To obtain a more complete understanding, you should read this section together with Sections titled, **Our Business**, and **Management's Discussion and Analysis of Financial Condition and Results of Operations** beginning on page no. 88 and 169 respectively, as well as the other financial and statistical information contained in this Prospectus.*

Any of the following risks, as well as the other risks and uncertainties discussed in this Prospectus, could have an adverse effect on our business, financial condition, results of operations and prospects and could cause the trading price of our Equity Shares to decline, which could result in the loss of all or a part of your investment. The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements because of certain factors, including the considerations described below and elsewhere in this Prospectus.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the effect is not quantifiable and hence has not been disclosed in such risk factors. You should not invest in this Issuing unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the consequences to you of an investment in the Equity Shares.

The financial information in this section is, unless otherwise stated, derived from our Restated Financial Statements prepared in accordance with Indian AS, as per the requirements of the Companies Act, 2013, and SEBI (ICDR) Regulations.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. *Some risks may not be material individually but may be material when considered collectively.*
2. *Some risks may have material impact qualitatively instead of quantitatively.*
3. *Some risks may not be material at present but may have a material impact in the future.*

INTERNAL RISK FACTOR**1. The increasing pollution control norms and imposition of ban on Plastic material for packing products.**

There is an increased awareness towards controlling pollution and many economies including India have joined in the efforts to ban plastic product. In this regard Government of India has list out single use plastics items, imposing ban on their usage effective 1st July 2022. Plastic in any form takes many years to decompose and is very dangerous for other living beings. Therefore, in case any plastic packaging products manufactured by the company are banned in India or in any of the markets where the company export its products, it could have a material and adverse effect on the business and results of operations.

Furthermore, many countries around the world are finding alternatives to the use of plastic products, if such a situation arise and If the Government of India legislates against the use of plastic products or if regulations for the manufacture and use of plastic packaging products are made more stringent, it could have a material and adverse effect on the business of the company and results of operations.

The product which we produce i.e., PP Leno Bags is not a single use plastic and is used multiple times for storage of fruits and vegetables and is not a banned item. The said product is widely used in Cold Storages and warehouses for storage of various products.

Presently, the company has obtained Consent to Operate from West Bengal Pollution Control Board which is valid till 30th September 2024.

2. Substantial portion of Company's revenues has been dependent upon few customers. The loss of any one or more of its major customers would have a material adverse effect on its business, cash flows, results of operations and financial condition.

During Fiscal 2020, Fiscal 2021 and Fiscal 2022, our top 10 (ten) customers contributed ₹ 2722.61 lakh, ₹ 2532.59 lakh and ₹ 3680.68 lakh comprising of 86.44%, 85.87% and 79.21%, respectively, of our total revenue from operations. Since we are significantly dependent on certain key customers for a significant portion of our sales, the loss of any one of our key customers for any reason could have an adverse effect on our business, results of operations and financial condition. While we strive to maintain good relations with our key customers, there is no assurance that our key customers will continue to place similar orders with us in the future. In addition to these external factors, these key customers may also set off any payment obligations, require indemnification for themselves or their affiliates, replace us with our competitors, or replace their existing products with alternative products which we do not supply. Therefore, there can be no assurance that we will not lose all or a portion of sales to these key customers, or that we will be able to offset any reduction of prices to these customers with reductions in our costs or by obtaining new customers. We may continue to remain dependent upon our key customers for a substantial portion of our revenues. Further, the deterioration of the financial condition or business prospects of these customers could reduce their requirement of our products and result in a significant decrease in the revenues we derive from these customers. In the event of our failure to retain one or more of our key customers, it will have an adverse effect on our financial performance and result of operations.

3. The Company has not entered into any long-term contracts with any of its customers and the company typically operate on the basis of Contracts/ orders. Inability to maintain regular order flow would adversely impact company's revenues and profitability.

The Company has long standing business relationships with various customers, traders and retailers [Collectively called as "Clients"] and has been serving its clients since many years. Our Company has not entered into any specific contracts with these clients and cater to them on an order-by-order basis. However, such orders may be amended or cancelled prior to finalisation, and should such an amendment or cancellation take place, we may be unable to seek compensation for any surplus unpurchased products that we manufacture. Consequently, there is no commitment on the part of the customer to continue to source their requirements from us, and as a result, our sales from period to period may fluctuate significantly as a result of changes in our clients' preferences.

Additionally, our customers have high and exacting standards for product quantity and quality as well as delivery schedules. Any failure to meet our customers' expectations could result in cancellation of orders. There are also a number of factors other than our performance that are beyond our control and that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house, or replace their existing products with alternative products, any of which may have an adverse effect on our business, results of operations and financial condition.

4. Company's business is dependent on certain suppliers and loss of any one or more of them would have a material adverse effect on business.

During Fiscal 2020, Fiscal 2021 and Fiscal 2022, our top 10 (ten) suppliers contributed ₹ 2191.54 lakh, ₹ 2252.53 lakh and ₹ 3302.22 lakh comprising of 96.39%, 98.15% and 97.88% respectively, of our total purchases of Polypropylene Granules or LLDPE Pellets of different grades and other raw materials etc. In the future, there may be industry-wide fluctuations in the supply of raw materials due to the growing demand for Leno Bags. We may, from time to time, experience late delivery from suppliers and may have to purchase raw materials at a higher price, which in turn may result in reduction of revenues. Further the company might face stiff competition from larger and well-established players for procuring these raw materials therefore company has entered in arrangement with major companies for supply of raw material, in order to secure uninterrupted supply of raw materials. However, if the Company is unable to procure the requisite quantities of raw materials well in time and at competitive prices, the production of the company might be affected, thus adversely affecting the business, prospects, results of operations and financial condition. There can be no assurance that the current procurement efforts will be successful in ensuring an adequate supply of raw materials at viable prices to meet our requirements. If we are unable to meet customer demand for our products or if our products are only available at a higher price because of a shortage of raw materials, we could lose customers, market share and revenue. Further, many of our competitors, that also purchase raw materials from our suppliers, may have stronger relationships as well as greater bargaining power with the suppliers. This may materially and adversely affect our business, financial condition, results of operations and cash flow.

- 5. The company has provided a corporate guarantee for loan taken one of its Group companies namely M/s. White Saffron Grains LLP. Any default in payment of the credit facility by the group company shall have an adverse-effect on business, financial condition, results of operations, cash flows and prospects of the company.**

The company has provided its corporate guarantee for one of its group companies to the tune of Rs.10,00,00,000 [Rupees Ten Crore Only]. Further, the commercial building of the company is situated at Plot No PPD-3 Howrah Poly Park, Mouza -Sandhipur, JI No-4, Rs- Dag No-801, 802,806,807 & 809 Kh No 629, 655, 494 Ps Sankrail Po Joynagar Under Kandua Grampanchayet 711302 near Dulagore Toll Tax, has been presented as collateral security for the loan availed by the group company. In case of a default under the loan agreements, the business prospects of the company might be adversely-effected. The company may face certain impediments in taking decisions in relation to Company, which in turn would result in a material adverse effect on its financial condition, business, results of operations and prospects and would negatively impact its reputation.

- 6. The Company is highly dependent on markets in the state of West Bengal and are exposed to risks related to the concentration of its operations in West Bengal. Any disruption to its operations in the state could materially and adversely affect its business, financial condition, results of operations and prospects.**

The company derives a significant proportion of its revenue from the state of West Bengal. The total contribution from West Bengal was ₹ 4143.79 lakhs, ₹ 2877.19 lakhs and ₹ 3055.51 lakhs comprising of 89.17%, 97.56% and 97.01% respectively, to its revenue from operations in Fiscal 2022, Fiscal 2021 and Fiscal 2020. Such geographical concentration of company's business in this region heightens its exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect business prospects, financial conditions and results of operations of the company.

Further, the company cannot assure its investors that it will be able to reduce its dependence on operations in state of West Bengal, or that such dependence will not increase in the future. Moreover, inability to expand into other areas may adversely affect business prospects, financial conditions and results of operations of the company.

However, as on March 2022, our Company has already made a presence in four other states and aims to strengthen its presence and expand operations in such regions.

- 7. The company is highly dependent on the sale of LENO BAGS and its business is exposed to risks related to product concentration, which could materially and adversely affect the business, financial condition, results of operations, and prospects of the company.**

Our revenue majorly derives from sales of Polypropylene Leno Bags. For the financial year 2022, 2021 and 2020, our revenue from sales of Leno Bag was ₹ 4099.66 lakh, ₹ 2759.39 lakh and ₹ 3029.35 lakh comprising of 88.22%, 93.56% and 96.18% respectively of our revenue from operations. As a result, the business of the company is exposed to risks related to product concentration. Company's inability to produce sufficient quantities of the existing products offered to its customers in a timely manner or at all, or the company's failure to develop new products that meet the evolving demands of end consumers or to obtain the regulatory approvals for such products, the development of successful products by its competitors and general economic conditions. In addition, the business, financial condition, results of operations and prospects could be materially and adversely affected if one or more of these uncertainties or disruptions occur.

- 8. The company could suffer adverse publicity and incur substantial costs as a result of defects in its products, which in turn could adversely affect the brand value, and its sales could be diminished if the company is associated with negative publicity.**

Any failure or defect in packaging products could result in a claim for damages, regardless of the responsibility for such a failure or defect. Although the company attempt to maintain quality standards, it cannot assure that all items would be of uniform quality, which in turn could adversely affect the value of brand, and sales could be diminished if the company is associated with negative publicity.

Any negative publicity regarding Company, brand, or its products, including those arising from a drop in quality, or any other unforeseen events could affect company's reputation and its results from operations.

- 9. The company in the past entered into related party transactions and may continue to do so in the future.**

The Company has entered into certain transactions with its Promoters, Promoter Group and Directors and other Related Parties. While it is to be believed that all such transactions are conducted at arm's length basis, there can be no assurance

that the company could not have achieved more favourable terms had such transactions not being entered into with related parties.

13. Our Manufacturing process may become outdated

Our Manufacturing process to manufacture Leno Bags and other products may become outdated with newer technology coming in the future which may have higher efficiency and features and may become more cost effective. Our existing manufacturing process may have to upgrade to the newer processes to adapt to the latest trend and demands of the market and be cost effective and we cannot assure that we will always be able to meet up to the expectation and in case we don't keep up with the technological advancement, then we may lose our contracts and this may lead to decrease in turnover and resulting decrease in profitability.

14. Our clients operate in various industry segments/verticals and fluctuations in the performance of the industries in which our clients operate may result in loss of clients, a decrease in the volume of work we undertake or the price at which we offer our products.

Our business operations are exposed to fluctuations in the performance of the industries in which our significant clients operate. Our clients may also decide to reduce spending on services due to a changing economic environment and other factors relating to the industry in which they operate. A loss of any of our significant clientele, a decrease in the volume of work our clients outsource to us or a decline in our prices may materially and adversely affect our business, operations, financial condition, results of operations.

Our products are used mainly by companies who require packaging materials for agriculture, horticulture etc. Our business is affected by change in technology, consumer preferences, market perception of brand, attractiveness, convenience, safety and environmental norms. Our ability to anticipate such changes and to continuously develop and introduce new and enhanced products successfully on a timely basis will be a key factor in our growth and business prospects. There can be no assurance that we will be able to keep pace with the technological advances that may be necessary for us to remain competitive. Further, any substantial change in preference of consumers who are end users of our products will affect our customers' businesses and, in turn, will affect the demand for our products. 18. Non-compliance with amendment in Safety, Health and Environmental laws and other applicable regulations, may adversely affect the Company’s results of operations and its financial condition.

The company is indulged in the business of manufacturing of PP [Polypropylene] Leno Bags and other similar product line. Due to nature of Business, the company is subject to Various Rules and Regulations in relation to safety, health and environmental protection including Air Prevention and Control of Pollution Act, Noise Pollution and Water Prevention and Control of Pollution Act, Contract Labour Act, Employees Provident Fund Act, Bonus Act etc.

Further, the company is subjected to the jurisdiction and is governed by Indian Law, rules and regulations in relation to safety, health and environmental protection due to the nature of the business of the company. These safety, health and environmental protection laws and regulations inter alia impose controls on air and water discharge, noise levels, storage handling, employee exposure to hazardous substances and other aspects of the Company’s operations and products.

Failure to comply with any existing or future regulations applicable to the Company may result in levy of fines, penalties, commencement of judicial proceedings and/or third-party claims, and may adversely affect the results of operations and financial condition.

19. The operations of the company may be adversely affected by strikes, work stoppages or increased wage demands by workforce or any other industrial unrest or dispute.

The company cannot be certain that it will not suffer any disruption of operations due to strikes, work stoppages or increased wage demands in the future. Further, if the work force forms union or associate themselves with any existing unions, or collective bargaining efforts by labour unions may divert the management’s attention and result in increased costs. These actions might cause unrest and delay in business operation of the company. Any shortage of skilled and experienced workers caused by such industrial unrest or disputes may adversely affect the business, results of operations and financial condition. As on the date no such instance of labour dispute has arose in our company.

Further, the labour laws in India are strict and our company may be held liable for wage payments or benefits and amenities made available to “daily wage” workers. Any requirement to discharge such payment obligations, benefits or amenities or to absorb a significant portion of the “daily wage” workers on rolls may adversely affect the business, results of operations and financial condition.

Employee misconduct or errors could expose company to business risks or losses, including regulatory sanctions and serious harm to company’s reputation. There can be no assurance that the company will be able to detect or deter such misconduct. Moreover, the precautions taken to prevent and detect such activity may not be effective in all cases. The employees and agents may also commit errors that could lead to claims and proceedings for alleged negligence, as well as regulatory actions on account of which the business, financial condition, results of operations and goodwill of the company could be adversely affected.

21. Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.

Our business activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production and execution schedule and timely delivery/completion of our products/projects which may adversely affect our business and result of operations. Though we have not faced any labour problem in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock- outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

- 22. The COVID-19 pandemic and resulting deterioration of general economic conditions has impacted our business and results of operations in the past and the extent to which it will impact our future business and results of operations will depend on future developments, which are difficult to predict.**

Since December 2019 when it was first reported, the outbreak of COVID-19 has spread globally. The World Health Organization declared the novel coronavirus disease (“COVID-19”) outbreak a Public Health Emergency of International Concern on January 30, 2020, and a pandemic on March 11, 2020. The rapid and diffused spread of COVID-19 and global health concerns relating to this pandemic have had a severe negative impact on, among other things, financial markets, liquidity, economic conditions and trade and could continue to do so or could worsen for an unknown period of time, that could in turn have a material adverse impact on our business, cash flows, results of operations and financial condition, including liquidity and growth. The extent to which the COVID-19 outbreak impacts our business, cash flows, results of operations and financial condition will depend on future developments, including on the duration and severity of the pandemic, the nature and scope of government actions to contain it, and the potential impact on global and national economic conditions, including inflation, interest rates, availability of capital markets, consumer spending rates, energy availability and costs (including fuel surcharges), which are highly uncertain and cannot be predicted. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and are likely to be severe.

In addition, while the Government of India in coordination with the state governments have started the bulk immunization process or vaccination drive since January 16, 2021, achieving a complete vaccination scale may take significant amount of time. There is also no assurance that the vaccines that are developed will be fully effective and/or may not have side effects. On March 14, 2020, India declared COVID-19 as a ‘notified disaster’ and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious reopening of businesses and offices. Thus, our business was under lock down during the nationwide lock down due to the spread of COVID 19 Pandemic from March 25, 2020 to May 02, 2020. It was also shut down during the month of June 2020 due to widespread COVID – 19 pandemic. Subsequently, our business was operating subject to certain social distancing and additional safety measures, such as, regular temperature checks, regular sanitization, and compulsory use of masks and hand sanitization. In addition, throughout March and April 2021, due to an increase in the number of daily COVID-19 cases, several state governments in India re-imposed lockdowns, curfews and other restrictions to curb the spread of the virus. As a result of the detection of new strains and subsequent waves of COVID-19 infections in several states in India as well as throughout various parts of the world, we may be subject to further reinstatements of lockdown protocols or other restrictions, which may adversely affect our business operations. We continue to closely monitor the impact that COVID-19 may have on our business and results of operations.

Our Company has witnessed a lower quantum of sales compared to similar periods in previous years. Our turnover has been drastically impacted due to global restriction and lockdowns including India due to Covid-19 pandemic. Our Turnover for the financial year 2021 has been reduced to ₹ 2949.23 lakhs from ₹ 3149.64 lakhs for the financial year 2020. However, we have increased our better revenue to ₹ 4646.83 lakhs in financial year 2022 as the restriction and lockdowns are being relaxed gradually. *(for further details, please refer “Management Discussion and Analysis of Financial Conditions and Results of Operations” beginning on page no. 169 of prospectus.*

- 23. The industry segments in which the company operate is fragmented, and has multiple level of competition from small and medium scale manufacturers. Thus, the competition faced from other business entities, may affect the business operations and financial conditions of the company.**

The market for the product of the company is competitive on account of both the organized and unorganized business entities. Manufacturers in this industry generally compete with each other on key attributes such as technical competence, quality of products, distribution network, pricing and timely delivery. Some of the competitors of the company might have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive.

Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by the company and consequently affect the volume of sales and growth prospects. Growing competition may result in a decline in the market share and may further affect margins which may adversely affect the business operations and financial condition.

- 24. Our Leno Bag industry is vulnerable to seasonal and weather fluctuations. This could result in fluctuations in demand which will adversely affect our sales and profitability.**

Leno Bag supply is dependent on harvesting of fruits and vegetables. Our Leno Bags are used by farmers majorly for packaging of Potatoes. Usually, potatoes are harvested during December to March. They are stored at Cold Storages

during March in West Bengal. Sales of Leno Bags during April to July is less as compared to other seasons/months during the year which consequently affect our revenue from operations and profitability. Our business operations and profitability may be adversely affected, in the event of natural calamities such as drought, insufficient rainfall or floods.

25. The Company's inability to successfully diversify the product offerings may adversely affect its growth and negatively impact the profitability.

We may attempt to diversify and expand our business operations by diversifying new products. For instance, we intend to undertake production of other types of bags i.e. PP/HDPE Woven Bags, BOPP Laminated Bags, HDPE/PP woven fabrics/sacks etc. We have limited experience and knowledge of carrying out such operations, and our foray into the same may be subject to high barriers to entry, including existing competition and market dynamics. Due to our limited experience, our entry into new business segments may not be successful, which could hamper our growth and damage our reputation. We will be subject to the risks generally associated with new product introductions and applications, including unproven know-how, unreliable technology, inexperienced staff, delays in product development and possible failure of products to operate properly. We may also encounter other additional anticipated risks and significant competition in such markets. We cannot assure you that we will be able to successfully develop our new product lines, and may not be able to successfully develop or introduce new products on a timely basis or at all, which may adversely affect our growth and impact negatively the profitability. We also cannot assure you that we will succeed in effectively implementing new technology in manufacturing new products or that we will recover our investments. Any failure in the development or implementation of our operations is likely to adversely affect our business, results of operations and cash flows.

26. The company is not able to trace certain experience record of its Promoters, Directors and has relied on the information furnished by them for such details of their profile, to be included in the Prospectus.

The company is unable to trace copies of documents pertaining to professional qualification and experience of some of its directors and promoters. Accordingly, the company has relied on the information furnished by Directors and Promoters, to disclose details of the professional qualification and experience in the Prospectus.

27. Orders placed by customers may be delayed, modified, cancelled or not fully paid for by the customers, which may have an adverse effect on the business, financial condition and results of operations of the company.

The company may encounter problems in executing the orders in relation to the products offered, or executing it on a timely basis. This situation may arise due to certain factors like power supply, bad weather conditions, insufficient supply of raw material etc. Moreover, factors beyond company's control or the control of its customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from customers' discretion or problems encountered during delivery of such products or reasons outside the control or the control of customers, the company might not be in a position to predict with certainty when, if or to what extent it may be able to deliver the orders placed.

Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that the company expect to be paid in respect of such products. Further, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed. As on date no such incidence has occurred with the company as the company caters to the needs of customers and provide them with the desired quality and quantity in time, however with expansion in business both geographically and demographically, company cannot be certain that such situation will not arise in future, thus adversely affecting the business prospects of the company.

28. The Company is dependent on the continuing operation of its manufacturing facilities. Any significant interruption in manufacturing at its facilities could have a material adverse effect on business, results of operations and financial condition.

The Company manufactures substantially all of the products at the manufacturing facility at Poly Park, Sandhipur, Kolkata, which are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, and natural disasters, directives from government, WBIDC rules and power interruptions.

In case of any disruption at such facilities, it may adversely affect the manufacturing cycle, and may lead to time over-run in the execution of the project. All of these manufacturing facilities require a significant amount and continuous supply of electricity and any shortage or non-availability of electricity may adversely affect operations and working of the company. The manufacturing process of products requires significant electricity. Presently, the Company depends on WBSEDCL for supply of its energy requirements.

29. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. In addition, disruptions to the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory at our manufacturing facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

30. Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years and which could affect our business and growth:

At present the company has been using its registered trademarks i.e. , ,  and  to conduct its business and in its day to day dealing. However, the trademarks have expired and application for its renewal has been filed by the company. Therefore, there can no assurance that these trademarks will not be infringed upon by any other market player. Depending on whether the company is able to discover any such infringement of trademark or successful enforcement of legal rights in the jurisdictions where such infringements may occur, the business and branding may suffer as a result of any misuse. In such circumstances, the reputation and business may be adversely affected. Further, if the company decides to pursue action against such infringements to protect the business and its reputation, it could result in diversion of both manual and financial resources, which might adversely affect the business and its financial results.

The Company has recently filed for registration of various trademarks i.e. , , , ,  and word marks i.e. **LENOFLEX**, with the registrar of trademarks which the company might be granted. In case the company is not granted the exclusive trademark and wordmark, or the application filed in objected to, it will involve incurring of extra expenses to obtain such right. Therefore, in such a case it could result in diversion of financial resources, which might adversely affect the business and its financial results.

32. We significantly depend on the contribution of our key managerial and senior managerial personnel. The loss of their services may have a material adverse effect on our business, financial condition and results of operations.

Our success significantly depends upon the continued service of our key managerial and senior managerial personnel. Our future performance depends on our ability to identify, hire and retain key technical, support staff, engineers, and

other qualified personnel. If we lose the services of any of our existing key managerial and senior managerial personnel without timely and suitable replacements, or if we are unable to attract and retain new personnel with suitable experience as we grow, our financial performance and operation may be materially and adversely affected.

33. Changes in latest technology machinery/ requirement of machinery based on business opportunity may adversely affect Company's results of operations and its financial condition.

Modernization and technology up gradation is essential for the business to reduce costs and increase the output. Changes in technology may render the current technologies including plant and machinery obsolete or will require the company to make substantial capital investments. However, the company's current manufacturing units have machineries with latest technology. Further the company strive to keep its technology, equipment's and machinery in line with the latest technological standards.

But in future the company might be required to implement new technology or upgrade the existing machineries and other equipment's employed. The costs in upgrading technology and modernizing the plant and machineries may be significant which could substantially affect the financial requirements of the company and its operations. Our manufacturing facility situated at Howrah Poly Park; West Bengal is located on premise, leased from West Bengal Industrial Development Corporation (WBIDC) Limited. Further the Registered office is taken on lease by us from third parties for a certain period. For details, please refer chapter titled "Our Business" beginning on page 88 of the DRHP. Though we have entered into long-term lease agreements with respect to these lands, such lease agreements may be terminated early in the event of a default or upon the expiry of their tenure and may not be renewed. If we do not comply with certain conditions of the lease, the lessor may terminate the lease, which could have an adverse effect on our operations and there can be no assurance that renewal of lease agreement with the owner will be entered into. In the event of non-renewal of lease, we may be required to shift our existing facilities, to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one.

35. Changes in trends may render the current products obsolete or require the company to make substantial capital investments and hiring of people with required new skills.

Like every industry, the industry in which the company operates is also prone to changes due to new trends and preferences of customer base. Further an added disadvantage to the company is that the majority product line of the company is based on plastic packaging material, which has already gained attention because of environmental concerns. These changes result in the frequent introduction of new business process, new products and significant price competition. To meet customers' needs as well as keep pace with competitors, the company might require to regularly update existing business processes and develop new products for customer retention.

In case of existing products becoming obsolete and if the company is unable to effectively introduce new product, the business and results of operations could be adversely affected. Moreover, the cost of implementing new process as well as R & D would require substantial new capital expenditures and/or write-downs of assets and could adversely affect business, prospects, results of operations and financial condition.

36. Restrictions on our exports of Leno Bags may impact our business operation and financial conditions

We manufacture Leno Bags and export may be subject to additional duties. For Fiscal 2021 and 2020, our export sales were ₹ 25.02 lakhs and ₹ 46.43 lakhs which represented 0.85% and 1.47%, respectively, of our total revenue from operations in such periods. Even though our exposure to exports currently have been low but in future we may expand our operations globally and so if any additional duties are imposed on our exported goods, the demand for our leno bags may decline and that may adversely impact our business and results of operations. The international markets in which we sell our products are diverse, with distinct legal and regulatory systems, having different levels of economic and infrastructure development and different stages of adoption of technology. We may therefore be subject to risks inherent in doing business in markets outside India, including risks related to: respective legal and regulatory environment; complex local tax regimes; payments by international customers; security issues; unexpected changes in regulatory environment and enforcement; challenges caused by distance, language and cultural differences; ensuring timely supply of products and provision of related support to customers in such markets; costs associated with doing business in

multiple markets; fluctuations in currency exchange rates; difficulties in implementing hedging measures; political, social or economic instability; difficulties in managing exports to multiple international locations; and exposure to local banking, currency control and other financial related risks which could have a material adverse effect on our results of operations and financial conditions.

In addition, some of the Promoters and Directors may also be interested to the extent of their shareholding and dividend entitlement in the Company.

If the company suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by it significantly exceeds its insurance coverage, the business, financial condition and results of operations of the company may be materially and adversely affected.

In this regards the company has obtained required license for carrying business activity including the Factory License, Trade License, Importer-Exporter Certificate, GST Registration and MSME Registration.

In the event company breach any financial or other covenants contained in any of financing arrangements, the company may be required under the terms of such financing arrangements to immediately repay its borrowings either in whole or in part, together with any related costs. This may adversely impact results of operations and cash flows of the company.

41. The company might be exposed to the risk of delays or non-payment by clients and other counterparties, which may also result in cash flow mismatches.

The company also cannot assure that it will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by clients, business partners, suppliers or other counterparties could affect the financial condition, results of operations and cash flows.

42. The Promoter and members of the Promoter Group will continue jointly to retain majority control over the Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post the Issue, Promoter and Promoter Group will collectively own the majority of the equity share capital. As a result, they will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to Board, in accordance with the Companies Act, 2013 and its Articles of Association.

Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of the Company. In addition, Promoter will continue to have the ability to cause to take actions that are not in, or may conflict with, the interests or the interests of some or all of the creditors or other shareholders, and the company cannot assure that such actions will not have an adverse effect on its future financial performance or the price of Equity Shares.

43. The future funds requirements of the company, in the form of fresh issue of capital or securities and/or loans taken, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

The company might require additional capital from time to time depending upon the requirements of the business. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase the interest burden and decrease cash flows, thus prejudicially affecting profitability and a liability to pay dividends to its shareholders.

44. The ability of the company to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in financing arrangements.

The company might not be in a position to pay dividends or might retain all its future earnings, if any, for use in the operations and growth and expansion of the business. As a result, the company might not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of the Board of Directors of the company and will depend on factors that the Board of Directors deem relevant, including among others, results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, there might be a situation wherein the company might not be permitted to declare any dividends under the loan financing arrangement that Company may enter into future, if there is a default under such loan agreements or unless Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders' investments may largely depend upon the appreciation of the price of the Equity Shares. There can be no assurance that the Equity Shares will appreciate in value.

The Company's clients have no obligation to avail its service and may either cancel, reduce or delay orders. The orders placed by Company's clients are dependent on factors such as the customer satisfaction with the level of consistency of the products that the Company supplies. Although, the company places a strong emphasis on quality, timely delivery of products, in the absence of long-term contracts, any change in the orders could adversely affect the business and the profitability of the Company.

45. The company's movable and immovable properties have been hypothecated/ mortgaged with the lenders to provide security in respect of finance availed by the company.

The company has secured its lenders by creating a charge over its movable and immovable properties with respect of loans / facilities availed by the company. The total charge created for the company as per the last filing with the RoC stands at Rs. 19,60,00,000 [Rupees Nineteen Crore Sixty Lakhs Only] as secured loans. However, as on March 31, 2022, the outstanding CC limit is NIL. In the event if the company avails the loans and default in repayment of the loans

/ facilities availed by it and any interest thereof, the properties may be possessed by lenders, which in turn could have significant adverse-effect on business, financial condition or results of operations of the company.

- 46. Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an application.**

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an application. While the company is required to complete listing pursuant to the issue within six working days from the issue closing date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

- 47. There is no monitoring agency appointed by the Company and the deployment of funds are at the discretion of the Management of the company and its Board of Directors, though it shall be monitored by the Audit Committee.**

As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of monitoring agency is required only if Issue size exceeds Rs. 100 Crore. Hence, the company has not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the Companies Act, 2013, the Audit Committee of the Company would be monitoring the utilization of the Issue Proceeds.

ROAD AHEAD

Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution, on January 21, 2022 said that Indian industry to raise 75 unicorns in the 75 weeks leading up to the country's 75th anniversary next year.

Mr. Piyush Goyal said that India will achieve exports worth US\$ 650 billion in the financial year 2021-22.

India's electronic exports are expected to reach US\$ 300 billion by 2025-26 this will be nearly 40 times the FY2021-22 exports (till December 2021) of US\$ 67 billion.

As per the data published in a Department of Economic Affairs report, in the first quarter of FY22, India's output recorded a 20.1% YoY growth, recovering >90% of the pre-pandemic output in the first quarter of FY20. India's real gross value added (GVA) also recorded an 18.8% YoY increase in the first quarter of FY22, posting a recovery of >92% of its corresponding pre-pandemic level (in the first quarter of FY20). Also, in FY21, India recorded a current account surplus at 0.9% of the GDP. The growth in the economic recovery is due to the government's continued efforts to accelerate vaccination coverage among citizens. This also provided an optimistic outlook to further revive industrial activities.

As per RBI's revised estimates of July 2021, the real GDP growth of the country is estimated at 21.4% for the first quarter of FY22. The increase in the tax collection, along with government's budget support to states, strengthened the overall growth of the Indian economy.

India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity from to 175 gigawatt (GW) by 2022. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behavior and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

Plastic Industry in India

Introduction

The Indian plastics industry made a promising beginning in 1957 with the production of polystyrene. Thereafter, significant progress has been made, and the industry has grown and diversified rapidly. The industry spans the country and hosts more than 2,000 exporters. It employs about 4 million people and comprises more than 30,000 processing units, 85-90% of which are small and medium-sized enterprises.

- In FY20, plastic and linoleum export from India stood at US\$ 7.55 billion.
- During April 2019 to January 2020, plastic export stood at US\$ 7.045 billion with the highest contribution from plastic raw material at US\$ 2.91 billion, plastic sheets, films, and plates at US\$ 1.22 billion and packaging materials at US\$ 722.47 million.
- India exported plastics raw materials worth US\$ 813 million in October 2020, and the export during April 2020 to October 2020 was US\$ 5.58 billion.
- India exported plastics worth US\$ 237.16 million in January 2021, and the export during April 2020 to January 2021 was US\$ 2.76 billion.
- The total plastic and linoleum export during April 2020 to February 2021 was US\$ 6.73 billion and for the month of February 2021, it was US\$ 630.94 million.
- The Indian plastics industry produces and export a wide range of raw materials, plastic-moulded extruded goods, polyester films, moulded/ soft luggage items, writing instruments, plastic woven sacks and bags, polyvinyl chloride (PVC), leather cloth and sheeting, packaging, consumer goods, sanitary fittings, electrical accessories, laboratory/ medical surgical ware, tarpaulins, laminates, fishnets, travel ware, and others.
- The Indian plastics industry offer excellent potential in terms of capacity, infrastructure, and skilled manpower. It is supported by many polymer producers, plastic process machinery and mould manufacturers in the country.
- Among the industry's major strengths is the availability of raw materials in the country. Thus, plastic processors do not have to depend on import. These raw materials, including polypropylene, high-density polyethylene, low-density polyethylene, and PVC, are manufactured domestically.

Recent Developments

The Department of Chemicals and Petrochemicals has approved 10 Plastic Parks in the country, out of which 6 parks have been given final approval in the below states:

- Assam (1 nos.)
- Madhya Pradesh (2 nos.)
- Odisha (1 nos.)
- Tamil Nadu (1 nos.)
- Jharkhand (1 nos.)

The Detailed Project Reports are under evaluation for two Plastic Park in Uttarakhand and Chhattisgarh respectively and proposal for setting up of two new Plastic Parks are under process.

These Plastic Parks will help to achieve environmentally sustainable growth and increase employment.

Plastics Export Promotion Council

The Plastics Export Promotion Council (PLEXCONCIL) is the apex Government body responsible for the promotion of plastic export. PLEXCONCIL members comprise large-/medium-/small-scale manufacturers and exporters. The council supports exporters by participating in international trade fairs, exploring new markets, organising buyer- seller meets both in India and overseas, and engaging in various other promotion and need- based activities.

INTRODUCTION

Indian plastic industry market is one of the leading sectors in the country. The history of the plastic industry in India dates back to 1957 with the production of polystyrene. Since then, the industry has made substantial progress and has grown rapidly. The industry is present across the country and has more than 2,000 exporters. It employs more than 4 million people in the country and constitutes 30,000 processing units; among these, 85-90% belong to small and medium enterprises. India manufactures various products such as plastics and linoleum, houseware products, cordage, fishnets, floorcoverings, medical items, packaging items, plastic films, pipes, raw material, etc. The country majorly exports plastic raw materials, films, sheets, woven sacks, fabrics, and tarpaulin. The Government of India intends to take the plastic industry from a current level of Rs. 3 lakh crores (US\$ 37.8 billion) of economic activity to Rs. 10 lakh crores (US\$ 126 billion) in 4-5 years.

Ten Plastic Parks have been approved in the country by The Department of Chemicals and Petrochemicals. Among these, 6 plastic parks have received final approval from the following states – Madhya Pradesh (2 parks), Assam (1 park), Tamil Nadu (1 park), Odisha (1 park) and Jharkhand (1 park). These parks are intended to boost employment and attain environmentally sustainable growth.

EXPORT DESTINATIONS

India exports plastic to more than 200 countries in the world. The top 5 consumer and houseware product importing countries are USA, Germany Japan, the UK and France. India largely exports plastic and related products to USA, China, UAE, Germany, Italy, the UK, Bangladesh, Nepal, Turkey, France, Viet Nam, Indonesia, etc. The total value of exports to USA, the largest consumer of the Indian plastic industry, stood at US\$ 1,485.8 million in 2020-21, an increase of 8.2% yoy. China is the second largest consumer of plastic export products from India and the total value of exports stood at US\$ 1,266.08 million, an increase of 20.9% yoy. USA and China constituted 15.0%, and 12.8%, of the total plastic exports in 2020-21.

The total plastic exports from India to France during 2020-21 was around US\$ 162 million. In order to boost exports to France and Europe, the PLEXCONCIL collaborated with Indo-French Chamber in the first quarter of 2021-22. The Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Mr. Piyush Goyal, recently urged the industry to adopt international standards to help it expand its global footprint. India has recently signed a free-trade agreement with UAE and Australia, which will give the plastics industry new opportunities.

GOVERNMENT INITIATIVES

The Ministry of Commerce & Industry of India aims to increase the plastic exports of the country to US\$ 25 billion by 2025. Multiple plastic parks are being set up in the country in a phased manner that will help improve the plastic manufacturing outputs of the country. Under the plastic park schemes, funds of up to 50% of the project costs or a ceiling cost of Rs. 40 crore (US\$ 5 million) per project.

Government initiatives like “Digital India”, “Make in India”, and “Skill India” will also boost India’s Plastic industry. For instance, under the “Digital India” program, the government aims to reduce the import dependence of products from other countries, which will lift the local plastic part manufacturers.

The government also launched a program for building Centres of Excellence (CoEs) to develop the existing petrochemical technology and promote the research environment pertaining to the sector in the country. This will aid in promoting and developing new applications of polymers and plastics in the country. Additionally, about 23 Central Institute of Plastics Engineering & Technology (CIPET) have been approved to accelerate financial and technological collaboration for promoting skills in chemicals and petrochemicals sector.

INDIAN PACKAGING INDUSTRY

The India Packaging Market was valued at USD 50.5 billion in 2019, and it is expected to reach USD 204.81 billion by 2025, registering a CAGR of 26.7% during the period of 2020-2025. Packaging is among the high growth industries in India and developing @ 22-25% per annum and becoming a preferred hub for packaging industry. Currently the 5th largest sector of India's economy, the industry has reported steady growth over past several years and shows high potential for much expansion, particularly in the export market. Costs of processing and packaging food can be up to 40% lower than parts of Europe which, combined with India's resources of skilled labour, make it an attractive venue for investment. A high degree of potential exists for almost all user segments which are expanding appreciably - processed foods, hard and soft drinks, fruit and marine products.

The Indian packaging industry has made a mark with its exports that comprise flattened cans, printed sheets and components, crown cork, lug caps, plastic film laminates, craft paper, paper board and packaging machinery, while the imports include tinplate, coating and lining compounds and others. In India, the fastest growing packaging segments are laminates and flexible packaging, especially PET and woven sacks. Over the last few years Packaging Industry is an important sector driving technology and innovation growth in the country and adding value to the various manufacturing sectors including agriculture and FMCG segments.

The global packaging industry is developing and expanding day by day and Indian packaging industry is also growing rapidly. This growth is primarily driven by factors like growing pharmaceutical, food processing, manufacturing industry, FMCG, healthcare sector and ancillary in the emerging economies like China, India, Brazil, Russia and few other East European countries.

TRENDS

With advancement in technology and general awareness, the packaging sector in India is well poised as most of the raw materials for packaging are abundantly available in the country. Moreover, the per capita spending has increased tremendously, leading to changing rural markets and a growing middle class who demand the best of products. Various upgraded technologies are being used in industry such as aseptic packaging, retort packaging and biodegradable packaging to enhance the life of food product. Moreover, the plastic packaging market is expanding rapidly registering a growth of 20-25 per cent per annum and is valued at 6.8 million tons while the paper packaging industry stands at 7.6 million tons. The packaging industry is poised to grow rapidly led by the increasing use of innovative packaging equipment and the rising flexible packaging market.

In terms of packaging, the food packaging industry is one growth area that has seen the maximum number of innovations in terms of packaging and branding. Consumers want their food products to be hygienic, safe and at the same time to look attractive. When it comes to food packaging, MNCs have a very good ecosystem. They have a dedicated R&D house, which conducts various research-based experiments using the latest technologies, and are always innovating to ensure that the consumer is benefited. This

development has led to healthy competition between our local manufacturers to deliver innovative products, and as a result, the entire ecosystem is gearing up for the change. Likewise, local manufacturers are now importing state-of-the-art machinery to ensure that the packaging is of the highest standards. If trends are anything to go by – seeing is believing! Consumers who have attended any packaging event of late would be able to identify with the above scenario. Packaging machines for labeling, bar coding and scanning, to metal and plastic packaging – every contraption is now available to local manufacturers.

However, at this stage, the industry is eagerly looking forward to the government machinery, which they hope will support them by implementing effective policies that will help them to compete on the international arena. This is where PIAI will play an active role in resolving the issues faced by the packaging industry.

CURRENT TRENDS

- Growth in consumer packaged goods
- Growth of organized retail
- Increasing use of Flexible Packaging
- Growth in the usage of Metal Packaging
- Usage of glass packaging for Beverages
- Increasing usage of Tetra packs for dairy and juice products
- Coding and marking
- Aseptic Packaging
- Usage of recyclable packaging material
- Vacuum Packaging
- Modified Atmosphere Packaging
- Aerosol packaging
- Skin Packaging
- Shrink and Stretch Packaging
- Temper evident Packaging

CHALLENGES

- Rapid changes in technology
- Shortage and Rising cost of raw material
- Costly Skilled Manpower
- Rising input costs
- Highly inadequate credit flow
- Lack of Market Access & Advanced technology
- Lack of exposure to Best Management and Manufacturing Practices
- Lack of 100% commitment to the quality standards

Indian Packaging Industry riding on the e-commerce wave

Packaging plays a pivotal role in consumers' experience with respect to the brand and the overall purchasing experience. There are four major functions of packaging—containment, protection, communication and utility—that are intended to maximise sales and profits while reducing losses and wastage; and all of them are critical for enhancing consumer experience. In a traditional brick-and-mortar commerce, packaging was used to create distinction and increase shelf presence through attractive and easy-to-spot colors, shapes and graphics. When damage is occurred in a brick-and-mortar store, it was easy for the consumer to keep the damaged product aside and pick an undamaged one placed right next to it. Loss of product was not necessarily compounded by the loss of sales or customer. In an e-commerce world, however, the effects of a damaged product are very different. A consumer makes a purchasing decision at the click of a button and to contend with a damaged product, after delivery wait time, can lead to a conclusive decision against the online retailer. As per eMarketer, 83% consumers are unlikely to purchase from an online retailer again after a poor experience.

Having realised the impact of their packaging decisions, companies are investing to enhance e-commerce packaging to meet consumer expectations and positively impact their perceptions and purchasing decisions.

Rise of the Indian e-commerce sector

India has been witnessing a surge in its e-commerce sector over the last 5-6 years. The Indian e-commerce market is projected to grow to US\$ 200 billion by 2026 from US\$ 38.5 billion in 2017. This growth is likely to be propelled by an increase in internet and smartphone penetration and the ongoing digital transformation in the country. After India locked down in March this year, the e-commerce segment witnessed a momentary decline for a few weeks; however, re-opening of markets led to recovery and subsequently, an upsurge. Marketplaces as well as direct brand websites witnessed an overall 130% spike in online orders.

Since June, the sector has recorded massive sales events such as Myntra's End of Reason Sale, Flipkart's Independence Day Sale and Amazon's Prime Day Sales, boosting order volumes. In fact, recently, Walmart declared (in its latest earnings report) that Flipkart's GMV (Gross Merchandising Volume) has exceeded the pre-COVID 19 levels.

Another driving factor for this surge in e-commerce transactions is the emergence of first-time shoppers and the digital-first approach. Social distancing has led to significant growth of first-time online shoppers. While India's top 5 metropolitan cities continue to dominate the e-commerce sector, Tier II and III cities have also joined the race with a rising share of online shoppers. Amazon and Flipkart have gone a step further in supporting this growth in smaller cities by offering their platform content in local languages.

Surge in e-commerce to continue post pandemic

The post-lockdown numbers indicate a systemic shift in consumer purchasing preferences from offline to online. Customers are increasingly getting used to the comforts of online shopping.

Local retail outlets (Kirana shops) are also digitising and starting to deliver online to keep up with changing customer preferences and not lose business to large marketplaces such as Amazon and Flipkart. This is largely adding to the convenience of customers—in having everything delivered to their doorstep and saving time.

In a post-pandemic scenario, whether consumers go back to their old ways of purchasing or will the comfort, ease and discounts of online shopping continue to lure them remains a question. Nonetheless, it can be assumed that not all consumers will switch back to in-store shopping and continue buying online in the near future.

Another point to note is the change towards hygienic living—sanitisation, personal hygiene, social distancing or using healthy products—as this is expected to have a lasting impact on consumers even after the pandemic.

OVERVIEW

Our Company was incorporated and founded by visionary Late Sri Anup Chand Sethia and his son Mr. Rakesh Sethia in the year 2003 having flexible packaging solution in mind and the search for right product and right location. In the year 2006, our Company was allotted 2.095 acres land in Sudha Ras Food & Poly Park promoted and developed by West Bengal Industrial Development Corporation Limited (WBIDC), Government of West Bengal which is a landmark industrial park of WBIDC Limited.

Mega Flex Plastics Limited is primarily engaged in manufacturing of Leno Bags which is used for packaging of agricultural produces like potatoes, onions, garlic, coconuts, fruits and vegetables. In addition to Leno Bags, our company is also manufacturing Woven Fabric and Sutli (Fibrillated Twisted Thread). The product which we majorly manufacture i.e., Leno Bags is made from Plastic Granules and is used multiple times for storage of fruits and vegetables. The said product is widely used in Cold Storages and warehouses for storage of various products.

Our state-of-the-art plant for manufacturing PP Leno Bags is situated at Sudha Ras Food & Poly Park (Industrial Park), Howrah in the state of West Bengal, India. The plant is strategically located on NH-6, about 120 km from international all-weather port of Haldia and around 30 kms from Kolkata port, which gives it excellent connectivity and transport facilities.

We started with state of art manufacturing facility with production capacity of 23.08 million Bags per year by installing 27 Leno looms in the year 2007. We gradually increased our production capacity by adding looms to our factory and till date, our factory has 60 looms with a production capacity of 51.30 million Bags per year. The core machinery comprising of an Extrusion Tape Line (melt capacity of 450 kg/hr) and 60 Leno Looms. The efficient and motivated workforce and with thrust on maintaining machine efficiency, we were able to achieve optimum level of production year after year. Strict production supervision and special focus on quality control ensured that only quality Leno bags products reached to the customers. Our bags are trusted upon by the customers. Our brands include *Lenoflex*, *Kisan*, *Kisan Regular*, *Goldflex*, *Goldflex Lite*, *Tiger*, *Tiranga*, *Hena*. The Lenoflex is most preferred brand for storage of potato when the farmer looks for the quality. We also export Leno Bags to European countries and our quality is well accepted there also. We are also capable to produce Sutli (fibrillated Twisted Thread) as per the demand.

When we started our production, usage of Leno Bags was in its nascent stage and farmers were hardly aware of this highly convenient and economic form of packaging. Vegetables were mainly packed in jute bags. Jute bags was not an efficient mode of packaging due to its high cost, voluminous in size, wastage of packed produce because of high water absorption resulting in huge loss during storage and transportation. With technical and marketing support of some big polymer manufacturers, we reached out to farmers at grass root level in villages of West Bengal and popularized use of Leno Bags. This revolutionized the way vegetables were packed and proved to be a boon for the farmers.

We became an integrated fruits and vegetable packaging solutions provider offering Leno Bags, which are used for packing of fruits & vegetables, Technical Textile Fabric and Sutli (Fibrillated Twisted Thread). We are part of a group whose other business interests include manufacturing of rigid plastic packaging products i.e. Plastic Container for Paints, Lubricants, Greases etc.; paper packaging products i.e. Corrugated Boxes & Mono Boxes; and logistics & warehousing etc.

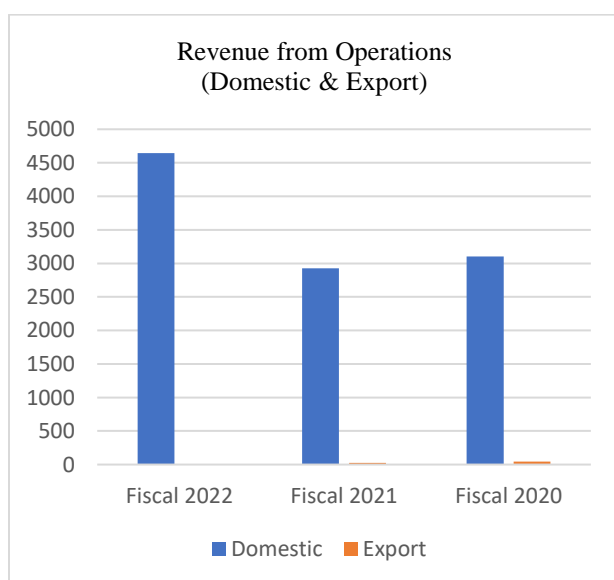

Our Company's Leadership team consists of our promoters who have several decades of experience in the field of packaging solutions. This has made our company a highly acclaimed and trusted enterprise with a focus on innovation and sustained growth. We are having a professional management team to execute our projects having vast techno-commercial knowledge and experience in the field of plastic packaging.

We have all the required facilities in house, which includes captive power generation unit, UPS, water treatment plant etc. We have well equipped laboratory to ensure quality check at all levels of production. We have our own fleet of vehicles to ensure timely delivery even to remote places.

Our Company Operates in the following segments:

1. Manufacturing of Leno Bags, PP Fabrics, Sutli (Fibrillated Twisted Thread)
2. Trading of Polypropylene Granules

Our Company was originally incorporated as “Mega Flex Plastics Private Limited” on November 18, 2003 vide certificate of incorporation bearing Corporate Identity No. U25209WB2003PTC097273 under the provisions of Companies Act, 1956 issued by the Registrar of Companies, West Bengal. Subsequently, the company was converted into Public Limited Company vide a fresh certificate of incorporation issued by the Registrar of Companies, West Bengal, consequent upon conversion from Private Limited to Public Company dated February 01, 2007 in the name of “Mega Flex Plastics Limited”. The Corporate Identification Number of our Company changed to U25209WB2003PLC097273.

Our Company was originally formed in the year 2003 under visionary and dynamic leadership of Late Anup Chand Sethia and his son Mr. Rakesh Sethia with the main object of manufacturing, processing, buying, selling, trading etc. in flexible packaging material and to do all other acts and things necessary for the attainment of the foregoing objects to empower the Indian rural sector with packaging solutions. With his decades of rich experience in plastic processing, oil milling, paper packaging and other industries, he visualized tremendous opportunity available in the field of packaging of horticultural produce, especially potato, onion and other vegetables. His vision became reality in the form of Mega Flex Plastics Limited which started operation with 27 looms in the year 2007.

In the year 2006, our Company acquired land of 2.095 acres in Howrah Poly Park from West Bengal Industrial Development Corporation Limited (WBIDC Limited) on lease basis for 99 years to set up plastic products/packaging unit. In the year 2007, we started with state of art manufacturing facility with installation of 27 looms with production capacity of 22.61 million Bags per year. We decided to put 27 looms (First Phase) all designed specially to manufacture PP Leno Bags mainly and one Extrusion Tape line which can accommodate 60-65 looms thinking of future expansion. It was a very bold decision from our management to go fully for the product which was hardly established in the market. But they had full confidence on the future of the LENO Bags.

Mr. Sethia then partnered with his childhood friend Mr. Mohan Lal Parakh and Mr. Hukum Chand Bothra son of his brother-in-law to move ahead and take on the challenge. Currently Mr. Mohan Lal Parakh is our Chairman and Mr. Hukum Chand Bothra is our Managing Director of the Company.

We gradually increased capacity to 51.30 million Bags per year in 2020. With efficient and motivated workforce and with thrust on maintaining machine efficiency, we could achieve optimum level of production year after year. Strict production supervision and special focus on quality, we ensure that quality packaging products reaches to the farmers. Our bags are trusted upon by the farmers and our brands are very popular among them. We also export Leno Bags to European countries and our quality is well accepted there also.

Our Company's Leadership team consists of our promoters who have several decades of experience in the field of packaging solutions. This has made our company a highly acclaimed and trusted enterprise with a focus on innovation and sustained growth. We are having a professional managed team to execute our projects having vast techno-commercial knowledge and experience in the field of plastic packaging.

BUSINESS OVERVIEW

Our Company was incorporated and founded by visionary Late Sri Anup Chand Sethia and his son Mr. Rakesh Sethia in the year 2003 having flexible packaging solution in mind and the search for right product and right location. In the year 2006, our Company was allotted 2.095 acres land in Sudha Ras Food & Poly Park promoted and developed by West Bengal Industrial Development Corporation Limited (WBIDC), Government of West Bengal which is a landmark industrial park of WBIDC Limited.

Mega Flex Plastics Limited is primarily engaged in manufacturing of Leno Bags which is used for packaging of agricultural produces like potatoes, onions, garlic, coconuts, fruits and vegetables. In addition to Leno Bags, our company is also manufacturing Woven Fabric and Sutli (Fibrillated Twisted Thread). The product which we majorly manufacture i.e., Leno Bags is made from Plastic Granules and is used multiple times for storage of fruits and vegetables. The said product is widely used in Cold Storages and warehouses for storage of various products.

Our state-of-the-art plant for manufacturing PP Leno Bags is situated at Sudha Ras Food & Poly Park (Industrial Park), Howrah in the state of West Bengal, India. The plant is strategically located on NH-6, about 120 km from international all-weather port of Haldia and around 30 kms from Kolkata port, which gives it excellent connectivity and transport facilities.

We started with state of art manufacturing facility with production capacity of 23.08 million Bags per year by installing 27 looms in the year 2007. We gradually increased our production capacity by adding looms to our factory and till date, our factory has 60 looms with a production capacity of 51.30 million Bags per year. The core machinery comprising of an Extrusion Tape Line (melt capacity of 450 kg/hr) and 60 Looms. The efficient and motivated workforce and with thrust on maintaining machine efficiency, we were able to achieve optimum level of production year after year. Strict production supervision and special focus on quality control ensured that only quality Leno bags products reached to the customers. Our bags are trusted upon by the customers. Our brands include *Lenoflex*, *Kisan*, *Kisan Regular*, *Goldflex*, *Goldflex Lite*, *Tiger*, *Tiranga*, *Hena*. The Lenoflex is most preferred brand for storage of potato when the farmer looks for the quality. We also export Leno Bags to European countries and our quality is well accepted there also. We are also capable to produce Sutli (fibrillated Twisted Thread) as per the demand.

When we started our production, usage of Leno Bags was in its nascent stage and farmers were hardly aware of this highly convenient and economic form of packaging. Vegetables were mainly packed in jute bags. Jute bags was not an efficient mode of packaging due to its high cost, voluminous in size, wastage of packed produce because of high water absorption resulting in huge loss during storage and transportation. With technical and marketing support of some big polymer manufacturers, we reached out to farmers at grass root level in villages of West Bengal and popularized use of Leno Bags. This revolutionized the way vegetables were packed and proved to be a boon for the farmers.

We became an integrated fruits and vegetable packaging solutions provider offering Leno Bags, which are used for packing of fruits & vegetables, Technical Textile Fabric and Sutli (Fibrillated Twisted Thread). We are part of a group whose other business interests include manufacturing of rigid plastic packaging products i.e. Plastic Container for Paints, Lubricants, Greases etc.; paper packaging products i.e. Corrugated Boxes & Mono Boxes; and logistics & warehousing etc.

Our Company's Leadership team consists of our promoters who have several decades of experience in the field of packaging solutions. This has made our company a highly acclaimed and trusted enterprise with a focus on innovation and sustained growth. We are having a professional management team to execute our projects having vast techno-commercial knowledge and experience in the field of plastic packaging.

We have all the required facilities in house, which includes captive power generation unit, UPS, water treatment plant etc. We have well equipped laboratory to ensure quality check at all levels of production. We have our own fleet of vehicles to ensure timely delivery even to remote places.

For Detailed information on our business, please refer to chapter titled “Our Business” and “Restated Financial Information” beginning from page no. 88 and 140 of this prospectus respectively.

SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS AND FINANCIAL CONDITION

IMPACT OF COVID-19

Since December 2019 when it was first reported, the outbreak of COVID-19 has spread globally. The World Health Organization declared the novel coronavirus disease (“COVID-19”) outbreak a Public Health Emergency of International Concern on January 30, 2020, and a pandemic on March 11, 2020. The rapid and diffused spread of COVID-19 and global health concerns relating to this pandemic have had a severe negative impact on, among other things, financial markets, liquidity, economic conditions and trade and could continue to do so or could worsen for an unknown period of time, that could in turn have a material adverse impact on our business, cash flows, results of operations and financial condition, including liquidity and growth. The extent to which the COVID-19 outbreak impacts our business, cash flows, results of operations and financial condition will depend on future developments, including on the duration and severity of the pandemic, the nature and scope of government actions to contain it, and the potential impact on global and national economic conditions, including inflation, interest rates, availability of capital markets, consumer spending rates, energy availability and costs (including fuel surcharges), which are highly uncertain and cannot

be predicted. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and are likely to be severe.

In addition, while the Government of India in coordination with the state governments have started the bulk immunization process or vaccination drive since January 16, 2021, achieving a complete vaccination scale may take significant amount of time. There is also no assurance that the vaccines that are developed will be fully effective and/ or may not have side effects. On March 14, 2020, India declared COVID-19 as a 'notified disaster' and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious reopening of businesses and offices. Thus, our business was under lock down during the nationwide lock down due to the spread of COVID 19 Pandemic from March 25, 2020 to May 02, 2020. It was also shut down during the month of June 2020 due to widespread COVID – 19 pandemic. Subsequently, our business was operating subject to certain social distancing and additional safety measures, such as, regular temperature checks, regular sanitization, and compulsory use of masks and hand sanitization. In addition, throughout March and April 2021, due to an increase in the number of daily COVID-19 cases, several state governments in India re-imposed lockdowns, curfews and other restrictions to curb the spread of the virus. As a result of the detection of new strains and subsequent waves of COVID-19 infections in several states in India as well as throughout various parts of the world, we may be subject to further reinstatements of lockdown protocols or other restrictions, which may adversely affect our business operations. We continue to closely monitor the impact that COVID-19 may have on our business and results of operations.

Our Company has witnessed a lower quantum of sales compared to similar periods in previous years. Our turnover has been drastically impacted due to global restriction and lockdowns including India due to Covid-19 pandemic. Our Turnover for the financial year 2021 has been reduced to ₹ 2949.23 lakhs from ₹ 3149.64 lakhs for the financial year 2020. However, we have increased our better revenue to ₹ 4646.83 lakhs in financial year 2022 as the restriction and lockdowns are being relaxed gradually. *(for further details, please refer "Management Discussion and Analysis of Financial Conditions and Results of Operations" beginning on page no. 169 of prospectus.*

INFLATION

As economic activity started showing signs of picking-up in the second year of the pandemic, the global economy faced the fresh challenge of rising global inflation. COVID-19 related stimulus spending in major economies along with pent-up demand boosting consumer spending pushed inflation up in many advanced and emerging economies. The surge in energy, food, non-food commodities, and input prices, supply constraints, disruption of global supply chains, and rising freight costs across the globe stoked global inflation during the year. Crude oil prices also witnessed an upswing during the year on the back of increased demand from recovering economies and supply restrictions by the Organization of the Petroleum Exporting Countries and its allies (OPEC+).

Retail inflation, as measured by Consumer Price Index-Combined (CPI-C) inflation, in India, which was slightly above 6 per cent in 2020-21 owing to supply chain disruptions caused by COVID-19 restrictions, lockdowns, and night curfews, moderated during the current financial year. Retail inflation during 2021-22 (April-December) stood at 5.2 per cent (Table 1). Wholesale inflation, based on Wholesale Price Index (WPI), after remaining benign during the previous financial years, saw a sharp uptick during 2021-22 (April-December). A part of the observed rise in wholesale inflation could be attributed to the low base in the previous year. However, rising input costs and global commodity prices also contributed to the rise in wholesale prices.

Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other

than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days. For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Managers.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “automatic route”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “government route”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails.

RBI has also issued Master Direction- Foreign Investment in India dated January 4, 2018. In terms of the Master Direction, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “U.S. Securities Act”), or the securities laws of any state of the United States and may not be offered or sold within the United States, except pursuant to exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold only outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sale occur. The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

Our Company and the Lead Manager are not liable for any amendments or modifications or changes in applicable laws or regulations, which may occur after the date of this Prospectus. Applicants are advised to consult their legal counsel, to make their independent investigations and ensure that Applications are not in violation of laws or regulations applicable to them and do not exceed the applicable limits under the laws and regulations.
