Summary of Business

We are primarily engaged in the manufacturing of Engineered Stones such as: (i) engineered quartz surfaces; and (ii) engineered marble surfaces. Our Company majorly manufactures engineered quartz surfaces and through our Subsidiary, HSPL, we manufacture engineered marble surfaces. We are one of the key Engineered Stone players in India. (Source: CARE Report). Engineered Stone is a composite material formed out of crushed stone that is held together by an adhesive. Engineered Stone’s non-porous characteristics, offer superior scratch, stain and heat resistance, making them extremely durable and therefore get an edge over competing products such as laminate and other manufactured solid surfaces. The strength, consistency, durability and appearance of our Engineered Stones, as well as their low maintenance makes it ideal for its application for vanities & bathroom surfaces, kitchen countertops, floors and wall cladding furniture, and other interior surfaces that are used in a variety of residential and non-residential applications. Through our innovative design and manufacturing processes, we are able to offer our product in wide variety of colours, styles, designs and textures.

For further details, see “*Our Business*” on page 147.

Summary of Industry

The Indian engineered stone market is estimated to be valued at \$3,643 million in 2022. The industry is expected to grow at a CAGR of 7-8% in the projected years between 2022 to 2027. By the year 2032, the Indian engineered stone market is expected to reach \$ 7,355 million.

The outlook for the natural segment is stable with a positive upside in the medium term. Like natural stones, the engineered stone industry is also linked to commercial and residential real estate industries. Going forward, with hybrid working environment, design specifications for homes are likely to be altered as there will be higher demand for flexible homes that are capable of functioning as offices and classrooms if required. This would result in increased penetration of engineered stones to be used in interior designing. Under commercial real estate, the hospitality segment is expected to register a gradual pick-up over the coming years as the sector recovers from the effects of the pandemic. This would turn out well for engineered stones as they are widely used in swimming pools, food facilities, walls, canteens, kitchen countertops, etc.

We have four Manufacturing Facilities which are located within the periphery of Udaipur, Rajasthan. We are dependent on our Manufacturing Facilities for the production of our products. Our Manufacturing Facilities are located in Rajasthan and events impacting state of Rajasthan may disrupt our production and operations. Further, our Manufacturing Facilities are subject to operating risks, such as the breakdown or failure of equipment, disruption in power supply or processes, severe weather conditions, performance below expected levels of efficiency, obsolescence, labour disputes, natural disasters, industrial accidents, infectious diseases (such as COVID-19 pandemic), political instability, the need to comply with the directives of relevant government authorities and the requirement to obtain certain material approvals to operate our Manufacturing Facilities. Historically, we have not experienced any disruption, breakdown or shutdown of our Manufacturing Facilities due to any breakdown or failure of equipment, disruption in power supply or processes, severe weather conditions, performance below expected levels of efficiency, obsolescence, labour disputes, natural disasters, industrial accidents and political instability. However, our Manufacturing Facilities operations were adversely affected due to compliance with the COVID-19 lockdown orders issued by the Government of India in the year 2020. Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted supply of our products is critical to our business. While we seek to ensure a continuous supply of our products to our customers, our customer relationships, business and financial results may be adversely affected by any disruption of operations of our pressing and polishing lines and our major equipment.

2. ***We do not own some of the business premises where our Registered office, branch office, storage facilities are located.***

Our premises on which our Manufacturing Facilities are situated are owned by us. However, some of the premises used by our Company for our business purposes such as our Registered Office and other premises being used for office purpose, storage facilities are taken on lease/rent basis. For more details on properties taken on lease by our Company, see “**Our Business**” on page 147. If any such lease/rent agreements under which we occupy the premises are not renewed on terms and conditions that are favourable to us, or at all, we may suffer a disruption in our operations which could have a material adverse effect on our business, financial condition and results of operations. If we do not comply with certain conditions of the lease, the lessor may terminate the lease, which could have an adverse effect on our operations. While we have not experienced any issue in renewing the lease arrangement in the past, there can be no assurance that renewal of lease/rent agreements with the owner will be entered into. In the event of non-renewal of lease/rent arrangements, we may be required to shift our business premises to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one.

3. *Our manufacturing activity is subject to availability of raw material and the costs of the raw materials. Any shortage in availability or fluctuations in raw material prices, may have a material adverse effect on our business, financial condition, results of operations and cash flows.*

Our operations are dependent upon the price and availability of the raw materials that we require for the production of our products. Our primary raw materials for Engineered Quartz and Engineered Marble Surfaces include quartz grit and powder, marble grit, calcite powder, resin, other chemicals and pigments and for Polyester Resin are phthalic anhydride, styrene monomer and ethylene glycol.

For the Financial Years 2022, 2023 and 2024, the cost of raw materials consumed represented 58.51%, 60.98% and 58.66% respectively, of our revenue from operations. We source majority of our raw materials from third party local suppliers. Our ability to remain competitive, maintain costs and profitability depend, in part, on our ability to source and maintain a stable and sufficient supply of raw materials at acceptable prices. The success of our business is significantly dependent on maintaining good relationships with our raw material suppliers. We generally do not enter into long term supply agreement and the absence of such long-term supply contracts subjects us to risks such as price volatility caused by various factors such as commodity market fluctuations, production and transportation cost, changes in government policies, regulatory changes, etc.

One of the key raw material, polyester resin is a crude oil derivate and hence its price moves in tandem with crude oil prices which makes us susceptible to the risks arising out of crude oil price fluctuation as well as foreign exchange rate fluctuations which could result in a decline in our operating margins.

Although, in order to cater the need of our primary raw material and to reduce our dependence on third-party raw material supplier of (i) quartz grit and quartz powder; and (ii) polyester resins, we commissioned our Manufacturing Facility II and Manufacturing Facility IV respectively. However, the Manufacturing Facility II and Manufacturing Facility IV have been in commissioned recently and therefore we are in process of gradually increasing their capacity utilisation.

While, we have not experienced any significant disruption in supply or fluctuation in the prices of raw material in the past, there can be no assurance that we will not face such situation in future. Any disruption in supply of our raw material or increase in the cost of inputs to our production could lead to higher costs for our products. If we increase the prices of our products to offset the impact of higher costs, this may cause certain of our customers to cancel orders or refrain from purchasing our products, which may materially and adversely reduce the demand for our products, and thus, negatively impact our operating results. If we are unable to pass on cost increases to our customers or are unsuccessful in managing the effects of raw material price fluctuations, our business, financial condition, results of operations and cash flows could be materially and adversely affected.

4. *A significant majority of our revenues from operations are derived from a limited number of customers.*

During the Financial Year 2024, Financial Year 2023 and Financial Year 2022, the contribution towards revenue from sale of products from our top 5 and top 10 customers is as follows:

Sr. No.	Particulars	FY 2023-24		FY 2022-23		FY 2021-22	
		Revenue	%	Revenue	%	Revenue	%
1	Revenue from Top 5 customers	13,954.48	51.66	8705.77	51.16	13445.29	72.66
2	Revenue from Top 10 customers	16,833.20	62.32	10879.39	63.94	15477.20	83.64

(in ₹ Lakhs)

However, the composition of revenue generated from these customers might change as we continue to add new customers in the normal course of business. Our revenues may be adversely affected if there is an adverse development with such customer, including as a result of a dispute with or our disqualification by such major customers, which may result in significant reduction in our orders from such customers, and thereby decline in our revenue, cash flows and liquidity. Further, if our customers are able to fulfil their requirements through captive or in house manufacturing or any of our existing or new competitors providing products with better quality, or cheaper cost, we may lose significant portion of our business and revenue.

Additionally, consolidation of any of our customers may also adversely affect our existing relationships and arrangements with such customers, and any of our customers who are acquired may cease to continue the businesses that require products manufactured by us or may resort to our competitors for their supply requirements. Further, in the event our customers face any form of adverse effect due to exigent circumstances, resulting in a sustained decline in the demand for their products, including due to macroeconomic factors affecting the economy in general could prompt them to reduce their production volumes, in turn affecting their demand for our products. For instance, the COVID-19 pandemic has impacted the sale of our products. Our business from our customers is dependent on our continuing relationship with such customers, the quality of our products, competitive pricing and our ability to timely deliver their orders, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all.

Further, we generally do not enter into long term purchase agreements with our customers and instead rely on purchase orders to govern the volume and other terms of our sales. While we believe that we have maintained good and long-standing relationships with our customers, however, there can be no assurance that we will continue to have such long-term relationship with them. Significant dependence on a select and small group of clients may increase the potential volatility of our results of operations.

We typically have credit terms of 30 to 90 days for our domestic customers and our credit term extends to 30 to 90 days for our export customers. As on date, our export sales are not backed by letter of credit and export receivables are not insured. Although, we have not experienced any material bad debts during the Financial Year 2024, 2023 and 2022, any delay or default in payment by these customers may adversely affect our business, financial condition and results of operations.

Our business is dependent on the decisions and actions of our customers which is determined by our ability to maintain and strengthen our relationships and arrangements with existing customers. Further, during the Fiscals 2024, 2023 and 2022, we derived 59.87%, 72.75% and 92.44% of our sales from exports, respectively. Further, out of our total exports, 94.43%, 97.51% and 96.47% are exported to USA during the Fiscals 2024, 2023 and 2022 respectively. Further during Fiscal 2024 and Fiscal 2023 the Company made 64.43% and 25.73% of our export sales to USA through our Subsidiary, Haique Stones Inc.. Our relationship with our customers is dependent to a large extent on our ability to regularly meet their requirements, including by introducing products with greater marketability, price competitiveness, efficient and timely product deliveries and consistent product quality. In the event we are unable to meet such requirements in the future, it may result in decrease in orders or cessation of business from affected customers. Any loss of any of our significant customers, a decrease in the volume of products our customers demand from us may materially and adversely affect our business, operations, financial condition, results of operations and prospects.

5. ***We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, any failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which are either received or applied for. Many of these approvals are subject to periodical renewal. Any failure to renew the approvals that may expire, or to apply for the required approvals, licences,

registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects.

Further, in order to comply with various applicable local laws, we have made a few applications for obtaining requisite approvals. For example, our Subsidiary Addwaya Chemical had initially made an application dated June 7, 2022 to obtain the consent to operate for Manufacturing Facility III. However, the Rajasthan State Pollution Control Board (“**RPCB**”) issued a Show Cause Notice as to why the application dated June 7, 2022 should not be refused on grounds of not obtaining environmental clearance required under the Ministry of Environment, Forest and Climate Change of India (“**MOEFCCI**”) notification dated September 14, 2006 applicable on production of unsaturated polyester resin. Accordingly, Addwaya has made an application February 2, 2023 bearing number SW/120978/2023 to the MOEFCCI for which public hearing was conducted on December 27, 2023 by Rajasthan Pollution Control Board. Once Addwaya Chemicals receives the environmental clearance, it will again approach the RPCB to obtain the consent to operate for our Manufacturing Facility III. Although, the State Government of Rajasthan has passed The Rajasthan Micro, Small & Medium Enterprise (Facilitation of establishment and Operation) Act, 2019 which provides exemptions to small and medium enterprises established post 2019 from obtaining approval and licenses for a period of five years from the date of obtaining valid acknowledgment certificate under section 6 of The Rajasthan Micro, Small & Medium Enterprise (Facilitation of establishment and Operation) Act, 2019 (“**Rajasthan MSME Act**”). Addwaya Chemicals has obtained the said acknowledgment certificate and therefore in light of the Rajasthan MSME Act, Addwaya Chemical is exempted from obtaining approvals and licenses required under various state and central legislation including approval from Rajasthan state pollution control board for period of five years till August 8, 2028.

In the event Addwaya Chemical fails to receive environmental clearance and consequentially the consent to operate for its Manufacturing Facility III, it shall still enjoy the exemption granted under the Rajasthan MSME Act till August 8, 2028. Thereafter, if the Company is still unable to obtain the environmental clearance and the consent to operate for its Manufacturing Facility III, it may have to cease its operations in the Manufacturing Facility III and it may divert the attention of our management and consume our corporate resources and we may have to incur significant expenses in identifying alternative land parcels for setting up of a new alternative manufacturing facility and shift our manufacturing operations from Manufacturing Facility III to the new alternative manufacturing facility.

In case our Company fails to cease its operations after expiry of the exemption granted under the Rajasthan MSME Act, it may be liable to certain penalties under the Air Act and the Water Act. For further details, see “**Government and Other Statutory Approvals**” on pages 276.

Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals which may result in the interruption of our operations and may have a material adverse effect on our business, financial condition, cash flows and results of operations. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, see “**Key Industry Regulations and Policies**” and “**Government and Other Statutory Approvals**” for permits/licenses required for the business on pages 167 and 276 respectively.

6. ***Major portion of our revenues are derived from exports to the United States of America and any adverse developments in this market or restrained economic or political relations of India with the United States of America could adversely affect our business.***

We have historically derived a significant portion of our revenues from exports to the United States of America. Accordingly, any materially adverse social, political or economic development, natural calamities, civil disruptions, regulatory developments or changes in the policies of the government in the USA could adversely affect our manufacturing and distribution activities, result in modification of our business strategy or require us to incur significant capital expenditure, which will in turn have a material adverse effect on our business, financial condition, results of operations and cash flows. Further, our sales from this region may decline as a result of increased competition, regulatory action, pricing pressures, fluctuations in the demand for or supply of our products or services, the outbreak of an infectious disease such as COVID-19, anti-dumping/ trade policies or geopolitical tensions. For instance, sales of engineered quartz surface products from India are presently subject to antidumping and countervailing duties which has ultimately resulted in lower export of our engineered quartz surfaces to the USA market. As on date, there is no substantial antidumping duty on export of engineered quartz surfaces to USA.

Further, during the Fiscals 2024, 2023 and 2022, we derived 59.87%, 72.75% and 92.44% of our sales from exports, respectively. Further, out of our total exports, 94.43%, 97.51% and 96.47% are exported to USA during the Fiscals 2024, 2023 and 2022 respectively. Further during the Fiscal 2024 and 2023 the Company made 64.43% and 25.73% of our export sales to USA through our Subsidiary, Haique Stones Inc. Therefore, any adverse developments in the USA economy could have an impact on our sales from exports. Our failure to effectively react to adverse situations could affect our business, prospects, results of operations, financial condition and cash flows.

7. *Our business is capital intensive. We require substantial financing for our business operations. Our indebtedness and the conditions and restrictions imposed on by our financing arrangements could adversely affect our ability to conduct our business.*

Our business requires significant amount of working capital primarily as a considerable amount of time passes between purchase of raw materials and collection of receivables post sales to customers. This requires us to obtain financing through various means. As on May 31, 2024, our total borrowings stood at ₹ 12,109.51 lakhs. We may incur additional indebtedness in the future. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and investors interest in the Company, and could adversely impact our Equity Share price.

Furthermore, the objects of the Issue include funding working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, see “*Objects of the Issue*” on page 107. Our working capital requirements may be affected due to factors beyond our control including force majeure conditions, delay or default of payment by our clients, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

During last three (3) financial years, we have been able to raise funding from bank as and when the need has arisen and has not delayed and defaulted our financial commitments. However, any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of one or more of our credit which may adversely affect our ability to conduct our business and have a material adverse effect on our financial condition and results of operations. We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner could adversely impact our planned capital expenditure, our business, results of operations and financial condition.

8. *Our ability to access capital at attractive costs depends on our credit ratings. Non-availability of credit ratings or a poor rating may restrict our access to capital and thereby adversely affect our business and results of operations.*

The cost and availability of capital, amongst other factors, is also dependent on our credit ratings. In December 2023, CRISIL Rating Limited has assigned us CRISIL BB/Stable for long term borrowing and CRISIL A4+ for short term borrowing. We have been assigned the following credit ratings in the last three years:

Particulars	December 1, 2023	August 28, 2023	May 31, 2022
Long Term Rating	CRISIL BB	CRISIL BB+ INC	CRISIL BBB
Short Term Rating	CRISIL A4+	CRISIL A4+ INC	CRISIL A3+
Outlook	Stable	Stable	Stable

Ratings reflect a rating agency's opinion of our Company's financial strength, operating performance, strategic position, and ability to meet our obligations. In December 2023, our ratings was downgraded as compared to August 28, 2023. Any adverse change in credit ratings assigned to our Company or our borrowing limits in the future may impact our ability to raise additional funds and/or the interest cost at which we borrow additional funds and could have an adverse effect on our business and results of operations.

9. *We have availed unsecured loans which are repayable on demand. Any demand for repayment of such unsecured loans, may adversely affect our cash flows.*

As on May 31, 2024, we have unsecured loans amounting to ₹2,356.01 lakhs which are repayable on demand to the relevant lender. Further, these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company, see "**Financial Indebtedness**" on page 243.

10. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have provided security in respect of loans / facilities availed by us from banks and financial institutions by creating a charge over our movable and immovable properties. The total amount outstanding and payable by us as secured loans was ₹ 9,753.49 lakhs, as on May 31, 2024. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our assets may be subject to forfeiture by lenders, which in turn could have significant adverse effect on our business, financial condition or results of operations. For further details of the secured loans availed by us, see "**Financial Indebtedness**" on page 243.

11. *Our Company, our Subsidiaries, our Promoters and Directors are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.*

Our Company, our Subsidiaries, our Promoters and Directors are party to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and legal forums. A summary of outstanding litigation proceedings involving our Company, Subsidiaries, our Promoters, and our Directors, as on the date of this Prospectus as disclosed in "**Outstanding Litigations and Material Developments**" on page 271, in terms of the SEBI ICDR Regulations and the Materiality Policy is provided below:

Additionally, a member of our Promoter Group, Mangi Lal Lunawath, had received a summon wherein he was requested to furnish certain information with respect to buying, selling or dealing in shares of Alka Securities Limited. The said details were furnished to SEBI on March 11, 2010. Post furnishing of requisitioned details, Mangi Lal Lunawath did not receive any further order or regulatory letters or follow up since then. It has been more around 14 years, Mangi Lal Lunawath has not received any further communication from SEBI.

There can be no assurance that litigations involving our Company, our Subsidiaries, our Promoters and

Directors will be decided in favour of our Company, Subsidiaries, Promoters and Directors and consequently it may divert the attention of our management and Promoters and consume our corporate resources and we may incur significant expenses in such proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against Company, our Subsidiaries, our Promoters and Directors, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

Furthermore, we may not be able to quantify all the claims in which we are involved. Failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure that similar proceedings will not be initiated in the future. This could adversely affect our business, cash flows, financial condition, and results of operation. For further details, pertaining to material pending outstanding litigations involving our Company, our Subsidiary, our Promoters and Directors, see “**Outstanding Litigations and Material Developments**” on page 271.

- 12. *We are in the process of expanding our operations and establishing a network of customers/distributors, particularly for engineered marble surfaces, in regions where we do not have a significant presence or prior experience. Any failure to expand into these new regions could adversely affect our sales, financial condition, result of operations and cash flow.***

In order to cater to the growing market demand for our products, specifically for engineered marble surfaces, and expand our presence in new regions, we are in the process of deepening our presence in regions where we do not have a significant presence or prior experience. We may not possess the same level of familiarity with the economic condition, customer network, end-customer base and commercial operations in the new regions we propose to enter into and therefore, we will be initially exposed to a degree of risk in realization and volume of sales. There can be no assurance that our expansion plans in these new regions will be successful, as our competitors may have a more established reputation, more experience in trends and deeper relationships with customers in these regions. Further, having limited or no presence in such new regions as compared to some of our competitors, may lead to lower product pricing due to lack of presence and higher expenditure on reputation building. As a result, it may be more expensive for us to distribute engineered marble surfaces in these new regions and it may take longer to reach the expected sales and profit levels than anticipated, which could affect the viability or our overall profitability. There can be no assurance that our products will gain market acceptance or meet the particular requirements of customers in these new markets and regions. If we do not successfully establish, reputation and image in these new markets and regions, our sales, financial condition, results of operations and cash flows could be materially and adversely affected.

- 13. *We derive a major portion of our revenue from export and thus are susceptible to exchange rate fluctuations***

We have historically derived a significant portion of our revenues from exports and are involved in foreign currency transactions for sale of our products. We therefore are exposed to foreign exchange risk between the Indian Rupee and U.S. Dollars and other foreign currencies, if applicable. During the Fiscals 2024, 2023 and 2022, we derived 59.87%, 72.75% and 92.44% of our sales from exports, respectively. In addition, because our financial statements are presented in Indian Rupees, we are subject to translation risk, which is the risk that our financial statements for a particular period or as of a certain date depend on the prevailing exchange rates of other currencies, against the Indian Rupee. The exchange rate between the Indian Rupee and other foreign currencies has changed considerably in recent years and may further fluctuate in the future. Such fluctuations in currency exchange rates may impact our results of operations. Based on our overseas business operations, we primarily deal in USD. We have not adopted foreign exchange risk mitigation measures and we bear the complete risk of currency exchange rate fluctuations. We are affected by fluctuations in exchange rates and we cannot assure you whether future

hedging or other risk management strategies will be effective. Our foreign currency exposures, exchange rate fluctuations between the Indian Rupee and foreign currencies, especially the USD, may have a material impact on our results of operations, cash flows and financial condition.

14. *Our Statutory Auditors have issued modified opinion on consolidated financial statements of the Group for the year ended March 31, 2023 in their Audit Report.*

Our Statutory Auditors had issued modified opinion on consolidated financial statements of the Group for the year ended March 31 2023 vide their Audit Report dated September 29, 2023. Following modified opinion was given:

“We did not audit the financial statements of wholly owned subsidiary Haique Stone Inc. which is incorporated in USA and their governing law, whose financial statements reflect total assets of Rs 1,426.44 lakhs as at 31 March 2023, total revenues of Rs. 3,106.49 lakhs and net cash inflows amounting to Rs -2.6 lakhs for the year ended on that date as considered in the consolidated financial statements in respect of this subsidiary, whose financial statements have not been audited by us. These financial statements are unaudited and have been prepared by the management and have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of this subsidiary and our report in terms of Sub section (3) of Section 143 of the Act in so far as it relates to the aforesaid subsidiary is based solely on such unaudited financial statement. In our opinion and according to the information and explanations given to us by the Management, these financial statements are material to the Group.

Our opinion on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is modified in respect of the above matters with respect to our reliance on the work done and the financial statements certified by the Management. In the absence of audited financials, effect of the same (if any) on consolidated financial statements cannot be ascertained.”

However, subsequent to the audit report as referred above, the auditor had conducted special purpose audit of Haique Stones Inc for the year ended March 31, 2023 and have issued unmodified opinion on the same vide their report dated February 6, 2024.

There can be no assurance that any similar issued modified opinion on financial statements of the Group will not form part of our financial statements for the future fiscal periods, which could subject us to additional liabilities due to which our reputation and financial condition may be adversely affected.’

15. *Any shortfall in the supply of our raw materials or an increase in our raw material costs, or other input costs for any of our business activity, may adversely affect the pricing and supply of our products and may have an adverse effect on our business, results of operations and financial condition.*

We are dependent on third party suppliers for the supply of our raw materials. Discontinuation of production by such suppliers or the failure of the suppliers to adhere to the delivery schedule or the required quality or quantity could hamper our production schedule and therefore affect our business and results of operations. Our cost of purchase amounts to ₹17,363.49 Lakhs, ₹11,591.65 Lakhs and ₹ 11,548.79 Lakhs for Financial Years 2024, 2023 and 2022 respectively. Further our top 10 suppliers contribute to 47.44 %, 51.01% and 78.58%, towards our total expenditure for procurement of raw materials for Financial Year 2024, 2023 and 2022 respectively. This dependence may also adversely affect the availability of key materials at reasonable prices thus affecting our margins and may have an adverse effect on our business, results of operations and financial condition.

There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in shortages or delays in their supply of raw materials to us. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure similar raw materials from other sources at comparable costs and of comparable quality in a timely manner, we would be unable to meet our production schedules for some of our key products and

to deliver such products to our customers in timely manner, which would adversely affect our sales, margins, reputation and customer relations.

We cannot assure you that a particular supplier will continue to supply the required components or raw materials to us in the future. Any change in the supplying pattern of our raw materials can adversely affect our business and profits.

16. *We may not be able to successfully manage the growth of our operations and execute our growth strategies which may have an adverse effect on our business, financial condition, results of operations and future prospects.*

As we continue to grow, we must continue to improve our managerial, technical and operational knowledge and allocation of resources, and implement an effective management information system. In order to fund our ongoing operations and future growth, we need to have sufficient internal sources of liquidity or access to additional financing from external sources, including debt or equity. Further, we will be required to manage relationships with a greater number of clients, suppliers, distributors, service providers, lenders and other third parties. We will need to further strengthen our internal control and compliance functions to ensure that we will be able to comply with our legal and contractual obligations and minimize our operational and compliance risks. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business and operations and training an increasing number of personnel to manage and operate the expanded business. There can be no assurance that we will be able to successfully manage our growth, strategies or that our expansion plans will not adversely affect our existing operations and thereby have an adverse effect on our business, financial condition, results of operations and prospects.

Further, we could also encounter difficulties and delays in executing our growth strategies due to a number of factors, including, unavailability of human and capital resources, inability to develop adequate systems, infrastructure and technologies, delayed payments or non-payments by clients, failure to correctly identify market trends, increase in cost of raw material, fuel, labour etc. There can be no assurance that we will be able to execute our growth strategy on time and within the estimated costs, or that we will meet the expectations of our clients.

17. *We are dependent upon the business experience and skill of our promoters, key managerial personnel and senior management personnel. Loss of our Senior Management or our inability to attract or retain such qualified personnel, could adversely affect our business, results of operations and financial condition.*

We believe that our Promoters have played a key role in the development of our business and we benefit from their industry knowledge and expertise, vision and leadership. Our Promoters namely Sunilkumar Lunawath, Nitin Gattani and Pradeepkumar Lunawath have strong operational knowledge, and good relationships with our clients. In addition to our Promoters, our key management and senior management team includes qualified, experienced and skilled professionals who possess requisite experience across various division of our business. We believe the stability of our management team and the industry experience brought on by our individual Promoters enables us to continue to take advantage of future market opportunities. We believe that our senior management team is well qualified to leverage our market position with their collective experience and knowledge in the industry, to execute our business strategies and drive our future growth.

Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled professionals. The loss of the services of our key personnel or our inability to recruit or train sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects. We have not faced any attrition of key managerial personnel and senior management personnel during the last three (3) financial years. However, we cannot assure that there will be no attrition of our senior management personnel in the future.

If we are unable to hire additional qualified personnel or retain them, our ability to expand our business may be impacted. Our Company's profitability, financial condition and results of operations may also be impacted due to lack of experienced and talented workforce. Senior management attrition may also result in our Company incurring higher costs, including the cost of recruiting and costs associated with onboarding. As we intend to continue to expand our operations, we will be required to continue to attract and retain experienced personnel. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting suitable employees.

18. *We have in past entered into related party transactions and we may continue to do so in the future*

As of March 31, 2024, we have entered into several related party transactions with our Promoter and individuals and entities forming a part of our Promoter Group. In addition, we have in the past also entered into transactions with other related parties. We confirm that the transactions with Related Parties entered into by our Company in the preceding three years have been carried out at arms' length price and are in compliance with the provisions of Companies Act, 2013 and other applicable laws. Further, we confirm that the transactions are not prejudicial to the interest of our Company. A summary of the related party transactions during the Financial Years 2024, 2023 and 2022 as per applicable Ind GAAP is derived from our Restated Financial Statements. For further details, see "**Restated Financial Information**" on page 205.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

19. *Under-utilisation of our manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.*

As on date of this Prospectus, we have four (4) Manufacturing Facilities located within the periphery of Udaipur, Rajasthan. Our Company has unutilised capacity at our Manufacturing Facilities. The following table sets forth the installed production capacity and the capacity utilization rate at our Manufacturing Facilities for Financial Year 2024, 2023 and 2022 and 2021;

**As certified by the Chartered Engineer, vide certificate dated June 26, 2024.*

During Financial Year 2023, our Manufacturing Facility I was not operating at historical level due to lower production of engineered quartz surfaces resulting from lower export to USA, on account of anticipation of increased antidumping duties on quartz surfaces imported from India to USA by importers in the USA. Our major export sales are contributed by USA Market, as evident from the fact that during Fiscals 2024, 2023 and 2022, we derived 59.87%, 72.75% and 92.44% of our sales from exports, respectively and out of our total exports, 94.43%, 97.51% and 96.47% were exported to USA during the Fiscals 2024, 2023 and 2022 respectively. Further during Fiscal 2024 and 2023 the Company made 64.43% and 25.73% of our export sales to USA through our Subsidiary, Haique Stones Inc. However, as on date, the antidumping duty is 0% for our Company. In the event; (i) the antidumping duties are increased to the extent it becomes unviable for our customers to buy from us; or (ii) we are not able to

mitigate the increased cost by increasing the selling price of our engineered quartz surfaces in USA market; or (iii) we are unable to lower down the cost of production and overhead through economies of scale and production efficiencies; or (iv) shift our export sales to countries other than USA; (v) increase sale of our engineered quartz surfaces in domestic market, we may not be able to continue production at desired capacity utilisation of our Manufacturing Facility I which could have a material adverse effect on our business, financial condition, future prospects, and future financial performance. For further details, see ***“Risk Factor - Major portion of our revenues are derived from exports to the United States of America and any adverse developments in this market or restrained economic or political relations of India with the United States of America could adversely affect our business.”*** on page 43.

Further, our Manufacturing Facility II, Manufacturing Facility III and Manufacturing Facility IV have been recently commissioned and thus we are in process of gradually increasing their capacity utilisation. For further details, see ***“Our Business”*** on page 147. Under-utilisation of our manufacturing capacities over extended periods, or significant underutilisation in the short-term, could materially and adversely impact our business, growth prospects and future financial performance.

Information relating to the historical installed capacity and estimated capacity utilization of our Manufacturing Facilities included in this Prospectus is based on various assumptions and estimates of our management and an independent chartered engineer. Actual production volumes and capacity utilization rates may differ significantly from the estimated production capacities and historical capacity utilization of our Manufacturing Facilities. Investors should therefore not place undue reliance on our historical installed capacity information for our existing Manufacturing Facilities included in this Prospectus.

20. *We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.*

As on date of this Prospectus, we have registered the trademark “ELEVATED LIVING”, “PREMIUM QUARTZ”, “HAIQU”, “HAIQUE”,  and ESPRIT STONES each under class 19. Our Company has also made applications for registration of the logo of the Company which is objected as on date and trade name and logo of Addwaya Chemicals which is accepted & advertised and pending for registration as on date. For further details, see ***“Government and Other Statutory Approvals”*** on page 276. We cannot assure you that we will be able to obtain registration against the application made or remove objection raised for the logo of the Company. If we are unable to renew or register our trademarks for various reasons including our inability to remove objections to any trademark application, or if any of our unregistered trademark are registered in favour of or used by a third party in India or abroad, we may not be able to claim registered ownership of such trademark and consequently, we may not be able to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities, causing damage to our business prospects, reputation and goodwill in India and abroad. Apart from this, any failure to register or renew registration of our registered trademark may affect our right to use such trademark in future. Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third-party claim on any of our unprotected intellectual property may lead to erosion of our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered brand name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad.

Further, if do not maintain our brand name and identity, which we believe is one of the factors that differentiates us from our competitors, we may not be able to maintain our competitive edge in India and abroad. If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability. Moreover, our ability to protect, enforce or utilize our brand name is subject to risks, including general litigation risks. Furthermore, we cannot assure you that such brand name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source in India and abroad. Any

damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position in India and abroad.

21. *We are vulnerable to cyclicity in the end-user industry.*

We are primarily engaged in the manufacturing of Engineered Stone such as: (i) engineered quartz surfaces; and (ii) engineered marble surfaces which finds application in construction business, such as real estate, hotel, infrastructure and other related industries etc. Real estate is a highly cyclical industry and could impact the business risk profile of our Company. Adverse conditions in or uncertainty about these markets or the economy could adversely impact our end-customers' confidence or financial condition, causing them to determine not to invest in real estate or delay purchasing or payment for real estate.

22. *Some of our Group Companies have incurred losses in the previous Fiscals.*

One of our Group Company namely Esprit Ventures Private Limited has suffered a loss of ₹36.20 lakhs in Financial Year 2023. Financial losses by our Group Company may not be perceived positively by external parties such as customers, bankers, suppliers etc., which may affect our credibility and business operations

23. *We have certain contingent liabilities as stated in the Restated Consolidated Financial Statement, and in the event, they materialize it could adversely affect our financial condition.*

The Company has received orders dated October 30, 2023 from Central Goods and Service Tax (CGST) Department, Udaipur for the wrong availment of Input tax credit amounting INR 181.44 lakhs for Financial Year 2018-19, 2019-20 and 2020-21 plus an equal amount of penalty. The Company has filed appeal against these order with the Hon'ble Appellate Authority CGST, Jodhpur on January 25, 2024 and the management believes that basis of ground of appeals, the chances of quashing the order are higher than confirmation of order by the Hon'ble Appellate Authority CGST, accordingly, no liability has been provided.

The Company has received orders dated 24 April 2024 from State Goods and Service Tax (SGST) Department, Udaipur for the wrong availment of Input tax credit amounting INR 11.08 lakhs for the financial year 2018-19 plus INR 10.55 lakhs for interest and others. event any of these contingent liabilities become established as liabilities, it may have an adverse effect on our financial condition and results of operations.

24. ***We have experienced negative cash flows from operating activities and may do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.***

The Company has reported negative cash flow from operating activities in Financial year 2023 as per the Restated Consolidated Financial Information as given below:

(₹ In Lakhs)

Particulars	For year ended March 31, 2024	For year ended March 31, 2023	For year ended March 31, 2022
Net cash flow generated from/ (utilized in) operating activities (A)	1,422.79	(2,851.54)	2,038.63

(Figures in brackets are negative)

For details, see “**Restated Financial Information – Restated Cashflow Statement**” on page 214 .

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Since our Company is in a growth phase, our working capital requirement has increased in tandem and this has resulted in negative cash flow from operations in the Financial Year ended March 31, 2023. We may continue to have negative operating cash flows in future. If our Company is not able to generate sufficient operating cash flows, it may adversely affect our business and financial operations. For further details, see “**Restated Financial Statement**” on page 205.

25. ***Our Company is dependent on third parties for transportation and export of our finished products and any disruption in their operations or a decrease in the quality of their services could have an adverse impact on our business, financial condition, cash flows and results of operations.***

Our ability to manufacture, transport, and sell our products is critical to our success. Our Company is dependent on third party transportation for movement of our products from our Manufacturing Facilities the port and thereafter export through sea. Any disputes with our transporters, including disputes regarding pricing or performance, could adversely affect our ability to supply products to our customers on timely basis and could materially and adversely affect our product sales, financial condition, and results of operations. For the Financial Years March 31, 2024, March 31, 2023 and March 31, 2022 the expenses incurred by our Company on ocean freight, transportation and clearing expenses was ₹ 1587.04 lakhs, ₹ 1,190.91 lakhs and ₹ 868.20 lakhs comprising of 6.09%, 6.97% and 5.22% respectively, of the total expenses incurred by our Company.

During lock-down imposed under the COVID-19 pandemic, our Company encountered challenges in availability of transportation for supply of its products. Although, we generally obtain insurance against transportation of our products, occurrence of any disruption to our third-party transportation services availed by us, due to weather, natural disaster, fire or explosion, terrorism, pandemics, strikes, government action, or other reasons beyond our control or the control of our transporters, could impair our ability to manufacture or sell our products. Failure to take adequate steps to mitigate the likelihood or potential impact of such events or to effectively manage such events if they occur could adversely affect our business. The occurrence of any of these factors could result in a significant decrease in the sales volume of our products and therefore adversely affect our financial condition, cash flows and results of operations.

26. ***Any inability to maintain or manage our workforce could have an impact on our profitability. Further, wage pressures and increases in operating costs may reduce our profit margins.***

We are dependent on our workforce and our equipment and machineries for the operation of our projects. As on May 31, 2024, we had 295 employees. For further details, see “***Our Business – Human Resource***” on page 163. We maintain a workforce based upon our current and anticipated workloads. The details of attrition rate of employees (excluding Directors and SMP) for the last three (3) financial years are as follows:

Particulars	March 31, 2024	March 31, 2023	March 31, 2022
Average number of employees*	244	240	204
Number of Employees left/retired	117	135	90
Attrition rate (%)	47.95	56.25	44.23

*Employees include production staff and trainees

We may also be required to increase our levels of employee compensation, more particularly unskilled employees or production workers, more frequently than in the past to remain competitive in attracting employees that our business requires. Failure to motivate unskilled employees or production workers properly may have resulted in an increased employee attrition rate. If we are unable to retain talent required for our business, or hire employees with similar talents and experience in the same cost, we may incur additional costs or we may face difficulties in our operations and performance due to lack of skilled and experienced workforce which could have a material adverse effect on our profitability, financial condition and results of operations.

Further, we also engage contractual labour, which provides us with readily available labours as per the requirements. The number of contract labourers employed by us varies from time to time based on the nature and extent of work we are involved in. Our dependence on such contract labour may result insignificant risks for our operations, relating to the availability and skill of such contract labourers, as well as contingencies affecting availability of such contract labour during peak periods. Further, although, we do not employ such contract labour directly, we may be held responsible for any wage payments to be made to such contract labour in the event of default by the third-party agencies, who employ them. If we are required to pay the wages of the independent contract labour, our results of operations and financial condition could be adversely affected. Further, we could be held liable for the acts committed by, or omission on the part of, personnel engaged by us on a contract basis.

Expense incurred on salaries and wages to factory staff by our Company for last three (3) financial years constitutes 3.97%, 5.14% and 5.47% of our total expenses. Wage and operating expense increase in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. Wages in India are increasing at a faster rate than in the developed economies, which could result in increased employee benefit expenses. We may need to continue to increase the levels of our employee compensation to remain competitive and manage attrition. Further, the Code on Wages, 2019 received the assent of the President of India on August 8, 2019 and proposes to subsume four existing laws namely, the Payment of Wages Act, 1936, the Minimum Wages Act, 1948, the Payment of Bonus Act, 1965 and the Equal Remuneration Act, 1976. The provisions of this code will be brought into force on a date to be notified by the Central Government. This may impact our wage structure and may lead to increased wage payments to our employees. Additionally, the cost of operating expenses is also increasing as India continues to grow. Compensation increases manifest a hike in operational costs which may result in a material adverse effect on our business and financial condition and result of operations.

27. ***Our management will have broad discretion in how we apply the Net Proceeds, including interim use of the Net Proceeds, and there is no assurance that the objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment.***

We intend to use Net Proceeds from the Issue towards (a) funding working capital requirements of our Company; (b) investment in our Subsidiary, HSPL, for repayment and / or prepayment in part or full of its outstanding borrowings; (c) investment in our Subsidiary HSPL for funding its Working Capital Requirement; and (d) general corporate purposes. For details of the objects of the Issue, see “**Objects of the Issue**” on page 107. Our management will have broad discretion to use the Net Proceeds, and investors will be relying on the judgment of our management regarding the application of the Net Proceeds. Moreover, we cannot undertake any material deviation in the utilisation of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of shareholders of our Company through a special resolution. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, costs of commodities and interest or exchange rate fluctuations and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in its business.

28. *Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.*

We propose to utilize the Net Proceeds as stated under “**Objects of the Issue**” on page 107. However, our funding requirements and the deployment of Net Proceeds are based on management estimates and have not been independently appraised.

As per section 27 of the Companies Act, the objects of utilization of the Net Proceeds from the fresh issue as disclosed in this Prospectus can only be varied after obtaining the shareholders’ approval vide a special resolution. In the event, the Company wishes to vary the objects for which the net proceeds from the fresh issue are required to be varied, our Company may not be able to obtain the Shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders’ approval may adversely affect our business or operations. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our ability to respond to any change in our business or financial condition, and thus, adversely affecting our business and results of operations.

Further, our Promoters would be required to provide an exit opportunity to Shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter our Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI. In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in this Prospectus, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

29. *Some of our Group Company is engaged in activities which is similar to our business. This may be a potential source of conflict of interest for us and which may have an adverse effect on our business, financial condition and results of operations*

Some of our Group Companies namely, Rose Marbles Private Limited, Rajasthan Packing Co Private Limited and Aravali Minerals and Chemicals Industries Private Limited has some objects similar to that of our business. Accordingly, such Group Companies may compete with us or our Subsidiaries, like any other third-party competitor. While necessary procedures and practices may be adopted as permitted by law to address any instances of conflict of interest, if and when they may arise, we cannot assure you that these or other conflicts of interest will be resolved in an impartial manner. There can be no assurance

that our Promoters or our Group Companies or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition. Thus, in future conflicts of interests may arise in allocating business opportunities amongst our Company and our Group Companies and member of Promoter Group. In cases of conflict, our Promoters may favour other companies or ventures in which our Promoters have interest.

30. *We operate in a competitive business environment. Competition from existing players and new entrants and consequent pricing pressures could have a material adverse effect on our business growth and prospects, financial condition and results of operations.*

The Engineered Stone industry is highly competitive, both in India and overseas. We expect that competition will continue to intensify both through the entry of new players and consolidation of existing players. Our competitors, especially overseas competitors, may have greater financial resources, better distribution network, technical and marketing resources and generate greater revenues, and therefore may be able to respond better to market changes than we can. The industry in which we operate have low entry barriers and therefore we cannot assure you that our current or potential competitors will not provide products comparable or superior to those we provide or adapt more quickly than we do to changing consumer preferences and market requirements, at prices equal to or lower than those of our products. Increased competition may result in our inability to differentiate our products from those of our competitors, which may lead to a loss of market share. Our ability to compete also depends on a number of factors beyond our control, including the ability of our competitors to attract, train, motivate and retain highly skilled technical employees, the price at which our competitors offer comparable products and the extent of our competitor's responsiveness to customer needs. Our inability to adequately address competitive pressures may have a material adverse effect on our business, prospects, financial condition and results of operations.

32. *We may not be able to identify or effectively respond to evolving preferences, expectations or trends in a timely manner and a failure to derive the desired benefits from our product development efforts may impact our competitiveness and profitability.*

The success of our business depends in part on our ability to anticipate, identify and respond promptly to evolving trends in demographics and preferences, customer expectations, needs and demands, and develop new products to meet these requirements. Our success is dependent on our ability to identify and respond to the economic, social, and other trends that affect demographic and end- customer preferences in a variety of our stones categories.

We cannot assure you that our future product development initiatives will be successful or be completed within the anticipated period or budget, or that our newly developed or improvised products will achieve wide market acceptance from our customers. Even if these products have been successfully developed, there is no guarantee that they will be accepted by our customers and achieve anticipated sales targets in a profitable manner, which may affect our ability to grow our network of customers and gain market share. In addition, there can be no guarantee that the time and effort that we spend in developing these products would be beneficial to our Company.

This could also adversely affect our ability to pursue our growth strategy of continuing to develop niche and products to grow our market share. Further, we cannot assure you that our existing or potential competitors will not develop products that are similar or superior to our products. It is often difficult to estimate the time to market new products and there is a substantial risk that we may have to abandon a potential product that is no longer commercially viable, even after we have invested significant resources in the development of such product. If we fail in our product launching efforts, our business, prospects, financial condition, results of operations and cash flows may be materially and adversely affected.

Further, as we continue to grow our business by expanding our products, offerings and our geographic reach, maintaining quality and consistency may be more difficult and there can be no assurance that the customers' confidence in our products will not diminish. Failure or any delay on our part to identify such trends, to align our business successfully and maintain quality could negatively affect our image, our relationship with our customers, the rate of growth of our business, our market share and our prospects.

33. *Any inability on our part to collect amounts owed to us or to pay amounts owed by us could result in the reduction of our profits*

We provide our customers with credit periods as part of our standard payment terms. For information on our trade receivables, see “**Restated Consolidated Financial Statement**” on page 205. The table below sets forth our trade receivables and debtor turnover ratio for the last three Fiscals:

Particulars	For Financial Year 2023-24	For Financial Year 2022-23	For Financial Year 2021-22
Trade receivables (₹ in lakhs)	7,247.62	4,138.70	2,485.35
Debtor turnover ratio (in days outstanding)	76	69	40
Provisions made/Write-off (₹ in lakhs)	137.88	-	-

For details, see “**Restated Financial Statement**” on page 205.

Our business depends on our ability to successfully obtain payments from our customers for services provided. We typically raise our invoice and maintain provisions against receivables and unbilled services. Actual losses on customer balances could differ from those that we currently anticipate and as

a result we may need to adjust our provisions. Financial difficulties including insolvency or bankruptcy experienced by our customers could cause delays in payments to us, and customers could default on their payment obligations to us or request modifications to their payment arrangements that could increase our receivables or affect our working capital requirements.

We cannot assure you that we would be able to accurately assess the creditworthiness of our customers. Further, macroeconomic conditions, which are beyond our control, could also result in financial difficulties for our customers, including limited access to the credit markets, insolvency or bankruptcy. Our customers may delay payment, request modifications to their payment terms, or default on their payment obligations to us, all of which could increase our trade receivables and/or write-offs of trade receivables. While we have not experienced any significant write-off of our receivables in the past, we cannot assure you that we will not face default of our receivables. If we are unable to meet our contractual requirements, we may experience delays in collection of and/ or be unable to collect our payments altogether on account of termination of such contracts. An increase in bad debts or in defaults by clients may compel us to utilize greater amounts of our operating working capital and result in increased interest costs, thereby adversely affecting our results of operations and cash flows

34. *Stringent environmental, health and safety laws and regulations or stringent enforcement of existing environmental, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.*

Our operations are subject to environmental, health and safety and other regulatory and statutory requirements in the jurisdictions in which we operate. We are subject to various national, state, municipal and local laws and regulations concerning environmental protection in India. Non-compliance with these laws and regulations could expose us to civil penalties, criminal sanctions and revocation of key business licenses. Environmental laws and regulations in India are becoming more stringent and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment and emissions management.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations, financial condition or cash flows. In addition, we could incur substantial costs, our products could be restricted from entering certain markets and we could face other sanctions, if we were to violate or become liable under environmental laws or if our products become non-compliant with applicable regulations. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs under environmental laws are difficult to predict.

35. *Our Promoters and some of our Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses.*

Some of Promoters and our Directors are interested in our Company to the extent of their respective shareholding in our Company as well as to the extent of any dividends, bonus or other distributions on such Equity Shares. We cannot assure you that our Directors will exercise their rights as shareholders to the benefit and best interest of our Company. Further, our Promoters holding Equity Shares may take or block actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. For further information on the interest of our Promoters and Directors, other than reimbursement of expenses incurred or normal remuneration or benefits, see “***Our Management***” and “***Our Promoters and Promoter Group***” on pages 179 and 192, respectively

36. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

37. ***We are subject to restrictive covenants under our financing agreements that could limit our flexibility in managing our business or to use cash or other assets. Any defaults could lead to acceleration of our repayment obligations, termination of one or more of our financing agreements or force us to sell our assets, which may adversely affect our cash flows, business, results of operations and financial condition.***

We have entered into agreements for secured short term and long-term borrowings with certain lenders. As on May 31, 2024 an aggregate of ₹9279.55 lakhs, on a consolidated basis, was outstanding towards loans availed from banks. The credit facilities availed by us are secured by way of mortgage of fixed assets, hypothecation of current assets (both present and future), and corporate guarantees. In case we are not able to pay our dues in time, the same may amount to a default under the loan documentation and all the penal and termination provisions therein would get triggered. This could severely affect our operations and financial condition. Our financing agreements include certain covenants that require us to obtain lender consents prior to carrying out certain corporate activities and entering into certain transactions, such as, incurring any additional borrowings, undertaking capital expenditure, effect any change in shareholding pattern and management control of the Company amongst others. In addition, any breach of financial or non-financial covenant may qualify as an event of default under financing agreements.

We cannot assure you that the lenders will not seek to enforce their rights in respect of any breach by us under our financing agreements. Any failure to comply with any condition or covenant under our financing agreements that is not waived by the lenders or is not otherwise cured by us, may lead to a termination of our credit facilities and/or acceleration of all amounts due under the relevant credit facility. Further, if the obligations under any of our financing agreements are accelerated, we may have to dedicate a substantial portion of our cash flow from operations to make payments under the financing documents, thereby reducing the availability of cash for our operations. In addition, the lenders may enforce their security interest in certain of our assets. Moreover, during the period in which we are in default, we may face difficulties in raising further loans. Any future inability to comply with the covenants under our financing agreements or to obtain the necessary consents required thereunder may lead to termination of our credit facilities, levy of penal interest, acceleration of all amounts due under such financing agreements and enforcement of any security provided. Any of these circumstances may have an adversely affect our business, results of operation and financial condition. Further, the said credit facilities can be renewed/enhanced/cancelled/suspended/reduced and the terms and conditions of the same can be altered by the lending banks, at their discretion. In the event, the lenders refuse to renew / enhance the credit facilities and/or cancel / suspend / reduce the said credit facilities and/or alter the terms and conditions to the derogation of our Company, then our existing operations as well as our future business prospects and financial condition may be severely affected.

38. ***There have been past instances of delays by the Company in filing of certain GST returns and making payments under the Employees Provident Fund and Miscellaneous Provisions Act, 1952. Any future instances of such delays may result in levy of penalties on the Company.***

There were certain instances of delays in filing of GSTR3B returns and making of payments under the Employees Provident Fund and Miscellaneous Provisions Act, 1952. However, our Company has made the requisite filings with payment of additional fees to the GST authorities and also made the requisite EPF payments.

In most of the instances, the delays in filing the GST returns had occurred as the Company was not able to get 100% claim of Input credit on or before due date of filing of returns and therefore the Company had to wait for its vendors to complete their filing so that Company can get inputs in its account, on account of technical issues with GST portal on various occasions, due to administrative difficulties and due to the difficulties during the COVID 19 pandemic. To address such delays, the Company has taken corrective steps to mitigate the delays and a separate software is taken for auto reconciliation.

Further, delays in making EPF payments had occurred due to technical issues with EPF portal on various occasions, administrative difficulties and difficulties during the COVID 19 pandemic. To address such delays, the Company has taken corrective steps to mitigate the delays including appointment of professionals.

The following table provides the number of delays we have made for financial years ended March 31, 2024, 2023 and 2022:

Name of the Entity	Governing Tax law	Form Type	Number of cases		
			2023-24	2022-23	2021-22
Esprit Stones Limited	Goods and Service Tax	GSTR1	-	-	-
	Goods and Service Tax	GSTR3B	2	4	4
	Provident Fund	Monthly Contribution	-	1	1
	Employees State Insurance	Monthly Contribution	-	2	1
Addwaya Chemicals Private Limited	Goods and Service Tax	GSTR1	-	-	1
	Goods and Service Tax	GSTR3B	1	1	-
	Provident Fund	Monthly Contribution	-	-	-
	Employees State Insurance	Monthly Contribution	1	-	-
Haique Stones Private Limited	Goods and Service Tax	GSTR1	-	-	-
	Goods and Service Tax	GSTR3B	-	1	-
	Provident Fund	Monthly Contribution	-	-	-
	Employees State Insurance	Monthly Contribution	-	-	-

While we have not been subject to any penalties by regulatory authorities, there can be no assurance that we would not be subject to such penalties or fines in the future. Further, there can be no assurance that there will be no delays or non-compliances with the filing of certain documents in the future.

39. *We are dependent on our Promoters/Directors for the functioning of our business and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.*

Our performance depends largely on the efforts and abilities of our Promoters and Directors. For details, see “***Our Management***” and “***Our Promoters and Promoter Group***” on pages 179 and 192, respectively. We believe that the inputs and experience of our Promoters/Directors are valuable for the growth and

development of business and operations and the strategic directions taken by our Company. Our business and operations are led by our Promoters/ Directors, who possess vast experience in the industry, the loss of whose services may adversely affect our business operations.

40. *We may be affected by competition law, the adverse application or interpretation of which could adversely affect our business.*

The Competition Act, 2002 (“**Competition Act**”) seeks to prevent business practices that have an Appreciable Adverse Effect on Competition (“**AAEC**”) in the relevant market in India. Under the Competition Act, any arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause an AAEC in India is void and attracts substantial monetary penalties. The Competition Act also prohibits abuse of a dominant position by any enterprise. The combination regulation (merger control) provisions under the Competition Act require that the acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by CCI. However, the applicability or impact of the provisions of the Competition Act on any future acquisition or arrangement entered into by us cannot be predicted with certainty at this stage.

41. *Inability to protect, strengthen and enhance our existing reputation could adversely affect our business prospects and financial performance.*

Our business reputation is critical to the success of our business. While we have been making consistent efforts to strengthen our image, various factors, some of which are beyond our control, are critical for maintaining and enhancing our reputation and if not managed properly, may negatively affect our brand and reputation. These include our ability to effectively manage the quality of our products, increase brand awareness among existing and potential customers, adapt our advertising and promotion efforts to emerging industry standards and protect the intellectual property related to our brand.

Our reputation could be negatively impacted if we fail to maintain our established standards of service, or if our products fail to meet the expectation of our customers. Any allegations of deterioration in product quality even when false or unfounded, could tarnish our image and may cause our customers to choose other competing products. Any negative publicity regarding us, our reputation, our products or the stones industry generally could adversely affect our business and our results of operations. Other risks associated with our industry include improper disclosure of proprietary information, negative comments about our brands or standard of service, exposure of personally identifiable information, fraud, hoaxes or malicious exposure of false information. The inappropriate use of social media by our customers, employees, suppliers or other third parties could also harm our reputation thereby increasing our costs, lead to litigation or result in negative publicity that could damage our reputation and adversely affect our business, results of operations and financial condition. In addition, counterfeit products, product defects and ineffective promotional activities are all potential threats to the image and potency of our brand. Our failure to develop, maintain and enhance our brand may result in decreased revenue and loss of customers and in turn adversely affect our reputation, business, financial condition, results of operations and cash flows.

42. *We are subject to operational risks on account of obsolescence, destruction, breakdown of our equipment or failure to repair or maintain such equipment. Further, if we do not continually enhance our business with the most recent equipment and technology, our ability to maintain and expand our markets may be adversely affected.*

Our Manufacturing Facilities, are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages or disputes, shortage of skilled labour, natural disasters, directives from government agencies, water shortages, power interruptions, performance below expected levels of output or efficiency, obsolescence, severe weather, industrial accidents, our inability to respond to technological advances and emerging industry standards and practices in the industry. In past, we have experienced an occurrence of an accident in our Manufacturing Facility I in year 2024, which caused

bodily injury to a worker. The Company is taking due care of the medical and other requirement of the said worker in due compliance with the applicable laws.

Further, any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair the malfunctioning machinery in a timely manner or at all, our operations may need to be suspended until we procure machinery to replace the same.

43. ***Our business is dependent on the delivery of adequate and uninterrupted supply of electrical power and water at a reasonable cost and any shortage, disruption or non-availability of power and water may adversely affect our entire processing requirements and have an adverse impact on our business, results of operations and financial condition.***

Adequate and cost-effective supply of electrical power and water is critical to our operations. The power requirement for our Manufacturing Facilities is sourced from the state power grids. We maintain power back-ups through DG Sets to ensure unhindered production, in case of power cuts by the local electricity providers. We have also installed solar power plant with an aggregate installed capacity of 1,706 KW at our Manufacturing Facilities which enable us to reduce our power costs. Further we have installed ground mounted solar generation plant of 1,300 KW at Gajner, Rajasthan and have long term open access agreement with state power grids for transmission of electricity which further reduces our utility costs as we get the credit benefit of such transmission in our power bill. For details, see “***Our Business***” on page 147. However, an interruption in or limited supply of electricity may result in suspension of our operations. A prolonged suspension in production could materially and adversely affect our business, financial condition or results of operations. Further, if the per unit cost of electricity is increased by state electricity boards, our power costs will increase. It may not be possible to pass on any increase in our power costs to our customers, which may adversely affect our profit margins

Our operations and facilities are especially dependent on a steady and stable supply of water which we source from third party water tank. Any irregular or interrupted supply of water could adversely affect our daily operations. For details, see “***Our Business***” on page 147. If there is an insufficient supply of water to satisfy our requirements or a significant increase in prices, we may need to limit or delay our production, which could adversely affect our business, financial condition and results of operations. We cannot assure you that we will always have access to sufficient supply of power and water in the future to accommodate our requirements and planned growth. Accordingly, any increase in power costs and water costs could adversely affect our profitability.

44. ***Changes in technology may affect our business by making our processing facilities or equipment less competitive or obsolete.***

Our future success will depend in part on our ability to respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis. Modernization and technology upgradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. The development and implementation of such technology and machinery entails technical and business risks. Further, the costs in upgrading our technology and modernizing the plant and machineries may be significant which could substantially affect our finances and operations. We cannot assure you that we will be able to successfully implement new technologies or adapt our processing systems to customer requirements or emerging industry standards. Changes in technology and high-power costs may make newer facilities or equipment more competitive than ours or may require us to make additional capital expenditures to upgrade our facility. If we are unable, for technical, financial or other reasons, to adapt in a timely manner to changing market conditions, customer requirements or technological changes, our business and results of operations could be adversely affected.

45. ***Our Promoters and members of the Promoter Group will continue jointly to retain majority control***

over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

After completion of the Issue, our Promoters and Promoter Group will collectively own a majority of the Equity Shares of our Company. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AoA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

46. ***Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “***Dividend Policy***” on page 204.

47. ***If we are unable to establish and maintain an effective internal controls and compliance system, our business and reputation could be adversely affected.***

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. Our internal audit functions make an evaluation of the adequacy and effectiveness of internal systems on an ongoing basis so that our operations adhere to our policies, compliance requirements and internal guidelines. We periodically test and update our internal processes and systems and there have been no past material instances of failure to maintain effective internal controls and compliance system. However, we are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to ensure effective internal checks and balances in all circumstances.

We take reasonable steps to maintain appropriate procedures for compliance and disclosure and to maintain effective internal controls over our financial reporting so that we produce reliable financial reports and prevent financial fraud. As risks evolve and develop, internal controls must be reviewed on an ongoing basis. Maintaining such internal controls requires human diligence and compliance and is therefore subject to lapses in judgment and failures that result from human error. Any lapses in judgment or failures that result from human error can affect the accuracy of our financial reporting, resulting in a loss of investor confidence and a decline in the price of our Equity Shares.

48. ***The average cost of acquisition of Equity Shares by our Promoter could be lower than the Issue Price.***

Our Promoter’s average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price. For further details regarding average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares by our Promoter in our Company, please refer to the chapters “***Capital Structure***” beginning on page 93.

49. ***Land measuring 5,000 sq. mt. adjacent to our Manufacturing facility I is pending for conversion for industrial use.***

Our Company has purchased land measuring 5,000 sq. mt. adjacent to its Manufacturing facility I located at Araj Number: 8923/1105 and 8925/1104, Lakhawali, Udaipur, Rajasthan. Although, the said land does not form a part of the Manufacturing Facility I, the same is used for the purpose of garden, parking and internal road from factory gate to office building. We have applied to the Secretary, Urban Improvement Trust, Udaipur, Rajasthan for conversion of land for industrial use. The application is currently under process with Urban Improvement Trust, Udaipur. If the application for land conversion for industrial purposes is not approved, there will be no penalties or negative effects on the Company's business. However, we will be unable to use the land for parking and internal road purposes, specifically for the route from the factory gate to the office building. This may cause difficulties for our employees in terms of vehicle parking, and we may need to consider alternative routes from the factory gate to the office building.

ISSUE SPECIFIC RISKS

50. ***The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

51. ***The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.***

The Issue Price of our Equity Shares will be determined by the book-building method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. For details, see “***Basis for Issue Price***” on page 122. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

52. ***Any future issuance of Equity Shares, or convertible securities or other equity linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. Any sale of our Equity Shares by our Promoters or major shareholders or future equity issuances, by us may adversely affect the trading price of our Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. We cannot assure you that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

53. ***Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

54. ***Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

55. ***QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within 3 Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit

the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS:

56. *Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.*

As we derive majority of our revenue from export sales, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax including antidumping duties and countervailing duties, trade, and monetary policies; occurrence of natural or man-made disasters; downgrade in debt rating; and adverse global economic conditions due to various reasons such as, effect of COVID Pandemic, ongoing dispute between Russia and Ukraine, recent turmoil in the Red Sea trade route and the Suez Canal, etc. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavourable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

57. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operations, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

58. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

Under the Companies Act, 2013, a company having share capital and incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of our Equity Shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted

59. ***Investors may not be able to enforce judgments obtained in foreign courts against us.***

We are a public limited company under the laws of India. All of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgments against them obtained from courts outside India, including judgments predicated on the civil liability provisions of the United States federal securities laws.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, which includes the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the Indian Code of Civil Procedure, 1908 (the “Civil Code”). The Civil Code only permits the enforcement of monetary decrees, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favour such final judgment is rendered may bring a fresh suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within three years of obtaining such final judgment. It is unlikely that an Indian court would award damages on the same basis or to the same extent as was awarded in a final judgment rendered by a court in another jurisdiction if the Indian court believed that the amount of damages awarded was excessive or inconsistent with public policy in India. In addition, any person seeking to enforce a foreign judgment in India is required to obtain prior approval of the Reserve Bank of India to repatriate any amount recovered pursuant to the execution of the judgment.

60. ***We are a public limited company under the laws of India. Many of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgments against them obtained from courts outside India, including judgments predicated on the civil liability provisions of the United States federal securities laws Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the industry in which we operate, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, and our business, prospects, financial condition and results of operations, in particular.

61. ***We are subject to regulatory, economic and social and political uncertainties and other factors beyond our control.***

We are incorporated in India and we conduct our corporate affairs and our business in India. Our Equity Shares are proposed to be listed on the Emerge platform of NSE, subject to the receipt of the final listing and trading approvals from the NSE. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- political instability, terrorism, military conflict, epidemic or public health issues in India or in countries in the region or globally, including in India's various neighbouring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- Instability in financial markets and volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- changes in India's tax, trade, fiscal or monetary policies; and
- other significant regulatory or economic developments in or affecting India or its logistics sector.

Moreover, a fall in the purchasing power of our customers, for any reason whatsoever, including rising consumer inflation, availability of financing to our customers, changing governmental policies and a slowdown in economic growth may have an adverse effect on our customers' revenues, savings and could in turn negatively affect their demand for our products. In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

62. ***Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.***

Inflation rates in India have been volatile in recent years, and such volatility may continue. India has experienced high inflation relative to developed countries in the recent past. Continued high rates of inflation may increase our expenses related to costs of raw material, rent, salaries or wages payable to our employees or any other expenses. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

63. ***Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to

be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

64. ***Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings for international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

65. ***Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.***

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

66. ***The occurrence of natural or man-made disasters may adversely affect our business, financial condition, results of operations and cash flows.***

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19 and man-made disasters, including acts of war such as Russia's invasion of Ukraine, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

67. ***Our ability to raise foreign capital may be constrained by Indian law.***

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition and results of operations.

68. *Rights of shareholders under Indian laws may be different from laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as our shareholder than as a shareholder of an entity in another jurisdiction.

1. FUNDING WORKING CAPITAL REQUIREMENT OF OUR COMPANY

With the growth in business, there will be need for additional working capital requirement in the Company. We fund a majority of our working capital requirements in the ordinary course of business from banks and internal accruals. Our Company requires additional working capital for funding its incremental working capital requirements. We intend to utilise ₹1,400 lakhs from the Net Proceeds to fund working capital requirements of our Company.

In the recent years, Company has increased its capacity by installing quartz pressing line and calibrating and polishing line due to increasing demand of quartz, majorly in export market. This led to high growth in the revenue from operations during Financial Year 2021 and Financial Year 2022. However, in

Financial Year 2023, the Company had a setback in its export sales due to publication of preliminary administrative review on Anti-dumping duty by US Department of Commerce on certain Quartz surfaces imported from India. Our customers in the USA held up their purchase orders in anticipation of higher duty on quartz surfaces imported in the USA from India. After the final results of the administrative review on the duties as aforesaid, the export business resumed its normal operations. However, there was change in sales strategy as importers in the USA expected DDP delivery terms instead of FOB due to which our order to cash cycle increased substantially. The Company has also increased its focus on domestic market by expanding the dealer distribution network, which by nature has a higher credit cycle. The above factors led to higher working capital requirement mainly in form of higher inventory and trade receivables.

To meet the higher working capital requirements, the Company increased its short-term borrowings to an extent and started procuring raw materials with higher credit period. The higher credit period of trade payables resulted in higher procurement cost of raw materials and consumables, which squeezed Company's profit margins. As the Company anticipates revenue growth in both export and domestic markets, it estimates that the working capital requirement will increase from ₹ 4,025.78 lakhs in Financial Year 2024 to ₹ 7,293.35 lakhs in Financial Year 2025. The incremental working capital in Financial Year 2025 is due to increase in inventory and trade receivables from ₹ 3,778.58 lakhs and ₹ 2,706.39 lakhs in Financial year 2024 to ₹ 3,928.13 lakhs and ₹ 4,331.78 lakhs in Financial Year 2025 respectively, as well as substantial reduction in trade payables from ₹ 3,197.36 lakhs in Financial Year 2024 to ₹ 1,778.10 lakhs Financial Year 2025. The reduction in trade payables will help in procuring raw materials and consumables at favourable terms such as reduction in prices and increase in vendor base.

The Company plans to fund the existing and estimated incremental working capital requirement through internal accruals and net proceeds from Issue.

Trade Receivables	40	71	61	67

Justification for “Holding Period” levels

The justifications for the holding levels mentioned in the table above are provided below:

Inventories	<p>Inventories primarily include raw materials and finished goods and consumables. The Company had expanded its installed capacity and utilisation due to higher demand for its products, due to which it was required to maintain higher level of inventory. Hence, inventory holding days was 53 days in Financial Year 2022. During Financial Year 2023, our Company suffered a substantial set back in revenue due to publication of preliminary administrative review on Anti-dumping duty by US Department of Commerce on certain Quartz surfaces imported from India. However, our investment in inventory did not decrease, due to which the holding period is substantially higher at 99 days as at the end of Financial Year 2023. During the Financial Year 2024, Company's operation started resuming and our revenue increased which reduced our inventory holding levels to 85 days. Also, as the Company plans to focus more on its domestic sales and therefore needs to maintain higher inventory levels to cater to its domestic dealer distribution network. The Company further estimates higher growth in revenue from operations in Financial Year 2025 while value of inventory is not estimated to be increased by similar proportion and therefore the estimated inventory holding level is reduced to 73 days as at the end of Financial Year 2025.</p> <p>It may be noted that our investment in inventory has been maintained between Rs. 3,497.63 lakhs in Financial Year 2022 and Rs. 3928.13 lakhs in Financial Year 2025, with mild fluctuations in the period between. However, due to multiple reasons mentioned above, our levels of inventory have fluctuated due to fluctuations in or revenue from operations.</p>
Trade receivables	<p>Company's trade receivable day was 40 days in Financial Year 2022. In Financial Year 2023 after favourable final results of administrative review on Anti-dumping duty by US Department of Commerce on certain Quartz surfaces imported from India, the export sales revived from the last quarter</p>

		but due to change in sales strategy, order to cash cycle has increased. The Company's domestic sales share has also increased, which requires higher credit period resulting into trade receivable holding level of 71 days. In the Financial Year 2024, the Company witnessed a slight decrease of trade receivable holding level at 61 days. However in Financial Year 2025, the Company estimates a higher mix of domestic sales which would require us to offer higher credit period to our domestic customers. However, we anticipate a marginal increase in our trade receivable holding level at 67 days.
Other Assets	Current	Other Current Assets majorly comprise of advances to vendors, Income Tax refund receivable, export benefit receivable, GST input tax credit & refund. For the Financial Year 2022 the Company's other current assets holding level was 53 days due to high-accumulated GST input tax credit. In Financial Year 2023 its holding level reduced to 50 days as the Company got substantial refund of GST input tax credit but there were export benefit receivables. In the Financial Year 2024, the holding period reduced further to 34 days. The Company estimates the holding period to reduce to 26 days as at the end of Financial Year 2025 due to increase in revenue.
Trade Payables		The Company's trade payable holding level was at 75 days in Financial Year 2022. In Financial Year 2023, the revenue reduced significantly but the average value of trade payables did not reduce to the same effect due to which the trade payable holding level increased to 96 days. In financial Year 2024, the holding level was reduced to 66 days due to increased revenue. In Financial Year 2025, the Company is planning to resort to quicker payment terms with its creditors which will help in procuring materials on favourable terms resulting into benefits such as reduction in prices and increase in vendor base. The trade payable holding level is estimated at 47 days in Financial Year 2025.
Other Liabilities	Current	Other Current Liabilities include mainly advances from customers, employee payables and other statutory dues. In Financial Year 2022 other current liabilities holding level was at 12 days. In Financial Year 2023 due to decrease in revenue, the holding level again increased to 19 days, which further reduced to 15 days in Financial Year 2024. Further, the Company estimates a marginal change in holding level as at the end of Financial Year 2025 at 14 days.

Note:

1. Holding period level (in days) of Trade Receivables is calculated by dividing average trade receivables by revenue from operations multiplied by number of days in the year (365).
2. Holding period level (in days) of Other Current Assets (Total current asset less trade receivables, inventories and cash & bank balances) and is calculated by dividing average other current assets by revenue from operations multiplied by number of days in the year (365).

3. INVESTMENT IN OUR SUBSIDIARY HSPL FOR FUNDING ITS WORKING CAPITAL REQUIREMENT

HSPL manufactures engineered marbles surfaces and started its commercial operation in September 2022. Since it is in its initial years of its commercial operations, its operational infrastructure is working capital intensive and involves maintaining higher levels of inventory and debtors.

HSPL is regularly developing new designs of its products for export as well as domestic market, due to which it needs to maintain higher level of inventories of finished goods and raw materials. It also needs to maintain high credit period for its trade receivables for distribution of its products through dealers.

Presently, HSPL funds the majority of its working capital requirements in the ordinary course of its business from borrowings from holding company and short-term financing from banks.

During the year ended March 31, 2023, the total working capital was ₹773.27 lakhs for a turnover of ₹ 2,256.31 lakhs. During the Financial Year ended March 31, 2024, although the turnover was ₹ 1,692.00 lakhs, the working capital requirement was ₹ 1,261.12 lakhs. It was required to maintain higher amounts of inventories for the Financial Year March 31, 2024 in anticipation of demand as well as to maintain continuity of its operations and business with its customers. The levels of trade receivable and other current assets were also higher but were partly offset by higher credit period from vendors. The balance working capital was financed from short-term borrowings from banks and borrowings from holding company.

We anticipate a substantial growth in revenue and operations in Financial Year 2025. This will result in significant growth in its working capital requirement from ₹ 1,261.12 lakhs as on March 31, 2024 to ₹ 1,564.97 lakhs in Financial Year 2025. We plan to fund the estimated working capital requirement through borrowings from holding company and net proceeds from the Issue.

To meet the additional working capital requirement of HSPL, our Company proposes to invest ₹ 650.00 lakhs of the Net Proceeds towards investment in HSPL. The deployment of net proceeds shall be over the course of the Financial Year 2025 in accordance with the working capital requirements of HSPL. Such investment shall be in the form of debt amounting up to ₹650.00 Lakh which shall be repayable on demand, in accordance with the applicable laws.

*For the Financial Year ended March 31, 2023, the number of days for calculating holding levels is taken as 213 days since the operations commenced from September, 2022.

Justification for “Holding Period” levels

The justifications for the holding levels mentioned in the table above are provided below:

Inventories	Inventories primarily include raw materials and finished goods. The HSPL’s inventory holding level of in Financial Year 2023 was at 34 days as it was first year of operations which increased substantially to 137 days in Financial Year 2024, as even at lower sales HSPL continued to produce finished goods to maintain continuity of its operations and business with its customers. HSPL has estimated further reduction of inventory holding period to 75 days in line with its anticipated increase in revenue for Financial Year 2025.
Trade receivables	HSPL had trade receivable holding level of 36 days in the Financial Year 2023. HSPL’s revenue declined in the Financial Year 2024, however, the average value of trade receivables did not witness a decline due to which

	the holding level was increased to 91 days. HSPL estimates that in Financial Year 2025, its revenue will increase further due to increased focus on both exports and domestic operations. The trade receivable holding period is estimated to reduce to 57 days in Financial Year 2025.
Other Current Assets	Other Current Assets majorly comprise of GST input tax credit & refund. For the Financial Year 2023 HSPL's holding level was at 52 days. For the Financial Year 2024, HSPL's other current assets holding level increased to 96 days due to high accumulated GST input tax credit on capital expenditure and decrease in revenue. The holding level is estimated to be reduced to 23 days mainly due to utilisation of accumulated GST input tax credit as at the end of Financial Year 2025.
Trade Payables	HSPL had trade payable holding level of 43 days in Financial Year 2023. For the Financial Year 2024, even at lower sales we continued to buy raw materials to produce finished goods to maintain continuity of its operations, and as a result, the holding level increased to 95 days. In Financial Year 2025, HSPL is estimating significant increase in revenue and is also planning to resort to quicker payment terms with its creditors which will help in procuring materials on favourable terms resulting into benefits such as reduction in cost and increase in its vendor base. Thus, the trade payable holding level is estimated at 32 days as at the end of Financial Year 2025.
Other Current Liabilities	Other Current Liabilities include advances from customers, employee payable and others. In the Financial Year 2023, other current liabilities holding level were 6 days. For the Financial Year 2024, the holding level increased to 10 days as the revenue decreased in the period. We estimate that due to increase in revenue, the other current liabilities holding level will reduce to 6 days in Financial Year 2025.

Note:

1. Holding period level (in days) of Trade Receivables is calculated by dividing average trade receivables by revenue from operations multiplied by number of days in the year (365).
2. Holding period level (in days) of Other Current Assets (Total current asset less trade receivables, inventories and cash & bank balances) and is calculated by dividing average other current assets by revenue from operations multiplied by number of days in the year (365).
3. Holding period level (in days) of Inventories is calculated by dividing average inventories by revenue from operations multiplied by number of days in the year (365).
4. Holding period level (in days) of Trade Payables is calculated by dividing average trade payables by revenue from operations multiplied by number of days in the year (365).
5. Holding period level (in days) of Other Current Liabilities (Total current liabilities less trade payables, short-term borrowings and excluding creditors for capital expenditure) is calculated by dividing average other current liabilities by revenue from operations multiplied by number of days in the year (365).

ANNEXURE TO THE STATEMENT OF SPECIAL TAX BENEFITS AVAILABLE TO ESPRIT STONES LIMITED (“THE COMPANY”) AND IT’S SHAREHOLDERS UNDER THE APPLICABLE TAX LAWS IN INDIA

Outlined below are the special tax benefits available to the Company and its shareholders as per the Income tax Act, 1961 (“IT Act”) as amended from time to time and applicable for financial year 2024-25 relevant to assessment year 2025-26 (AY 2025-26) and Indirect Tax Laws as amended from time to time and applicable for financial year 2024-25. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in the Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

I. Under the IT Act

1. Special Tax Benefits to the Company

- Lower Corporate Tax rate under Section 115BAA

A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 (“the Amendment Act, 2019”) granting an option to domestic companies to compute corporate tax at a reduced rate of 25.17% (22% plus surcharge of 10% and cess of 4%) from the Financial Year 2019-20, provided such companies do not avail specified exemptions/incentives (e.g. deduction under Section 10AA, 32(1) (iia), 33ABA, 35(2AB), 80-IA etc.) The Amendment Act, 2019 also provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax (“MAT”) under Section 115JB. The CBDT has further Issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available. Corresponding amendment has been inserted under Section 115JAA dealing with MAT credit.

The company has exercised the above option in the Financial Year 2019-20.

2. Special Tax Benefits available to Shareholders

There are no Special Tax Benefits available to the Shareholders (other than Resident Corporate Shareholder) of the Company.

With respect to a Resident Corporate Shareholder, a new section 80M is inserted in the Finance Act, 2020, to remove the cascading effect of taxes on inter-corporate dividends during financial year 2020-21 and thereafter. The section provides that where the gross total income of a domestic company in any previous year includes any income by way of dividends from any other Domestic Company or a Foreign Company or a Business Trust, there shall, in accordance with and subject to the provisions of this section, be allowed in computing the total income of such domestic company, a deduction of an amount equal to so much of the amount of income by way of dividends received from such other Domestic Company or Foreign Company or Business Trust as does not exceed the amount of dividend distributed by it on or before the due date. The “due date” means the date one month prior to the date for furnishing the return of income under sub-section (1) of section 139.

NOTES:

- The above statement of Special Tax Benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
- The above statement covers only certain Special Tax Benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This statement also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
- The above statement of Special Tax Benefits is as per the current Direct Tax Laws relevant for the assessment year 2025-26. Several of these benefits are dependent on the Company or its

- Shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
- As the Company has opted for concessional corporate income tax rate as prescribed under section 115BAA of the Act, it will not be allowed to claim any of the following deductions:
 - a. Deduction under the provisions of section 10AA (deduction for units in Special Economic Zone)

Economic Outlook

Global Economy

As per the International Monetary Fund (IMF)’s World Economic Outlook growth projections released in October 2023, the global economic growth for CY22¹ stood at 3.5% on a year-on-year (y-o-y) basis, down from 6.3% in CY21 due to disruptions resulting from the Russia-Ukraine conflict and higher-than-expected inflation worldwide. On the other hand, the global economic growth for CY23 is projected to slow down further to 3.0% and 2.9% in CY24, attributed to compressing global financial conditions, expectant steeper interest rate hikes by major central banks to fight inflation, and spill-over effects from the Russia-Ukraine conflict, with gas supplies from Russia to Europe expected to remain tightened. For the next 4 years, the IMF projects world economic growth in the range of 3.0%-3.2% on a y-o-y basis.

Indian Economic Outlook

GDP Growth and Outlook

India’s GDP grew by 9.1% in FY22 and stood at Rs. 149.3 trillion despite the pandemic and geopolitical Russia-Ukraine spillovers. In Q1FY23, India recorded 13.2% y-o-y growth in GDP, largely attributed to improved performance by the agriculture and services sectors. Following this double-digit growth, Q2FY23 witnessed 6.3% y-o-y growth, while Q3FY23 registered 4.5% y-o-y growth. The slowdown during Q2FY23 and Q3FY23 compared to Q1FY23 can be attributed to the normalization of the base and a contraction in the manufacturing sector’s output.

Subsequently, Q4FY23 registered broad-based improvement across sectors compared to Q3FY23 with a growth of 6.1% y-o-y. The investments, as announced in the Union Budget 2022-23 on boosting public infrastructure through enhanced capital expenditure, have augmented growth and encouraged private investment through large multiplier effects in FY23. Supported by fixed investment and higher net exports, GDP for full-year FY23 was valued at Rs. 160.1 trillion registering an increase of 7.2% y-o-y.

Furthermore, in Q1FY24, the economic growth accelerated to 7.8%. The manufacturing sector maintained an encouraging pace of growth, given the favourable demand conditions and lower input prices. The growth was supplemented by a supportive base alongside robust services and construction activities.

GDP Growth Outlook

- During FY24, strong agricultural and allied activity prospects are likely to boost rural demands. However, a rebound in contact-intensive sectors and discretionary spending is expected to support urban consumption.
- Strong credit growth, resilient financial markets, and the government's continual push for capital spending and infrastructure are likely to create a compatible environment for investments.
- External demand is likely to remain subdued with a slowdown in global activities, thereby indicating adverse implications for exports. Additionally, heightened inflationary pressures and resultant policy tightening may pose a risk to the growth potential.

Taking all these factors into consideration, in October 2023, the RBI in its bi-monthly monetary policy meeting estimated a real GDP growth of 6.5% y-o-y for FY24.

Overview of Natural and Engineered Stone Industry

Natural stones are produced by complex geological processes and include products such as granite, limestone, marble, slate, quartzite, onyx, sandstone, travertine, and others quarried from the earth. They are widely known for their uniqueness, aesthetic appeal, texture, colour, and composition as no two natural stones are the same. Further, natural stones have a wide range of applications in large-scale constructions such as the construction of government buildings, churches, monuments, and road construction.

Quartz, an example of engineered stone used in the countertop industry, is a composite material made up of crushed stone bonded by an adhesive. For instance, for countertops, the slabs are made from quartz crystals bonded with a resin binder. The engineered stone slabs are manufactured by bonding up to 93% natural quartz which is one of the hardest materials. Whereas pigments, aggregates, and polyester resins are used to produce vibrant stone surfaces with excellent stain, heat, chip, and scratch resistance properties. Furthermore, it is recommended that the engineered stone like quartz products should not be used for exterior applications as direct exposure to sunlight can lead to fading. Accordingly, engineered stone like quartz are used for vanity tops, reception or bar counters, kitchen benchtops, upstands, and splash backs.

Engineered Stone

Engineered stone, is a composite material formed out of crushed stone that is held together by an adhesive. The various types of engineered stones are:

- Engineered quartz,
- Polymer concrete and
- Engineered marble

Historically, amongst the three kinds of engineered stone, engineered quartz has accounted for the highest market share followed by engineered marble stone.

Quartz

Quartz, which is also known as "engineered stone", is a product with the word "quartz" referring to a natural mineral. Quartz particles are bound together with resin, pigments, and other elements. Quartz is manufactured at plants across the globe, including the United States, Europe, and Asia. The specific composition of engineered quartz varies by brand and hue, and manufacturers promote their slabs' high mineral content.

Further, manufactured quartz includes 93% mineral quartz. There are, however, two caveats. First, the maximum quartz percentage is 93%, and the actual quartz content can be substantially lower. Second, the percentage is based on weight rather than volume. A quartz particle is much heavier than a resin particle. So, if a person wants to determine how much quartz is in a countertop, he/she should measure the elements by volume rather than weight. Vicostone, for example, is about 90% natural quartz aggregates and polymer resin and pigments.

The strength of quartz, even in a manufactured form, makes it naturally resistant to abrasion, scratches, dents, and even acids without the need for sealants. And the environmental impact of manufactured quartz is low. Quartz is an abundant material and the finished product is nontoxic and nonallergenic, and will last a lifetime, reducing the need for replacement.

Polymer Concrete

Conventional cement concrete is manufactured by substituting the cement hydrate binders with polymer resins or liquid resins, creating a composite material known as polymer concrete. Liquid resins, such as methacrylic resins, thermosetting resins, and tar-modified resins, polymerize at ambient or room temperature to form polymer concrete.

Engineered Marble Stone

Engineered marble is made from crushed natural stone that has been pressed, heated, and bonded with a small quantity of resin. Engineered marble, unlike porous natural stone, is less prone to moisture, which may lead to mildew. It is also more scratch- and stain-resistant than quarried or cultured marble. Moreover, it does not need any extra cleaning or polishing.

Composite Marble can be used in interior application like flooring, window jamming etc. Engineered stone composite is a constituent of marble dust and chips, bound with resin and pigment. It mainly constitutes byproducts of the marble processing and mining industry. In addition to the remnant marble products, colored glass, metal, or shells also can be combined to make composite marble. It is molded into structures later refined and polished to be used as countertops, bathtubs, sanitary ware, kitchenware, and many more.

Engineered Stone – Quartz & Engineered Marble Industry

Brief Overview

Quartz, an engineered stone, is a composite material formed of crushed stone that is held together by an adhesive. Slabs of quartz crystals are kept together by a resin binder in the case of counters. The majority of quartz is made using a 93% crushed stone to 7% resin and coloring ratio. Engineered quartz is gaining significant popularity as they are durable and non-porous. For instance, the engineered quartz is resistant to dents, abrasion, scratches, and acid.

Engineered quartz is available in different styles, designs, and prices that makes it a popular choice among home renovators and contractors. When these quartz aggregates are compressed to slabs, they endure similar texture and color as that of granite or natural slate.

One of the key benefits of engineered stone is that it can be cut into tiles which can be used for flooring and provides sophisticated finish. Also, engineered stones are resistant to mold and mildew due to which they are also suitable for wet rooms of commercial and residential constructions. The engineered stones can also be used to create luxurious fireplaces owing to its modern and sleek finish that meet the architectural styling requirements.

Current Scenario

The global engineered stone market's CAGR is expected to be 7% and reach \$26,917 million in 2022 from \$20,374 million in 2018. The engineered quartz has been the major contributor in the engineered stone segment followed by the engineered marble stone.

In the year 2020 and 2021, the industry was impacted by the price fluctuations of quartz. The average price of quartz increased by 12% and 3% in the year 2021 and 2020 respectively. Rise in shipping cost and raw materials were the primary reason for the same.

Global situations like Ukraine – Russia war, trade wars and pandemic lead to surge in uncertainty in global economy. The war between Ukraine and Russia has triggered a humanitarian crisis and economic slowdown in the global growth. The commodity price rise due to the war has led to projections of inflation at 5.7% in advanced economies and 8.7% in emerging economies. The developing economies are projected to have inflation projections of 1.8 and 2.8 percentage points higher than projections for last January.

However, in the projected period from 2022 to 2027, the engineered stone market is expected to grow at a CAGR of 7-8% and reach \$37,569 million, thereafter the industry is expected to reach \$ 48,104 million in 2032.

Region Wise Contribution

North America

The engineered stones market in North America is expected to have a high growth in Canada in the forecasted years 2022 to 2032. The growth is majorly attributed to increased construction and remodeling activities, and growing demand for strong, natural, and aesthetic looking countertops for kitchens. The segment is also expected to expand in the USA driven by increase in demand for building and construction activities. The rise in demand for countertops in new construction as well as renovations is expected to boost the engineered stone market in the USA. Countertops is the dominant application segment for engineered stones.

Engineered stones surface countertops have gained popularity due to their durability and stain resistance. They can be used primarily for kitchen countertops, bathroom countertops, and outdoor applications as they are durable and non porous. Thus, growth in the building and construction activities is estimated to boost the demand for engineered stones. Rise in commercial activities in the country is leading to construction of commercial buildings and institutional buildings further driving the demand for engineered stones.

The engineered stone segment is valued at an estimated \$5,419 million in 2022, growing at a CAGR of 5% from \$ 4,453 million in 2018.

Dubai and the Gulf region have evolved as global business hubs with corporates having their offices in this region. It is also developing as the centre for export and various activities around the world. The engineered stone industry in Dubai is expected to benefit from the following key demand drivers:

- In Dubai, infrastructure is developing at a rapid pace. The application of engineered stone is expected to witness growth in Dubai due to increased infrastructure activities like building metro stations and various tourist attractions.

- Dubai is situated centrally and has new manufacturing lines established strategically at the Free Trade Zone and near ports. This positioning of the manufacturing units near the port leads to the optimization of freight and transportation charges as compared to manufacturing units established in landlocked areas that use rail and roads for transportation. Moreover, the companies and production facilities located in Free Trade Zones are exempt from income tax and VAT. The income tax exemption and free trade privileges serve as a key factor in attracting investments.

Indian Engineered Stone Industry

Engineered quartz was declared as a minor mineral by the Government of India in 2015. More than half of quartz in India comes from the state of Andhra Pradesh, followed by Rajasthan. Other states where quartz is available are Chhattisgarh, Gujarat, West Bengal, Karnataka and Jharkhand. The industry mainly consists of unorganized players. Besides catering to the Indian market, India is a major exporter of engineered or quartz stones in countries like the U.S, Europe and U.A.E. The demand for engineered stones has increased tremendously owing to its wide range of applications, cost effectiveness, and many other characteristics such as strength, durability, and availability in various color pellets.

The Indian engineered stone market is estimated to be valued at \$3,643 million in 2022. The industry is expected to grow at a CAGR of 7-8% in the projected years between 2022 to 2027. By the year 2032, the Indian engineered stone market is expected to reach \$ 7,355 million.

Moreover, In the FY2020-21 the industry was impacted by the Covid-19 leading to disruptions in production and transportation process. As the lockdowns were imposed throughout the country, laborers migrated back to their native towns creating a shortage of labor. The infrastructure and customer base were also affected by the pandemic as the customers wanted to check the look and feel of the products which was not possible during the time of lockdowns. The Indian stone industry grew at a very slow pace in that period.

Unsaturated Polyester Resin

Overview

Unsaturated polyester resin (UPR) is a polymer type widely used in the manufacturing of various products, particularly in the field of composite materials. It is a thermosetting resin, meaning it undergoes a chemical reaction that irreversibly solidifies or 'sets' when it is cured, typically through the addition of a curing agent. The curing process involves the addition of a catalyst, usually a peroxide, and sometimes an accelerator. This combination initiates a chemical reaction that results in the formation of a three-dimensional network of polymer chains, turning the liquid resin into a solid, durable material. Unsaturated polyester resins find extensive use in the production of composite materials such as fiberglass-reinforced plastics (FRP).

India – Unsaturated Polyester Resin

The India unsaturated polyester resin market was valued at \$1,290 million in 2022 and is projected to reach \$2,674 million by 2032, registering a CAGR of 8% from 2022 to 2032. The unsaturated polyester resin market in India is experiencing significant growth, buoyed by robust development in the construction and automotive industries. The construction sector, fueled by rapid urbanization and infrastructure projects, showcases a soaring demand for unsaturated polyester resins used in applications like composite materials, laminates, and coatings. Simultaneously, the automotive industry is witnessing a surge in the use of these resins for manufacturing lightweight components, enhancing fuel efficiency and sustainability. In addition, the Indian government's initiatives to boost these industries, such as the "Make in India" campaign and increased infrastructure investments, further amplify the demand for unsaturated polyester resins. These resins, known for their versatility, strength, and corrosion resistance, align seamlessly with the evolving needs of these key sectors. As India strives for economic growth and technological advancement, the unsaturated polyester resin market is poised to play a pivotal role in fostering innovation and contributing to the nation's industrial development.

OVERVIEW

We are primarily engaged in the manufacturing of Engineered Stones such as: (i) engineered quartz surfaces; and (ii) engineered marble surfaces. Our Company majorly manufactures engineered quartz surfaces and through our Subsidiary, HSPL, we manufacture engineered marble surfaces. We are one of the key Engineered Stones players in India. (Source: CARE Report). Engineered Stones are composite material formed out of crushed stone that is held together by an adhesive. Engineered Stone’s non-porous characteristics, offer superior scratch, stain and heat resistance, making them extremely durable and therefore get an edge over competing products such as natural stones, laminate and other manufactured solid surfaces. The strength, consistency, durability and appearance of our Engineered Stones, as well as their low maintenance makes it ideal for its application for vanities & bathroom surfaces, kitchen countertops, floors and wall cladding furniture, and other interior surfaces that are used in a variety of residential and non-residential applications. Through our innovative design and manufacturing processes, we are able to offer our product in wide variety of colours, styles, designs and textures.

We have customized our manufacturing processes in order to maximize the consistency, quality, durability and crack resistance of our Engineered Stones while also increasing its slickness and luster. Together with our research and development capabilities, our manufacturing expertise enable us to develop a number of aesthetically distinct designs for our products. We continually work to ensure that we acquire high quality raw materials for our Engineered Stones and ensure that our high-quality standards are met by conducting ongoing quality control checks of the raw materials and finished goods at our Manufacturing Facilities.

Additionally, through our Subsidiary, Addwaya Chemicals, we are also engaged in the manufacturing of unsaturated polyester resin which is one of the key raw materials in manufacturing of Engineered Stones.

Our Company was incorporated in the year 2016 and is promoted by two business houses from Udaipur, Rajasthan namely, Aravali group and Gattani group. We within a short span of less than six years since becoming operational, have expanded our manufacturing capacity and diversified our operations. Having set up our Manufacturing Facility I in the year 2017, we started the production of engineered quartz with a single press line and a polish line capable of producing around 24 lakhs sq.ft. engineered quartz per annum. As on date, our Manufacturing Facility I is equipped with three (3) pressing lines and two (2) polishing lines with a production capacity of around 72 lakhs sq.ft. per annum. Additionally, we commissioned our Manufacturing Facility II for manufacturing of quartz grit and quartz powder which is the primary raw material for manufacturing of engineered quartz. Thereafter, in order to further reduce our dependency on third-party raw material suppliers of unsaturated polyester resin, which is an important ingredient for manufacturing of Engineered Stones, our Company, through our Subsidiary namely, Addwaya Chemicals, started manufacturing of unsaturated polyester resin at Manufacturing Facility III having an annual capacity of around 18 thousand metric tonnes. As a result of this backward integration, our Company gained a better control on quality of key raw materials. In the year 2022, our Company through our Subsidiary, HSPL has commenced manufacturing and processing of engineered marble surfaces at our Manufacturing Facility IV which is equipped with one (1) pressing line, two (2) gangsaw and one (1) polishing line and having an annual capacity of around 74 lakhs sq. ft. For further details of expansion of our operations, see “**History and Certain Corporate Matters**” on page 174.

At present we are one of the key Engineered Stones players in the Indian Market (*Source: CARE Report*) and we market and sell our Engineered Stones in domestic as well as international markets through a combination of direct export sales and a network of independent distributors in the domestic market. As on the date of this Prospectus, we are exporting to over 10 countries including USA, Canada, Egypt, Bulgaria, UAE, Saudi Arabia, etc. under white labelling. A majority of our sales comprise of export sales. During the Fiscals 2024, 2023 and 2022, we derived 59.87%, 72.75% and 92.44% of our sales from exports, respectively. Further, out of our total exports, 94.43%, 97.51% and 96.47% are exported to USA during the Fiscals 2024, 2023 and 2022 respectively. Further during Fiscal 2024 and 2023 the Company made 64.43% and 25.73% of our export sales to USA through our foreign subsidiary, Haique Stones Inc.

Initially, the business of the Company was only export based. However, to capitalise the growing demand of Engineered Stones in domestic market, our Company launched our premium brand ‘Haiqu’ which was later renamed as “Haique”. As on the date of this Prospectus, we have extended our reach to 15 states in the country through our distributors network. Our Company is in the process of setting up of an experience centre at Kishangarh, Rajasthan, the marble city of India. Additionally, our Company also has a storage facility and sales office in Mumbai, Maharashtra.

We believe that we have invested considerable resources to position ‘Haique’ as a premium brand and as a symbol of elevated living. Presently, we are promoting our brand by engaging an eminent Bollywood celebrity and strive to actively support our brand through online and print advertising and exhibitions and events. At the same time, we intend to continue developing Engineered Stones with new and innovative characteristics related to colour, design, texture and thickness as well as promoting other applications for our products, such as high-end bathroom surfaces, countertops and wall cladding, to ensure that end-consumers continue to recognize ‘Haique’ as a luxury brand and a leading provider of premium-quality Engineered Stones.

Our business model is aimed to consistently continue to strengthen our product portfolio through continued investment in product innovation supported by strong research and development initiatives, marketing activities and the establishment of long-term relationships with our existing and new customers.

We are led by our Promoters, Sunilkumar Lunawath, Nitin Gattani and Pradeep Lunawath, who have extensive experience in the industry in which we operate and have been intimately involved in our business from inception. Our Promoters continue to remain actively involved in our operations and continue to bring their vision, business acumen and leadership to our Company, which has been instrumental in sustaining our business operations and growth. We also have qualified and experienced Key Managerial Personnel and Senior Management Personnel who have demonstrated their ability to anticipate and capitalize on changing market trends, manage and grow our operations and leverage and deepen customer relationships. For further details, see “**Our Promoters**” and “**Our Management**” on page 192 and 179, respectively.

believe that we have achieved this success due to our strong understanding of consumer preferences that helps us recognize and address local trends in the markets we serve. We believe that we are well positioned to benefit from attractive growth and substantial penetration opportunities in the Engineered Stones segment. The global engineered stones market is expected to reach \$48,104 million by 2032. The global engineered stone industry is expected to grow at a CAGR of 5%-6% between 2027 and 2032. Further, the Indian engineered stone market was valued at \$2,611 million in 2018 and grew at a CAGR of 8% to reach \$3,286 million in 2021. The industry is expected to grow at a CAGR of 7%-8% in the projected years between 2022 to 2027. By the year 2032, the Indian engineered stone market is expected to reach \$7,355 million. (Source: CARE Report). We believe that the continued growth of the global engineered stones market including Indian market represents a significant future growth opportunity for our products, as we continue to penetrate new and existing markets.

2. Focus on quality and innovation

We believe that quality and innovations are the bed-rock of success. Towards this end, we stress on and constantly strive to maintain and improve the quality of our products. This focus is reflected in the standard of our quality systems which have been certified ISO 14001:2015, ISO 45001:2018, ISO 9001:2015, NSF certifications, green guard certifications, etc. For further details, see “**Government and Other Approval**” on page 276. We have developed quality control processes for inspecting the raw materials as well as the final products. The raw materials and the final products undergo strict quality checks and for this purpose we have even implemented internal procedures for quality control. Our Facilities have dedicated personnel responsible for monitoring the parameters of equipment, strength of materials, reporting any irregularities in the manufacturing process and making adjustments accordingly. These multi-level quality checks ensure that we consistently provide premium quality products which further enhances our brand value.

We have a R&D team comprising of six persons who focus on producing new innovative designs and aesthetics concept. During Financial Year 2023 and 2024, our R&D team introduced approximately more than 30 new designs and concepts. We have also introduced new designs such as Platinum Statuario, Palais Grey, Crystal White in the market. The in-house a R&D ensures that we are self-reliant for the development of high-quality products and are kept abreast of the market trends. We believe that this enables us to compete with greater efficiency against our competitors and provide us with the competitive edge.

3. Backward Integration

We are engaged in the manufacturing of engineered quartz surfaces and the core raw material for manufacturing of engineered quartz are quartz grit and unsaturated polyester resin. In order to reduce our dependence on third-party raw material suppliers, use consistent and quality material in our products, we commissioned our Manufacturing Facility II for manufacturing of quartz grit. As a result of this backward integration, our Company gained a better control on such raw material. In addition, the quartz grit produced by our Manufacturing Facility II places us in an advantageous position in the event of a limited availability of quartz grit in the market.

Thereafter, in order to further reduce our dependency on third-party raw material suppliers of unsaturated polyester resins, which is an important ingredient for manufacturing of engineered stone, our Company, through our Subsidiary namely, Addwaya Chemicals Private Limited started manufacturing of unsaturated polyester resins at our Manufacturing Facility III, strategically located in the close proximity to our Manufacturing Facility I and IV which provides location advantage and quality assurance. We believe that these integration measures allow us to have greater control on the manufacturing process by capturing value chain, keep up our quality standards and benefit from cost efficiencies in our resource utilisation.

In addition to polyester resin’s application in production of Engineered stones, it also finds its application in other industries such as natural stones, button manufacturing, and fibre manufacturing. Therefore, the manufacturing of polyester resin at our Manufacturing Facility III and sale of the same in open market adds to our revenue stream.

4. *Strategic location and state-of-the-art manufacturing facilities*

The Udaipur area in Rajasthan has abundant mineral deposits that are used for manufacturing of our Engineered Stones. Our manufacturing facilities, located in the Udaipur district, benefit from the mineral-rich ecology, resulting in economic and logistical advantages. Our Manufacturing Facilities are fully integrated from handling of raw material to finished goods and are equipped with modern storage facilities and latest technology machineries such as quartz pressing line including mixers and pressing line, calibrating and polishing line, EOT cranes, CNC machines, bridge-cutter, resin line, grit grinding unit, powder ball mill, powder storage silos, resin tanks, mixers and block pressing line, gang saw, polishing machines, reactors, blenders, etc. enabling us to manufacture quality products, minimize human labour involvement and achieving cost efficiencies. Our machineries are imported as well as domestically procured and match the international quality standards. Over the years, our Company has made continuous investments in its manufacturing infrastructure to support its product portfolio requirements. We engage in continuous product development and introduction of new designs to keep up with the trends and meet our customer requirements.

Our Strategies

We intend to pursue the following strategies in order to enhance our product brand and market share, build economies of scale in our business and grow our revenues and net income:

1. *Expand awareness of our premium brand*

We have recently launched our premium brand ‘Haique’. We believe that we have invested considerable resources to position ‘Haique’ as a premium brand and as a symbol of elevated living. Presently, we are promoting our brand by engaging an eminent Bollywood celebrity and strive to actively support our brand through online and print advertising and exhibitions and events. At the same time, we intend to continue developing engineered stone with new and innovative characteristics related to colour, design, texture and thickness as well as promoting other applications for our products, such as high-end bathroom fittings and wall cladding, to ensure that end-consumers continue to recognize ‘Haique’ as a premium brand and a leading provider of high-quality engineered stone products. For the Financial Year 2024, Financial Year 2023 and Financial year 2022 our marketing expenses including salaries and expenses of marketing employees were ₹656.25 lakhs, ₹342.32 lakhs and ₹111.29 lakhs respectively.

2. *Focus on existing and entering new markets*

We believe that a significant portion of our future growth will come from continued penetration in our

key growth markets, particularly the United States which we have prioritized as key growth markets due to their size, growth potential and the existing demand for our products. A majority of our sales comprise of export sales. During the Fiscals 2024, 2023, 2022 and 2021, we derived 59.87%, 72.75% and 92.44% of our sales from exports, respectively. Further, out of our total exports, 94.43%, 97.51% and 96.47% are exported to USA during the Fiscals 2024, 2023 and 2022 respectively. Further during the Fiscal 2024 and 2023 the Company made 64.43% and 25.73% of our export sales to USA through our foreign subsidiary, Haique Stones Inc. We also intend to expand our foot print in Middle East countries and in furtherance to the same, we in year 2023 have entered into an exclusive distribution arrangement with a Saudi Arabia registered entity for distribution of our engineered stones in the territory of Saudi Arabia.

We are also focusing to cater to domestic demand through our product offerings. The Indian engineered stone market was valued at \$2,611 million in 2018 and grew at a CAGR of 8% to reach \$3,286 million in 2021. The industry is expected to grow at a CAGR of 7%-8% in the projected years between 2022 to 2027. By the year 2030, the Indian engineered stone market is expected to reach \$7,355 million (*Source: CARE Report*). Currently, we have our presence in 15 states in the country through more than 50 active distributors with a pan India Sales and Marketing team of 44 personnel. We expect the demand in the Indian markets to strengthen in the future. As a business strategy, we intend to expand our dealers' network in Indian cities as we believe that there are significant untapped opportunities in these cities for us to capitalise to grow our business operations. We believe the penetration rates of engineered stone in Indian market and our market share in the export market can reach considerably higher levels in the future and therefore our focus will remain on acquiring new customers, retaining existing customers and offering good quality products.

3. *Enhanced focus on efficiency, cost and return on capital*

We intend to continue to improve the efficiency of our operations, reduce costs, improve margins and enhance the efficiency of capital employed thereby increasing the return on our capital, while still focusing on sustainable growth. We will continue to leverage technology for better demand planning, replenishment. This will help us improve sales and sell through, allowing us to increase turnover and minimize markdowns on our inventory. These actions are expected to improve margins, reduce costs and also reduce our overall inventory and debtor levels. We believe our focus on costs and network efficiency will help us improve our profitability and return on capital employed.

4. *Focus on rationalizing our consolidated indebtedness*

We focus on rationalising our indebtedness. We have entered into various financing arrangements with banks and financial institutions for financial facilities. We propose to infuse funds in our Subsidiary namely HSPL which would be utilised to repay or prepay all or a portion of certain borrowings availed by our Subsidiary. For details see "*Objects of the Issue*" on page 107. The repayment or prepayment will help reduce HSPL outstanding indebtedness, assist us in maintaining a more favourable debt equity ratio and enable utilisation of our internal accruals for further investment in business growth and expansion.

5. *Expand the product line by introducing fresh designs to the portfolio.*

Our Company's strategy is focused towards introducing new product designs to meet the ever-changing demands of the market as well as garnering the attention of more end-users. This helps in strengthening the relationship with the existing customer network through a wide range of products while also onboarding new customers. Identifying and developing new products and designs is a continuous exercise that our management team engages into as we believe that there is an immense demand in the markets for unique designs, good quality and competitively priced products.

Our Product Portfolio

The details of our product portfolio are detailed as below;

Description	Key Features	Thickness	Key Product Series	Application
Engineered quartz surfaces	<p>Quartz, an engineered stone, is a composite material formed of crushed stone held together by an adhesive. Slabs of quartz crystals are kept together by a resin binder in the case of counters. The majority of quartz is made using a 93% crushed stone to 7% resin and colouring ratio.</p> <p>Engineered quartz is gaining significant popularity as they are durable and non-porous. For instance, the engineered quartz is resistant to dents, abrasion, scratches, and acid. Further, engineered quartz is available in different styles, designs, and prices, which makes it a popular choice among home renovators and contractors. When these quartz aggregates are compressed into slabs, they endure a similar texture and colour as that of granite or natural slate.</p> <p>One of the key benefits of engineered stone is that it can be cut into tiles, which can be used for flooring and provides a sophisticated finish. Also, engineered stones are resistant to mould and mildew due to which they are also suitable for wet rooms of commercial and residential constructions. The engineered stones can also be used to create luxurious fireplaces owing to their modern and sleek finish that meets the architectural styling requirements. Engineered marbles surfaces	Marble is the geological name for massive & compact limestone which is completely re-crystallized by heat and pressure that captures several foreign substances, thus creating a unique variety of colours and veining (minerals). Marble is just a changed limestone, or to be more specific, metamorphic limestone. The dissimilarity of materials causes veining in marbles facilitating weakness within many marbles. Like numerous other stones such as Calcareous stones, travertine and onyx, calcium carbonate is a major component of marble.	20 mm 18 mm 16 mm	Neo Marble & Terrazzo surfaces	Flooring, Window and door jamming, Table-tops, Wall-cladding

	<p>Further, marble can be polished and used for architectural and ornamental purposes. It is available in different colours from white to black, yellow, red, and green. Marbles are also veined or clouded beautifully. They are preferred for floorings as they emphasize the living space with its richness (<i>Source: CARE Report</i>)</p> <p>Engineered marble surfaces is a human-made alternative to natural stones. It is an attractive way to enhance the beauty of your accommodations. Engineered marble surfaces is a constituent of marble dust and chips, bound with resin and pigment. Unstaurated Polyester Resins	<p>Unsaturated polyester resin (UPR) is a polymer type widely used in the manufacturing of various products, particularly in the field of composite materials. It is a thermosetting resin, meaning it undergoes a chemical reaction that irreversibly solidifies or ‘sets’ when it is cured, typically through the addition of a curing agent. The curing process involves the addition of a catalyst, usually a peroxide, and sometimes an accelerator. This combination initiates a chemical reaction that results in the formation of a three-dimensional network of polymer chains, turning the liquid resin into a solid, durable material.</p> <p>Further, unsaturated polyester resin (UPR) is a versatile liquid polymer that, when cured through cross-linking with styrene and specific organic peroxides known as hardeners, solidifies into a durable shape.</p> <p>The production of unsaturated polyester resin involves the condensation of various raw materials, including unsaturated polyols, anhydrides, and acids. The processing of these resins incorporates additional materials like</p>	NA	Quartz resin, GP resin, Galaxy resin, Heera resin, Sheet resin	Manufacturing of Engineered stones, Button, Fiber Processing of Natural stones,

Manufacturing Process

Engineered quartz surfaces

Process name	Description
Mixing of Raw Material	Each design, pattern and size has its unique formula. Based on the formula all the raw materials are mixed in a big mixer to form a semi-solid mixture.
Leveling	The mixture is then poured into a mould (a tray), to form a leveled surface.
Pressing	The leveled mixture is then processed in press machine, to convert into a more solid surface.
Heating	After pressing, the slab is heated in an oven for approximately 60-90 minutes to make it pure solid surface.
Cooling	After heating, the slab is allowed to cool for 24 hours.
Edge Cutting	After cooling, the 4 edges of the slab are cut to make it perfect rectangular in shape.
Calibrating	After edge cutting, the slab goes into calibration machine, to make its top and bottom side even/ flat. This process is done with the help of fickers (in machine) and water.
Polishing	After calibrating, the slab goes into polishing machine, to make slab's one side polished and glossy. This process is done with the help of abrasive (in machine) and water.
Quality Testing	Every slab then undergoes rigorous quality testing to ensure it meets our extremely high standards of color, hue and consistency.
Labelling & Packing	The slabs are then labeled with stickers and surface protection film is applied.

Unsaturated Polyester Resin

Process name	Process Description
Pre-processing through Vacuum Pump	All three Glycols MEG, PEG, DEG are mixed with Maleic and Pthalic and are processed in a Vacuum Pump to eliminate all kind of moisture from the mixture.
Polyesterification in a Vessel called Reactor	The polyesterification reaction is normally carried out in stainless steel vessels ranging from 8000 to 20,000 L, heated and cooled through internal coils.

Process name	Process Description
	Blade agitators revolving at 70–200 rpm are effective in stirring the low viscosity mobile reactants, which are maintained under an inert atmosphere of nitrogen or carbon dioxide during the reaction at temperatures up to 240°C. Weigh tanks or meters measure the liquid glycols into the reactor. Solids are usually added from 25-kg bags components. Through this process a Polymer @ 200°C is formed. This process takes almost 8 hours for one batch of 1MT.
Cooling	Once the polymer is formed, it is cooled to 60°C and drained into a cooled blend tank containing styrene.
Blending with Styrene	The Polymer is finally mixed with Styrene and is blended in a vessel for almost 4 hours to form unsaturated polyester resin for one batch of 16MT.

Procurement of Raw Materials

Major raw materials for engineered quartz and engineered marble surfaces includes quartz grit and powder, marble grit, calcite powder, resin, other chemicals and pigments and for unsaturated polyester resin are phthalic anhydride, styrene monomer and ethylene glycol. In Financial Year 2022, 2023 and 2024 the cost of raw materials consumed represented 58.51%, 60.98% and 58.66% respectively, of our revenue from operations. We source majority of our raw materials from local suppliers based around our manufacturing facilities.

Inventory Management

The quantity of our finished products is determined based on a combination of confirmed and expected orders based on past trends and market research. We have an inventory management policy which provides various parameters for maintaining minimum and maximum stock levels of raw materials and finished products. Further, stock is taken physically at defined intervals in accordance with our policy and our existing stock is reviewed at regular intervals for quality purposes. Our finished products are stored onsite at our manufacturing facilities. Our finished products are packed through semi-automated stackers in wooden crates which are further exported in containers. We also make use of various other software to manage our inventory management.

Logistics

Our raw materials are primarily transported by road while our finished products are majorly transported through sea for export sales and by road for domestic sales. Our suppliers directly deliver our raw materials to our respective manufacturing facilities. We outsource the delivery of our products to third-party logistics providers and rely on freight forwarders to deliver our products from our manufacturing facilities to the customers. We do not have long-term contractual relationships with the logistics providers or freight forwarders.

Utilities

Our operations require use of power and water. The power requirement for our manufacturing facilities are sourced from the state power grids. We maintain power back-ups through DG Sets to ensure unhindered production, in case of power cuts by the local electricity providers. We have also installed solar power plant with an aggregate installed capacity of 1,706 KW at our Manufacturing Facilities which enable us to reduce our power costs. Further we have installed ground mounted solar generation plant of 1,300 KW at Gajner, Rajasthan and have long term open access agreement with state power grids for transmission of electricity which further reduces our utility costs as we get the credit benefit of such transmission in our power bill.

We require reasonable quantum of water for our production activities which we source from third party water tank. The water used during the production process at our Manufacturing Facility is further recycled.

A. Industry Related Laws

The Factories Act of 1948 (“Factories Act”)

The Factories Act was enacted to protect the welfare of workers in a factory by regulating employment conditions, working conditions, the working environment, and other welfare requirements of specific industries. The Factories Act lays out guidelines and safety measures for using machinery, and with its strict compliance, it also provides owners with instructions. When factory workers were taken advantage of and exploited by paying them low wages, the Factories Act was passed.

Industrial Disputes Act, 1947, as amended (the “ID Act”)

The ID Act provides for statutory mechanism of settlement of all industrial disputes, a term which primarily refers to a dispute or difference between employers and workmen concerning employment or the terms of employment or with the conditions of labour of any person. The Industrial Dispute (Central) Rules, 1957 inter-alia specify procedural guidelines for lock-outs, closures, layoffs and retrenchment.

Industrial Employment (Standing Orders) Act, 1946

In order to strengthen the bargaining powers of the workers this act is enacted, it requires the employers to formally define the working conditions to the employee. As per this act, an employer is required to submit five copies of standing orders required by him for adoption of his industrial establishment. An employer failing to submit the draft standing orders as required by this act shall be liable to pay fine as per section 13 of this act.

The Industrial Relations Code, 2020

The Industrial Relations Code, 2020 received the assent of the President of India on September 28, 2020 and it proposes to subsume three existing legislations, namely, the Industrial Disputes Act, 1947, the Trade Unions Act, 1926 and the Industrial Employment (Standing Orders) Act, 1946. The provisions of this Code will be brought into force on a date to be notified by the GoI.

B. Laws Relating to Employment

The various labour and employment related legislation that may apply to our operations, from the perspective of protecting the workers’ rights and specifying registration, reporting and other compliances, and the requirements that may apply to us as an employer, would include, among others, the following: (i) Contract Labour (Regulation and Abolition) Act, 1970; (ii) Relevant state specific

shops and commercial establishment legislations; (iii) Employees' Provident Funds and Miscellaneous Provisions Act, 1952; (iv) Employees' State Insurance Act, 1948; (v) Minimum Wages Act, 1948; (vi) Payment of Bonus Act, 1965; (vii) Payment of Gratuity Act, 1972; (viii) Payment of Wages Act, 1936; (ix) Maternity Benefit Act, 1961; (x) Apprenticeship Act, 1961; (xi) Equal Remuneration Act, 1976; (xii) Employees' Compensation Act, 1923; and (xiii) Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 In order to rationalize and reform labour laws in India, the Government has enacted the following codes, which will be brought into force on a date to be notified by the Central Government.

Code on Wages, 2019

The Code on Wages regulates and amalgamates wage and bonus payments and subsumes four existing laws namely –the Payment of Wages Act, 1936, the Minimum Wages Act, 1948, the Payment of Bonus Act, 1965 and the Equal Remuneration Act, 1976. It regulates, inter alia, the minimum wages payable to employees, the manner of payment and calculation of wages and the payment of bonus to employee. The Central Government has notified certain provisions of the Code on Wages, mainly in relation to the constitution of the central advisory board.

Code on Social Security, 2020

The Code on Social Security amends and consolidates laws relating to social security, and subsumes various social security related legislations, *inter alia* including the Employee's State Insurance Act, 1948, the Employees' Provident Funds and Miscellaneous Provisions Act, 1952, the Maternity Benefit Act, 1961, Building and Other Construction Worker's Welfare Cess Act, 1996 and the Payment of Gratuity Act, 1972. It governs the constitution and functioning of social security organisations such as the Employee's Provident Fund Organisation and the Employee's State Insurance Corporation, regulates the payment of gratuity, the provision of maternity benefits and compensation in the event of accidents that employees may suffer, among others.

The Occupational Safety, Health and Working Conditions Code, 2020

The Occupational Safety, Health and Working Conditions Code consolidates and amends the laws regulating the occupational safety and health and working conditions of the persons employed in an establishment. It replaces 13 old central labour laws including the Factories Act, 1948, Contract Labour (Regulation and Abolition) Act, 1970, the Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996 and the Inter-State Migrant Workmen (Regulation of Employment and Conditions of Service) Act, 1979.

C. Environmental Laws

The Environment (Protection) Act, 1986 (the "EPA")

The EPA has been enacted with the objective of protecting and improving the environment and for matters connected therewith. As per the EPA, the Central Government has been given the power to take all such measures for the purpose of protecting and improving the quality of the environment and to prevent environmental pollution. Further, the Central Government has been given the power to give directions in writing to any person or officer or any authority for any of the purposes of the EPA, including the power to direct the closure, prohibition or regulation of any industry, operation or process.

The Environmental Impact Assessment Notification, 2006 (the "Notification")

As per the Notification, any construction of new projects or activities or the expansion or modernization of existing projects or activities as listed in the Schedule attached to the notification entailing capacity addition with change in process and or technology can be undertaken only after the prior environmental clearance from the Central government or as the case may be, by the State Level Environment Impact Assessment Authority, duly constituted by the Central government under the provisions of the Environment (Protection) Act, 1986, in accordance with the procedure specified in the notification. The environmental clearance process for new projects comprises of four stages viz. screening, scoping, public

consultation and appraisal. However, in 2016, MoEF issued a notification for integrating standard and objectively monitorable environmental conditions with building permissions for buildings of different sizes with rigorous monitoring mechanism for implementation of environmental concerns and obligations in building projects. This is in line with the objective of the Central government to streamline the permissions for buildings and construction sector so that affordable housing can be provided to weaker sections in urban area under the scheme 'Housing for All by 2022' and is proposing to remove the requirement of seeking a separate environment clearance from the MoEF for individual buildings having a total build up area between 5,000 square metre and 150,000 square metre, apart from adhering to the relevant bye-laws of the concerned State authorities.

- (d) In respect of Forward Exchange contracts entered into to hedge foreign currency risks, the difference between the forward rate and exchange rate at the inception of the contract is recognized as income or expense over the life of the contract. Further, the exchange differences arising on such contracts are recognized as income or expense along with the exchange differences on the underlying assets / liabilities. Further, in case of other contracts with committed exchange rates, the underlying is accounted at the rate so committed. Profit or loss on cancellations / renewals of forward contracts is recognized during the year. In case of option contracts, the losses are accounted on mark to market basis.

2.13 Earning Per Share

Basic earnings per share is calculated by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

As per Accounting Standard -20 on Earning Per Share, If the number of equity or potential equity shares outstanding increases as a result of a bonus issue or share split or decreases as a result of a reverse share split (consolidation of shares), the calculation of basic and diluted earnings per share should be adjusted for all the periods presented. If these changes occur after the balance sheet date but before the date on which the financial statements are approved by the board of directors, the per share calculations for those financial statements and any prior period financial statements presented should be based on the new number of shares. Accordingly the EPS has been calculated on number of shares after bonus issue made on 29 December 2023 for all reporting period.

2.14 Borrowing Cost

Interest and other borrowing costs attributable to qualifying assets are capitalized. A qualifying asset is an asset that necessarily requires a substantial period of time (generally over 12 months) to get ready for its intended use or sale. Other interest and borrowing costs are charged to statement of Profit & Loss.

2.15 Employee Benefits

(a) Short Term Employee Benefits:

All employee benefits payable wholly within 12 months of rendering service are classified as short term employee benefit. Benefits such as Salaries, Wages, performance incentives, expected cost of bonus, exgratia are recognised during the period in which employee renders related service.

(b) Post-employment Benefits:

Defined contribution plans: Company's contribution paid / payable during the year to employees state insurance scheme, Provident Fund and Labour welfare fund are recognised during the period.

Defined benefit plans: For defined benefit schemes in the form of gratuity fund, provident fund and post retirement medical benefits, the cost of providing benefits is determined using the Project Unit Credit Method, with actuarial valuations being carried out at each balance sheet date, which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discounting rate used for determining the present value of the obligation under defined benefit plans, is based on the market yields on government securities as at the balance sheet date, having maturity periods approximately to the terms of related obligations.

Actuarial gains/losses are recognised in full in the statement of profit and loss, for the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested, and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligations recognised in the balance sheet represents that present value of the defined benefit obligation as adjusted for unrecognised past service cost and as reduced by the fair value of the scheme of assets.

- (c) **Termination benefits** : Termination benefits are recognised as an expense in the period in which they are incurred.

2.16 Leases

A lease is classified at the inception date as finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease. The Company as a lessee:

(i) **Operating lease:** Rentals payable under operating leases are charged to the statement of profit and loss on a straight line basis over the term of the relevant lease.

(ii) **Finance leases:** Finance leases are capitalised at the commencement of lease, at the lower of the fair value of the property or the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged directly against income over the period of the lease.

2.17 Provisions, Contingent Liabilities, Contingent Assets and commitments

(a) Provisions:

Provisions are recognised when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

(c) Contingent Assets:

Contingent Assets are neither recognised nor disclosed in the financial statements

(d) Commitments:

Commitments include the amount of purchase order (net of advances) issued to parties for completion of assets

2.18 Accounting for Taxes on Income

(a) Current tax

Current tax is measured at the amount expected to be paid to the tax authorities in accordance with the provisions of the Income-tax Act, 1961 and Delaware and US Federal for foreign subsidiaries.

(b) Deferred Tax

Deferred tax assets and liabilities are recognised by computing the tax effect on timing differences which arise during the year and reverse in the subsequent periods. Deferred tax assets against unabsorbed depreciation and carried forward loss under tax laws, are recognised only to the extent that there is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets on other timing differences are recognised only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised.

(c) Current and Deferred tax is measured based on the provisions of tax laws and tax rates enacted or substantively enacted as at the Balance Sheet date.

2.19 Segment reporting

Each of the reportable segments derives its revenues from the main products and hence these have been identified as reportable segments by the management of the group. Segment revenue, result, assets and liabilities include the respective amounts identifiable to each of the segments and amount allocated on a reasonable basis. Unallocated expenditure consists of common expenditure incurred for all the segments and expenses incurred at corporate level. The assets and liabilities that cannot be allocated between the segments are shown as unallocated corporate assets and unallocated corporate liabilities respectively.

2.20 Government Grants

The Company has received government grants related to revenue expenses, which are deducted from related revenue expenses for the year.

2.21 Cash and Cash Equivalents

Cash comprises cash on hand and demand deposits with banks

Cash equivalents are short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value

Defined benefit plans: For defined benefit schemes in the form of gratuity fund, provident fund and post-retirement medical benefits, the cost of providing benefits is determined using the Project Unit Credit Method, with actuarial valuations being carried out at each balance sheet date, which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discounting rate used for determining the present value of the obligation under defined benefit plans, is based on the market yields on government securities as at the balance sheet date, having maturity periods approximately to the terms of related obligations.

Total Income

Our total income has increased by 56.07% to ₹ 27,477.82 Lakhs in Financial Year ended March 31, 2024 from ₹ 17,606.52 Lakhs in Financial Year ended March 31, 2023 primarily due to overall increase in the revenue from operations and other income.

Revenue from Operations

Revenue from operations comprises of-

- Sale of Products
The increase in the sale of products by 58.74% from ₹17,015.69 lakhs in financial year 2023 to ₹27,009.90 lakhs in Financial Year 2024 is due to below mentioned reasons:
 - The Company's sale of engineered quartz increased from ₹14,349.08 Lakhs in financial year 2023 to ₹17,236.40 lakhs in Financial Year 2024. This is because the Company suffered a setback in Financial Year 2023 pursuant to publication of preliminary administrative review on Anti-dumping duty by US Department of Commerce on certain Quartz surfaces imported from India. Hence the Company's export sales of engineered quartz from India to U.S.A had decreased substantially Financial year 2023. Post the favourable result of administrative review by the US Department of Commerce, the company's business of export sale of engineered quartz started recovering in

Financial Year 2024.

- Company's sale of engineered marble increased from ₹103.39 in Financial Year 2023 to ₹1,622.99 in Financial Year 2024. This is because sale of engineered marble was partially operational in Financial Year 2023 which became fully operational in Financial Year 2024.
 - Company's sale of polyester resins increased from ₹2,563.22 in Financial Year 2023 to ₹8,150.51 in Financial Year 2024. During the financial year 2023 the Company's capacity utilization was 33.21% of the total capacity which further increased to 61.55% of total capacity in the Financial year 2024. This ultimately contributed to increase in sales in Financial year 2024.
- Other Operating revenue
 - Other Operating revenue decreased by 34.39% to ₹279.12 Lakhs in Financial Year ended March 31, 2024 from ₹425.40 Lakhs in Financial Year ended March 31, 2023. This is because Company benefitted from first time accrual of income amounting to ₹287.72 Lakhs from RoDTEP in Financial Year ended March 31, 2023.

Other Income

Our other income increased by 14.13% to ₹188.80 Lakhs in Financial Year ended March 31, 2024 as compared to ₹165.43 lakhs in Financial Year ended March 31, 2023, which is primarily because of increase in other income by ₹24.31 lakhs, and balances which have been written back amounting to ₹13.15 lakhs. However the increase in other income was partially offset by decrease in interest earned on fixed deposit by ₹24.30 lakhs.

Total Expenses

Our total expenses have increased by 52.67% to ₹26,068.14 lakhs in Financial Year ended March 31, 2024 from ₹17,075.28 lakhs in Financial Year ended March 31, 2023. This increase was principally due to ₹5,372.44 lakhs increase in cost of material consumed, ₹610.31 lakhs increase in purchases of Stock-In-Trade, ₹788.02 lakhs increase in changes in inventories of finished goods, work in progress and stock in trade, ₹231.30 lakhs increase in employee benefit expenses, ₹362.87 lakhs increase in finance costs, ₹180.18 increase in depreciation and amortization expenses and ₹1,447.74 lakhs increase in other expenses.

Cost of Goods Sold

Cost of Goods Sold represents sum of cost of material consumed, purchases of stock in trade, changes in inventories of finished goods, work in progress, and stock in trade. Cost of Goods Sold has increased by 68.78% from Financial Year ended March 31, 2023 to Financial Year ended March 31, 2024, also as a percentage of revenue, cost of goods sold has increased from 56.44% in Financial year ended March 31, 2023 to 60.88% in Financial year ended March 31, 2024. This is because although the company earned a reasonable margin on sale of engineered quartz and engineered marble, the margins on sale of unsaturated polyester resin were lower. Moreover, due to increased proportion of polyester resins in total sales in the Financial Year 2024 the cost of goods sold has been increased.

Cost of material consumed

Cost of material consumed increased by 50.52% from ₹10,634.87 lakhs in Financial Year ended March 31, 2023 to ₹16,007.31 lakhs in Financial Year ended March 31, 2024 as purchases of raw material increased in line with increase in total sales for the Financial Year 2024.

Purchase of stock in trade

The purchase cost has increased by 84.55% to ₹1,332.16 lakhs in Financial Year ended March 31, 2024 from ₹721.85 lakhs in Financial Year ended March 31, 2023. This is because the Company purchases customized products for its customers on cost plus basis as per requirement.

Changes in Inventories

The change in inventories of Finished Goods, Work-In-Progress and Stock-In-Trade was at ₹(725.19) lakhs as at the end of March 31, 2024 as compared to ₹(1,513.21) lakhs as at the end of March 31, 2023, a increase of 52.08%

was primarily because of accumulation of inventory at the close of Financial Year ended March 31, 2024.

Employee Benefits Expenses

The increase in Employee Benefits Expenses is primarily attributable to the increase in salaries and wages of factory staff due to the full operationalization of manufacturing facilities and year-on-year increment of salaries.

Finance Cost

Finance cost has increased by 57.21% to ₹ 997.11 lakhs in Financial Year ended March 31, 2024 from ₹ 634.24 lakhs in Financial Year ended March 31, 2023. This increase was primarily attributable to increase in finance cost of overdraft facility availed amounting to ₹4,130.83 as on March 31st, 2024.

Depreciation and Amortization Expenses

Depreciation and amortisation expense increased by 24.58 % to 913.29 lakhs in Financial Year ended March 31, 2024 from ₹ 733.11 lakhs in Financial Year ended March 31, 2023. This increase was primarily attributable to depreciation charged for the complete year on the addition of assets of two new manufacturing facilities of engineered marble and polyester resins which were installed in Financial Year 2023 and addition of new assets amounting to ₹ 299.27 in the Financial Year 2024.

Other Expenses

Other expenses increased by 33.83% to ₹ 5,726.77 lakhs in Financial Year ended March 31, 2024 from ₹ 4,279.03 lakhs in Financial Year ended March 31, 2023. This was primarily due to increase in primary packing by ₹179.18 lakhs, Job work charges by ₹226.03 Lakhs, secondary packing material consumed by ₹ 83.90 lakhs, transportation, ocean freight and clearing expenses by ₹396.13 lakhs , Exhibition and marketing expenses by ₹ 186.01 Lakhs, travelling and accommodation expenses by ₹ 87.66 lakhs and recording of provision for doubtful receivables and debts aggregating to ₹137.88 lakhs.

Total Income

Our total income has decreased by 7.35% to ₹ 17,606.52 Lakhs in Financial Year ended March 31, 2023 from ₹ 19,002.60 Lakhs in Financial Year ended March 31, 2022 primarily due to overall decrease in the revenue from operations and other income.

Revenue from Operations

Revenue from operations comprises of

- Sale of products includes sale of Engineered Quartz, Engineered Marble and Unsaturated Polyester resin in Financial Year ended March 31, 2023 as compared to only sale of Engineered Quartz in Financial year ended March 31, 2022. The decrease in the sale of product by 8.05% from ₹18,504.61 Lakhs in financial year 2022 to ₹17,015.69 lakhs in Financial Year 2023 is due to below mentioned reasons:
 - The Company's sale of engineered quartz decreased from ₹18,504.61 Lakhs in financial year 2022 to ₹12,234.15 lakhs in Financial Year 2023. This is because the Company suffered a setback in terms of export sales of engineered quartz from India to USA in Financial Year 2023 pursuant to publication of preliminary administrative review on Anti-dumping duty by US Department of Commerce on certain Quartz surfaces imported from India. The preliminary administrative review suggested an imposition of average anti-dumping margin of 161.56% on such imports with effect from July 8, 2022 onwards. However the final results dated January 9, 2023 released by US Department of Commerce imposed an anti-dumping margin of only 3.19%. Due to preliminary administrative review, the company's export sales declined substantially in the intervening period.
 - The Company's selling price was also impacted by increase in competition in the industry.

However the decrease in revenue was partially offset by the following:

 - The company started a new manufacturing line of engineered marble in Financial Year 2023 but the same being under commissioning stage was operational for part of the year and the same generated revenue of ₹2,218.32 Lakhs in Financial Year 2023.
 - The company started generating revenue from the sale of unsaturated polyester resin for the first time in Financial Year 2023 by an amount of ₹2,563.22 Lakhs which was only 33.21% of the total capacity.
- Other Operating revenue
 - Other Operating revenue increased by 201.62% to ₹425.40 Lakhs in Financial Year ended March 31, 2023 from ₹141.04 Lakhs in Financial Year ended March 31, 2022. This is because Company

benefitted from accrual of income amounting to ₹287.72 Lakhs from RoDTEP for the first time in Financial Year ended March 31, 2023.

Other Income

Our other income decreased by 53.65% to ₹165.43 Lakhs in Financial Year ended March 31, 2023 as compared to ₹ 356.95 lakhs in Financial Year ended March 31, 2022, which is primarily because of decrease in foreign exchange gain by ₹142.52 lakhs, decrease in interest earned on fixed deposits by ₹29.42 lakhs and decrease in interest earned on loans and advances by ₹23.88 lakhs.

The decrease in foreign exchange gain is because the Company had availed pre shipment credit in foreign currency at a lower rate in Financial Year ended March 31, 2022. Since there was an uptrend in Dollar value in Financial Year ended March 31, 2023, revenue was booked at a higher rate but the Company had to repay the credit at a lower rate. This led to accrual of lower foreign exchange gain in Financial Year 2023. Also the company's realizations from receivables were lower in Financial Year 2023.

Total Expenses

Our total expenses have increased by 2.65% to ₹ 17,075.28 lakhs in Financial Year ended March 31, 2023 from ₹16,635.26 lakhs in Financial Year ended March 31, 2022. This increase was principally due to ₹ 273.88 lakhs decrease in cost of material consumed, ₹ 358.24 lakhs increase in purchases of Stock-In-Trade, ₹ 223.49 lakhs decrease in changes in inventories of finished goods, work in progress and stock in trade, ₹ 231.62 lakhs increase in employee benefit expenses, ₹ 308.81 lakhs increase in finance costs, ₹ 108.02 increase in depreciation and amortization expenses and ₹ 69.30 lakhs decrease in other expenses.

Cost of Goods Sold

Cost of Goods Sold has decreased by 1.39% from Financial Year ended March 31, 2022 to Financial Year ended March 31, 2023, however as a percentage of revenue cost of goods sold has increased from 53.54% in Financial year ended March 31, 2022 to 56.44% in Financial year ended March 31, 2023. This is because although the company earned a reasonable margin on sale of engineered quartz, the margins on sale of unsaturated polyester resin were lower. This is further explained below:

Cost of material consumed

Cost of material consumed decreased by 2.51% from ₹10,908.75 lakhs in Financial Year ended March 31, 2022 to ₹ 10,634.87 lakhs in Financial Year ended March 31, 2023 as purchases of raw material were lower on account of decrease in export sales.

This increase was primarily attributable to addition of employees benefit expenses of two new manufacturing facilities of engineered marble (Haique Stones

	<p>passed The Rajasthan Micro, Small & Medium Enterprise (Facilitation of establishment and Operation) Act, 2019 which provides exemptions to small and medium enterprises established post 2019 from obtaining approval and licenses for a period of five years from the date of obtaining valid acknowledgment certificate under section 6 of The Rajasthan Micro, Small & Medium Enterprise (Facilitation of establishment and Operation) Act, 2019 (“Rajasthan MSME Act”). Addwaya Chemicals has obtained the said acknowledgment certificate and therefore in light of the Rajasthan MSME Act, Adwaya Chemical is exempted from obtaining approvals and licenses required under various state and central legislation including approval from Rajasthan state pollution control board for period of five years till August 8, 2028*.</p> <p>However, Addwaya Chemicals in order to be compliant with all laws, irrespective of the available exemption, had initially made an application dated June 7, 2022 to obtain the consent to operate for Manufacturing Facility III. However, the Rajasthan State Pollution Control Board (“RPCB”) issued a Show Cause Notice as to why the application dated June 7, 2022 should not be refused on grounds of not obtaining environmental clearance required under the Ministry of Environment, Forest and Climate Change of India (“MOEFCCI”) notification dated September 14, 2006 applicable on production of unsaturated polyester resin. Accordingly, Addwaya has made an application February 2, 2023 bearing number SW/120978/2023 to the MOEFCCI for which public hearing was conducted on December 27, 2023 by Rajasthan Pollution Control Board. Once Addwaya Chemicals receives the environmental clearance, it will again approach the RPCB to obtain the consent to operate for our Manufacturing Facility III.</p>

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated

Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and was replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continued to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

All SCSBs offering facility of making application in public issues are required to also provide facility to make application using the UPI Mechanism. The Issuers has appointed one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than 1 (one) Working Day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-Issue BRLMs are required to compensate the concerned investor.

Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs are undertaken pursuant to an application made by the SCSBs to the BRLMs, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹5 lakh, shall use the UPI Mechanism. Individual investors Bidding under the Non-Institutional Portion Bidding for more than ₹2 lakh and up to ₹5 lakh, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“**DPIIT**”) makes policy announcements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEMA. The DPIIT also issues the Consolidated Foreign Direct Investment Policy (“**FDI Policy**”) from time to time. The regulatory framework pertaining to foreign investment, over a period of time, thus, consists of acts, regulations, master circulars, press notes, press releases, and clarifications among other amendments.

India’s current FDI Policy issued by the DPIIT with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT till October 15, 2020. All the press notes, press releases, clarifications on FDI issued by DPIIT till October 15, 2020 stand rescinded as on October 15, 2020. In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

In accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the FDI Policy and the Foreign Exchange Management (Non-debt Instruments) Rules, 2019. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Further, in accordance with the amendment to the Companies (Share Capital and Debentures) Rules, 2014 vide notification dated May 4, 2022 issued by Ministry of Corporate Affairs, a declaration shall be inserted in the share transfer form stipulating whether government approval shall be required to be obtained under Foreign Exchange Management (Non-debt Instruments) Rules, 2019 prior to transfer of shares. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

Further, the existing individual and aggregate investment limits for an FPI in our Company are not exceeding 10% of the total paid-up Equity Share capital of our Company for each FPI and the total holdings of all FPIs in the Company shall not exceed 24% of the total paid-up Equity Share capital of our Company. The RBI, in exercise of its power under the FEMA, has also notified Foreign Exchange Management (Non-debt Instruments) Rules, 2019 and Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. SEBI registered FPIs have been permitted to purchase shares of an Indian company through the Issue, subject to total FPI investment being within the individual FPI/sub account investment limit of less than 10% of the total paid-up equity capital on a fully diluted basis of the Company subject to the total holdings of all FPIs/sub accounts including any other direct and indirect foreign investments in the Company shall not exceed 24% of the paid-up equity capital of the Company on a fully diluted basis. The aggregate limit of 24% in case of FPIs may be increased up to the sectoral cap/statutory ceiling, as applicable, by the Company concerned by passing of resolution by the Board of the Company to that effect and by passing of a special resolution to that effect by its Shareholders. With effect from April 1, 2020, the aggregate limit of 24% has increased to the sectoral cap applicable to the Indian Company which in case of the Company is 100%. As per the Regulations, the aggregate limit as provided above was permitted to be decreased by the Company to a lower threshold limit of 24% or 49% or 74% as deemed fit, with the approval of its Board of Directors through a resolution and also of its shareholders by means of a special resolution, before March 31, 2020. The Company has passed no such Board Resolution and hence, has not revised its sectoral caps.

As per the FDI Policy, FDI in the industry in which we operate is permitted up to 100% of the paid up share capital of such company under the automatic route.

Further, eligible NRIs and OCIs investing on repatriation basis are subject to individual investment limit of 5% of the total paid-up equity capital on a fully diluted basis subject to the aggregate paid-value of the shares purchased by all NRIs and OCIs put together on repatriation basis not exceeding 10% of the total paid-up equity capital on a fully diluted basis of the Company. The aggregate limit of 10% in case of NRIs and OCIs together may be raised to 24 % if a special resolution to that effect is passed by the shareholders of the Company.

The transfer of shares between an Indian resident and a Non-resident does not require prior approval of RBI, subject to fulfillment of certain conditions as specified by DPIIT / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. Investors are advised to refer to the exact text of the relevant statutory provisions of law before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.
