangements with such third-party logistics service providers. We are, therefore, constrained to rely on a large number of such overland transport providers and shipping companies.

A portion of our expenses is due to freight carriage, transport, freight and forwarding expense, export freight charges etc. Packing, despatching and freight costs represented ₹69.33 lakhs and ₹380.97 lakhs, ₹371.82 lakhs and ₹236.55 lakhs, respectively, of our total expenses in the six months period ended as on September 30, 2023 and in the Fiscal 2023, Fiscal 2022, and Fiscal 2021. If we cannot fully offset any increases in freight costs, through increases in the prices for our products, we would experience lower margins. In addition, any increase in export tariffs also will increase expenses which in turn may adversely affect our business, financial condition and results of operations.

While these third-party logistics service providers have generally, in the past, been reliable, we cannot assure you that they will continue to be available to us as required. If such third-party logistics service providers discontinue their services for a reasonable length of time and, if we are unable to obtain the services of other service providers, our business operations could be adversely impacted, at times, significantly.

We may also be exposed to the risk of accidents and/or loss of our products in transit. While there have been no material instances of accident or loss in the past five years, we cannot assure you that such incidents will not occur in future. Any such acts could result in serious liability claims (for which we may not be adequately insured) which could have an adverse effect on our business, financial condition and results of operations.)

Moreover, we cannot assure you that we will not be liable for acts of negligence or other acts which may result in harm or injury to third parties. Any such acts could result in serious liability claims (for which we may not be adequately insured) which may,

in addition to resulting in pecuniary liability also entail personal liability, which could significantly adversely impact our business operations and financial condition.

17. A significant portion of our revenues are denominated in foreign currencies. As a result, we are exposed to foreign currency exchange risks which may adversely impact our results of operations.

Our Company also export its products to over 10 countries, such as USA, Germany, Europe, Middle East, Oman, Saudi Arabia, South Africa, Nepal and Bangladesh, Japan, Ukraine, Ghana, Brazil, Egypt, Greece. We have material exposure to foreign exchange related risks since a significant portion of our revenue from operations are in foreign currencies. In the last three Fiscals, we have had customers across over 15 countries including the USA, Germany, Europe, etc. During the six months period ended as on September 30, 2023 and the Fiscals 2023, 2022 and 2021, revenue from export of our products our exports of products accounted for ₹ 860.74 lakhs, ₹ 2067.69 lakhs, ₹ 1,550.50 lakhs and ₹ 1056.27 lakhs resulting into 17.19 %, 20.00%, 16.91% and 16.56% of our total revenue, for such periods respectively. Our revenues from exports have grown at a CAGR of 39.91% between Fiscals 2021 and 2023. Any appreciation or depreciation of the Indian Rupee against these currencies can impact our results of operations. We may experience foreign exchange losses and gains in respect of transactions denominated in foreign currencies. We may from time to time be required to make provisions for foreign exchange differences in accordance with accounting standards. Our inability to price our products at the applicable prices in the international markets, may affect the demand for our products and consequently have a material adverse effect on our results of operations and financial condition.

Section 276C provides for punishment in the case of wilful attempt to evade tax, penalty or interest or under-reporting of income. As per section 276C if a person wilfully attempts to evade tax, penalty or interest or under-reports his income, then in addition to any penalty that may be imposed on him under any other provision of the Act, he shall be punished as follows: (i) with rigorous imprisonment which shall not be less than 6 months but which may extend to seven years and with fine where tax sought to be evaded exceeds Rs. 25 lakhs. If an adverse order is passed against the Company, the Company may be liable to a fine which is not determinable at this juncture and the Directors shall be liable to be proceeded against and punished in accordance with the provisions of this IT Act. Further, the penalty if levied under the other provisions of the Income tax act shall be such amount as the Assessing Officer may direct, and in the case of a continuing default, such further amount or amounts as the Assessing Officer may, from time to time, direct, so, however, that the total amount of penalty does not exceed the amount of tax in arrears, i.e., Rs. 31.82 lakhs.

The Company is unable to ascertain the amount involved at this juncture as amount of compensation and/or fine including any imprisonment, which may be adjudged upon the conclusion of the litigation and once the order is passed. However, in the event an adverse order is passed against our Company, it may have a material and/or financial impact on the business of the Company.

We may be required to devote management and financial resources in the defense or prosecution of such legal proceedings. Should any new developments arise, including a change in Indian laws or rulings against us by the appellate courts or tribunals, we may face losses and we may have to make further provisions in our financial statements, which could increase our expenses and our liabilities. Decisions in such proceedings, adverse to our interests, may have a material adverse effect on our business, cash flows, financial condition, and results of operations. Failure to successfully defend these or other claims, or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subject to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure you that similar proceedings will not be initiated in the future. Any adverse order or direction in these cases by the concerned authorities, even though not quantifiable, may have an adverse effect on our reputation, brand, business, results of operations and financial condition.

For further details, please refer to "**Outstanding Litigation and Material Developments**" on page 228 of this Prospectus.

19. Some of our borrowings carry restrictive covenants or conditions and could affect our ability to manage our business operations.

Our Company has entered into agreements in relation to financing arrangements with certain banks for working capital facilities, term loans and bank guarantees. As of September 30, 2023, we had total outstanding borrowings of ₹ 2062.47 lakhs.

Our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions. These restrictive covenants, among other things, require us to obtain either the prior permission of such banks or financial institutions or require us to inform them of various activities, including, among others, effecting any change in the constitutional documents or management or capital structure, any change in the business, any reorganization, merger, amalgamation or scheme of arrangement or compromise, dilution of our Promoters' stake in our Company and changes in the shareholding pattern of

our Company. Additionally, certain terms of our financing agreements also require us to maintain financial ratios which are tested periodically, including on a quarterly or annual basis. For further details, please see “*Financial Indebtedness*” on page 225 of this Prospectus.

Our inability to meet these conditions or ensure that compliance of these conditions do not hamper the operational flexibility needed from time to time could materially adversely affect our results of operations and financial conditions.

20. *Our Manufacturing Units are located at Gandhinagar and Mehsana in Gujarat and at Hoogly in West Bengal exposing us to regulatory and other geography specific risks such as weather and natural occurrences as well as regulatory, economic, demographic and other changes in Gujarat and West Bengal.*

Our Manufacturing Units are located at Gandhinagar and Mehsana in Gujarat and at Hoogly in West Bengal. The concentration of all of our operations these two locations, with two of our Manufacturing Units concentrated in Gujarat, heightens our exposure to adverse developments related to weather and natural occurrences, as well as regulatory, economic, demographic and other changes in Gujarat and West Bengal, which may adversely affect business, financial condition and results of operations.

Further, our manufacturing operations require significant labour and are also reliant on government policies in terms of taxes, duties and incentives made applicable by the Gujarat and West Bengal state governments. As a result, any unfavourable policies in Gujarat and West Bengal, could adversely affect our business, financial condition and results of operations. Furthermore, Gujarat and West Bengal has experienced social and civil unrest in the past within the state and such tensions could lead to political or economic instability in Gujarat and West Bengal and a possible adverse effect on our business, financial condition and results of operations. There can be no assurance that such situations will not recur or be more intense than in the past.

21. *Any adverse change in regulations governing our products and the products of our customers, may adversely impact our business, prospects and results of operations.*

Regulatory requirements with respect to our products and the products of our customers are subject to change. An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our manufacturing process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers. We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for manufacturing or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

22. *Any inability on our part to manage our growth or implement our strategies effectively could have a material adverse effect on our business, results of operations and financial condition.*

We cannot assure you that our growth strategy will continue to be successful or that we will be able to continue to expand our operations. Our growth strategies are subject to and involve risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategies or growth plans or complete them within the budgeted cost and timelines. We currently intend to inter alia expand and optimise our product offerings, increase our global footprint and augment sales in current geographies and expanding into new geographic markets, etc. Such strategies are subject to certain risks and uncertainties. For further details in relation to such strategies see “*Business Overview - Our Strategies*” on page 116 of this Prospectus.

Expansion of operations increases the challenges involved in inter alia making accurate assessments of the resources we require, acquiring new customers and increasing or maintaining contribution from existing customers, procuring raw materials at a cost-effective manner, recruiting, training and retaining sufficient skilled personnel, maintaining high levels of customer satisfaction and adhering to expected performance and quality standards. Pursuant to changes in market conditions, industry dynamics, technological improvements, changes in regulatory or trading policies or changes therein and other relevant factors, our growth strategies and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Additionally, there can be no assurance that debt or equity financing or our internal accruals will be available or sufficient to meet the funding of our growth plans in the future.

Further, our existing operations, personnel, systems and internal controls may not be adequate to support our growth and may require us to make additional unanticipated investments in our infrastructure. To manage the future growth of our operations, we will be required to improve our administrative, operational and financial systems, procedures and controls, and expand, train

and manage our growing employee base. Any inability on our part to manage our growth or implement our strategies effectively could have a material adverse effect on our business, results of operations and financial condition. If, for any reason, the benefits we realize are less than our estimates or the implementation of these growth initiatives, strategies and operating plans adversely affect our operations or cost more or take longer to effectuate than we expect, or if our assumptions prove inaccurate, our results of operations may be materially adversely affected.

23. *Our Promoters and Promoter Group will, even after the culmination of this Issue, continue to be our largest Shareholders and can influence the outcome of resolutions, which may potentially involve conflicts of interest with the other Equity Shareholders.*

While there is no shareholder agreement in place between our Promoters and/or members of the Promoter Group, they will nevertheless, collectively, will have the ability to significantly influence our corporate decision-making process. This will include the ability to appoint Directors on our Board and the right to approve significant actions at the Board and at the Shareholders meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements and any amendment to the constitutional documents. We cannot assure you that the interest of Our Promoters and members of the Promoter Group in any such scenario will not conflict with the interest of other Shareholders or with our interests. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business effectively or in the best interests of the other Shareholders of our Company.

24. *We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.*

As on the of this Prospectus, our Company has registered a trademark  under class 6 bearing registration no. 3912505 with the Registrar of Trademarks under the Trademarks Act. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may also lead to litigations and any such litigations could be time-consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations.

Further, if we do not maintain our brand name and identity, which is a principal factor that differentiates us from our competitors, we may not be able to maintain our competitive edge. If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability. Moreover, our ability to protect, enforce or utilize our brand name is subject to risks, including general litigation risks. Furthermore, we cannot assure you that such brand name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source in India and abroad. Any damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position.

Further, while we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty that we are not infringing any existing third-party intellectual property rights and we may also be susceptible to claims from third parties asserting infringement and other related claims in India and abroad. 26. *We may not be able to secure funding in the future. In the event our Company is unable to obtain sufficient funding, it may delay our growth plans and have a material adverse effect on our business, cash flows and financial condition.*

From time to time, our Company's plans may change due to changing circumstances, new business developments, new challenges or investment opportunities or unforeseen contingencies. If our plans change or if we are required to adapt to changing circumstances or business realities, our Company may need to obtain financing to meet inter alia capital expenditure. Such financing may be in the form of debt funding, which may be raised through borrowings from commercial banks, issue of debentures or other debt securities. If we raise funds in future by incurring additional debt, the interest and debt repayment obligations of our Company will increase, and we may be subject to supplementary or new covenants, which could limit our ability to access cash flow from operations and/or other means of financing. Moreover, these funds could come at a higher cost which may impact our profitability. Further, we cannot assure you that we will be able to obtain adequate financing to fund

future capital requirements on acceptable terms, in time. Any failure to obtain sufficient funding could result in the delay or abandonment of our growth plans and have an adverse impact on our business, cash flows and financial conditions.

27. *Our insurance coverage may not be sufficient or adequate to protect us against all material hazards, which may adversely affect our business, results of operations, financial condition and cash flows.*

Further, there is no assurance that the insurance premiums payable by us will be commercially viable or justifiable. Accordingly, our inability to maintain adequate insurance cover in connection with our business could adversely affect our operations and profitability.

We cannot assure you that, in the future, any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Further, an insurance claim once made could lead to an increase in our insurance premium, result in higher deductibles and also require us to spend towards addressing certain covenants specified by the insurance companies. We had no insurance claims that were receivable in last three Fiscals.

To the extent that we suffer loss or damage as a result of events for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or the amount received pursuant to an insurance claim, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected.

We are a manufacturing entity and, at all points of time, a certain portion of assets comprise inventory of raw materials and finished products. Maintaining sufficient inventory of raw materials is critical for our operations. Any failure on our part to effectively manage our inventory of raw materials and finished products in response to changing market scenario may have an adverse effect on our financial condition and may even lead to loss of materials and increase the costs of our operations. 32. *Our Company may not be successful in penetrating new export markets.*

In addition, the risks involved in entering new geographic markets, may be higher than expected, and we may face significant competition in such markets. By expanding into new geographical regions, we could be subject to additional risks associated such as compliance with a wide range of laws, regulations and practices; exposure to expropriation or other government actions; and political, economic and social instability.

33. *Our operations could be adversely affected by strikes, work stoppages, demands for increased wages or any other kind of employee dispute.*

We cannot assure you that the above-mentioned forms will be available in the future.

Further, in the past, certain filings and corporate authorizations made by our Company have not been made in strict compliance of the Companies Act, 2013 and or the Secretarial Standards, such as certain mandatory attachments required to be attached to the forms filed with the RoC were not attached. For instance, consent of Auditor was inadvertently not attached to e-form ADT-1 form filed in e-form GNL-2 for the year 2014. Additionally, certain forms filed by our Company in the past had factual inaccuracies or were not made in the manner required under the Companies Act, 1956, the Companies Act, 2013, which related to, amongst others, incorrect references to the relevant provisions of the Companies Act, 1956 and the Companies Act, 2013 and typographical error in recording of names of allottees in the forms and resolutions. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented / augmented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of oil prices and other constraints. Our Company is mainly dependent on the State Governments for meeting its electricity requirements. Any disruption / non-availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

Information relating to the current and historical installed capacity of each of the plants currently in our Manufacturing Units and the estimated installed capacities of the additional plants proposed to be installed at the Manufacturing Units are based on certain technical assumptions. Such assumptions include assumptions for arriving at production capacity like number of shifts and the duration of each shift. Prospective investors should not place undue reliance on the historical installed capacity information and estimated installed capacity for the plants currently in the Manufacturing Units, and the estimated installed capacities of additional proposed plants. While we have obtained a certificate from S.K. Patel, dated January 20, 2024 actual capacities and utilization rates may differ significantly from the estimated installed capacities or estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our installed capacity or estimated capacity utilization information for our existing facility included in this Prospectus. For further details, please refer to the chapter titled “**Business Overview**” on page 116 of this Prospectus.

Further, the transactions into which we have entered and any future transactions into which we may enter into with our related parties have involved or could potentially involve conflicts of interest. The Companies Act, 2013 and the SEBI Listing Regulations provide for compliance requirements, such as obtaining prior approval from the audit committee, board of directors and shareholders for certain related party transactions. There can be no assurance that such transactions would be approved. There can also be no assurance that we would be able to maintain existing terms, or in case of any future transactions with related parties. While we have entered into transactions with related parties on an arm's length basis and are in accordance with the provision of the Companies Act, 2013 and other applicable laws if any, we cannot assure you that any related party transactions in future, individually or in the aggregate, will not be negatively perceived or have an adverse effect on our results of operations and financial condition.

Our computer systems may be potentially vulnerable to breakdown, malicious intrusion and computer viruses and these systems may be susceptible to outages due to fire, power loss, telecommunications failures, natural disasters, break-ins and similar events. We cannot assure you that we will not encounter disruptions to our information technology systems in the future and any such disruption may result in the loss of key information or disruption of our business processes, which could adversely affect our business and results of operations.

39. *Our Company's ability to pay dividends in the future will depend on a number of factors, including but not limited to our Company's earnings, capital requirements, contractual obligations, applicable legal restrictions and overall financial position.*

Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements with our lenders. The declaration and payment of dividends will be recommended by the Board of Directors and approved by the Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act 2013 and dividend policy of our Company. However, we may retain all future earnings, if any, for use in the operations and expansion of the business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company.

Further, we cannot assure you that the Promoters will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and results of operations.

Any demand for the repayment of such unsecured loans, may adversely affect our cash flow and financial condition.

- 44. *Our Promoters and members of the Promoter Group have provided personal guarantees for our borrowings to secure our loans. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by Our Promoters in connection with our Company’s borrowings.***

Our Promoters and members of the Promoter Group have provided personal guarantees for our borrowings to secure our loans. For further details, please see “*Financial Indebtedness*” on page 225 of this Prospectus. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters / members of the Promoter Group in connection with our Company’s borrowings.

- 45. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the chapter “*Objects of the Issue*” on page 80 of this Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

- 46. *The requirements of being a listed entity will strain our resources.***

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which require us to file audited / unaudited reports periodically with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and / or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, for which significant resources and management overview will be required. Further, we may need to hire additional legal and accounting staff with appropriate and relevant experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner or at all. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations.

- 47. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by Our Promoters may dilute your shareholding and adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may lead to a dilution of your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur, may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

48. *If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.*

Having our business operations at multiple jurisdictions, we are subject to varying central and state tax regimes. The applicable categories of taxes and tax rates also vary significantly from jurisdiction to jurisdiction, which may be amended from time to time. Our business and financial performance may be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business or the regulator enforcing them in any one of those countries may adversely affect our results of operations.

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the GoI that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time and any adverse changes in any of the taxes levied by the GoI may adversely affect our competitive position and profitability. We cannot assure you that the GoI may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government and other regulatory bodies or impose onerous requirements and conditions on our operations.

49. *Statistical and industry data contained in this Prospectus may be incomplete or unreliable.*

Statistical and industry data used throughout this Prospectus has been obtained from various government and industry publications. We believe the information contained herein has been obtained from sources that are reliable, but we have not independently verified it and the accuracy and completeness of this information is not guaranteed and its reliability cannot be assured. The extent to which the market and industry data presented in this Prospectus is meaningful will depend upon the reader's familiarity with and understanding of the methodologies used in compiling such data.

Further, this market and industry data has not been prepared or independently verified by us or the Lead Manager or any of their respective affiliates or advisors. Such data involves risks, uncertainties and numerous assumptions and is subject to change based on various factors. Accordingly, investment decisions should not be based on such information.

50. *Our business is working capital intensive. If we experience insufficient cash flows to meet required payments on our working capital requirements, there may be an adverse effect on the results of our operations.*

Our working capital requirements for FY 2023-24 and 2024-25 are estimated at ₹ 4773.98 lakhs and ₹ 5803.05 lakhs, respectively. For details, please see "*Objects of the Issue*" on page 80 of this Prospectus.

We require a significant amount towards working capital requirements which is based on certain assumptions, and accordingly, any change of such assumptions would result in changes to our working capital requirements.

A significant amount of working capital is required to finance the purchase of raw materials, equipment, mobilization of resources and other work on projects before payment is received from clients. As a result, we will continue to avail debt in the future to satisfy our working capital requirements. Our working capital requirements may increase if we undertake larger or additional projects or if payment terms do not include advance payments or such contracts have payment schedules that shift payments toward the end of a project or otherwise increase our working capital burden.

The working capital requirement involves providing of performance bank guarantees for the work awarded to our Company for which cash margin has to be provided. Apart from that the clients retain certain percentage of the contract value after the completion of the project as retention money. We strive to maintain strong relationships with local and national banks, as well as non-banking financial institutions to increase our financing flexibility. Our credit profile often enables us to obtain financing on favourable terms from major financial institutions. However, we cannot assure you that our relationships with lenders will not change or that lenders will continue lending practices we are familiar with. Our lenders may implement new credit policies, adopt new pre-qualification criteria or procedures, raise interest rates or add restrictive covenants in loan agreements, some or all of which may significantly increase our financing costs, or prevent us from obtaining financings totally. As a result, our projects may be subject to significant delays and cost overruns, and our business, financial condition and results of operations may be materially and adversely affected. In general, a large part of our working capital is also blocked in trade receivables from our clients, including those arising from progress payments or release of retention money. There can be no assurance that the progress payments and the retention money will be remitted by our clients to us on a timely basis or that we will be able to efficiently manage the level of bad debt arising from such payment practice. Our working capital position also depends on the period of time taken by the government authorities/bodies to certify the invoice issued by us and release payment. All of these factors may result in an increase in the amount of our receivables and short-term borrowings and the continued increase in working capital requirements may have an adverse effect on our financial condition and results of operations.

51. *There is no monitoring agency appointed by our Company to monitor the utilization of the Issue proceeds*

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above Rs. 100.00 Crores. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

Further, we propose to utilize the Net Proceeds for purposes identified in the chapter titled “*Objects of the Issue*” and we propose to utilize the Rs. 2000.00 Lakhs of the Net Proceeds towards funding capital expenditure towards expansion of our existing manufacturing facility at Plot No. 110/1,110/2, New Survey No. 202, Village Ganeshpura, Mehsana, Gujarat, India (“Manufacturing Unit 2”) and Rs. 350.00 Lakhs of the Net Proceeds towards funding our Working Capital requirements. The manner of deployment and allocation of such funds is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the Companies Act.

Our Company shall on a half yearly basis disclose to the Audit Committee the uses and application of the Net Proceeds. Additionally, the Audit Committee shall review the report submitted by the Management and make recommendations to our Board for further action, if appropriate. Our Company shall, on an annual basis, prepare a statement of funds utilised for purposes other than those stated in this Prospectus and place it before the Audit Committee. Such disclosure shall be made only till such time that all the Net Proceeds have been utilised in full.

52. *Our Company has mortgaged its immovable properties including factory land against the manufacturing facility availed by us.*

Our Company has mortgaged its immovable properties including its factory land and building to secure our credit facilities. Further, if we fail to service our debt obligations, the lenders have the right to enforce the security created in respect of our secured borrowings. If the lenders choose to enforce security and dispose our assets to recover the amounts due from us, our business, results of operations and financial condition may be adversely affected.

53. *Our Promoter, has mortgaged their personal properties and provided personal guarantees for our borrowings to secure our credit facilities. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal provided by our Promoters in connection with our Company’s borrowings.*

Mr. Jyoti Prasad Bhattacharya, our Promoter has mortgaged his personal properties and provided personal guarantees for our borrowings to secure our credit facilities. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal and/or corporate guarantees provided by our Promoter in connection with our Company’s borrowings. For further details, please see “*Financial Indebtedness*” on page 216 of the Prospectus.

EXTERNAL RISKS

54. *Changing laws, rules and regulations in India and legal uncertainties, including adverse application of tax laws, in the jurisdictions in which we operate may adversely affect our business and results of operations.*

The governmental and regulatory bodies may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, results of operations and financial condition. In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations, including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals.

The Government of India has notified four labour codes which are yet to completely come into force as on the date of this Prospectus, namely, (i) The Code on Wages, 2019, (ii) The Industrial Relations Code, 2020 (iii) The Code on Social Security, 2020 and (iv) The Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. There can be no assurance that the Government of India will not implement new regulations and policies requiring us to obtain approvals and licenses from the Government of India or other regulatory bodies or impose onerous requirements and conditions on our operations. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management

time and other resources, and any failure to comply may adversely affect our business, results of operations and financial condition.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time-consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

55. *The occurrence of natural or man-made disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect the financial markets and our business.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19 and man-made disasters, including acts of war such as Russia's invasion of Ukraine, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

56. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

We maintain large amounts of inventory at our premises at all times. Although we have set up security measures, our operations may be subject to incidents of theft or damage to inventory. There can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future which could adversely affect our results of operations and financial condition. For instance, we had in the past experienced theft of few finished products at our manufacturing facilities. Additionally, in case of losses due to theft, fire, breakage or damage caused by other casualties, there can be no assurance that we will be able to recover from our insurer the full amount of any such loss in a timely manner, or at all. If we incur a significant inventory loss due to third-party or employee theft and if such loss exceeds the limits of, or is subject to an exclusion from, coverage under our insurance policies, it could have a material adverse effect on our business, results of operations and financial condition.

57. *A downgrade in ratings of India and other jurisdictions in which we operate may affect the trading price of the Equity Shares.*

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. Any further adverse revisions to credit ratings for India and other jurisdictions we operate in by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available. Further, a downgrading of India's credit ratings may occur, for example, upon change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favorable terms and consequently adversely affect our business and financial performance and the price of the Equity Shares.

58. *If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our customers thereby reducing our margins.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of wages and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our customers, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase the price of our products to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

59. A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian law.

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011 (“**Takeover Regulations**”); an ‘*acquirer*’ has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors / shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of the Takeover Regulations.

60. Investors may not be able to enforce a judgment of a foreign court against us, our Directors, the LM or any of their directors and executive officers in India respectively, except by way of a lawsuit in India.

Our Company is incorporated under the laws of India as a company limited by shares. As on the date of this Prospectus, the majority of our Directors and Key Managerial Personnel are residents of India. A substantial portion of our Company’s assets and the assets of our Directors and executive officers resident in India are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons outside India or to enforce judgments obtained against our Company or such parties outside India.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Recognition and enforcement of foreign judgments is provided for under section 13 of the Code of Civil Procedure, 1908 (“CPC”), on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that section, in any country or territory outside of India which the GoI has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties but does not include an arbitration award, even if such an award is enforceable as a decree or judgment. The United Kingdom, United Arab Emirates, Singapore and Hong Kong, among others, have been declared by the GoI to be reciprocating territories for the purposes of section 44A of the CPC.

The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States on civil liability, whether or not predicated solely upon the federal securities laws of the United States, would not be enforceable in India. However, the party in whose favour such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three (3) years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

Further, there may be considerable delays in the disposal of suits by Indian courts. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian law. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered, and we cannot assure you that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approvals would be acceptable. Further, any such amount may be subject to income tax in accordance with applicable laws. Any judgment awarding damages in a foreign currency is required to be converted into Rupees on the date the award becomes enforceable and not on the date of payment.

61. *A slowdown in economic growth in India could adversely affect our business.*

The structure of the Indian economy has undergone considerable changes in the last decade. These include increasing importance of external trade and of external capital flows. Any slowdown in the growth of the Indian economy or any future volatility in global commodity prices could adversely affect our business, financial condition and results of operations. India's economy could be adversely affected by a general rise in interest rates, fluctuations in currency exchange rates, adverse conditions affecting housing and tourism and electricity prices or various other factors. Further, conditions outside India, such as slowdowns in the economic growth of other countries, could have an impact on the growth of the Indian economy and government policy may change in response to such conditions. The Indian economy and financial markets are also significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States, Europe or China or Asian emerging market countries, may have an impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss of investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets, and could have an adverse effect on our business, financial condition and results of operations and the price of the Equity Shares.

62. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, in the jurisdictions in which we operate may adversely affect our business and results of operations.*

Our business, results of operations and financial condition could be materially adversely affected by changes in the laws, rules, regulations or directions applicable to us, or the interpretations of such existing laws, rules and regulations or the promulgation of new laws, rules and regulations. For details on the laws applicable to us, please see "**Key Regulations and Policies in India**" on page 137 of this Prospectus.

The governmental and regulatory bodies may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, results of operations and financial condition. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations, including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals.

The Government of India has notified four labour codes which are yet to completely come into force as on the date of this Prospectus, namely, (i) The Code on Wages, 2019, (ii) The Industrial Relations Code, 2020, (iii) The Code on Social Security, 2020 and (iv) The Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. There can be no assurance that the Government of India will not implement new regulations and policies requiring us to obtain approvals and licenses from the Government of India or other regulatory bodies or impose onerous requirements and conditions on our operations. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and financial condition.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time-consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

ISSUE SPECIFIC RISKS

Risks relating to the Equity Shares and this Issue

63. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price / Price of the Equity Shares will be determined by our Company and in consultation with the LM through Fixed price method. This price will be based on numerous factors, as described under "**Basis for Issue Price**" on page 93 of this Prospectus and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, problems such as temporary closure, broker default and settlement delays experienced by the Indian Stock Exchanges, strategic actions by us or our competitors, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all. There has been significant

volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

64. *The trading volume and market price of our Equity Shares may be volatile post the Issue.*

The market price of the Equity Shares may fluctuate as a result of the following factors, some of which are beyond our control:

- General economic and stock market conditions;
- Quarterly variations in our results of operations;
- Changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- Announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- Announcements by third parties or governmental entities of significant claims or proceedings against us;
- New laws and governmental regulations applicable to our industry;
- Additions or departures of key management personnel;
- Changes in exchange rates;
- Public's reaction to our press releases, other public announcements and filings with the regulator;
- Any additional investment or sale of investment by significant shareholders(s);
- Fluctuations in stock market prices and volume.
- Changes as regards any of the factors above could adversely affect the price of our Equity Shares.

65. *Future sales of Equity Shares by our Promoters and significant shareholders may adversely affect the market price of our Equity Shares.*

After the completion of the Issue, our Promoters and significant shareholders will own, directly and indirectly, approximately 64.60 % of our outstanding Equity Shares. Sales of a large number of the Equity Shares by our Promoters and/or significant shareholders could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur could adversely affect the market price of the Equity Shares. Except as disclosed in "*Capital Structure*" on page 61 of this Prospectus, no assurance may be given that our significant shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

66. *Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to the applicable Indian laws and practice, permission for listing of the Equity Shares will not be granted till the Equity Shares in this Issue have been issued and allotted and all relevant documents are submitted to the Stock Exchange. Further, certain actions must be completed prior to the commencement of listing and trading of the Equity Shares such as the Investor's book entry or 'demat' accounts with the depository participants in India, expected to be credited within one (1) Working Day of the date on which the Basis of Allotment is finalized with the Stock Exchange. In addition, the Allotment of Equity Shares in the Issue and the credit of such Equity Shares to the applicant's demat account with the depository participant could take approximately two (2) working days from the Bid / Issue Closing Date and trading in Equity Shares upon receipt of listing and trading approval from the Stock Exchange, is expected to commence within three (3) working days from Bid/ Issue Closing Date. Any failure or delay in obtaining the approval or otherwise commence trading in Equity Shares would restrict your ability to dispose of your Equity Shares. We cannot assure you that the Equity Shares will be credited to investors' demat accounts or that trading in the Equity Shares will commence in a timely manner (as specified herein) or at all. We could also be required to pay interest at the applicable rates if the allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

67. *Any future issuance of Equity Shares, or convertible securities or other equity linked instruments by us may dilute your shareholding and sale of Equity Shares by the Promoter and members of our Promoters Group (with significant shareholding) may adversely affect the trading price of the Equity Shares.*

We may be required to finance our growth (whether organic or inorganic) through future equity offerings. Any future issuance of Equity Shares, convertible securities or securities linked to the Equity Shares by us, may lead to a dilution of your shareholding in our Company. Any future equity issuances by us (including under any employee benefit scheme) or disposal of our Equity Shares by our Promoters, members of our Promoters Group or any of our other principal shareholders or any other change in our shareholding structure to comply with the minimum public shareholding norms applicable to listed companies in India or any public perception regarding such issuance or sales may adversely affect the trading price of the Equity Shares,

which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt.

We cannot assure you that we will not issue further Equity Shares or that our existing shareholders including our Promoters and members of our Promoters Group will not dispose of further Equity Shares after the completion of the Issue (subject to compliance with the lock-in provisions under the SEBI ICDR Regulations) or pledge or encumber their Equity Shares. Any future issuances could also dilute the value of shareholder's investment in the Equity Shares and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the Issue Price. We may also issue convertible debt securities to finance our future growth or fund our business activities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

68. *Significant differences exist between Ind AS and other accounting principles, such as U.S GAAP and IFRS, which investors may consider material to their assessment of our financial condition.*

Our Restated Financial Statements for the six months period ended September 30, 2023 and for the FY 2022-23, 2021-22 and 2020-21, have been prepared and presented in conformity with Ind GAAP. Ind GAAP differs in certain significant respects from IND AS, IFRS, U.S. GAAP and other accounting principles with which prospective investors may be familiar in other countries. If our financial statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our financial statements, and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should be limited accordingly.

69. *Rights of shareholders of our Company under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and wide-spread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder of our Company than as a shareholder of an entity in another jurisdiction.

70. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI, from time to time. If a transfer of shares is not in compliance with such requirements and fall under any of the exceptions specified by the RBI, then the RBI's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms, or at all. In terms of Press Note 3 of 2020, dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade ("DPIIT"), as consolidated in the FDI Policy with effect from October 15, 2020, all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the GoI. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the GoI. Any such approval(s) would be subject to the discretion of the regulatory authorities. This may cause uncertainty and delays in our future investment plans and initiatives.

We cannot assure you that any required approval from the relevant governmental agencies can be obtained on any particular terms or at all. For further details, please see "**Restrictions on Foreign Ownership of Indian Securities**" on page 287 of this Prospectus.

Moreover, the exchange control regulations we are subject to constrain our ability to remit dividends to our Shareholders. There is no assurance that your dividends will not subject to any delay or deduction. In addition, the exchange control regulations we are subject to could affect the availability of cash and cash equivalents for use by our Company, which may adversely affect our business, results of operations, financial condition and cash flows.

71. *The determination of the Issue Price is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The determination of the Issue Price is based on various factors and assumptions and will be determined by our Company, in consultation with the LM. Furthermore, the Issue Price of the Equity Shares will be determined by our Company in consultation

with the LM, through the Fixed Price Process. These will be based on numerous factors, including factors as described under “**Basis for the Issue Price**” on page 93 of this Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

72. Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (ASM) and Graded Surveillance Measures (GSM) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility. On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Issue due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the above-mentioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation. In the event our Equity Shares are covered under such pre-emptive surveillance measures implemented by SEBI and the Stock Exchanges, we may be subject to certain additional restrictions in relation to trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active market for and trading of our Equity Shares.

C. Justification

Inventories	Inventory levels are maintained by our Company depending upon the demand and delivery schedules. We have assumed Inventories turnover days to be around 90 days for Fiscal 2024 and 90 days for FY 2025. The Holding levels of the inventories were 140 days in Fiscal 2021 and 80 days in Fiscal 2022. The business operations during the said periods were impacted by Covid-19. However, the holding level was reduced to 80 days in Fiscal 2022. The Holding levels of the inventories were 93 days in Fiscal 2023. The higher inventory level of 118 days for the six months period ended September 30, 2023 will get normalised by end of the FY2024.
Trade Receivable	We have maintain holding level for trade receivable. The Holding levels of the trade receivable were 72 days in Fiscal 2021, 63 days in Fiscal 2022 and 68 days in Fiscal 2023. We have been able to maintain the trade receivables around normalcy during the previous three Fiscals 2023, 2022 and 2021 irrespective of the Covid-19 impact.
Short Term Loans & Advances	Short term loan and advance consist of balance with government authorities, advance to employees etc. The holding level of Short-Term Loans & Advances of our Company were 29 days in Fiscal 2023, 30 days in Fiscal 2022, 23 days in Fiscal 2021.
Other Current Assets	Our Company had maintained holding level of other current assets at 3 days in Fiscal 2023, 2 days in Fiscal 2022, 4 days in Fiscal 2021.
Trade Payable	For Fiscal 2024 and Fiscal 2025, we expect to utilize proceeds of the issue to rationalize the creditors payment days and thus intends to get benefits of better pricing by offering faster payment terms. The holding level of our creditors payment period had come down from 86 days in Fiscal 2021 to 57 days in Fiscal 2022 and to 45 days in Fiscal 2023.
Other Current liabilities	This consists of amounts payable to employees and towards other expenses and are assumed to be having payment cycle as per the terms and conditions prevailing for each such financial liability. The holding level of other financial liabilities has ranged 13 days in Fiscal 2023, 20 days in Fiscal 2022 and 26 days in Fiscal 2021.
Short term provision	The holding levels of short term provision has ranged of 9 days in Fiscal 2023, 7 days in Fiscal 2022 and 4 days in Fiscal 2021.

The increase in working capital is on account of increase in revenue from operations estimated for the FY 2024 and 2025. The higher sales in FY 2025 is also attributable to the expansion of production capacity which shall commence manufacturing in FY 2025. Further, the increase in net working capital is also due to rationalization of trade payable to 30 days in FY 2024 and 2025 as against 45 days in FY 2023. This is in line with the strategy of the company to reduce the trade payable over the years, for e.g., the trade payable have reduced to 45 days in 2023 from 86 days in 2021.

We believe that our growth in revenue for FY 2024 and 2025 would be both organic and also attributable to the proposed expansion and investment in plant & machinery out of proceeds received from IPO. We further believe that the expansion should result in improvement in process and value addition. Thus, resulting in increase in revenue from operations and profitability of the Company.

The quantum of utilization of funds toward the aforementioned purposes will be determined by our Board based on the amount actually available under the head “**General Corporate Purposes**” and the corporate requirements of our

INTRODUCTION

One of the primary forces behind industrialization has been the use of metals. Steel has traditionally occupied a top spot among metals. Steel production and consumption are frequently seen as measures of a country's economic development because it is both a raw material and an intermediary product. Therefore, it would not be an exaggeration to argue that the steel sector has always been at the forefront of industrial progress and that it is the foundation of any economy. The Indian steel industry is classified into three categories - major producers, main producers and secondary producers.

India is the world's second-largest producer of crude steel, with an output of 125.32 MT of crude steel and finished steel production of 121.29 MT in FY23. In FY23, the production of crude steel in India stood at 125.32 MT. India's steel production is estimated to grow 4-7% to 123-127 MT in FY24. The growth in the Indian steel sector has been driven by the domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is modern, with state-of-the-art steel mills. It has always strived for continuous modernisation of older plants and up-gradation to higher energy efficiency levels.

MARKET SCENARIO

Indian Market Scenario

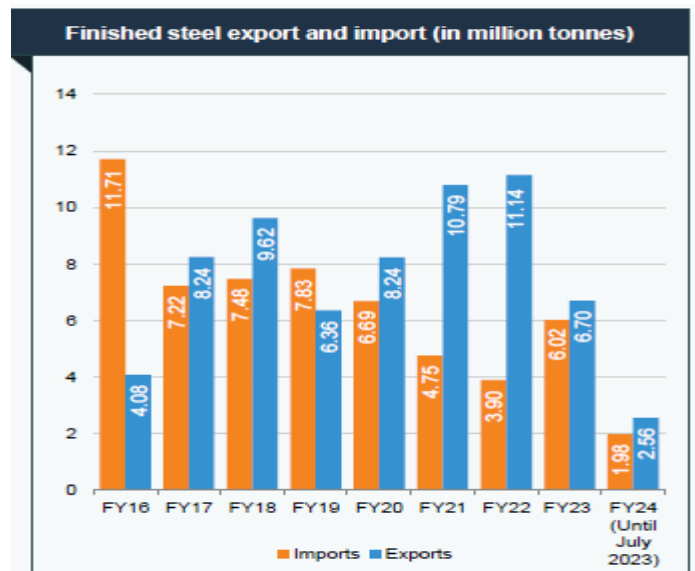

In the past 10–12 years, India's steel sector has expanded significantly. Production has increased by 75% since 2008, while domestic steel demand has increased by almost 80%. The capacity for producing steel has grown concurrently, and the rise has been largely organic.

In FY23, the production of crude steel and finished steel stood at 125.32 MT and 121.29 MT respectively. . In FY24 (until July 2023), the production of crude steel and finished steel stood at 45.39 MT and 43.01 MT respectively. In FY23, crude and finished steel production stood at 125.32 MT and 121.29 MT respectively. In July 2023, crude steel production in India stood at 11.52 MT. In July 2023, finished steel production stood at 10.53 MT. In FY24 (until July 2023), the consumption of finished steel stood at 41.15 MT. The per-capita consumption of steel stood at 86.7 kgs in FY23.

In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively. The consumption of finished steel stood at 105.751 MT in FY22. In FY23, the consumption of finished steel stood at 119.17 MT. In April-July 2022, the production of crude steel and finished steel stood at 40.95 MT and 38.55 MT.

In FY23, exports and imports of finished steel stood at 6.7 MT and 6.02 MT, respectively. In FY22, India exported 11.14 MT of finished steel. ■ In April 2023 exports of steel stood at 8.55 lakh metric tonnes (LMT), while imports stood at 4.60 LMT. . In FY24 (until July 2023), the exports and imports of finished steel stood at 2.56 MT and 1.98 MT, respectively.

The annual production of steel is anticipated to exceed 300 million tonnes by 2030–2031. By 2030–31, crude steel production is projected to reach 255 million tonnes at 85% capacity utilisation achieving 230 million tonnes of finished steel production, assuming a 10% yield loss or a 90% conversion ratio for the conversion of raw steel to finished steel. With net exports of 24 million tonnes, consumption is expected to reach 206 million tonnes by the years 2030–1931. As a result, it is anticipated that per-person steel consumption will grow to 160 kg.

Market opportunity & investment rationale

Rolls are tailor-made as per the mill requirement of the customers. Since a major quantity of the cast Rolls and forged Rolls are produced for use in the rolling mills of the steel industry, hence the Roll industry is closely related to the steel industry. The growth in the steel industry offers good potential for Rolls manufacturers. With both automobile and infrastructure sectors showing healthy growth rate, there will be a demand-push effect for both flat product and long product rolls. Demand for high-quality, high-performance cast rolls, which are indispensable to the rolling of high-grade steel sheets or strips, is expected to undergo significant growth. Accordingly, the demand for Rolls will be directly related to capex plans of the iron and steel industry and also the demand for steel.

The Indian steel industry envisages 300 million tonnes of production capacity by 2030-31.

Expansion plans announced in the Indian steel industry by some the key players:

- 67 applications from 30 companies have been selected under the Production Linked Incentive (PLI) Scheme for Specialty Steel. This will attract committed investment of Rs. 42,500 crore (US\$ 5.19 billion) with a downstream capacity addition of 26 million tonnes and employment generation potential of 70,000.
- In September 2022, Steel Authority of India Limited (SAIL), a Maharatna PSU, supplied 30,000 tonnes of the entire DMR grade specialty steel for the nation's first indigenously built Aircraft Carrier INS Vikrant.

- In May 2022, Tata Steel announced a CAPEX of Rs. 12,000 crore (US\$ 1.50 billion).
- In October 2021, Tata Steel was planning to set up more scrap-based facilities that will have a capacity of at least a billion tonnes by 2025.
- In October 2021, JSW Steel invested Rs. 150 billion (US\$ 19.9 billion) to build a steel plant in Jammu and Kashmir and boost manufacturing in the region.
- In October 2021, ArcelorMittal and Nippon Steel Corp.'s joint venture steel firm in India, announced a plan to expand its operations in the country by investing ~Rs. 1 trillion (US\$ 13.34 billion) over 10 years.
- In August 2021, Tata Steel announced to invest Rs. 8,000 crore (US\$ 1.08 billion) in capital expenditure to develop operations in India in FY22.

OUR PRODUCTS

Product description

Our Company manufactures custom based and different kinds of Rolls which finds its application in long product mills, flat product mills and seamless tube rolling mills. Our products can be classified based on the raw materials used to manufacture our products or based on their applications. Our products based on the raw materials used to manufacture our products are:

S.G Iron or Ductile Iron Rolls

S.G Iron or Ductile Iron Rolls are available in a wide range of hardness & composition for a variety of applications. The matrix structure varies from Ferrite – Pearlitic, Pearlitic to Bainitic & Martensitic together with different carbide contents and graphite in the form of spheroids/nodules.

The rolls are used in roughing, intermediate as well as finishing stands of both heavy & light section mills. Some critical grades are heat treated for higher strength. The chemical composition and structure are chosen to suit specific application.

Indefinite Chill Alloy Cast Iron

These are cast Iron based rolls alloyed with Nickel, Chromium and Molybdenum having a matrix of pearlite and carbide with flake graphite. These rolls are used primarily for Section Rolling. The material has very good thermal properties and in parts good surfaces finish to the product.

These rolls are available in higher hardness ranges where the matrix is Bainitic instead of Pearlitic and are used in finishing stands of rod mill.

Alloy Steel Base

These rolls are special hyper eutectoid steels alloyed with Nickle, Chromium & Molybdenum. These Rolls are used in breakdown, roughing & intermediate mills for bloom, billet & sections and for finishing of heavy sections.

These rolls are statically cast and undergo a three-stage high temperature heat treatment comprising of annealing, normalizing & tempering cycles. The rolls are available in a wide variety of composition & properties to suit specific application. These rolls normally do not have any drop in hardness along section.

Double Poured Alloy Indefinite Chill

D.P.I.C rolls are made of a high alloy iron shell a soft grey iron or ductile iron core metal. These rolls are used in finishing stands of rod mills and for flat rolling. The shell material consisting of predominantly Bainitic or Martensitic matrix with free carbides with small quantities of tiny flake graphite, have excellent wear resistance coupled with resistance to fire cracking. These rolls are available in hardness range of 70 to 85 Shares C. The core material of these rolls is mostly grey iron but where higher strength is required, the core is made of ductile/nodular cast iron.

HSS Rolls

High-Speed Steel (HSS) rolls are composed of a high alloy and high carbon HSS outer shell with a nodular iron core. The HSS material’s microstructure comprises a tempered martensitic matrix that contains finely dispersed MC, M2C, and M6C carbides in significant amounts. They also provide exceptional features such as improved high temperature strength, hot hardness, wear & oxidation resistance, excellent smooth surface high fire crack resistance & a very fine fire crack pattern. Additionally, they can even sustain multiple campaigns without requiring regrinding under suitable testing conditions.

Our products can majorly be divided as:

Application / Name of Products	Product Image	Application	Description
--------------------------------	---------------	-------------	-------------

<p>Spheroidal Graphite Iron Rolls</p>		<p>TMT/ Bar/ Round Mill, Light Section Mill, Blooming & Heavy Section Mill, Universal & Rail Mill, Narrow Strip Mill, Seamless Tube Rolling Mill</p>	<p>Pearlitic Chill rolls are essentially an indefinite chill type material. The microstructure constitutes of nodular graphite and carbides in a pearlitic matrix. The resistance to fire-cracking is best when the softer grades are used.</p> <p>Its good hardness penetration makes it suitable for small to medium sections and billets although they can also give good results when rolling flat products.</p>
<p>Adamite Rolls</p>		<p>TMT/ Bar/ Round Mill, Light Section Mill, Blooming & Heavy Section Mill, Universal & Rail Mill, Continuous Strip Mill</p>	<p>These rolls are special hyper eutectoid steels alloyed with Nickle, Chromium & Molybdenum. These Rolls are used in breakdown, roughing & intermediate mills for bloom, billet & sections and for finishing of heavy sections.</p> <p>These rolls are statically cast and undergo a three stage high temperature heat treatment comprising of annealing, normalizing & tempering cycles. The rolls are available in a wide variety of composition & properties to suit specific application. These rolls normally do not have any drop in hardness along section.</p>
<p>Double Pour Indefinite Chilled Rolls</p>		<p>TMT/Bar/ Round Mill, Light Section Mill</p>	<p>The micro structure of DPIC has a gradual transition from a carbide-rich surface containing a small amount of graphite to a grey core. The surface is intermediate between white and grey iron, with the amount of graphite reducing in harder grades towards the centre of the roll.</p> <p>The presence of flake graphite enhances chipping resistance and fire-cracking resistance, making DPIC suitable for products that require excellent surface finish.</p> <p>The material is ideal for rolling flats, sections, and similar products with shallow grooves.</p>

Indefinite Chilled Rolls		TMT/Bar/Round Mill, Light Section Mill, Blooming & Heavy Section Mill, Universal & Rail Mill, Seamless Tube Rolling Mill	<p>The micro structure of Indefinite Chilled Cast Irons has a carbide-rich yet tough material. The presence of flake graphite enhances chipping resistance and fire-cracking resistance, making Indefinite Chilled Cast Irons suitable for products that require excellent surface finish.</p> <p>The material is ideal for rolling flats, sections, and similar products with deeper grooves.</p>

Our Manufacturing Process

Static casting process

The Static Casting process is used to cast the whole Roll in one go so the chemical properties are same throughout the Roll. By employing cooling speed and heat treatment techniques, we are able to manipulate the performance of the Roll neck and shell to meet specific requirements. Our static casting process is utilized for a variety of rolling mills, including roughing mills, section mills, rail and beam mills, universal mills, edge mills, wire mills, and rod mills. To produce our rolls, we utilize both top pour and bottom pour casting methods.

The raw materials and steel scrap are melted in the furnace and the accurate chemical composition is achieved. This liquid metal is then poured into a sand mould. Once cooled, the 'knockout' process begins, involving the removal of sand and moulds to reveal the raw casting. The castings then undergo initial inspection for any flaws or defects, with faulty castings being either repaired or recycled.

Next, the casting moves on to 'machining', where traditional processes like turning, milling, and drilling give the raw casting its final shape and size as a finished roll. During machining, quality checks are performed, where the roll is examined for compliance with the design specifications, and any surface imperfections are addressed. Once the finished roll passes all quality checks, it's ready for 'dispatch', with proper packaging for damage prevention during transportation, and then shipped to the customer.

Centrifugal casting process

With centrifugal casting, we are able to create rolls consisting of two distinct materials. The surface portion of the barrel is composed of a material that is both heat-resistant and highly resistant to wear, while the core is made up of a material that boasts excellent mechanical strength. The upper and lower ends of the layer exhibit almost uniform thickness and the structure is more compact making it perform better than static rolls where high-heat performance is required. All the processes are identical except the liquid metal is poured into a centrifuge during casting.

ENVIRONMENT, HEALTH AND SAFETY MEASURES

Environment and safety considerations are an important part of our operations. We are subject to environmental laws and regulations, including regulations relating to the protection of the environmental and human health in relation to our Manufacturing Units. These laws and regulations govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from our operations. We have obtained necessary approvals and permission for operating our Manufacturing Units. For further details, see chapter titled *“Government and Other Approvals”* beginning on page 234 of this Prospectus and *“Risk Factors - We are required to obtain consents under certain environmental laws, which are critical for operating our Manufacturing Facility. We have in the past been non-compliant with the requirements under environmental law for our operations and there is no assurance that in the future we would be able to obtain such consent in a timely manner or at all.”* on page 23 of this Prospectus.

We believe that accidents and occupational health hazards can be significantly reduced through a systematic analysis and control of risks and by providing appropriate training to our management and our employees. Our Company has installed fire safety equipment to manage any fire accident at our Manufacturing Units.

We believe in the strict adherence of laws and regulations relating to protection of human health and safety, and the environment. We follow high standards of work safety measures and standards, and our equipment and working conditions promote a healthy and safe work environment. Our Manufacturing Units and personnel are well versed with laws and regulations governing the management and disposal of hazardous substances, and we intend to make our operations more environmentally sustainable in the future.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I:

This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II:

This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III:

SEBI Circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 UPI Phase II was extended till March 31, 2020. Subsequently, the final reduced timeline of T+3 days for the UPI Mechanism for applications by UPI Bidders ("UPI Phase III") and modalities of the implementation of UPI Phase III was notified by SEBI vide its circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 and made effective on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis

for all issues opening on or after December 1, 2023. The Issue will be undertaken pursuant to the processes and procedures as may be prescribed by the SEBI from time to time. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

The Issue will be made under UPI Phase II of the UPI Circulars, unless Phase III of the UPI Circulars becomes mandatorily effective and applicable on or prior to the Issue Opening Date. If the Issue is made under UPI Phase III of the UPI Circulars, the same will be advertised in shall be advertised in all editions of a widely circulated English national daily newspaper, all editions of a widely circulated Hindi national daily newspaper, and all editions of Gujarati newspaper (Gujarati being the regional language of Gujarat, where our Registered Office is located), on or prior to the Issue Opening Date and such advertisement shall also be made available to the Stock Exchanges for the purpose of uploading on their websites.

All SCSBs offering the facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/or payment instructions of the UPI Bidders using the UPI.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-Issue LM will be required to compensate the concerned investor.

Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the LM, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.
