However, there are risks where the impact is not quantifiable and hence the same has not been disclosed in such risk factors. Internal Risk Factors

- 1. *Our Company, our Promoters and Directors are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.***

Our Company, our Promoters and Directors are party to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and legal forums. We cannot provide assurance that these legal proceedings will be decided in our favour. Any adverse decisions in any of the proceedings may have a significant adverse effect on our business, results of operations, cash flows and financial condition. | Outstanding Litigation which may have material impact on our Company | - | - | - | - | - | - |

[^] Amount involved excludes interest liability on outstanding demands and excludes demands for which the amount is presently unascertainable.

There can be no assurance that litigations involving our Company, our Promoters and Directors will be decided in favour of our Company, Promoters and Directors and consequently it may divert the attention of our management and Promoters and consume our corporate resources and we may incur significant expenses in such proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against Company, our Promoters and Directors, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. Further, Our Promoter, Mr. Kunjit Maheshbhai Patel, has provided an undertaking / affidavit, inter alia, stating that, in the event any of the contingent liability of the company crystallizes into an actual liability, he shall personally bear and discharge the same out of his own funds and shall indemnify and keep indemnified the Company against any loss, claim, demand, liability or expense arising on account of the same.

Furthermore, we may not be able to quantify all the claims in which we are involved. Failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure that similar proceedings will not be initiated in the future. This could adversely affect our business, cash flows, financial condition, and results of operation. For further details, pertaining to material pending outstanding litigations involving our Company, our Subsidiary, our Promoters and Directors, see "Outstanding Litigation and Material Developments" on page 266 of this Prospectus.

- Our company is significantly dependent on few customers for our revenue. The loss of any one or more of such customers may have a material effect on our business operations and profitability. We derive a significant portion of our revenue from sales to our top 1, 5 and 10 customers. Any failure to maintain relationships with such customers could adversely affect our revenue and financial condition.**

The percentage of revenue derived from our top one, five and ten customers for the period ended November 30, 2025 and Financial Year 2024-25, 2023-24 and 2022-23 are given below:

(Rs. In Lakhs)

| Particulars | November 30, 2025 | | March 31, 2025 | | March 31, 2024 | | March 31, 2023 | |
|------------------|-------------------|--------|----------------|--------|----------------|--------|----------------|--------|
| | Amount | % | Amount | % | Amount | % | Amount | % |
| Customers | | | | | | | | |
| Top 1 Customer | 3,070.53 | 44.08% | 3479.00 | 25.68% | 2296.79 | 28.72% | 1403.51 | 29.95% |
| Top 5 Customers | 6,538.30 | 93.85% | 10814.39 | 79.83% | 5980.80 | 74.80% | 4350.14 | 92.84% |
| Top 10 Customers | 6,964.94 | 99.98% | 13,444.12 | 99.25% | 6,986.34 | 87.37% | 4,517.24 | 96.41% |

Our top one, five and ten customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since we are largely dependent on certain key customers for a significant portion of our sales, the loss of any one of our key customers or a significant reduction in demand from such customers could have a material adverse effect on our business, financial condition, results of operations and future prospects.

Further, we also cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. We have not entered into formal arrangements or contracts with our customers to purchase the products from us. We work on purchase order basis with our customers based on their demand. Since we have no formal arrangements with our customers, they are not contractually obligated to purchase minimum quantity of products from us and may choose to purchase the products from our competitors. We cannot assure you that we will be able to continue to retain these customers on terms that are commercially acceptable to us, or at all.

If we are unable to maintain our relationship with any of our key customers or fail to retain them, we may lose business from such customers. Further, if any of our major customers becomes bankrupt or insolvent, we may lose some or all of our business from that customer and our receivable from that customer would increase and may have to be written off, adversely impacting our revenue and financial condition.

3. Under-utilization of our manufacturing capacity and an inability to effectively utilize our expanded manufacturing capacity could have an adverse effect on our business, future prospects, and financial performance, and the information on installed capacities, historical production, and capacity utilization included in this Prospectus is based on estimates.

Information relating to our installed capacities, historical production and capacity utilization of our Manufacturing facility is based on various assumptions and estimates by Mr. Dinesh P Jani, Chartered Engineer, as set out in their certificate dated January 10, 2026. Such assumptions and estimates may not continue to be true and future production and capacity utilization may vary. Calculation of the installed capacities and historical production and capacity utilization of our Manufacturing facility by the independent chartered engineer may not have been undertaken on the basis of any standard methodology and may not be comparable to that employed by competitors.

As on the date of this Prospectus, we operate a Manufacturing Facility in India located in the state of Gujarat. The table below sets forth certain information relating to the installed capacity, available capacity, actual production and capacity utilisation for our products for the period/ years indicated:

| Particulars | 30-11-2025 | 31-03-2025 | 31-03-2024 | 31-03-2023 |
|--------------------------|------------|------------|------------|------------|
| Installed Capacity (MT) | 3,360.00 | 5,040.00 | 5,040.00 | 5,040.00 |
| Production Volume (MTPA) | 1,210.92 | 2,658.10 | 2,354.05 | 1,835.46 |

| | | | | |
|--------------------------|-------|-------|-------|-------|
| Capacity Utilization (%) | 36.04 | 52.74 | 46.71 | 36.42 |
|--------------------------|-------|-------|-------|-------|

Ability to maintain our profitability depends on our ability to maintain high levels of capacity utilization. Capacity utilization is affected by the demand for our products, our ability to accurately forecast customer demand, to carry out uninterrupted operations, the availability of raw materials, and industry/ market conditions. In the event there is a decline in the demand for our products, or if we face prolonged disruptions at our Manufacturing Facility including due to interruptions in the supply of water, electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our Manufacturing Facility, resulting in operational inefficiencies which could have a material adverse effect on our business, financial condition and cash flows. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term, or an inability to fully realize the benefits of our recently implemented capacity expansion, could materially and adversely impact our business, future prospects and future financial performance.

4. Our Company has not paid Self-Assessment Tax for AY 2025-26 and has not filed Income Tax Return for AY 2025- 26. Such failure may result in interest, penalties or other regulatory actions under applicable tax laws, which could adversely affect our financial condition and reputation.

Our Company has not paid Self-Assessment Tax amounting to Rs. 345.91 Lakhs (excluding Interest and before TDS credit) for the Assessment Year 2025-26 and has not filed Income Tax Return for AY 2025-26 due to liquidity constraints. Although Our Company intends to regularize the same in due course, any failure or delay in payment of taxes or filing of income tax returns may attract interest, penalties or other actions under the applicable provisions of the Income-tax Act, 1961. Continued failure to file the income tax return or to pay taxes may result in escalating penalties, which can increase significantly the longer the delay continues. In addition to penalties, interest may be charged on unpaid tax amounts, which increases the amount owed over time.

Further, we cannot assure that our Company will not be subject to any legal proceedings or regulatory actions, including monetary penalties by the relevant statutory authorities on account of such delay in payments or filing of returns, which may adversely affect our business, financial condition and reputation.

Further, our Company has formed a compliance team comprising the Managing Director, Accountant with the additional oversight of Statutory Auditor to strengthen our regulatory and statutory compliance processes. This team will ensure the timely and accurate adherence to all relevant laws, oversee the submission of required documents to regulatory authorities, and monitor ongoing compliance to prevent any future errors similar to those made previously. Additionally, Our Company is currently reviewing past mistakes/errors/delays related to the preparation and filing of its e-forms / documents / records in accordance with the Income Tax Act, and other applicable laws and intends to implement appropriate measures to ensure compliance with applicable rules, regulations and legal provisions going forward.

5. Extensive government regulation and the impact of plastics on the environment could have a severe impact on our ability to continue our business operations, which could adversely affect our business, results of operations and financial condition.

The increasing reliance of the world on plastics and their impact on the environment, could lead to promulgation of stricter government regulations and adoption of rigorous waste management rules which in turn may require us to make additional capital expenditures, incur additional expenses or take other actions in order to remain compliant and maintain our current operations. Further, certain of our products involve complex multilayer structures, which pose recycling challenges and hinder effective end-of-life management. This may attract heightened regulatory scrutiny and require us to invest in alternative materials, redesign our products, or adopt enhanced waste management processes, which could increase our costs and adversely impact our operations.

Further, the increasing focus on the environmental impact of plastics has led to evolving regulatory frameworks which may require us to incur additional capital expenditure, increase operational costs or modify our products and processes. Additionally, transitioning towards sustainable packaging solutions, including recyclable mono-material structures and biodegradable or compostable alternatives, requires significant capital investment and involves technical and performance-related challenges. In addition, inadequate recycling infrastructure, particularly for multi-layer packaging, and lack of uniform waste collection and segregation systems may hinder environmentally sound disposal and recycling of such materials, which could expose us to increased costs, operational constraints or reputational risks.

On happening of any of the abovementioned events, we may have to completely halt our business operations or reduce our production to comply with the prevalent government and industrial regulations. In the event, we are forced to shut down our factory for a prolonged period; it would adversely affect our earnings, our ability to repay our borrowings, our other results of operations and financial condition as a whole. Further on halting of our business operations, we may be required to repay the outstanding secured loans, failure of which would authorise our lenders to take appropriate actions enlisted as consequences of defaults of such agreements. We cannot assure you that the above-mentioned events will not occur or if they occur, we will effectively be able to deal with such events. In the event, we are forced to shut down our factory or halt our business operations, the continuity of our business operations, revenue, result of operations and financial condition might be adversely affected.

6. *Inadequate or uninterrupted supply and price fluctuation in our products could adversely affect our business, results of operations, cash flows, profitability and financial condition.*

Our company engages in the manufacturing and trading of different types of films, rolls and pouches. We offer customized and wide range of packaging films solutions to business-to-business (B2B) manufacturers operating across diverse industries and to other customers as per based on specific orders. We do not have long-term contracts with our suppliers and usually get raw materials based on price quotes from different vendors. Since suppliers are not legally bound to supply to us, they may choose to sell to others, including our competitors. We book supply in advance based on our expected demand, but any delay, shortage, or poor-quality material can disrupt our production. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacturing of our products, could have a material adverse effect on our business.

Our operations are also subject to volatility in prices of petrochemical based raw materials such as Cast polyethylene and Cast polypropylene, which are linked to global crude oil prices. Our ability to get raw materials at the right price and in the needed quantity depends on factors like global and local price changes, weather, supply and demand, transport issues, inflation, government rules and how much bargaining power we have. All of this can affect our costs and ability to deliver products on time. Our company passes on the cost escalations to our customers; however, we may not be able to pass on every instance of escalation in input costs and may have to pursue internal cost control measures or may have to absorb in some instances. If we are not able to effectively pass on our escalated costs to customers, such price escalations could have a material adverse impact on the results of operations, financial condition and cash flows.

7. *We are dependent on our top suppliers for uninterrupted supply of Raw-Materials and purchase stock in trade. Any shortfall in the supply, or an increase in costs and other input costs, may adversely affect the pricing and supply of our products with subsequently having an adverse effect on the business, results of operations and financial conditions of our company.*

We procure our supply of raw materials and purchase stock in trade from various approved suppliers depending upon the price and quality. Raw materials and purchase stock in trade, are subject to supply disruptions and price volatility caused by various factors such as commodity market fluctuations, the quality and availability, consumer demand, changes in government policies and regulatory sanctions. Any disruption of supply from

these suppliers will adversely affect our operations. The contributions of our top 1, top 5 and top 10 suppliers are as follows:

(Rs. In Lakhs)

| Particulars | November 30, 2025 | | March 31, 2025 | | March 31, 2024 | | March 31, 2023 | |
|------------------|-------------------|---------|----------------|--------|----------------|--------|----------------|--------|
| | Amount | % | Amount | % | Amount | % | Amount | % |
| Suppliers | | | | | | | | |
| Top 1 Supplier | 2,044.29 | 31.59% | 5,087.89 | 41.49% | 2,343.13 | 31.89% | 3,094.99 | 72.66% |
| Top 5 Suppliers | 6,355.59 | 98.22% | 12,226.94 | 99.64% | 6,490.48 | 98.73% | 4,160.25 | 97.67% |
| Top 10 Suppliers | 6,470.38 | 100.00% | 12,258.37 | 99.81% | 7,345.32 | 99.97% | 4,256.77 | 99.93% |

By collaborating exclusively with approved vendors, we ensure a consistent supply at agreed-upon rates and within specified timelines. Additionally, the expansive pool of suppliers within our industry mitigates the potential impact of the loss of any individual supplier on our production processes and, consequently, our overall profitability. This diversified supplier network contributes to the resilience of our supply chain, enabling us to maintain operational continuity and uphold the quality standards that define our business.

However, we cannot assure you that we will be able to continue to procure raw materials and stock in trade from our existing suppliers on commercially acceptable terms or at all. Any failure by our suppliers to supply raw materials and stock in trade in a timely manner, any significant increase in input costs, or our inability to identify and engage alternative suppliers in a timely manner may disrupt our supply chain and production processes. Such disruptions could adversely affect our ability to meet customer demand, which may have a material adverse effect on the business, results of operations and financial condition of Our Company.

8. *Our success largely depends upon the knowledge and experience of our Key Managerial Personnel, Senior Managerial Personnel and Promoters of our company. Loss of such KMP, SMP and promoter and our ability to attract and retain them could adversely affect our business, operations and financial condition.*

Our Company's growth and success are significantly dependent on the experience, continued services, and management skills of our Key Managerial Personnel as well as the guidance of our Promoter, Mr. Kunjit Maheshbhai Patel, in formulating business strategies, monitoring their implementation, and addressing future challenges. The expertise and contributions of our Key Managerial Personnel, Mr. Uday Misal and Mr. Amit Punambhai Parmar, and our Senior Managerial Personnel, Mr. Rupesh Kumar Mittal are valuable to the operations of our Company. Our future performance and growth depends, to a large extent, on our ability to attract, motivate, and retain skilled managerial personnel.

We cannot assure you that we will be successful in recruiting or retaining a sufficient number of personnel with the requisite skills to replace any of our Key Managerial Personnel or Senior Managerial Personnel who may resign or otherwise discontinue their services. Any inability to retain or replace such personnel in a timely manner may adversely affect our business operations, financial condition, results of operations, and prospects, and could hinder our ability to achieve future business growth.

For further details of our Key Managerial Personnel and Senior Managerial Personnel, please refer to the chapter titled "Our Management" beginning on page 215 of this Prospectus.

9. *The land proposed to be acquired for the purposes of establishing new manufacturing facility from the proceeds of the Issue is not currently registered in the name of our Company.*

Our Company proposes to utilize a portion of the Net Proceeds towards the acquisition of land situated at Survey No. 47/1 Paiki, Moje: Dhandha, Taluka Himatnagar, Sabarkantha – 383001, Gujarat, admeasuring approximately 4,502 square meters.

As of the date of this Prospectus, the aforesaid land is not registered in the name of our Company and is currently owned by Radhaben Hikmat Kunwar (erstwhile promoter of the Company). The Company has executed an Agreement for Sale dated March 05, 2026 with the Radhaben Hikmat Kunwar for the acquisition of the said land. The proposed acquisition of the land is intended to be funded from the Net Proceeds of the Issue.

The completion of the proposed acquisition is subject to execution of the final sale deed, payment of the agreed consideration, registration of the property in the name of our Company, and completion of other customary conditions and formalities under applicable law. There can be no assurance that the proposed acquisition and registration of the land in the name of our Company will be completed within the anticipated timelines.

Any delay in the completion of the acquisition, registration of title in favour of our Company, or any defects in title or other legal or regulatory issues relating to the land may result in delays in the implementation of the project for which the Issue proceeds are proposed to be utilized. Such delays may adversely affect our business operations, financial condition, cash flows and results of operations.

10. *The land proposed to be acquired by our Company from the erstwhile promoters is currently mortgaged in favour of Canara Bank for a loan availed by our Company and will continue to remain mortgaged after the proposed acquisition, which may expose us to certain risks.*

Our Company has availed a loan facility from Canara Bank, for which a land situated at Survey No. 47/1 Paiki, Moje: Dhandha, Taluka Himatnagar, Sabarkantha – 383001, Gujarat, which is currently owned by the erstwhile promoters of Our Company has been mortgaged as security in favour of the Bank. Our Company proposes to acquire the ownership of the said land from the erstwhile promoters out of the Issue Proceeds. However, the mortgage created in favour of Canara Bank will continue to subsist even after the proposed transfer of ownership, as the land has been provided as security for the loan facility availed by our Company.

Accordingly, while the ownership of the land is proposed to be transferred to our Company, the property will continue to remain encumbered in favour of Canara Bank until the loan facility is fully repaid or the charge is otherwise released by the Bank. In the event of any default by our Company under the terms of the loan facility, the Bank may enforce its security interest over the mortgaged land in accordance with applicable laws. Further, any delay in completion of the proposed acquisition, execution of necessary documentation or compliance with applicable regulatory requirements may expose Our Company to legal and operational risks.

We cannot assure you that the proposed acquisition and related formalities will be completed in a timely manner or without any regulatory or legal implications. Any such events may adversely affect our business operations, financial condition and future prospects.

11. *There may have been certain instances of irregularities, discrepancies and non-compliance with respect to filing of certain statutory forms with the Registrar of Companies as per the reporting requirements under the Companies Act, and we cannot assure you that no adverse action or penalty will be imposed by the regulatory authorities against Our Company in this regard.*

Under the applicable provisions of the Companies Act, 2013, Our Company is required to file various event based and other e forms with the Ministry of Corporate Affairs (“MCA”). As noted in the Due Diligence Report received from the Practicing Company Secretary, our Company has, in the past, experienced instances of irregularities / non-compliance and/or delays in filing certain statutory forms and returns with the Registrar of Companies. The key observations are as follows:

- a. Our Company has, in the past, delayed the filing of certain statutory forms with the Registrar of Companies (RoC), including but not limited to the following:

Our Company has made the requisite filings as mentioned above with payment of additional fees to the Ministry of Corporate Affairs, as applicable.

- b. On certain occasions Our Company had made inadvertent clerical / typographical errors which include recording the date of the Board meetings in e-form MGT-7 filed for F.Y. 2016 - 17. This resulted in a mismatch between the minutes of meetings maintained by Our Company and the information reported in the said return. Although no show cause notice has been issued against the Company till date in respect of above, such delay, noncompliance may in the future render us liable to statutory penalties and could have serious consequences on our operations.
- c. Our Company has been unable to trace bank statements relating to allotments made on June 23, 2005, March 31, 2006, January 23, 2009, and February 25, 2014. Despite sending written communications via email to the concerned banks to obtain copies of these statements, no response has been received. Consequently, we have relied on internal records and supporting documents, such as the minutes of the meetings of Our Company, to ascertain the details of the equity shares issued during the relevant periods. Owing to the unavailability of these bank statements and forms, independent verification of certain allotment related transactions from those years is not feasible.
- d. Our Company has been unable to trace the share transfer forms relating to transfers effected on November 18, 2008 and December 26, 2011. Despite efforts made to locate these records, they are currently not available in the Company's possession. Consequently, independent verification of the underlying documents for these specific share transfers is not possible. We have relied on its statutory registers and other available records to ascertain the details of these transfers. However, the absence of the original transfer forms may limit the ability to independently substantiate the underlying transactions.
- e. Our Company had obtained two valuation reports from independent registered valuers dated November 29, 2022, in connection with a preferential allotment of Equity Shares dated November 30, 2022. Under one valuation report, the fair value of the Equity Shares was determined at ₹20.44 per share. Under the other valuation report, the fair value was determined at ₹20 per share, with the valuer having rounded off the computed value of ₹20.44 per share to ₹20 per share.

Based on the valuation report determining the fair value at ₹20 per share, Our Company carried out the preferential allotment of Equity Shares at a price of ₹20 per share on November 30, 2022. However, while filing Form PAS-3 in relation to the said preferential allotment, Our Company inadvertently attached the valuation report reflecting the fair value of ₹20.44 per share instead of the valuation report on the basis of which the allotment was actually undertaken. Issuance of Equity Shares at a price lower than the value reflected in the incorrectly attached valuation report may be construed by regulatory authorities as a non-compliance with Section 62(1)(c) of the Companies Act, 2013 read with Rule 13 of the Companies (Share Capital and Debentures) Rules, 2014 and other applicable provisions of the Companies Act, 2013. To rectify

the discrepancy, Our Company has filed a revised Form PAS-3 along with the valuation report forming the basis of the preferential allotment.

- f. For FY 2020–21, Our Company inadvertently filed Form MGT-7A instead of Form MGT-7, though it did not qualify as a Small Company. In addition, while filing Form AOC-4, Form MGT-7A and issuing the Annual Report (including the Directors' Report), Our Company mistakenly disclosed the shareholding pattern and promoter details as they existed before certain share transfers during the year. Accordingly, the impact of such transfers was not reflected in the annual filings, and the records for FY 2020–21 may not fully reflect the correct shareholding structure and holding company details as on the reporting date.

Our Company has identified that this resulted in non-compliance with Sections 92 and 129 of the Companies Act, 2013, due to the omission of holding company details in the relevant filings and to regularize the matter, Our Company has voluntarily applied for adjudication under Section 454 of the Companies Act, 2013 in Form GNL-1 vide SRN AC2453172, and the application is currently under process. There can be no assurance regarding the outcome of the proceedings. Any adverse decision may result in penalties or other regulatory actions, which could impact Our Company's financial position and operations.

- g. In the financial year 2021–22, Roopyaa Finbizz Limited acquired 99.99% of the equity share capital of the Company and thereby became the holding company of the Company. Pursuant to such acquisition, the Company was required to comply with the provisions relating to declaration and filing of beneficial interest in shares in accordance with Section 89 of the Companies Act, 2013.

However, the Company has not filed Form MGT-6 with the Registrar of Companies within the prescribed timeline as required under Section 89 of the Companies Act, 2013. Further, any subsequent changes in beneficial interest, if any, have also not been filed with the Registrar of Companies as required under the applicable provisions of the Companies Act, 2013.

Such non-compliance may attract penalties on the Company and its officers in default under the applicable provisions of the Companies Act, 2013. The Company may be required to undertake necessary steps to regularize the aforesaid non-compliance, including filing the requisite forms and payment of applicable additional fees or penalties, if any. Any regulatory action or penalties imposed in this regard may have an adverse impact on the Company's compliance status and financial position.

- h. Our Company issued bonus shares on July 7, 2025 by capitalizing ₹1,500.00 lakhs out of its free reserves and surplus of ₹1,702.06 lakhs as at March 31, 2025, based on a certificate dated July 4, 2025 issued by our Statutory Auditor, B.S. Thakker & Co., Chartered Accountants, confirming the availability of free reserves

However, the certificate was issued without mentioning the required UDIN (Unique Document Identification Number) as mandated by the ICAI guidelines, due to an inadvertent oversight. The omission was identified during IPO due diligence, following which the Statutory Auditors generated the UDIN on February 3, 2026.

While the UDIN has since been generated, the initial non-compliance may attract regulatory scrutiny or disciplinary action against the auditors. Any such action, delay, or penalty could adversely affect Our Company's reputation, business, results of operations, cash flows, and financial condition

Such instances of delays in filings, procedural lapses, typographical or clerical errors in e-forms, and non-traceability of certain historical secretarial records may attract regulatory scrutiny, adjudication proceedings, penalties, compounding proceedings, additional fees, or directions from the Registrar of Companies, Ministry of Corporate Affairs or other statutory authorities in relation to such matters.

Our Company has taken and continues to take steps to regularize such matters and strengthen its internal compliance processes. However, notwithstanding such corrective actions, there can be no assurance that similar delays, errors, or compliance lapses will not occur in the future and that Our Company will not be subjected regulatory risks.

While the management believes that such matters do not materially affect Our Company's financial condition, shareholding pattern, operations, or business prospects, any requirement by regulatory authorities to produce records, any adverse inference drawn due to non-availability of records, or any adverse regulatory action or order may affect Our Company's compliance track record, reputation, credibility with stakeholders, and its ability to raise capital in the future, which could have an adverse effect on its business, financial condition, results of operations, and prospects.

12. *Our Promoter has limited experience in our line of business, which may adversely affect our operations and growth prospects.*

Our Promoter, Mr. Kunjit Maheshbhai Patel, joined our Company in 2022 and has comparatively limited experience in our line of business. While he has contributed to our growth since joining, such limited experience may affect his ability to fully anticipate industry challenges, competitive pressures, and evolving customer preferences. Any inability on the part of our Promoter to provide effective guidance and strategic support to our management team may adversely impact our business operations, financial performance, and future growth prospects.

13. *The introduction of alternative packaging materials caused by changes in technology or consumer preferences may affect demand for our existing products, which may adversely affect our financial results and business prospects.*

Our products are used mainly by companies who require packaging materials for FMCG, Pharmaceuticals, Food Products etc. Our business is affected by changes in technology, attractiveness, convenience, safety and environmental norms. Growing consumer preference and regulatory push towards eco-friendly alternatives, such as paper-based packaging, may reduce demand for our existing products. Our ability to anticipate such changes and to continuously develop and introduce new and enhanced products successfully on a timely basis will be a key factor in our growth and business prospects. There can be no assurance that we will be able to keep pace with the technological advances that may be necessary for us to remain competitive. Any failure to forecast and/or meet the changing demands of packaging businesses and consumer preferences may have an adverse effect on our business, profitability and growth prospects.

14. *One of our Promoter is a corporate entity, which may limit direct involvement and guidance in our business operations and may affect our operations, business performance and growth prospects.*

One of our Promoter is a corporate promoter, and unlike individual promoter, such an entity may not be able to devote personal attention or provide direct strategic guidance to Our Company's operations on a continuous basis. The decision-making process within a corporate promoter may involve multiple stakeholders, which can delay or dilute timely inputs. Further, any adverse developments relating to the corporate promoter, including changes in its ownership, management, financial condition, or strategic priorities, could have a material impact on its ability or willingness to support our Company. These factors may affect our operations, business performance, and growth prospects.

15. *Our majority of our revenue is concentrated in Gujarat and any adverse developments affecting our operations in these regions could have a significant impact on our revenue*

Our Revenue is majorly dependent from the Gujarat state only. We generated almost 100.00%, 99.26%, 90.78% and 96.77% of the total revenue from Gujarat for the period ended 30th November, 2025, financial year ended on 31st March, 2025, 31st March, 2024 and 31st March 2023 respectively. The heavy reliance on Gujarat exposes our Company to concentration risk. Clients in Gujarat state may contribute a substantial share of our revenue in the future. The loss of a major client or reduced business from significant clients in this region could have a considerable negative impact on our financials. Any adverse economic, regulatory, or business conditions in the said state could significantly impact our financial performance and overall stability. To reduce revenue dependency from Gujarat state, we will strategically focus on expanding our presence into other regions. By diversifying our operations geographically, we aim to balance revenue generation and minimize the impact of regional risks. While we are cognizant of this risk and are actively implementing mitigation strategies, there can be no assurance that unforeseen events or challenges will not affect our financial performance.

16. *Our working capital loans are repayable on demand, and any withdrawal of such facilities may adversely affect our business operations.*

Our Company has availed working capital loan facilities from banks/financial institutions which are repayable on demand. Since such facilities are sanctioned at the sole discretion of the lenders, they may withdraw or reduce the limits at any time without prior notice. In the event our lenders recall the facilities or do not renew/extend the same, we may be required to arrange alternative financing at higher costs or use our internal accruals, which could strain our liquidity position.

Any inability to timely arrange alternate funding may disrupt our operations, affect our ability to meet working capital requirements, and could have an adverse effect on our business, financial condition, results of operations, and prospects.

17. *We have entered into certain related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

We have entered into related party transactions with our Promoters, Directors and other associates. While we believe that all such transactions have been conducted on the arms-length basis, however it is difficult to ascertain whether more favourable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. All related party transactions that we may enter into post listing, will be subject to an approval by our Audit Committee, Board, or Shareholders, as required under the Companies Act and the SEBI Listing Regulations. Such related party transactions in the future or any other future transactions may potentially involve conflicts of interest which may be detrimental to the interest of our Company and we cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, financial condition, results of operations, cash flows and prospects. For details on the transactions entered by us, please refer to Chapter titled "**Restated Financial Statements**" beginning on page 241 of this Prospectus.

18. *Some of the KMPs are associated with our Company for less than one year and may have limited familiarity with our business operations and internal processes.*

Our CFO Mr. Amit Punambhai Parmar is associated with Our Company for a period of less than one year in the capacity of CFO. Due to the limited duration of their association with Our Company, such personnel may still be in the process of becoming fully acquainted with our business operations, internal systems, policies and procedures.

While we believe that our KMPs possess the necessary experience and qualifications to perform their respective roles, the limited tenure of certain KMPs with our Company may affect the continuity and effectiveness of our management and decision-making processes. Any inability of such personnel to quickly adapt to our operational and regulatory environment could have an adverse effect on our business operations, financial condition and results of operations.

For details of Key Management Personnel and their appointment, please refer to chapter **“Our Management”** beginning on page 215 of this Prospectus.

19. We have incurred indebtedness, and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.

Any failure to comply with such obligations may result in an event of default, leading to acceleration of repayment, enforcement of security and imposition of additional restrictions on our operations. Such events could adversely affect our business, cash flows, financial condition and results of operations.

For further details, please refer to the chapter titled **“Financial Indebtedness”** beginning on page 264 of this Prospectus.

There have been instances of delays in filing of statutory returns and in the payment of statutory dues to government authorities in the past, including payment of Professional Tax. Further, our Company has formed a compliance team comprising the Managing Director, Accountant with the additional oversight of Statutory Auditor to strengthen our regulatory and statutory compliance processes. This team will ensure the timely and accurate adherence to all relevant laws, oversee the submission of required documents to regulatory authorities, and monitor ongoing compliance to prevent any future errors similar to those made previously. Additionally, Our Company is currently reviewing past mistakes/errors/delays related to the preparation and filing of its e-forms / documents / records in accordance with the applicable laws and intends to implement appropriate measures to ensure compliance with applicable rules, regulations and legal provisions going forward.

While Our Company endeavours to comply with all applicable statutory requirements in a timely manner, there can be no assurance that such delays will not occur in the future. Any such delays may result in the levy of penalties, interest or other actions by the relevant authorities, which could have a material adverse impact on our financial condition and cash flows.

21. A significant portion of our revenue is derived from our Holding Company and we have availed substantial financial support from our Managing Director, exposing us to risks of dependence, potential conflicts of interest and adverse changes in such arrangements.

We have entered into, and may continue to enter into, transactions and arrangements with our related parties, including our Holding Company and certain of our Directors. Such arrangements expose us to risks of dependence, potential conflicts of interest and the possibility that such transactions may not always be on terms as favourable as those that could have been obtained from unrelated parties.

A summary of our key related party exposures for the periods indicated is set out below:

(Rs. In Lakhs)

Our dependence on the Holding company for a portion of our revenue exposes us to concentration risk, and there can be no assurance that such business will continue at similar levels or on similar terms in the future. Any reduction, modification or termination of such arrangements may adversely affect our business, revenue, cash flows and results of operations.

Further, we have availed funding from our Managing Director and have paid remuneration to certain related parties who were Directors in the relevant periods. While such arrangements have supported our operations, there can be no assurance that such financial support or services will continue to be available or will be available on favourable terms in the future. Any withdrawal, recall, adverse modification or discontinuation of such arrangements may adversely impact our liquidity, cost structure and overall financial position.

Although related party transactions are subject to necessary approvals under applicable laws, these arrangements may involve conflicts of interest and there can be no assurance that they will always be in the best interests of our minority shareholders. Any adverse change in or discontinuation of these arrangements could have a material adverse effect on our business, financial condition, results of operations, cash flows and prospects.

22. A significant increase in our trading revenues relative to manufacturing revenues, driven by capacity constraints and business strategy, may adversely impact our margins, increase dependence on third-party suppliers and affect utilization of our manufacturing facilities.

Our Company operates in both manufacturing and trading segments. The company has experienced a significant increase in the contribution of trading revenues to our total revenue, as set out below:

(Rs. in lakhs)

| Particulars | 2022-23 | | 2023-24 | | 2024-25 | | Nov-25 | |
|---------------|-----------------|----------------|-----------------|----------------|------------------|----------------|-----------------|----------------|
| Manufacturing | 4,124.11 | 88.02% | 5,328.63 | 66.64% | 6,038.10 | 44.57% | 2,621.83 | 37.63% |
| Trading | 561.55 | 11.98% | 2,667.26 | 33.36% | 7,507.96 | 55.43% | 4,344.65 | 62.37% |
| Total | 4,685.65 | 100.00% | 7,995.89 | 100.00% | 13,546.07 | 100.00% | 6,966.49 | 100.00% |

The manufacturing revenue of Our company has increased from Rs. 4,124.11 lakhs in F.Y. 2022-23 to Rs. 5,328.63 lakhs and Rs. 6,038.10 lakhs in F.Y. 2023-24 and F.Y. 2024-25 respectively. While the manufacturing sales has increased over the years, the trading sales has also increased from Rs. 561.55 lakhs in F.Y. 2022-23 to Rs. 2,667.26 lakhs and Rs. 7,507.96 lakhs in F.Y. 2023-24 and F.Y. 2024-25 respectively.

The manufacturing sales have increased at a growth of 29.21% and 13.31% in F.Y. 2023-24 and F.Y. 2024-25 respectively and trading sales have increased at a growth of 374.98% and 181.49% in F.Y. 2023-24 and F.Y. 2024-25 respectively. There is a constant growth in manufacturing operations and the growth in the trading segment is primarily driven by our Company's strategic expansion, including higher order volumes from existing customers. As part of this strategy, our Company has consciously undertaken trading activities to accept higher volumes of orders, with a view to build and retain customer relationships, which is aligned with its long-term plan to expand and upgrade manufacturing capacity and gradually shift such traded products to in house production, thereby improving margins.

Further, Our Company experienced capacity constraints in our existing manufacturing facilities, particularly during periods of elevated demand. In order to ensure timely execution of orders and avoid loss of business opportunities, Our Company procured finished goods from third party manufacturers to service excess and specialized requirements. Such transactions are recognized as trading sales, leading to an increased share of trading in the overall sales mix. As a result, we are exposed to risks relating to supplier dependence, including potential disruptions in supply, variability in quality, and fluctuations in procurement costs.

Trading activities typically yield lower margins compared to manufacturing due to limited value addition and lower pricing flexibility. Accordingly, the increasing contribution of trading revenues has led, and may continue to lead, to moderation in our overall margins.

In addition, our existing manufacturing facilities have historically operated at sub-optimal capacity utilization levels, as set out below:

| Particulars | 30-11-2025 | 31-03-2025 | 31-03-2024 | 31-03-2023 |
|--------------------------|------------|------------|------------|------------|
| Installed Capacity (MT) | 3,360.00 | 5,040.00 | 5,040.00 | 5,040.00 |
| Production Volume (MTPA) | 1,210.92 | 2,658.10 | 2,354.05 | 1,835.46 |
| Capacity Utilization (%) | 36.04 | 52.74 | 46.71 | 36.42 |

Such lower utilization is attributable to operational and technological limitations of existing machinery, including lower operating speeds, higher changeover time and inability to undertake certain high specification jobs. Consequently, certain orders are executed through third-party manufacturers and reflected as trading revenues.

While we intend to expand and upgrade our manufacturing capacity and capabilities, including through proposed capital expenditure, and to progressively convert a portion of trading revenues into manufacturing revenues, there can be no assurance that such transition will be achieved within expected timelines or at all.

If we are unable to improve our manufacturing capacity utilization, successfully execute our capacity expansion plans, reduce dependence on third-party suppliers, or maintain our margins despite an increasing share of trading revenues, our business, results of operations, financial condition and cash flows could be materially and adversely affected.

23. Our Promoter had been associated with companies that have been struck off, which may attract regulatory scrutiny or investor concerns.

Our Promoter, Mr. Kunjit Maheshbhai Patel , was a director of Viveza Ventures Private Limited, from which he resigned with effect from March 20, 2017, and was appointed as director of Krish Professional Services Private Limited under Promoter Category, from which he resigned with effect from October 5, 2015. However, the relevant resignation forms in the case of Krish Professional Services Private Limited were not filed with the Registrar of Companies by such company. Subsequently, Viveza Ventures Private Limited and Krish Professional Services Private Limited were struck off by the Registrar of Companies.

The management believes that the strike-off of these entities was not on account of any fraud, misconduct, or mismanagement by Mr. Kunjit Maheshbhai Patel as he had resigned from such companies. However, regulatory authorities or investors may seek clarifications or take an adverse or cautious view of such past associations, including with respect to the non-filing of resignation forms. Any adverse perception, inquiry, or regulatory action

arising from these matters may adversely affect Our Company’s reputation, business, financial condition, results of operations, and future prospects and may attract regulatory scrutiny or investor concerns.

24. Our Promoters / Directors and certain other persons have provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.

Our Promoters/ Directors and certain other persons have provided personal guarantees in relation to certain loan facilities availed by us. In the event that any of these guarantees are revoked or, the lenders for such facilities may require alternate guarantees or an additional security, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative guarantees or provide an alternate collateral security in a timely manner or at all. If our lenders enforce these restrictive covenants or exercise their options under the relevant debt financing agreements, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details, please refer to the chapter titled — **“Financial Indebtedness”** on page 264 of this Prospectus.

25. Material statutory clearances for our proposed manufacturing facility are pending, and failure to obtain them may adversely affect our operations.

Our Company is in the process of establishing a new manufacturing facility to be sourced out of Issue Proceeds, for which certain material statutory approvals and clearances from relevant authorities are required to be obtained at various stages as detailed below:

| S. No. | Particulars of licenses | Tentative Time Period of application |
|--------|---|---|
| 1. | Factory Layout & Building Plan Approval | Within 1 week from date of execution of Sale Deed, Prior to commencement of construction of factory building |
| 2. | Consent to Establish | Within 1 week from date of execution of Sale Deed, Prior to commencement of construction / installation of plant and machinery. |
| 3. | Certificate of Stability issued under the Factories Act, 1948 | Before Commissioning of manufacturing unit |
| 4. | License to work a factory under Section 6(1) the Factories Act, 1948 | Prior to commencement of manufacturing operations |
| 5. | Certificate of Registration under Legal Metrology (Packed Commodities), Rules, 2011 | After the commencement of manufacturing operations, Prior to commencement of sale of products |
| 6. | ISO 9001:2015, Quality Management Systems | After commencement of Manufacturing Operations |
| 7. | Water Requirement | Within 15 days of approval of building plan. |
| 8. | Power and Fuel Requirement | Within 15 days of approval of building plan. |

Such approvals are granted on commencement or completion of various activities, as applicable. All such approvals shall be procured as and when they are required in accordance with applicable law. Until such approvals are granted, Our Company may face restrictions on commencing operations at the new manufacturing facility. Any delay, refusal, or conditions imposed by the authorities in granting these approvals could adversely affect the planned operations, expansion schedule, and overall business prospects of Our Company.

26. Our Current order book may not necessarily translate into future income in its entirety. Some of current orders which we have received may be modified, cancelled, delayed, put on hold or not fully paid for by customers, which could adversely affect our results of operations.

Our company is primarily engaged in the business of manufacturing and trading of printed multilayer flexible packaging material such as plastic film rolls and pouches which are predominantly used for packaging applications across various industries.

Our company operates in the industry with a short manufacturing and delivery cycle that allows us to efficiently manufacture and deliver products in a rapid timeframe which results into production as needed basis. Historically, we did not prepare an official order book for all of our products.

We manufacture our products on the basis of orders which are received from our customers which generally contain the specifications as per which the packaging material has to be manufactured, which may result in wrong prediction of the production capacity and our production capacity may remain underutilized.

As of March 31, 2026, our outstanding order book aggregated to Rs. 2,329.98 lakhs. Our order book comprises of orders received from customers that are pending at execution stage; however, it may not be a reliable indicator of our future income. While we expect the current order book to translate into revenues over the respective execution periods, realization of such revenues is subject to various risks, including modification, cancellation, delay in execution, or being placed on hold by customers due to changes in their requirements, financial position, or prevailing market conditions. Further, there may be instances of delayed payments or non-recovery of amounts from customers. Although we have not such experienced material order cancellations in the past, there can be no assurance that similar events will not occur in the future.

Accordingly, there can be no assurance that all orders in our order book will be executed as anticipated or will result in actual income. Any such modifications, cancellations, delays, or payment defaults may adversely affect our revenue, cash flows, and results of operations.

27. The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue price.

Our Promoters' average cost of acquisition of Equity Shares in our Company is lower than the Issue Price as decided by Our Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters and build-up of Equity Shares by our Promoters in our Company, please refer chapter title "**Capital Structure**" and "**Summary of Issue Document**" beginning on page 90 and 23, respectively of this Prospectus.

| Sr. No. | Name of Promoters | No. of equity shares held | Average cost of acquisition (in ₹ per equity share) |
|---------|---------------------------|---------------------------|---|
| 1. | Roopyaa Tradebizz Limited | 1,62,50,000 [^] | 1.08 |

[^] Includes seventy-eight (78) equity shares of face value ₹10 each, comprising thirteen equity share of face value ₹10 held by each of Kunjit Maheshbhai Patel, Kushang Surendrakumar Thakkar, Amit Punambhai Parmar, Kanaiyalal Harishankar Mehta, Rupesh Kumar Mittal, and Jitesh Joitaram Patel, on behalf of and as nominees of our Promoter, Roopyaa Tradebizz Limited.

28. The deployment of proceeds from the Issue may not be fully realizable as planned, which could affect our business and financial condition.

Our Company intends to utilize the net proceeds from the Issue for purposes as stated in the "Objects of the Issue" section of this Prospectus. However, the actual deployment of the proceeds may vary depending on future

business conditions, regulatory approvals, market conditions, and other factors. Any delay, inability, or deviation in deploying the proceeds as planned may adversely impact the intended expansion, working capital requirements, or other strategic initiatives, which in turn could have a material adverse effect on our business, financial condition, results of operations, and prospects.

29. *Our revenues, growth and Profit after Tax may fluctuate and we may not be able to sustain our historical growth levels and profit after tax margins, which could adversely affect our business and results of operations.*

We have experienced growth in our operations in recent years. Our revenues from operations for the period ended November 30, 2025 and the financial years ended March 31, 2025, March 31, 2024 and March 31, 2023 amounted to ₹6,966.49 lakhs, ₹13,546.06 lakhs, ₹7,995.89 lakhs and ₹4,685.66 lakhs, respectively. Further, we have earned a profit after tax margin of 5.51%, 6.15%, 7.24% and 1.43% respectively for the period ended November 30, 2025 and the financial years ended March 31, 2025, March 31, 2024 and March 31, 2023 respectively.

However, our historical growth rates and profit after tax margin may not be indicative of our future performance. Our revenues, growth and profit after tax margin may fluctuate from period to period and we may not be able to sustain our historical growth levels and profitability margins. Further, we have experienced negative growth in revenues during the stub period of Financial Year 2025–26 compared to the corresponding previous period, which may indicate potential volatility in our revenue trends and Our Company had experienced an increase in Profit after Tax margins during the Financial Year 2023-24. Such improvement may have been driven by certain factors, including favourable market conditions, better raw material cost management, cost efficiencies, operational improvements, increase in gross profit margins etc. which may not continue in future periods.

Our ability to sustain and manage our growth and profit after tax margins depends on several factors, including our ability to maintain and increase demand for our products from existing customers, acquire new customers, maintain the quality and precision levels of our products, manage increased price competition, ensure timely availability of raw materials, manage changes in input costs, pricing pressures, competitive dynamics, regulatory environment, or other external factors.

Any decline in demand for our products, inability to maintain product quality, disruptions in raw material supply or increased competitive pressures may adversely impact our revenues, growth and profit margins.

Our growth strategy involves deepening, diversifying and expanding our customer base, expanding our product portfolio, focusing on advanced technology and higher-margin products, and improving operational efficiencies to enhance returns. Implementation of such strategies may require significant investments in our operations and may place substantial demands on our management as well as our financial, accounting, operational and internal control systems and administrative infrastructure. If we are unable to effectively manage such growth initiatives or if our strategies do not achieve the intended results, our business, financial condition, results of operations and future prospects may be adversely affected.

Accordingly, there can be no assurance that we will be able to sustain our historical growth levels and profit after tax margins or successfully implement our growth strategies, and any inability to do so may have an adverse effect on our business, financial condition and results of operations.

30. *Our Company have unsecured loans that may be recalled by the lenders at any time.*

Based on restated financial statements, as on November 30, 2025, our Company has unsecured loan of ₹ 801.31 lakhs, from Promoter of our Company which are repayable on demand. These unsecured loans may be re- called at any time by these parties.

In the event these loans are required to be re-paid on a short notice, our Company may have to arrange additional fund which may affect our business, cash flows, financial condition and results of operations. For further details, see **“Financial Indebtedness”**, on page 264 of this Prospectus.

31. Our insurance coverage does not adequately protect us against losses (including damages or loss caused to the Products), and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.

Our insurance policies, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption, losses in transit, natural disasters etc. because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

The principal types of insurance coverage of Our Company include: (i) Building including plinth, Basement and additional structures; (ii) Furniture & Fixtures, Fittings and Other Equipment’s; and (iii) Plant and Machinery. Notwithstanding the insurance coverage that we carry, we may not be fully insured against certain business risks. There are many events that could significantly impact our operations, or expose us to third-party liabilities, for which we may not be adequately insured.

Further, certain assets of Our Company are not adequately insured, we could face liabilities or otherwise suffer losses should any unforeseen incident such as fire, flood, and accidents affect our premises. The following tables set forth details of coverage of our insurance policies against the total insurable assets.

| Particulars | Nature of Asset | November 30, 2025 | March 31, 2025 | March 31, 2024 | March 31, 2023 |
|------------------|-----------------|-------------------|----------------|----------------|----------------|
| Insured Assets | Inventory | 66.96% | 39.51% | 26.77% | 45.29% |
| | Fixed Assets | 62.42% | 59.67% | 55.90% | 111.72% |
| Uninsured Assets | Other Assets | Nil | Nil | Nil | Nil |

Note: Insurance coverage as % of assets is based on assets and net block of fixed assets as per the Restated Financial Statements.

While we periodically review Company’s insurance requirements to ensure adequate coverage, we cannot guarantee that all losses or claims will be fully covered under the existing policies. We have not faced any material instances of uninsured losses or rejection of insurance in the three preceding financial years.

32. We face significant competition from various packaging companies which may lead to a reduction in our market share, which in turn may adversely affect our business, results of operations, financial condition and cash flows.

We face significant competition from packaging companies. Increased competition from existing manufacturers and new entrants in the packaging market in India or outside India may cause us to lose or fail to attract new consumers, maintain existing customers and result in an overall reduction in our market share. If our competitors’ production capacity surpasses ours in terms of quality or performance or competitive pricing, our market share, profitability and results of operations may be adversely impacted. In addition, competition from existing and future competitors may affect our ability to adequately pass on any increases in materials and logistics costs, which may affect our operational profitability.

Our competitors may also innovate faster and more efficiently, and new technologies may increase competitive pressures by enabling competitors to offer more efficient or lower cost packaging capacity. Any failure by us to develop new or enhanced packaging products, or to react to changes in existing preferences, could materially delay our development of new and enhanced packaging solutions, which could result in the loss of competitiveness of our packaging sourcing solutions, decreased revenue and a loss of market share to competitors.

33. Our registered office and factory are located in Gujarat. Any adverse development affecting such region may have an adverse effect on our business, prospects, financial condition and results of operations.

Our Registered office and factory is situated at survey No. 32, Plot No. 15 and 16, Village: Dhandha, Himatnagar, Sabarkantha-383001, Gujarat. Any materially adverse social, political or economic development, natural calamities, civil disruptions, or changes in the policies of the states or local governments in this region could adversely affect operations at our Registered Office or factory. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts, or diseases heightened or particular to the region, may adversely impact the supply of products, local transportation and operations at our office and factory. Any such adverse development could result in significant loss from inability to meet inventory schedules and stock our plant appropriately, which could materially affect our business reputation within the industry. Should the supply of our products be disrupted, we may not be able to procure an alternate source of supply of products in time to meet the demands of our customers, or we may not be able to procure products of equal quality or on equally competitive terms, or at all. Such disruption to supply would materially and adversely affect our business, profitability and reputation. While our strategic objectives include geographical expansion across India, in the event that we are unable to make available our products in a prompt manner and within the requisite timelines, our business, financial condition and prospects may be adversely affected.

34. Our godown and Sales and admin office is taken on lease, and any non-renewal or termination of the lease may disrupt our operations.

Our Company's godown and Sales and admin office is taken on lease. These leases are subject to the terms and conditions agreed with the lessors and may be renewed or terminated at the lessors' discretion, in accordance with applicable laws. Any non-renewal, early termination, or unfavourable change in lease terms could adversely affect Our Company's ability to operate efficiently, disrupt storage and administrative operations, increase costs, or otherwise have an adverse effect on Our Company's business, financial condition, results of operations, and prospects.

35. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

(Rs. In Lakhs)

| Particulars | For the Financial Year/ period ended | | | |
|--|--------------------------------------|------------|------------|------------|
| | 30-11-2025 | 31-03-2025 | 31-03-2024 | 31-03-2023 |
| Net Cash flow from/ (used in) Operating Activities | 193.98 | (1,244.03) | (49.02) | 48.03 |
| Net Cash used in Investing Activities | - | (70.43) | (244.53) | (77.62) |
| Net Cash flow from/ (used in) Financing Activities | (194.03) | 1,314.69 | 286.60 | 42.55 |

Cash flow of a Company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external

resources. We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition. For further details, please refer to the section titled "**Financial Information**" and chapter titled "**Management's Discussion and Analysis of Financial Condition and Results of Operations**" beginning on page no. 241 and page no. 244 respectively of this Prospectus.

36. Our Company is dependent on third-party transportation providers for the delivery of our finished products and movement of raw materials and goods, any disruption in such services may adversely affect our operations.

Our Company requires transportation facilities for the delivery of finished products from our factory to our customers and distributors and for movement of raw materials, semi-finished goods and finished products between our godowns and manufacturing facility, as and when required. We are largely dependent on third-party transporters for such deliveries, which exposes us to various uncertainties and risks. For raw materials, the transportation cost is, in most cases, borne by our suppliers; however, in certain cases, we engage third-party transport agencies at our own cost.

In addition, raw materials and finished products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. Any compensation received from insurers or third-party transportation providers may be insufficient to cover the cost of any delays and will not repair damage to our relationships with our affected customers and distributors. We may also be affected by an increase in fuel costs, as it will have a corresponding impact on freight charges levied by our third-party transportation providers. This could require us to expend considerable resources in addressing our distribution requirements, including by way of absorbing these excess freight charges to maintain our selling price, which could adversely affect our results of operations, or passing these charges on to our customers, which could adversely affect demand for our products. Further, we have not entered into any long-term agreements with our transporters for our manufacturing units and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfil their obligations or would not commit a breach of the understanding with us.

Accordingly, any disruption in availability of transportation services for movement of goods between our godowns and manufacturing facility or for delivery of finished products to customers may adversely affect our operations and ability to meet customer requirements in a timely manner.

37. Our business is dependent on the adequate and uninterrupted supply of electrical power and water at a reasonable cost. Our Company does not have suitable power back-up to meet power failure exigencies.

Our business operations are highly dependent on the adequate and uninterrupted supply of electrical power and water at a reasonable cost. We currently source our power requirements from UGVCL and do not have any power back-up facilities such as generators or UPS. Any shortage or disruption in power supply may adversely affect our manufacturing process, cause delays in meeting customer requirements, and negatively impact our financial performance. Frequent or prolonged power outages could also result in loss of business, reputational harm, and financial losses. Further, if the per unit cost of electricity is increased by the state electricity board, we may not be able to pass on such increases to our customers, which may adversely affect our profit margins. In addition, water is a key component for our manufacturing operations. At present, our water requirements are met from a borewell at our manufacturing unit. Any disruption or non-availability of water, or our inability to arrange alternate sources in a timely manner, may adversely impact our production, operations, and overall business results.

38. Our company is yet to place orders for any of the components of the Proposed Capital Expenditure, any delay may result in extended project timelines, cost escalations, and potential disruptions to our planned expansion.

As of the date of this Prospectus, we have not yet placed orders for the Construction and development of infrastructure and associated facilities and purchase of plant and machinery required for our Proposed Capital Expenditure. We have obtained quotations from third-party vendors for the proposed Construction and development of infrastructure and associated facilities aggregating to approximately Rs. 398.75 lakhs, excluding GST, interest charges, freight and insurance charges and purchase of plant and machinery to be installed at the new manufacturing facility, aggregating to approximately Rs. 343.05 lakhs, excluding GST, interest charges, freight and insurance charges. These quotations are valid for a period of 6 months and 12 months respectively from the date of quotation and may be subject to revisions due to changes in market conditions, commercial terms or other technical factors.

Any delay in placing orders may result in cost escalations, limited availability of equipment or extended project timelines. In addition, there can be no assurance that the vendors from whom we have received quotations will be able to undertake the construction and development of infrastructure and associated facilities as well as supply and installation of plant and machinery for the manufacturing plant within the required timelines or at the quoted prices. If we are unable to engage such vendors for construction and development work and for procurement of the required plant and machinery, we may be required to identify alternative suppliers, which may lead to further delays or higher costs.

Such delays or cost increases may result in time and cost overruns in the implementation of our Proposed Capital Expenditure and could adversely affect the deployment schedule of the Net Proceeds, our expansion plans, business operations, financial condition and future growth prospects.

39. *The objects of the issue include funding working capital requirements of our Company, which are based on certain assumptions and estimates and such working capital requirements may not be indicative of the actual requirements of our Company.*

The objects of the issue include funding working capital requirements of our Company, which are based on management estimates and certain assumptions in relation to inter alia cost and holding periods of inventories of raw materials and finished goods as well as capacity utilization. For details, please refer to the chapter titled **“Objects of the Issue”** beginning on Page No. 107 of this Prospectus. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, and availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

40. *We have not identified any alternate source of raising the funds. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance. Further in case of any delay in the completion of the issue, there would be a corresponding delay in implementation schedule.*

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Fresh Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds for setting up the new manufacturing facility along with required Plant and machinery, which may result us in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of Our Company. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to consider alternative source for meeting the fund requirement. We therefore, cannot assure that we would be able to execute the proposed expansion plan

within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

- 41. We propose to utilize the Net Proceeds for purposes identified in the section titled “Objects of the Issue” in this Prospectus. The objects of the Issue for which the funds are being raised have not been appraised by any bank or financial institutions. Any variation in the utilization of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval, which may restrict our ability to respond to any change in our business or financial condition and thereby, may adversely affect our business and results of operations.**

Our Company intends to use Net Proceeds raised pursuant to the offer in the manner set out in the chapter titled “**Objects of the Issue**” beginning on Page No. 107 of this Prospectus. The funding requirements mentioned as a part of the objects of the Issue are based on internal management estimates in view of past expenditures and have not been appraised by any bank or financial institution. Whilst Monitoring Agency will not be appointed for monitoring utilization of the Gross Proceeds as the offer size is less than ₹ 50 crores, the proposed utilization of Gross Proceeds is based on our current business plan, management estimates, prevailing market conditions and other commercial considerations, which are subject to change and may not be within the control of our management. Based on the competitive nature of our industry, we may have to revise our business plan and/ or management estimates from time to time and consequently our funding requirements may also change.

We intend to deploy the Net Proceeds in financial year 2026-27 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., Accordingly, within the parameters as mentioned in the chapter titled — “**Objects of the Issue**” beginning on page 107 of this Prospectus, the Management will have significant flexibility to deploy the Gross Proceeds and to deposit the Gross Proceeds temporarily in deposits with one or more scheduled commercial banks included in Second Schedule of Reserve Bank of India Act, 1934, as may be approved by our Board. Accordingly, prospective investors will need to rely upon our management’s judgment with respect to the use of Gross Proceeds.

Our Board of Directors will monitor the proceeds of this Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorize to do so by our shareholders by way of special resolution and other compliances in this regard. As per applicable provisions, our Promoter and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

- 42. Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute upto 11.97% of the Issue Proceeds. As on date we have not identified the use of such funds.**

Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute upto 11.97% of the Issue Proceeds. We have not identified the general corporate purposes for which these funds may be utilized. The deployment of such funds is entirely at the discretion of our management in accordance with policies established by our Board of Directors from time to time and subject to compliance with the necessary provisions of the Companies Act. For details, please refer the chapter titled “**Objects of the Issue**” beginning on Page No. 107 of this Prospectus.

- 43. We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.**

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, please refer “Dividend Policy” on page 240 of this Prospectus.

- 44. Industry information of Our Company included in this Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.**

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

- 45. Our Company has not entered into any long-term contracts with any of its customers and we typically operate on the basis of purchase orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.**

Our Company is engaged in the business of manufacturing flexible packaging material for direct sale to manufacturers of various industries. We manufacture our products on the basis of orders which are received from our customers which generally contain the specifications as per which the packaging material has to be manufactured. We have not entered into any formal agreements, arrangement or any other understanding with our customers and therefore, our business is dependent upon the continuous relationship with the customers and the quality of our products. Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers’ demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

- 46. We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.**

As on the date of the Prospectus, our Company has made an application bearing number 670497 dated 6th January 2025 for registration of our logo “” under class 16 of the Trade Mark Act, 1999 which is currently pending as on date. For further details, see “**Government and Other Key Approvals**” on page 276. There can be no assurance that we will be able to successfully obtain registration against the application, which may affect our ability to use such trade marks in the future. If we are unable to renew or register our trademarks for various reasons including our inability to remove objections to any trademark application, or if any of our unregistered trademark are registered in favour of or used by a third party in India or abroad, we may not be able to claim registered ownership of such trademark and consequently, we may not be able to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities, causing damage to our business prospects, reputation and goodwill in India and abroad. Apart from this, any failure to register or renew registration of our registered trademark may affect our right to use such trademark in future.

Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third-party claim on any of our unprotected intellectual property may lead to erosion of our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered brand name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad. For further details see “**Our Business - Intellectual Property**” and “**Government and Other Key Approvals**” on pages 177 and 276 respectively.

47. Our Promoter Company has not paid Self-Assessment Tax for AY 2025-26 and has not filed Income Tax Return for AY 2025- 26. Such failure may expose our Promoter Company to penal consequences under applicable tax laws, which may adversely affect its financial condition and consequently have an adverse impact on our Company.

Our Promoter Company, i.e., Roopyaa Tradebizz Limited has not paid Self-Assessment Tax for AY 2025-26 of Rs. 390.57 Lakhs (excluding Interest and before TDS credit) and has not filed Income Tax Return for AY 2025-26 due to liquidity constraints. Although the Promoter Company intends to regularize the same in due course, any failure or delay in payment of taxes and filing of income tax returns may attract interest, penalties, or other actions under the applicable provisions of the Income-tax Act, 1961. Continued failure to file the income tax return or to pay taxes may result in escalating penalties, which can increase significantly the longer the delay continues. In addition to penalties, interest may be charged on unpaid tax amounts, which increases the amount owed over time.

Further, we cannot assure you that our Promoter Company will not be subject to any legal or regulatory proceedings, including monetary penalties or other actions by the relevant statutory authorities on account of such delay. Any such proceedings or actions may adversely affect the reputation of our Promoter Company and could consequently have an adverse impact on our business, financial condition, and reputation.

48. We are required to obtain, renew or maintain statutory and regulatory permits, licenses and approvals to operate our business and our manufacturing facility, and any delay or inability in obtaining, renewing or maintaining such permits, licenses and approvals could result in an adverse effect on our results of operations.

Our Company requires certain statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for a fixed period of time and are required to be renewed from time to time. Non-renewal of the said permits and licenses would adversely affect our operations, thereby having a material effect on our business, results of operations and financial condition.

Further, certain permits, licenses and approvals obtained by our Company are conditional in nature. While our Company endeavours to meet such conditions, we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, renew, maintain or obtain the required permits, licenses or approvals, or revocation, cancellation or suspension of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. There can be no assurance that the relevant authorities will issue any or all such permits or approvals in the time-frame anticipated by us or at all. Non-receipt of the required license would result in payment of fines under the respective laws. Any failure or delay in payment of such statutory dues may expose us to statutory and regulatory action, as well as significant penalties, and may adversely impact our business, results of operations and financial condition. For further details, please see “**Key Industry Regulations and Policies**” and “**Government and Other Key Approvals**” on pages 196 and 276 respectively of this Prospectus.

49. We may be unable to attract and retain employees with the requisite skills, expertise and experience, which would adversely affect our operations, business growth and financial results.

We rely on the skills, expertise and experience of our employees to provide quality services and finished goods to our customers. Our employees may leave from their employment with us prematurely and we may not be able to retain them. The following is the attrition rate for the last 3 FYs and stub period:

| Particulars | 30-11-2025 | 31-03-2025 | 31-03-2024 | 31-03-2023 |
|----------------------------------|---------------|---------------|---------------|------------|
| Number of employees at the start | 9 | 8 | 8 | 8 |
| Number of employees that joined | 1 | 2 | 1 | 2 |
| Number of employees that left | 1 | 1 | 1 | 2 |
| Number of employees at the end | 9 | 9 | 8 | 8 |
| Average Employees | 9 | 8.5 | 8 | 8 |
| Attrition Rate | 11.11% | 11.76% | 12.50% | 25% |

Experienced and skilled employees in the packaging industry are highly sought after, and competition for talent is intense. If we experience any failure to attract and retain competent personnel or any material increase in employee costs as a result of the shortage of skilled labour, our competitiveness and business would be damaged, thereby adversely affecting our financial condition and operating results. Further, if we fail to identify suitable replacements of our departed staff, our business and operation could be adversely affected and our future growth and expansions may be inhibited.

50. We have not entered into any technical support service for the maintenance and smooth functioning of our equipment’s and machineries, which may affect our performance.

Our manufacturing processes involve use of technical equipment’s and machineries. They require periodic maintenance checks and technical support in an event of technical breakdown or malfunctioning. Our company has not entered into any technical support service agreements with any competent third party. Our failure to reduce the downtime in case such events occur may adversely affect our productivity, business and results of operations.

51. We regularly work with hazardous materials and activities in our factory can be dangerous, which could cause injuries to people or property.

Operating certain machinery and processes in our factory involve risk of accidents and personal injuries. These hazards can cause personal injury and loss of life or destruction of property and equipment as well as environmental damages, which could result in a suspension of operations and the imposition of civil or criminal liabilities. The loss or shutting down of our facilities could disrupt our business operations and adversely affect our results of operations, financial condition and reputation. While we maintain what we believe to be adequate insurance, there is a risk that an accident may occur at any of our manufacturing facilities. An accident may result in personal injury to our employees or the labour deployed at our facilities, destruction of property or equipment, manufacturing or delivery delays, environmental damage, or may lead to suspension of our operations and/or imposition of liabilities and bring negative publicity to us. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend such litigation can be significant. If these claims and lawsuits, individually or in the aggregate, are resolved against us, our business, results of operations and financial condition could be adversely affected.

52. Our inability to identify customer demand accurately and maintain an optimal level of inventory may impact our operations, net sales, profitability, cash flow and liquidity adversely.

The success, continuous and smooth operations of our business is dependent on our ability to effectively manage our inventory, to receive the timely delivery of our finished products, to anticipate and forecast customer demand and trends. Any error in our forecast could result in either surplus stock, which we may not be able to sell in a timely manner, or at all, or under stocking, which could affect our ability to meet customer demand. Ensuring continuous availability of our products requires prompt turnaround time and a high level of coordination across raw material procurement, manufacturers, suppliers, warehouse management and departmental coordination. Maintaining an optimal level of relevant inventory is important to our business as it allows us to respond to customer demand effectively and to maintain a full range of products. Further, if our management misjudges the expected customer demand, it could adversely impact the results by causing either a shortage of finished goods or an accumulation of excess inventory.

53. Our contingent liabilities and commitments, as disclosed in our Restated Financial Statements could adversely affect our financial condition.

As on November 30, 2025, our contingent liabilities and commitments identified were as follows:

(Amount in Lakhs)

| Particulars | For period ended | For Financial Year ended March 31 st | | |
|---|----------------------------------|---|--------|-------|
| | November 30 th , 2025 | 2025 | 2024 | 2023 |
| Claims against the company not acknowledged as debt – Income Tax Dues | 850.40 | 850.80 | 693.50 | 14.49 |

These contingent liabilities arise in the ordinary course of our business and may include, among others, claims, legal proceedings, guarantees and other contractual obligations. While we believe that we have made adequate provisions, where required, in accordance with applicable accounting standards, there can be no assurance that these contingent liabilities will not materialize or that the actual amounts payable will not exceed the amounts provided for, if any.

If any of these contingencies materialize or if we are required to meet our commitments, it could result in significant cash outflows, adversely affecting our financial condition, results of operations, cash flows and liquidity. Further, the occurrence of such events may also require us to divert management time and resources, which could have a material adverse effect on our business and prospects.

54. *If we are unable to collect our receivables from our clients, our results of operations and cash flows could be adversely affected.*

As on November 30, 2025, March 31, 2025, March 31, 2024 and March 31, 2023, we had an outstanding trade receivable, aggregating ₹ 3,083.51 lakhs, ₹ 3,140.57 lakhs, ₹ 724.92 lakhs and ₹ 318.45 lakhs respectively, constituting 44.26%, 23.18%, 9.07% and 6.80% respectively, of our revenue from operations during the respective years.

Recovery of our receivables and timely collection of client balances depends on our ability to complete our commitments and bill and collect our contracted revenues. If we are unable to meet our requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience an increase in the time to bill and collect for our services, our cash flows could be adversely affected. The potential for delays or defaults in customer payments poses a risk to our profitability. While we extend credit facilities based on payment history and financial condition, credit risk, particularly from trade receivables, persists. Hence, we are exposed to this credit risk from our operating activities specifically from trade receivables.

55. *Our inability to successfully implement our business and growth strategies may adversely affect our business, financial condition, results of operations and the market price of our Equity Shares.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in the future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long-term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on Equity Share price of our Company.

56. *Some of our Directors does not have prior experience of being a Director of a Listed Company , which may result in challenges in complying with the regulatory, corporate governance and reporting requirements applicable to listed companies.*

Some of our Directors does not have prior experience of being a director/ holding directorship of listed companies. Accordingly, they have limited exposure as regards managing the affairs of a listed company which inter-alia entails several compliance requirements and scrutiny of affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, our Company will be required to adhere strict standards pertaining to accounting, corporate governance and reporting that it did not require as an unlisted company. Our Company will also be subject to the SEBI Listing Regulations, which will require it to file audited annual and unaudited half yearly reports with respect to its business and financial condition. If the Company experiences any delays, we may fail to satisfy the reporting obligations. Further, as a publicly listed company, our Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions.

57. *Any failure in our quality control processes may adversely affect our business, results of operations and financial condition.*

We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations. Our products might have certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence, human error or otherwise, may damage our products and result in deficient products. It is imperative for us to meet the quality standards by our customers and agencies as deviation from the same may cause them to reject our products and cause damage to our reputation, market standing and brand value. In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we may be compelled to take back the sub-standard products and reimburse the cost paid by our customers. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and image, as well as entail significant costs.

58. Any conflict of interest which may occur between our business and any other similar business activities pursued by our Promoters, Promoter Group entity and our Group Company could have a material adverse effect on our business and results of operations.

As of the date of this Prospectus, our Company does not have any Group Company in which our Promoters and directors are engaged in business activities similar to our business, thereby causing a conflict of interest between our Company, our Promoters, Promoter Group entity. We have not entered into a non-compete arrangement with them to address such conflicts. Further, we have entered into, and may continue to enter into, transactions and arrangements with our promoter entity in the recent past. We cannot assure you that a conflict will not arise, or that we will be able to suitably resolve any such conflict without an adverse effect on our business or operations.

59. Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities by starting trading of new product like Woven Fabric packaging material etc. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. Our failure to address risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

60. In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and Promoters are interested in our Company.

Our Promoters may be interested in our Company to the extent of the Equity Shares held by them in our Company, and any dividends, bonuses or other distributions on such Equity Shares. For details of shareholding of our Promoters in our Company, see **"Capital Structure –Details of shareholding of our Promoters and members of the Promoter Group in our Company"** on page 90 of this Prospectus. We have also availed unsecured loan from one of our Promoters. For details on such unsecured loan see **"Restated Financial Statements"** on page 241 of this Prospectus. Our Promoter is also interested to the extent of any related party transactions with our Company including Purchase, Sales, Advances, Unsecured loans, if any etc. For details on related party transactions, see **"Restated Financial Statements"** on page 241 of this Prospectus.

61. We may not be successful in improving inadequacies in information and reporting systems which may have a material adverse effect on our business, financial condition, and results of operations.

Our Company relies on information technology systems and internal reporting mechanisms for financial reporting, operational monitoring, decision making, and regulatory compliance. Any inadequacies in such systems, including limitations in data accuracy, integration, timeliness, or scalability, may impair our ability to effectively manage operations and comply with applicable laws and regulations.

If we are unable to successfully upgrade, implement, or improve our information and reporting systems in a timely and efficient manner, it may result in errors, delays in financial reporting, or non-compliance with statutory and regulatory requirements. Additionally, ineffective systems may hinder management's ability to make informed decisions and respond promptly to business developments.

Any such failure or delay could adversely impact our operational efficiency, internal controls, reputation, and may have a material adverse effect on our business, financial condition, and results of operations.

62. *Our estimates and forward-looking statements may prove to be inaccurate.*

The Prospectus contains forward-looking statements that involve substantial risks and uncertainties. All statements, other than statements of historical facts, included in the Prospectus, including, without limitation, statements regarding our future financial position, business strategy, plans and objectives for future operations, capital expenditure, and future cash flows, are forward-looking statements.

These forward-looking statements are based on our current expectations, projections, and beliefs about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy, and financial needs. These statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties, and assumptions, which could cause our actual results, performance, or achievements to differ materially from those expressed or implied by the forward-looking statements. Accordingly, investors should not place undue reliance on such estimates and forward-looking statements. Any inaccuracy or deviation from such estimates may have a material adverse effect on our business, financial condition, and results of operations.

63. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of monitoring agency is required only for Issue size above Rs. 5,000 Lakhs. Since this Issue Size is less than Rs. 5,000 Lakhs, our Company has not appointed any monitoring agency for this Issue. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

64. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks.*

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. There can be no assurance that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may adversely impact our ability to accurately report, or successfully manage, our financial risks, and to avoid fraud.

65. *Delay or default in payment to our suppliers may adversely affect financial position of Our Company.*

Our Company may face risks associated with delays or defaults in payments to suppliers, particularly in situations where there are disruptions in the working capital cycle. Such delays could strain relationships with key suppliers, potentially resulting in reduced access to essential goods and services, higher costs, or less favourable payment terms. These disruptions could lead to delays in production, customer dissatisfaction, and loss of business, which could harm the Company's reputation and market position. Additionally, payment delays or defaults could expose the Company to legal or financial penalties, increased credit risk, and the need for additional financing, all of which could negatively impact Our Company's liquidity, profitability, and overall financial stability.

66. *Our Business requires deployment of labour and depends on availability of labour. In case of unavailability of such labour, our business operations could be affected.*

Our business operations are labour-intensive and largely dependent on daily wage labourers. Any shortage, unavailability, or inability to retain such workforce may adversely affect our operations and profitability. Further, recent amendments in labour and employment laws relating to wages, social security, occupational safety, health, and working conditions may increase our employee costs and compliance burden. Although our employees are not currently unionised, there can be no assurance that they will not seek unionisation in the future. Any strikes, lockouts, work stoppages, slowdowns, or other disruptions may result in operational delays, increased costs, and loss of productivity. Additionally, our inability to recruit skilled employees and retain our existing workforce could materially and adversely affect our business, financial condition, and growth prospects.

67. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our company faces potential risks related to incidents of theft or damage to inventory. While we have not encountered such situations in the past, we acknowledge that there is a possibility of experiencing inventory losses due to various factors such as employee theft, vendor fraud, and general administrative errors. These incidents could have a negative impact on the results of operations and financial condition. During the execution of the contract and up to defect liability period we are generally fully liable to compensate all concerned for any loss, damage, or destruction of work, structure, property etc. including third party risk arising due to causes attributable to us. Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance. Although we have insurance coverage against losses due to fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for Our Company.

68. *Our Promoter will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us.*

After the completion of our Initial Public Issue, our Promoter will hold, approximately 69.70% of our post issue paid up equity capital of our Company. As a result, our Promoter to some extent will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoter may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoter could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us,

discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoter will always act in our Company's or your best interests. For further details, please refer to the chapters titled "**Capital Structure**" and "**Our Promoters and Promoter Group**" beginning on page no. 90 and 233 respectively, of this Prospectus.

69. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

70. Limited or sporadic trading of specified securities of Our Company on the Stock Exchange

The trading volume and liquidity of our shares may be limited and may not reflect the underlying value of our Company. There can be no assurance that an active and liquid market for our securities will develop or be sustained after the Issue. Limited trading may result in reduced investor interest and may also lead to greater volatility in the market price of our securities. This could make it difficult for investors to sell their securities at or near the quoted price or at all, at any given time. Additionally, such illiquidity may impact our ability to raise further capital in the future through the capital markets. Investors should note that the market price of our equity shares could be subject to significant fluctuations due to factors both related and unrelated to our Company's performance, including general market conditions, macroeconomic developments, industry-specific trends, and speculation in the market.

71. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholdings and any sales of the Equity Shares by any major shareholders may adversely affect the trading price of our Equity Shares.

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. Any future equity issuances by us or sales of our Equity Shares by major shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. There can be no assurance that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

72. We cannot assure you that our Equity Shares will be listed on the Emerge Platform of NSE in a timely manner or at all, which may restrict your ability to dispose of the Equity Shares.

In terms of Chapter IX of the SEBI (ICDR) Regulations, 2018, as amended from time to time, we are not required to obtain any in-principal approval from SEBI for listing of our Equity Shares. We have received in-principle approval from NSE for listing of our Equity Shares on the Emerge Platform of NSE. The in-principle approval granted by NSE is subject to our fulfilling certain conditions, including submission of all relevant documents and compliance with applicable statutory and regulatory requirements. Permission for listing of the Equity Shares will be granted only after the Equity Shares offered in this Issue have been allotted. Approval from NSE will require all relevant documents authorizing the issuing of the Equity Shares to be submitted to it. There could be

a failure or delay in listing the Equity Shares on the Emerge Platform of NSE. Further, certain procedural and regulatory requirements of SEBI and the Stock Exchange are required to be completed before the Equity Shares are listed and trading commences. Trading in the Equity Shares is expected to commence within 3 (Three) Working Days from the Issue Closing Date. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining the approvals would restrict your ability to dispose of your Equity Shares.

73. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchange may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

74. *Our operating results may fluctuate significantly and could fall below the expectations of securities analysts and investors due to various factors.*

Our operating results may fluctuate significantly because of various factors, including changes in comparable store sales and customer orders, including as a result of declining consumer confidence or the introduction of new menu items; the timing of new store openings and related revenues and expenses; labour availability and wages of store management and crew; profitability of our stores; variations in general economic conditions, including the impact of declining interest rates on our interest income; negative publicity about the ingredients we use or the occurrence of food-borne illnesses or other problems at our stores; changes in consumer preferences and discretionary spending; and fluctuations in supply prices. As a result of these factors, results for any one quarter are not necessarily indicative of results to be expected for any other quarter or for any year. Average store sales or comparable store sales in any particular future period may decrease. In the future, operating results may fall below the expectations of securities analysts and investors, which could cause our stock prices to fall.

75. *There may be restrictions on daily/monthly movements in the price of our Equity Shares, which can adversely affect shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point of time.*

Once listed, we would be subject to circuit breakers imposed by Stock Exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange is not required to inform us of the percentage limit of the circuit breaker from time to time and may change it without our knowledge. This circuit breaker, if imposed, would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

76. *The investors may not be able to sell immediately on an Indian stock exchange any of the Equity Shares they acquire in the Issue, in case of delay in receipt of Listing and Trading approval.*

The Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the listing and commencement of trading of Equity Shares. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited with the Equity Shares within one working day of the date on which the Basis of Offer is approved by the Stock Exchanges. The Allotment of Equity Shares in this Offer and the credit of such Equity Shares to the applicant's demat account with depository participant could take time from the Bid/ Offer Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise any delay in commencing trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

77. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Offer Closing Date.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise or withdraw their Bids during the Bid/Offer Period. While our Company is required to complete Allotment pursuant to the Issue within such period as may be prescribed under applicable law, events affecting the Bidders' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

External Risk Factors

78. Political instability and significant changes in Government policy could adversely affect economic conditions in India generally and our business in particular.

Changes in exchange rates and controls, interest rates, Government policies, taxation, social and ethnic instability and other political and economic developments in and affecting India may have an adverse effect on our results of operations.

India has a mixed economy with a large public sector and an extensively regulated private sector. The role of the Government and that of the state governments in the Indian economy and their effect on producers, consumers, service providers and regulators has remained significant over the years. Both state and central governments have, in the past, among other things, imposed controls on the prices of a broad range of goods and services, restricted the ability of businesses to expand existing capacity and reduce the number of their employees and determined the allocation to businesses of raw materials and foreign exchange. Since 1991, successive Governments have pursued policies of economic liberalization, including significantly relaxing restrictions in the private sector. Nevertheless, the role of the Government and state governments in the Indian economy as producers, consumers and regulators has remained significant. There can be no assurance that the Government's past liberalization policies or political stability will continue in the future. Elimination or substantial change of such policies or the introduction of policies that negatively affect the security service industry could have an adverse effect on our business. Any significant change in India's economic liberalization

and deregulation policies could disrupt business and economic conditions in India generally and our business in particular.

79. *Financial instability in other countries, particularly countries with emerging markets, could disrupt Indian markets and our business and cause the trading price of the Equity Shares to decrease.*

The Indian financial markets and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause volatility in Indian financial markets and in the Indian economy. Any worldwide financial instability could also have a negative effect on the Indian economy. Accordingly, any significant financial disruption could have an adverse effect on our business, financial condition, and results of operations.

80. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition, and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Our business is subject to a significant number of state tax regimes and changes in legislations governing them, implementing them or the regulator enforcing them in any one of those jurisdictions could adversely affect our results of operations. The applicable categories of taxes and tax rates also vary significantly from state to state, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditures incurred. Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government or State Governments that affect our industry include GST, income tax and other taxes, duties or surcharges introduced from time to time and any adverse changes in any of the taxes levied by the Government or State Governments could adversely affect our competitive position and profitability. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

81. *The requirements of being a listed company may strain our resources.*

We are not a listed company. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the Equity Listing Agreements with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management's attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

82. *The trading volume and market price of the Equity Shares may be volatile following the Issue.*

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- half yearly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties/ governmental entities of significant claims/ proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- changes in the price of oil or gas;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

83. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under Current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long term capital gains and is taxable at 12.5% in excess of Rs.1,25,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

84. *We may be adversely affected by changes in technology, as a result, our business, results of operations, financial condition and prospects could be negatively impacted.*

The Flexible Packaging industry is subject to rapid and significant changes in technology. The technologies we currently employ may become obsolete or subject to competition from new technologies in the future, and the technology in which we invest in the future may not perform as we expect or may be superseded by competing technologies before our investment costs have been recouped. In addition, the cost of implementing new technologies, upgrading our networks or expanding network capacity to effectively respond to technological changes may be substantial. Our ability to meet such costs will, in turn, depend upon our ability to obtain additional financing on commercially acceptable terms. Moreover, there can be no assurances that technologies will develop according to anticipated schedules, or that they will perform according to expectations or be commercially accepted. As a result, our business, results of operations, financial condition and prospects could be negatively impacted.

85. *Unfavourable conditions in our industry or the global economy or reductions in spending on information technology and communications could adversely affect our business, results of operations and financial condition.*

Our results of operations may vary based on the impact of changes in our industry or the global economy on our clients. Our results of operations depend in part on demand for information technology and cloud communications. In addition, our revenue is dependent on the usage of our services, which in turn is influenced by the scale of business that our clients are conducting. To the extent that weak economic conditions result in a reduced volume of business for, and communications by, our clients and prospective clients, demand for, and use of, our products may decline. Further, weak economic conditions may make it more difficult to collect on outstanding accounts receivable. Small and medium-sized business may be affected by economic downturns to a greater extent than enterprises, and typically have more limited financial resources, including capital-borrowing capacity, than enterprises. If our clients reduce their use of our services, or prospective clients delay adoption or elect not to adopt our services, as a result of a weak economy, this could adversely affect our business, results of operations and financial condition.

86. *Any downgrading of India's debt rating by an international rating agency could adversely affect our business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

87. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets.

In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the equity shares.

88. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

89. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not

in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions specified by the RBI, then the prior approval of RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further details, please refer to section titled “*Restrictions on Foreign Ownership of Indian Securities*” beginning on page 349 of this Prospectus.

90. *Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must issue its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor’s benefit. The value such custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

| Bid Quantity | Bid Amount (₹) | Cumulative Quantity | Subscription |
|---------------------|-----------------------|----------------------------|---------------------|
| 500 | 24 | 500 | 16.67% |
| 1,000 | 23 | 1,500 | 50.00% |
| 1,500 | 22 | 3,000 | 100.00% |
| 2,000 | 21 | 5,000 | 166.67% |
| 2,500 | 20 | 7,000 | 250.00% |

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with BRLM, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Details of the Objects of the Issue

The details of utilization of the Net Proceeds are set forth below:

1. To meet capital expenditure requirements

As on the date of this Prospectus, our existing manufacturing unit is located at Survey No 32, Plot No 15 and 16, B/h Marutinandan Temple, Dhandha, Himatnagar (SK), Gujarat-383001, where we are manufacturing plastic films, rolls, pouches, multilayer plastic films and other plastic packaging materials. Our company intends to set up new manufacturing facility at Survey No. 47/1 Paiki, Moje: Dhandha, Taluka Himatnagar, Sabarkantha – 383001, Gujarat admeasuring 4,502 Square Meters.

Our Company is engaged in the business of manufacturing and trading of plastic packaging materials. One of the objects of the Issue is to fund the expansion of our business operations by establishing a new manufacturing facility through acquisition of land, setting up of factory and acquisition of plant and machinery, which will enhance our production capacity, support our growth strategy and improve our operational efficiency. The products proposed to be manufactured at the proposed new manufacturing facility will be in the same line of business as our existing operations.

Our existing plant and machinery are relatively old and refurbished. These machines are capable of catering only to specific types of jobs and are comparatively less efficient than newer generation machinery available in the market. Further, due to operational limitations such as higher layover time and technological

constraints, our existing machines are unable to process high precision and higher specification orders.

In order to address these operational limitations and to improve the quality and scale of production, we propose to install technologically advanced machinery with enhanced features which will enable us to undertake higher precision jobs and expand our product offerings.

At present, a portion of our orders requiring higher precision specifications are outsourced to third-party manufacturers due to technological limitations of our existing machinery. Such significant portion of our revenue forms part of our trading activities wherein we procure finished goods from third parties.

The proposed capital expenditure will enable us to increase our manufacturing capacity and improve production efficiency, undertake high precision jobs which are currently outsourced and convert such portion of trading turnover into in-house manufacturing, improve product quality and consistency through technologically advanced machinery, and achieve higher operating margins through reduction in outsourcing and trading activities.

We currently have confirmed customer orders aggregating to approximately Rs. 2329.98 lakhs, which provides visibility of demand for our products. (The orders in hand are pursuant to certificate of our Peer Review Auditor B. S. Thakker & Co., Chartered Accountants dated April 18, 2026.) Further, we believe that there is significant opportunity to secure additional business from our existing and new customers upon establishing the proposed new manufacturing facility.

Accordingly, the proposed capital expenditure is expected to support our future growth by enabling us to increase in-house production, improve profitability and strengthen our competitive positioning in the market.

Capacity Utilisation and increase in capacity post expansion

Details of existing installed capacity and capacity utilisation is as under:

| Particulars | 30-11-2025 | 31-03-2025 | 31-03-2024 | 31-03-2023 |

Justifications for Net Working Capital:

Over FY 2022–23 to FY 2024–25, the Company's net working capital increased from ₹382.67 lakhs as of March 31, 2023, to ₹1,087.20 lakhs as of March 31, 2024, primarily on account of higher trade receivables and

inventory reflecting growth in operations. During FY 2024–25, net working capital further increased to ₹3,243.38 lakhs, driven predominantly by a substantial rise in trade receivables due to extended credit to customers and moderate inventory buildup to support higher production and sales; the incremental working capital during these periods was funded through a combination of additional bank working capital limits and internal accruals. For the period ended November 30, 2025, net working capital increased marginally to ₹3,517.36 lakhs, led by an increase in inventory and short-term loans and advances, with the same funded through internal accruals, reflecting the Company’s ongoing operational requirements and scaling of business.

By FY 2025-26 and FY 2026-27, it is projected to rise further to ₹3981.95 lakhs and ₹7042.61 Lakhs. The funding of the same will be through internal accruals and IPO Proceeds. The increase in net working capital will be driven by:

Higher Sales Volumes: Anticipated growth in demand and increase in manufacturing turnover.

Competitive Strategy: Emphasis on identifying and capitalizing on emerging business opportunities while effectively responding to evolving market competition.

To manage this growth, the company plans to use ₹1,776.29 lakhs from its IPO proceeds in FY 2026-27 to support working capital requirements. This ensures sufficient liquidity for higher inventory levels and receivables, enabling seamless operations and supporting future growth.

Trade Receivables

| | 31/03/2023 | 31/03/2024 | 31/03/2025 | 30/11/2025 | 31/03/2026 | 31/03/2027 |
| Trade Receivables | 318.45 | 724.92 | 3,140.57 | 3,083.51 | 3,399.09 | 5,350.93 |
| In Days | 25 | 33 | 85 | 108 | 85 | 87 |

In FY 2023, 2024 and 2025 and for the eight months ended on November 30, 2025 our Trade Receivable holding period was 25 days, 33 days, 85 days and 108 days respectively. During FY 25, Company borrowed additional working capital limits from bank resulted in additional Credit Offering in the market which in turn resulted in higher sales and profitability.

We are estimating to maintain the Trade Receivable holding period at almost the same level (that of FY 25) at 85 days and 87 days for the financial year 2026 and 2027 respectively as per its projected financials, historical trend of previous year and market condition while supporting business expansion.

Trade Receivables fluctuations over the years:

- During FY 2023-24, trade receivables increased from ₹318.45 lakh to ₹724.92 lakh, primarily due to a significant increase in turnover.
- During FY 2024-25, trade receivables increased from ₹724.92 lakh to ₹3,140.57 lakh, primarily due to a significant increase in turnover and additional credit offered by company. During this period, company has borrowed additional working capital limits which gave leverage to extend credit limits.
- As at November 30, 2025, trade receivables amounting to ₹3,083.51 reflect the slowdown in sales during the period, resulting in receivables from prior period sales continuing to remain outstanding

The overall rise in absolute trade receivables was a natural outcome of increased sales volume while maintaining standard credit terms.

The company expects trade receivables to be ₹3,399.09 lakh for FY 2025-26, which is in line with FY 2024-25.

The company projects trade receivables at ₹5,350.93 Lakh for FY 2026-27. The projected increase of

₹1,951.84 Lakhs will be on account of:

- **Facilitating Business Growth** – Providing reasonable credit periods supports the company’s efforts to penetrate new markets and enhance customer engagement.
- **Higher Sales Volumes** – The anticipated increase in receivables corresponds with projected growth in sales and a broader customer base.
- **Strengthening Customer Relationships** – Offering reasonable credit terms helps build long-term partnerships with key customers.

By offering controlled credit terms, the company strengthens customer loyalty, competitiveness, and business scalability, without jeopardizing financial health.

The inventory increased from ₹441.58 lakhs in FY 2022-23 to ₹747.04 lakhs in FY 2023-24 and further to ₹1,012.46 lakhs in FY 2024-25, reflecting the Company’s growing scale of operations and higher production requirements. For the eight months ended November 30, 2025, inventory stood at ₹1,269.41 lakhs, which corresponds to an inventory holding period of 50 days. This increase is primarily attributable to strategic inventory build-up to support anticipated growth in sales, preparation for higher order volumes, and maintenance of adequate safety stock to avoid production disruptions.

Historically, the Company has maintained an inventory holding period within a range of 31–39 days, demonstrating efficient inventory management practices. Based on past trends, operational requirements, and anticipated business growth, the Company projects an inventory holding period of approximately 35 days for FY 2025-26 and FY 2026-27, which is broadly in line with historical levels.

With the expansion of operations and increased order volumes, inventory levels increased to ₹747.04 lakhs as of March 31, 2024, mainly driven by higher Raw Material inventory of ₹553.09 lakhs and Finished Goods of ₹150.11 lakhs, reflecting higher procurement to support increased production and sales.
- Further, as of March 31, 2025, inventory increased to ₹1,012.46 lakhs, comprising Raw Materials of ₹532.03 lakhs, Work-in-Progress of ₹66.98 lakhs, and Finished Goods of ₹413.45 lakhs. (Amount in Lakhs)

| Particulars | Restated | Restated | Restated | Restated | Projection | Projection |
|--|------------|------------|------------|------------|------------|------------|
| | 31/03/2023 | 31/03/2024 | 31/03/2025 | 30/11/2025 | 31/03/2026 | 31/03/2027 |
| Short Term Loans & Advances and Other Current Assets | 20.33 | 317.47 | 45.91 | 333.73 | 340.13 | 553.66 |
| In Days | 2 | 16 | 1 | 13 | 9 | 10 |

The Company's Short-Term Loans & Advances and Other Current Assets increased from ₹20.33 lakhs in FY 2022–23 to ₹317.47 lakhs in FY 2023–24. The balance subsequently decreased to ₹45.91 lakhs in FY 2024–25 and increased to ₹333.73 lakhs as of November 30, 2025. It is further projected to be ₹340.13 lakhs in FY 2025–26 and ₹553.66 lakhs in FY 2026–27.

The average holding period increased from 2 days in FY 2022–23 to 16 days in FY 2023–24, decreased to 1 day in FY 2024–25, and increased to 13 days as of November 30, 2025. The holding period is projected to be 9 days in FY 2025–26 and 10 days in FY 2026–27.

The movement in Short-Term Loans & Advances and Other Current Assets during the above periods is primarily attributable to advance payments made to suppliers for procurement of raw materials, Advances to Government Authorities, and other trade-related advances as part of the Company's working capital management.

In FY 2023–24, the balance increased mainly on account of higher advances provided to suppliers for procurement of raw materials. In FY 2024–25, the balance declined primarily due to a reduction in trade advances.

As of November 30, 2025, the balance increased due to higher advances provided to suppliers for securing timely procurement of raw materials, which is in line with the Company's operational requirements.

For the projected period, the Company has estimated Short-Term Loans & Advances and Other Current Assets based on historical trends, expected procurement requirements, advance tax payments, and other trade advances. The projections also factor in anticipated improvements in supplier credit arrangements and stabilization of business operations, which are expected to support efficient working capital management.

Trade Payables

(Amount in Lakhs)

| Particulars | Restated | Restated | Restated | Restated | Projection | Projection |
|----------------|------------|------------|------------|------------|------------|------------|
| | 31/03/2023 | 31/03/2024 | 31/03/2025 | 30/11/2025 | 31/03/2026 | 31/03/2027 |
| Trade payables | 319.64 | 389.84 | 376.96 | 385.00 | 327.25 | 163.62 |
| In Days | 27 | 19 | 11 | 15 | 9 | 3 |

The Company procures raw materials from domestic suppliers and purchases are generally made through a combination of short credit periods and prompt payments, depending on supplier relationships, procurement volumes and prevailing market conditions. The Company maintains relatively short credit cycles with suppliers to ensure timely availability of raw materials and smooth execution of manufacturing and trading operations.

Historically, the Company's trade payables have remained largely stable in absolute terms between ₹300.00 lakh and ₹400.00 lakh from FY 2023 to the Stub Period, reflecting consistent procurement patterns and prudent working capital management.

Year on Year Movement for Trade Payables:

- FY 2023-24 as compared to FY 2022-23**

Trade payables increased from ₹319.64 lakh in FY 2023 to ₹389.84 lakh in FY 2024, primarily due to higher procurement of raw materials in line with the scale of operations. However, trade payable days improved from 27 days to 19 days, reflecting better working capital management.

- FY 2024-25 as compared to FY 2023-24**

Trade payables marginally decreased from ₹389.84 lakh in FY 2024 to ₹376.96 lakh in FY 2025 despite an increase in purchases. Consequently, trade payable days reduced from 19 days to 11 days, indicating efficient supplier payment practices.

- Stub Period ended November 30, 2025**

Trade payables stood at ₹385.00 lakh with payable days at 15 days. The increase in payable days during the stub period is primarily attributable to higher purchases towards the end of November 2025, resulting in higher outstanding balances as of the reporting date.

The Company has projected trade payables at ₹327.25 lakh in FY 2025-26 and ₹163.62 lakh in FY 2026-27, with the trade payable cycle expected to reduce to 9 days and 3 days, respectively.

The projected reduction in trade payables is primarily on account of the Company's expected improvement in internal cash accruals and liquidity position, enabling faster settlement of dues to suppliers. The Company intends to maintain shorter payment cycles with its suppliers while ensuring uninterrupted procurement of raw materials required for its manufacturing and trading operations. Accordingly, the projected trend reflects the Company's focus on efficient working capital management and timely payment to suppliers while supporting the anticipated growth in operations.

The balance further increased to ₹784.40 lakhs as at November 30, 2025. The increase during the period was primarily attributable to higher statutory dues, employee-related payables and provision for taxation, in line with the growth in the scale of operations of the Company.

Going forward, Other Current Liabilities and Short-Term Provisions are projected to decrease to ₹656.48 lakhs as at March 31, 2026 and further to ₹590.83 lakhs as at March 31, 2027. The projected decrease is primarily on account of the expected settlement of statutory dues and employee-related payables within normal operating cycles and the Company's continued focus on efficient working capital management.

Provision for taxation has also increased during the period under review, which is primarily attributable to the higher taxable profits generated by the Company during the respective periods. Such provisions represent the estimated income tax liability for the year in accordance with applicable tax laws and are adjusted upon final assessment.

The Company intends to continue maintaining prudent cash flow management and timely settlement of statutory and employee-related obligations. This approach is expected to support efficient working capital management, maintain financial discipline and ensure smooth operational functioning of the Company in the future.

Growth in advanced economies is projected to be 1.8 percent in 2026 and 1.7 percent in 2027. In the United States, the economy is projected to expand by 2.4 percent in 2026, supported by fiscal policy and a lower policy rate, while the impact of higher trade barriers also gradually wanes. This 0.3 percentage point upward revision from the October forecast reflects a stronger-than expected GDP outturn in the third quarter of 2025, a rebound

in activity in the first quarter of 2026 compared with that in the fourth quarter of 2025 following the end of the federal government shutdown, and the associated carryover.

In emerging market and developing economies, growth is expected to continue to hover just above 4.0 percent in 2026 and 2027. Relative to the projection in October, growth in 2025 for China is revised upward by 0.2 percentage point to 5.0 percent. The revision reflects stimulus measures and additional policy bank lending for investment. Growth for 2026 is also revised upward by 0.3 percentage point to 4.5 percent, reflecting the lower US effective tariff rates on Chinese goods due to the yearlong trade truce agreed to in November and stimulus measures that are assumed to be implemented over two years. The economy’s growth rate is expected to decelerate to 4.0 percent in 2027 as structural headwinds assert themselves.

In India, growth is revised upward by 0.7 percentage point to 7.3 percent for 2025, reflecting the better-than expected outturn in the third quarter of the year and strong momentum in the fourth quarter. Growth is projected to moderate to 6.4 percent in 2026 and 2027 as cyclical and temporary factors wane.

In the Middle East and Central Asia, growth is projected to accelerate from 3.7 percent in 2025 to 3.9 percent in 2026 and to 4.0 percent in 2027, supported by higher oil output, resilient local demand, and ongoing reforms. Growth is also expected to accelerate in sub-Saharan Africa, from 4.4 percent in 2025 to 4.6 percent in 2026 and 2027, supported by macroeconomic stabilization and reform efforts in key economies. In Latin America and the Caribbean, growth is projected to moderate to 2.2 percent in 2026 and bounce to 2.7 percent in 2027 as countries in the region approach potential from different cyclical positions. In emerging and developing Europe, a sharp slowdown in 2025 to a growth rate of 2.0 percent is expected to reverse, with economies in the region expanding at an average rate of 2.3 percent in 2026 and 2.4 percent in 2027. In most regions, the rebound also reflects the fading effect of shifting trade policies.

1.1 GDP Growth Across Major Regions

GDP growth across major global regions—including Europe, Latin America & the Caribbean, Middle East & Central Asia, and Sub-Saharan Africa—continues to display varied trajectories. The global outlook presents a mixed scenario, with emerging economies continuing to outperform advanced economies.

In Emerging and Developing Asia, growth is projected to moderate from 5.4% in CY 2025 to 5.0% in CY 2026 and further projected at 4.8% during CY 2027. India’s expected growth in 2025 has been uplifted at 7.3% in CY 2025, supported by resilient rural consumption and sustained infrastructure investments, up from 6.5% in CY2024. The

growth estimate for 2026 and 2027 is kept at 6.4%. In contrast, China’s growth is estimated at 5.0% in CY2025, and to further decelerate at 4.5% in 2026 and 4.0% in 2027.

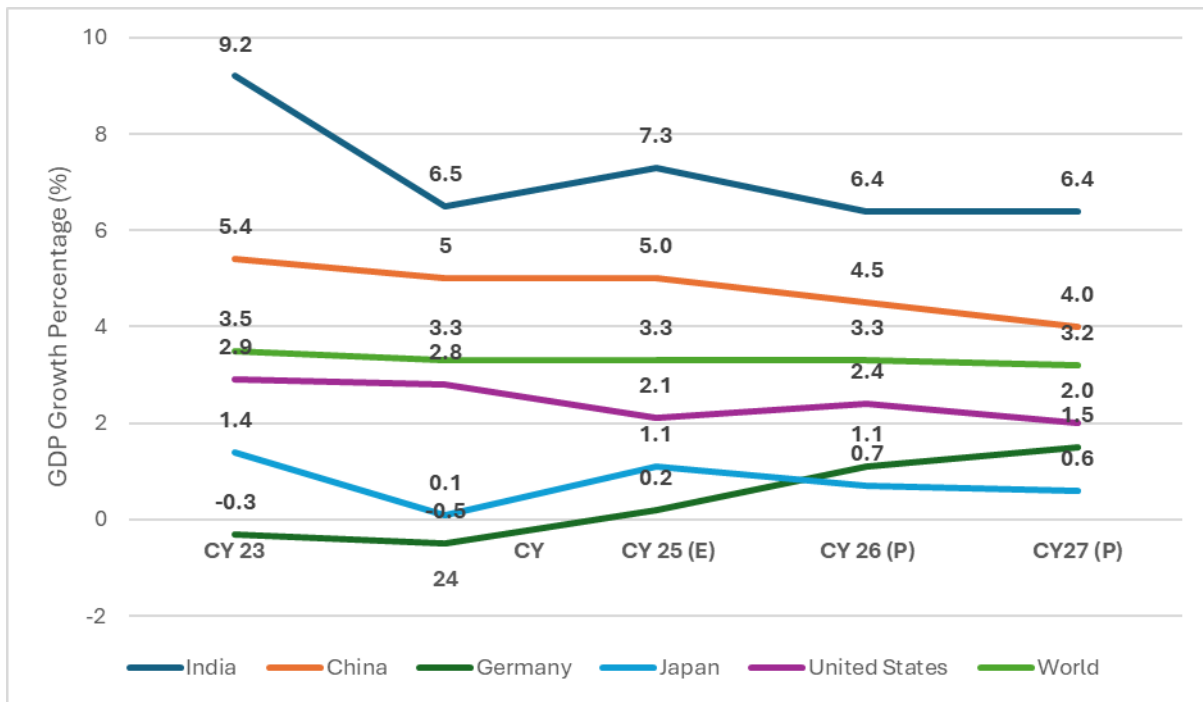

Sub-Saharan Africa is projected to grow at 4.4% in CY 2025, increased from 4.1% in CY 2024, with growth is expected to accelerate further at 4.6% in CY 2026. This gradual improvement is being supported by better weather conditions and more efficient supply chain operations.

In the Middle East and Central Asia, the economy is forecasted to expand from 3.7% in CY 2025 to 3.9% in CY 2026, and further at around 4.0% in CY 2027, driven by stabilization in oil production and ongoing economic reforms.

For Latin America and the Caribbean, the economy is expected to slow from 2.4% in CY 2025, to 2.2% in CY2026, but increase again at 2.7% in CY 2027 reflecting stable yet subdued economic momentum supported by stronger macroeconomic management across key economies.

Emerging and Developing Europe remains subdued, with growth estimated at 2.0% in CY 2025, down from 3.5% in CY 2024, expected to rise modestly to 2.3% in CY 2026 and further at 2.4% in 2027. However, the recent Greenland issue and tariff imposition by the US President has posed fresh challenges for the region. The region continues to face structural manufacturing challenges, particularly in major economies like Germany.

Overall, while global growth is expected to remain steady at 3.3% in CY 2025~CY2026 and at 3.2% in CY2027, regional disparities persist, influenced by a combination of domestic challenges, external geopolitical tensions, and fluctuating commodity prices.

2. India’s Macroeconomic Scenario

2.1 Gross Domestic Product (GDP)

Real GDP is estimated to grow by 7.4% in FY 2025–26, improving from a growth rate of 6.5% in FY 2024–25. This momentum is also evident on a quarterly basis, with real GDP recording a robust growth of 8.2% in Q2 of FY 2025–26 compared to the growth rate of 5.6% during Q2 of FY25, whereas nominal GDP has witnessed a

growth rate of 8.7% in Q2 of FY 2025-26. Source – MOSPI, Press release – First advance estimates of Gross domestic product posted on January 07th, 2026.

In its latest Economic Outlook, the OECD noted that India remains one of the fastest-growing major economies, supported by strong investment activity and resilient services. OECD highlighted that India's GDP is projected to grow by 6.7% in fiscal year 2025-26, 6.2% in 2026-27 and 6.4% in 2027-28. Despite some likely impact of the US tariff on Indian exports, private consumption will be supported by rising real incomes as inflation remains soft and low consumption/indirect taxes (GST). Going forward, investment will be sustained by declining borrowing costs and strong public capital expenditure. Current low headline inflation is projected to gradually converge towards the 4% target. Notably, India's Headline Inflation drops to 0.25 % in October 2025.

India's Economic Growth Momentum Remains Strong - Surpassed USD 4 Trillion.

In June 2025, India became the fourth-largest economy in the world and retained its position as the fastest-growing major economy. The country is projected to become the world's third largest economy by 2030, with an estimated GDP of USD 7.3 trillion.

Key factors behind India's rise include its strong economic performance, expanding and youthful workforce, and increasing strategic engagement across the region. India's Economic Capability improved significantly, supported by its position as the world's third-largest economy in terms of purchasing power parity (PPP). Additionally, a notable increase in its Future Resources score highlights the demographic advantage that is expected to sustain its growth trajectory in the coming years.

2.2 Gross Value Added (GVA)

According to the First Advance Estimate of GDP for 2025-26 by MOSPI, Govt. of India (GoI), Real GVA is estimated at INR 184.50 lakh crore in the FY 2025-26, against the Provisional Estimates (PE) for the FY 2024-25 of INR 171.87 lakh crore, registering a growth rate of 7.3%. Nominal GVA is estimated to attain a level of INR 323.48 lakh crore during FY 2025-26, against INR 300.22 lakh crore in FY 2024-25, showing a growth rate of 7.7%. (MOSPI, Press Release, 7 January 2026).

2.5 Index of Industrial Production (IIP) Growth Trends:

As per the Index of Industrial Production (IIP), the industrial sector grew by 4.0% in FY 2025, moderating from 5.9% in FY 2024 and 5.2% in FY 2023. This deceleration in overall IIP growth in FY 2025 reflects a softening of industrial momentum amidst global headwinds and tighter financial conditions.

Among key components:

- **Manufacturing** (which holds a 77.6% weight in IIP) registered a slower growth of 3.9% in FY 2025, compared to 5.5% in FY 2024 and 4.7% in FY 2023.
- **Mining** growth also moderated sharply to 2.9% in FY 2025 from 7.5% in FY 2024 and 5.8% in FY 2023.
- **Electricity** growth remained relatively stable at 5.1% in FY 2025, slightly down from 7.1% in FY 2024 and significantly lower than 8.9% in FY 2023.

This slowdown indicates tightening domestic demand and spillover effects from a weaker global industrial cycle.

Latest IIP data in Oct'25 remains a tad low amid less activity during festival times

The Index of Industrial Production (IIP) slows a tad at 0.4% during Oct'25 due to less working days available amid festivals. The growth rates of the three sectors, Mining, Manufacturing and Electricity for the month of October 2025 are (-) 1.8 percent, 1.8 percent and (-) 6.9 percent respectively. Lower demand in October 2025 and subsequent decline in electricity generation was driven by extended rainfall season and comfortable ambient temperature across multiple States/UTs.

Use-Based Classification Trends:

Source: Ministry of Statistics & Programme Implementation (MOSPI)

According to the use-based classification:

- Capital Goods segment growth slowed to 5.5% in FY 2025, down from a high of 13.1% in FY 2023 and 6.3% in FY 2024, indicating a reduction in investment momentum.
- Primary Goods also witnessed slower growth at 3.9%, compared to 6.1% in FY 2024 and 7.5% in FY 2023.
- Intermediate Goods rebounded modestly to 4.1% in FY 2025, up from 3.8% in FY 2023, although still lower than 5.3% in FY 2024.

- Infrastructure/Construction Goods slowed to 6.6% in FY 2025 from 9.7% in FY 2024 and 8.4% in FY 2023, pointing to softening construction and infrastructure activity.
- Consumer Durables grew significantly by 7.9%, rebounding from 3.6% in FY 2024 and 0.6% in FY 2023, indicating improved demand in consumer electronics and appliances.
- In contrast, Consumer Non-Durables contracted by 1.6% in FY 2025, reversing the 4.1% growth in FY 2024, likely reflecting subdued rural and essential goods demand.

The divergence in growth across segments suggests an uneven industrial recovery in FY 2025. While certain consumer categories have rebounded, investment-related and primary sectors remain under pressure.

The latest growth rates of IIP as per Use-based classification in October 2025 over October 2024 are (-)0.6 percent in Primary goods, 2.4 percent in Capital goods, 0.9 percent in Intermediate goods, 7.1 percent in Infrastructure/ Construction Goods, (-) 0.5 percent in Consumer durables and (-)4.4 percent in Consumer non-durables. Based on use-based classification, top three positive contributors to the growth of IIP for the month of October 2025 are Infrastructure/ construction goods, Intermediate goods and Capital goods.

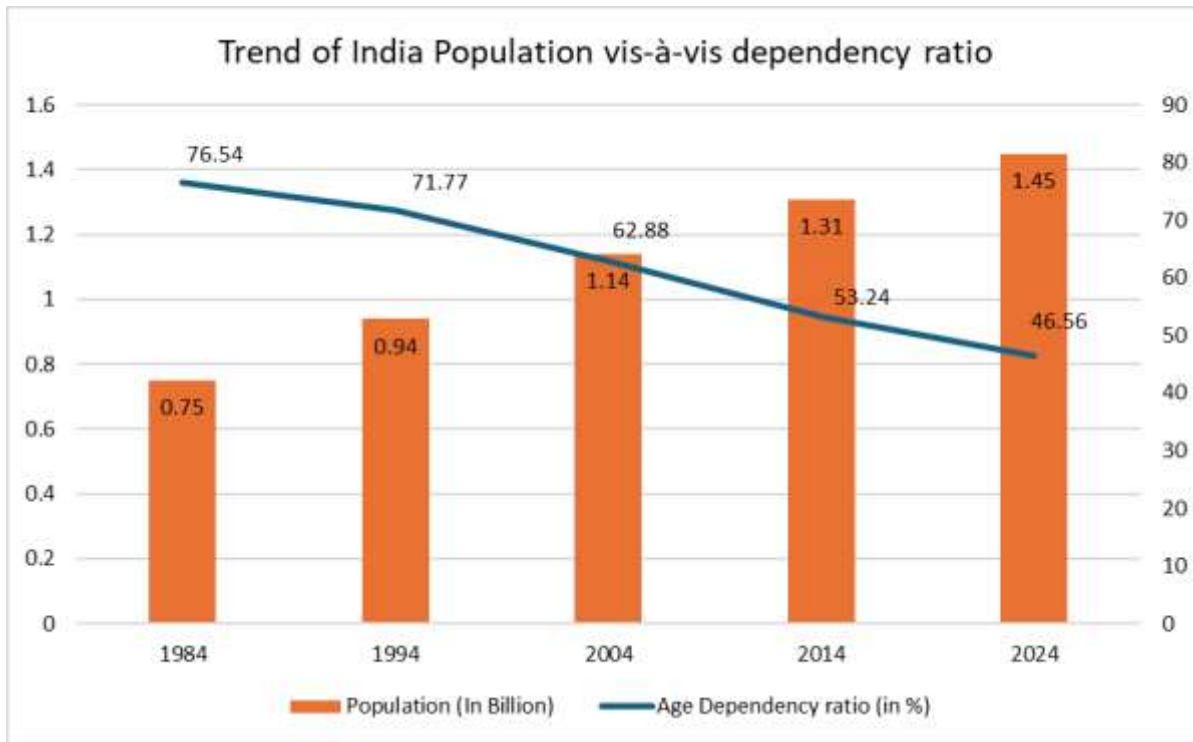

2.6 Overview on Key Demographic Parameters

2.6.1 Population growth and Urbanization

India's economic trajectory and consumption dynamics are closely tied to its demographic shifts. According to the World Bank, India's population expanded from approximately 0.75 billion in 1984 to 1.45 billion in 2024, consolidating its position as the world's most populous nation. This growth underlines the emergence of a vast labour force and consumer base, essential for driving sustained economic progress.

A key demographic indicator—the age dependency ratio—has witnessed a steady decline over the last four decades. From a high of 76.54% in 1984, it reduced to 71.77% in 1994, 62.88% in 2004, and 53.24% in 2014, before reaching a low of 46.56% in 2024. This downward trend signifies that for every 100 working-age individuals, there are now fewer than 47 dependents, compared to over 76 dependents in the mid-1980s. Such a shift reflects a growing share of the working-age population, unlocking India's demographic dividend—a critical driver of productivity, savings, and investment.

Together, the rising total population and declining dependency ratio provide a dual advantage: a larger workforce capable of supporting economic activity and a lower demographic burden, which allows for higher disposable incomes and consumption growth. These demographic fundamentals form a strong backbone for India's long-term economic and private consumption expansion.

Urbanization Trend in India

Source: World Bank Database

Urbanization, too, is transforming India’s socio-economic fabric. The urban population rose from 424.96 million in 2014 (32.38% of total population) to 522.93 million in 2023 (36.36%), and further to approximately 534.91 million in 2024 (36.87%), according to World Bank estimates. This rapid growth in urban areas underscores the need for sustainable urban planning, investment in infrastructure, and development of smart cities to accommodate and benefit from the shifting population dynamics.

2.6.2 Labour Force in India

India's labour force has experienced significant growth over the past decade. In 2010, the total labour force was approximately 467.56 million. By 2024, this number had increased to 607.69 million, reflecting a Compound Annual Growth Rate (CAGR) of 1.89% over the 14-year period.

This upward trend underscores the expanding working-age population and the country's ongoing economic development. However, it also highlights the need for effective employment policies to ensure that the growing labour force is adequately absorbed into productive sectors.

The labour force participation rate (LFPR) has also seen fluctuations, influenced by various socio-economic factors. As of 2024, the LFPR stood at 45.1%, indicating the percentage of the working-age population that is either employed or actively seeking employment.

These statistics emphasize the importance of implementing strategies that not only create employment opportunities but also enhance the quality and inclusivity of jobs across different sectors of the economy.

Source: World Bank Database

2.6.3 Breakdown of Employment by Sector

According to the Periodic Labour Force Survey (PLFS) 2023–24, the employment distribution across various sectors exhibits distinct gender-based patterns. A significant portion of male workers are engaged in agriculture, followed by notable participation in construction, manufacturing, and trade-related activities. In contrast, female workers are predominantly employed in agriculture, with considerable involvement in manufacturing and other services sectors. While female representation in trade and construction is lower compared to males, Additionally, a substantial proportion of employed women are self-employed, often contributing as unpaid helpers in household enterprises or operating small businesses, indicating a reliance on informal employment avenues.

Source: Annual Report 2023-24, Periodic Labour Force Survey

2.6.4 Disposable Income and Consumer Spending

Gross National Disposable Income (GNDI) represents the total income available to a nation’s residents for consumption and saving after accounting for income transfers with the rest of the world. In FY24, Per capita GNDI grew by 10.9%, followed by a moderate growth of 8.6% in FY25. This steady increase indicates that households and businesses had more income at their disposal, which is critical for supporting both consumption and savings—key components of economic resilience and expansion.

The rise in GNDI has translated into higher consumer spending, as reflected in the growth of Private Final Consumption Expenditure (PFCE), which measures the total value of goods and services consumed by households. Per Capita PFCE grew by 8.7% in FY24 and further accelerated to 10.9% in FY25, highlighting strong consumer confidence and robust domestic demand.

2.7 Union Budget FY 26-27 Highlights

The Union Budget FY 2026–27, presented by Finance Minister Nirmala Sitharaman, introduces a comprehensive set of measures aimed at stimulating economic growth, enhancing infrastructure, and fostering inclusive development. With a focus on sectors such as agriculture, MSMEs, infrastructure, innovation, and exports, the budget seeks to create a conducive environment for sustained economic expansion.

- ### Capital Expenditure and Infrastructure Development

In FY2026-27, the Union Budget has increased the public capex towards to INR 12.2 lakh crore from the previous INR 11.21 lakh crore (3.1% of GDP) which was earmarked in FY 2025–26. To strengthen the confidence of private developers regarding risks during infrastructure development and construction phase, the budget proposed to set up an Infrastructure Risk Guarantee Fund to provide prudently calibrated partial credit guarantees to lenders.

- ### Support for MSMEs

Recognizing the pivotal role of Micro, Small, and Medium Enterprises (MSMEs) in India's economic landscape, the budget introduced a three-pronged approach to support the sector. The budget introduced a dedicated INR 10,000 crore SME Growth Fund as well as proposed to top up the Self-Reliant India Fund set up in 2021, with INR 2,000 crore to continue support to micro enterprises and maintain their access to risk capital. With TReDS, more than INR 7 lakh crore has been made available to MSMEs. To leverage its full potential, the budget further proposed four measures: (i) mandate TReDS as the transaction settlement platform for all purchases from MSMEs by CPSEs, serving as a benchmark for other corporates; (ii) introduce a credit guarantee support mechanism through CGTMSE for invoice discounting on TReDS platform; (iii) link GeM with TReDS for sharing information with financiers about government purchases from MSMEs, encouraging cheaper and quicker financing; (iv) introduce TReDS receivables as asset-backed securities, helping develop a secondary market, enhancing liquidity and settlement of transactions. Moreover, Government will facilitate Professional Institutions such as ICAI, ICSI, ICMAI to design short-

term, modular courses and practical tools to develop a cadre of 'Corporate Mitras', especially in Tier-II and Tier-III towns, which will help MSMEs meet compliance requirements at affordable costs.

- **Establishment of dedicated Rare Earth Corridors**

A Scheme for Rare Earth Permanent Magnets was launched in November 2025. In line with that, the budget proposed to support the mineral-rich States of Odisha, Kerala, Andhra Pradesh and Tamil Nadu to establish dedicated Rare Earth Corridors to promote mining, processing, research and manufacturing.

- **Integrated Programme for the Textile Sector**

The following Schemes have been announced:

- (a) The National Fibre Scheme for self-reliance in natural fibres such as silk, wool and jute, man-made fibres, and new-age fibres.
- (b) Textile Expansion and Employment Scheme to modernise traditional clusters with capital support for machinery, technology upgradation and common testing and certification centres.
- (c) A National Handloom and Handicraft programme to integrate and strengthen existing schemes and ensure targeted support for weavers and artisans.
- (d) Tex-Eco Initiative to promote globally competitive and sustainable textiles and apparels.
- (e) Samarth 2.0 to modernize and upgrade the textile skilling ecosystem through collaboration with industry and academic institutions.

- **Carbon Capture Utilization and Storage (CCUS)**

Aligning with the roadmap launched in December 2025, CCUS technologies at scale will achieve higher readiness levels in end-use applications across five industrial sectors, including, power, steel, cement, refineries and chemicals. An outlay of INR 20,000 crore is proposed over the next 5 years.

- **Municipal Bonds**

To encourage the issuance of municipal bonds of higher value by large cities, the budget proposed an incentive of INR 100 crore for a single bond issuance 10 of more than INR 1000 crore. The current scheme under AMRUT which incentivises issuances up to INR 200 crore, will also continue to support smaller and medium towns.

- **Ease of Doing Business**

Individual Persons Resident Outside India (PROI) will be permitted to invest in equity instruments of listed Indian companies through the Portfolio Investment Scheme. It is also proposed to increase the investment limit for an individual PROI under this scheme from 5% to 10%, with an overall investment limit for all individual PROIs to 24%, from the current 10%.

- **Hubs for Medical Value Tourism**

To promote India as a hub for medical tourism services, the budget proposed to launch a Scheme to support States in establishing five Regional Medical Hubs, in partnership with the private sector. These Hubs will serve as integrated healthcare complexes that combine medical, educational and research facilities. They will have AYUSH Centres, Medical Value Tourism Facilitation Centres and infrastructure for diagnostics, post-care and rehabilitation. These Hubs will provide diverse job opportunities for health professionals including doctors and AHPs.

- **Agriculture Related Schemes**

To diversify farm outputs, increase productivity, enhance farmers' incomes, and create new employment opportunities, the budget announced support schemes related to high value crops such as coconut, sandalwood, cocoa and cashew in coastal areas. Agar trees in Northeast and nuts such as, almonds,

walnuts and pine nuts in hilly regions will also be supported. India is the world's largest producer of coconuts.

About 30 million people, including nearly 10 million farmers, depend on coconuts for their livelihood. To further enhance competitiveness in coconut production, the Budget proposed a Coconut Promotion Scheme to increase production and enhance productivity through various interventions including replacing old and non-productive trees with new saplings/plants/varieties in major coconut growing States. A dedicated programme is proposed for Indian cashew and cocoa to make India self-reliant in raw cashew and cocoa production and processing, enhance export competitiveness and transform Indian Cashew and Indian Cocoa into premium global brands by 2030.

Further, the Central Government will partner with State Governments to promote focused cultivation and post-harvest processing to restore the glory of the Indian Sandalwood ecosystem. To rejuvenate old, low-yielding orchards and expand high-density cultivation of walnuts, almonds and pine nuts, the budget announced to support a dedicated programme to enhance farmer incomes and in bringing value addition by engaging youth.

The Union Budget FY 2026–27 presents a balanced approach to economic growth by addressing immediate consumption needs and laying the foundation for long-term sustainability. Through targeted investments in infrastructure, support for MSMEs, and sector-specific initiatives, the budget aims to foster an inclusive and resilient economy. These measures are expected to create new opportunities for financial institutions, as the growing demand for investment products will provide avenues for expansion and innovation in the financial services sector.

Industry Overview – Global Plastic Film Packaging Industry

3.1 Introduction

As global demand shifts toward convenience, sustainability, and enhanced product safety, the plastic film packaging industry has emerged as a vital component of modern packaging solutions. This segment, which forms the backbone of the broader flexible packaging industry, focuses on the use of thin polymer-based films to deliver high-performance, versatile, and cost-efficient packaging across sectors such as food & beverage, pharmaceuticals, personal care, home care, agriculture, and industrial goods.

Plastic films are typically manufactured using materials such as polyethylene (PE), polypropylene (PP), polyester (PET), polyvinyl chloride (PVC), and advanced multilayer laminates. These films are valued for their lightweight properties, mechanical strength, moisture and gas barrier capabilities, printability, and recyclability. Key formats include shrink films, stretch films, barrier films, metallized films, co-extruded films, and biodegradable or compostable films tailored for diverse applications ranging from snack packaging to pharmaceutical blister packs.

The industry has transitioned from producing basic mono-layer films to complex multi-layered structures engineered for specific performance attributes—such as high barrier protection, temperature resistance, and product shelf-life enhancement. Innovations such as anti-fog coatings, antimicrobial layers, and recyclable mono-material structures are reshaping product portfolios in line with ESG norms and circular economy principles.

Driven by the global shift toward e-commerce, sustainable sourcing, and value-added packaging, companies are now integrating AI-based defect detection, automation, digital printing, and smart packaging features (like QR codes and NFC tags) into their production lines. These advancements support both branding and logistical traceability, improving end-user experience and supply chain visibility.

Furthermore, with regulatory frameworks tightening around single-use plastics, many players are investing in chemical recycling, closed-loop manufacturing, and bio-based alternatives. The rise of Extended Producer

Responsibility (EPR) in markets like India and the EU is also compelling firms to offer recyclable and compostable alternatives to traditional plastic films.

Emerging economies such as India, Vietnam, and Mexico are fast becoming global manufacturing hubs for plastic film packaging, benefiting from competitive production costs, raw material availability, and export-friendly policies. Strategic partnerships between multinational consumer brands and regional film converters are accelerating innovation and expanding global reach.

In summary, the plastic film packaging industry is at the confluence of material science, digital transformation, and sustainability leadership. Its future will be shaped by the industry's ability to balance performance, cost, environmental compliance, and consumer-centric innovation in an increasingly dynamic global landscape.

3.4 Market Trends

- **Increasing emphasis on Environmental Sustainability** - There is a growing global emphasis on reducing environmental impact, which is driving the demand for sustainable and eco-friendly packaging solutions. Consumers are increasingly opting for packaging formats that contribute to lower greenhouse gas (GHG) emissions and support circular economy goals. Flexible packaging, by design, uses less material and energy during production compared to rigid alternatives, making it inherently more sustainable. Additionally, regulatory bodies across key markets are promoting the adoption of sustainable packaging practices. These initiatives are focused on reducing plastic waste, energy usage, and carbon emissions associated with single-use plastic packaging, thereby reinforcing the momentum for sustainable flexible packaging solutions globally.
- **Rising Demand for Consumer Convenience** - Changing consumer lifestyles and a preference for convenience have led to increased adoption of flexible packaging formats that are portable, resealable, and easy to use. The demand for single-serve and on-the-go packaging solutions in the food and beverage sector continues to rise, as these formats help reduce food waste and enhance portion control. In response, industry participants are introducing portion-sized packaging to cater to diverse consumption patterns. As an example, Berry Global Group, Inc. partnered with Mars, a global snack and treats manufacturer, to introduce pantry-sized treats in polyethylene terephthalate (PET) jars. These jars, launched in September 2022, are designed to be lightweight and contain 15% post-consumer recycled (PCR) content, aligning with both convenience and sustainability goals.
- **Technological Advancements in Packing Material** - Continued innovation in packaging materials and design is enabling manufacturers to deliver enhanced product protection, extended shelf life, and improved functionality. Developments in barrier film technology and recyclable substrates are key enablers in the flexible packaging industry. Leading players are investing in R&D and strategic collaborations to bring novel solutions to market. For example, On October 3, 2022, Mondi collaborated with Norwegian pet food company Felleskjøpet to introduce a recyclable high-barrier packaging solution

under the brand name 'FlexiBag Recyclable'. This solution provides high barrier performance to preserve product quality while meeting recyclability requirements, reflecting the industry's shift towards combining functionality with sustainability.

- **Volatility in Raw Material Prices** - Global prices of key polymers (like LDPE, HDPE, PP, and PET) remain volatile due to geopolitical tensions, supply chain disruptions, and crude oil fluctuations. As a result, manufacturers are focusing on material efficiency, downgauging, and circular sourcing strategies to manage costs and reduce dependency on virgin resins.

3.5 Flexible packaging – Leading the way in packaging innovation

Technology Innovation and Product Advancement

The flexible packaging industry continues to evolve through sustained innovation and cross-sector collaboration. Technological advancements in material science have led to the development of flexible packaging with improved barrier properties against moisture, oxygen, Odors, and bacteria. These innovations have enabled flexible packages to be more durable, printable, and compatible with sterilization and heating applications, while simultaneously reducing the environmental impact. When compared to traditional formats such as metal cans or glass jars, flexible packaging offers significantly lower greenhouse gas emissions, water and energy consumption, and transportation costs.

For instance, the production of a flexible food service pouch requires up to 75% less energy and results in approximately one-tenth of the CO₂ emissions generated during the manufacture of a metal can for an equivalent product quantity. Additionally, 1.5 pounds of flexible packaging can contain the same volume of liquid food as 50 pounds of glass, and transporting these pouches requires substantially fewer truckloads.

Sustainability and Circular Economy Alignment

Sustainability is a central theme in the ongoing transformation of the flexible packaging industry. Flexible packaging solutions offer several environmental benefits including:

- Source reduction and lower packaging waste
- Decreased carbon footprint during transportation and storage
- Extended shelf life and reduced food spoilage
- Compatibility with renewable materials and compostable formats
- Consumer convenience and portion control

Brands, retailers, and packaging manufacturers are increasingly aligning with these objectives by investing in sustainable materials and technologies. Initiatives include the incorporation of post-consumer recycled (PCR) content, bio-based polymers, and readily recyclable mono-material structures. Bio-based plastics made from renewable resources such as corn, sugarcane, and vegetable oils are also being developed and commercialized. Compostable flexible films are gaining traction in select applications where end-of-life management infrastructure is available.

Advanced packaging formats are now designed to be compatible with commercial recycling and composting systems, reducing landfill dependence. Intelligent packaging, which includes sensors and indicators for shelf-life and freshness, is being introduced to further minimize food waste and improve supply chain efficiency.

4. Indian Plastic films Packaging Industry

4.1 Overview of the Plastic Films Packaging Industry in India

The plastic films packaging industry in India represents a dynamic and indispensable segment of the nation's broader packaging sector. It plays a crucial role in serving high-growth industries such as food and beverages, pharmaceuticals, personal and home care, FMCG, industrial chemicals, and Agri-products, by providing cost-effective, durable, and efficient packaging formats. Plastic films used in packaging are primarily produced from polymers like polyethylene (PE), polypropylene (PP), polyester (PET), polyvinyl chloride (PVC), and nylon, offering a combination of flexibility, barrier properties, and mechanical strength.

India's plastic films segment includes a wide array of formats such as laminated rolls, multilayer films, stretch and shrink films, pouches, wraps, and thermoformed films. These are extensively used for packaging snacks, dairy products, ready-to-eat meals, condiments, personal care items, and over-the-counter pharmaceuticals. Their lightweight nature, customizability, shelf-life extension, and adaptability to high-speed packaging lines have made them a preferred packaging medium for both domestic consumption and export-oriented industries.

Over the past decade, the Indian market has witnessed a shift from unorganised, low-value converters to organised, integrated manufacturers offering advanced, value-added packaging. This includes solvent-free lamination, high-barrier metallized films, recyclable mono-materials, and compostable film technologies. The sector's evolution is being spurred by rising urbanisation, growing retail penetration, the proliferation of e-commerce, and the increasing demand for hygiene-focused packaging post-COVID.

Additionally, government regulations such as the Plastic Waste Management Rules (PWM) and Extended Producer Responsibility (EPR) are pushing the industry toward sustainable innovation. Many leading players are developing recyclable, biodegradable, and reusable plastic films, aligning with global sustainability goals and India's climate commitments. This is further catalysed by the growing emphasis on circular economy practices, plastic credit systems, and the preference for source-reduced, lightweight packaging formats.

As packaging preferences evolve and industries demand higher performance and compliance, the Indian plastic films packaging industry is poised for robust growth. With innovation, sustainability, and automation at its core, it is expected to play a strategic role in India's journey toward becoming a global manufacturing and packaging hub.

India’s plastic film packaging industry has emerged as a vital segment within the broader flexible packaging ecosystem, playing a pivotal role in the preservation, transportation, and aesthetic presentation of products across food and beverages, pharmaceuticals, FMCG, agriculture, and e-commerce. The market has shown steady growth, with its estimated value increasing from 1.93 million tonnes in FY 2025, indicating consistent demand growth across sectors. As the industry estimates, the Indian plastic film packaging market is projected to reach around 3.81 million tonnes by FY 2035, growing at a CAGR of 7.05% during the forecast period FY 2025–FY 2035.

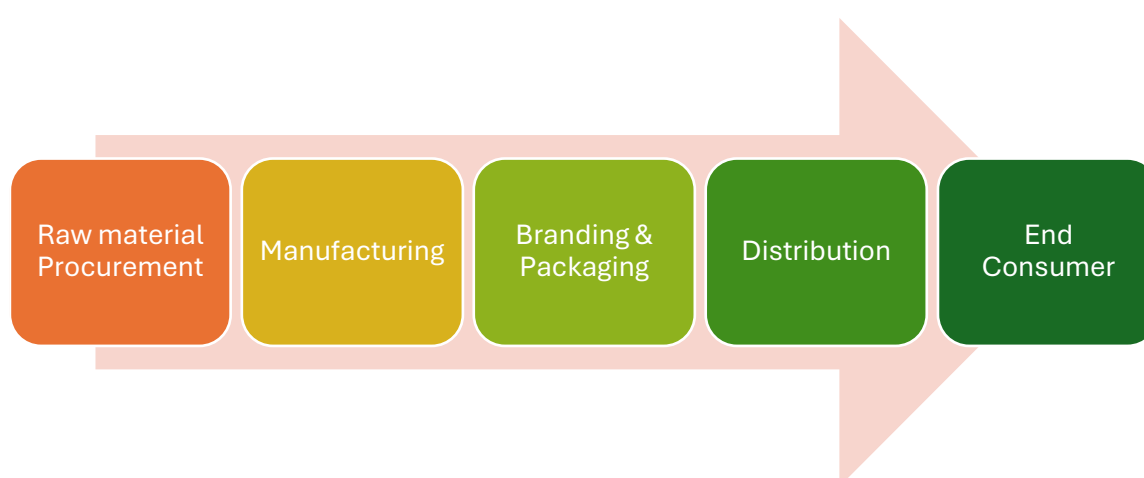

Source – Infomerics Analytics & Research

This growth trajectory is underpinned by increasing demand for hygienic, lightweight, and cost-effective packaging, rising disposable incomes, and expanding modern trade networks. Plastic films such as polypropylene (PP), polyethylene (PE), polyethylene terephthalate (PET), and PVC are extensively used for flexible laminates, barrier packaging, shrink and stretch wraps, and specialty films, making them indispensable across multiple applications. The sector is also benefitting from increased use of multilayer films and biodegradable variants in response to regulatory pressure and consumer preference for eco-friendly alternatives.

India's strong polymer production base, government support for manufacturing (such as under the PLI scheme), and relatively lower operational costs provide a competitive advantage to domestic players. Furthermore, advancements in extrusion and co-extrusion technologies have enhanced film performance, enabling extended shelf-life, better printability, and improved recyclability.

However, the industry faces critical challenges including plastic waste accumulation, lack of robust collection and recycling systems, and regulatory uncertainties surrounding single-use plastics. Moving forward, the sector's sustainability will depend on the scale-up of circular economy practices, development of recyclable mono-material films, and collaborative efforts between industry and government to build integrated waste management frameworks. Despite these hurdles, the plastic film packaging industry in India is expected to maintain its growth momentum, driven by innovation, regulatory alignment, and the evolving needs of a consumption-driven economy.

4.3 Industry Value Chain Analysis

1. Raw Material Procurement: -

The value chain in the Indian Plastic Films packaging industry begins with the procurement of base raw materials, primarily comprising polyethylene (PE), polypropylene (PP), polyester (PET), aluminium foil, adhesives, inks, and in some cases, bioplastics. The selection and quality of these inputs directly impact the mechanical strength, barrier properties, and recyclability of the final packaging material. Sourcing is a mix of domestic procurement from petrochemical firms and global imports, particularly for specialty films or aluminium laminates. Backward integration is common among larger players who maintain in-house extrusion, ink formulation, and adhesive coating lines to ensure consistency, cost control, and formulation flexibility.

2. Manufacturing: -

The manufacturing stage includes a series of integrated processes such as film extrusion or lamination, metallization, printing (flexographic, rotogravure, or digital), slitting, pouching, and converting. Depending on the final application, packaging formats may undergo value additions like resealable zippers, spouts, or laser scoring. High-speed automated machines ensure precision and scalability, while stringent quality checks are deployed to comply with FSSAI, pharma-grade, or export specifications. Technological advancements such as high-barrier mono-material films, solventless lamination, and recyclable structures have improved production efficiency and environmental compliance.

3. Branding & Packaging: -

With increased competition and direct-to-consumer (D2C) engagement, branding and packaging aesthetics have gained strategic importance. Beyond structural integrity, packaging now conveys attributes such as sustainability (recyclable, compostable), health safety (BPA-free, food-grade), convenience (resealability,

microwave compatibility), and product differentiation. Labels often highlight certifications, product claims, and usage instructions. Brand owners are also demanding minimalist, sustainable, and digitally interactive packaging (e.g., QR codes for traceability). Premium FMCG and personal care brands invest heavily in customized packaging that enhances shelf appeal and reinforces brand identity.

4. Distribution: -

Distribution of flexible packaging materials in India is facilitated through a multi-channel network, including:

- Direct sales to FMCG, pharma, and agro-input manufacturers (bulk buyers)
- B2B dealers and packaging converters who serve MSMEs and smaller brands
- Online B2B platforms and export agents for global trade
- OEM supply chains aligned with multinational brands or private-label programs. With the growing prominence of e-commerce and D2C models, flexible packaging suppliers are increasingly aligning with fast-moving brands seeking agile, small-batch, and custom packaging. Efficient logistics, warehousing, and just-in-time (JIT) delivery capabilities are vital to meeting short turnaround times and maintaining packaging supply continuity.

5. End Consumer: -

The final users of Plastic Films packaging are diverse and span across:

- **FMCG brands** (snacks, ready-to-eat, dairy, frozen foods, beverages)
- **Pharmaceutical companies** (blister foils, medical-grade laminates, unit-dose sachets)
- **Personal and home care brands** (shampoo sachets, face wipes, detergent packs)
- **E-commerce retailers** (courier bags, protective films)
- **Agri-input companies** (seed pouches, fertilizer bags, pesticide sachets)

Consumer preferences for sustainability, convenience, and hygiene continue to shape demand across all segments. The growth of urban households, QSR chains, and rural consumption is further broadening the scope of end-use applications for flexible packaging in India.

4.4 Production Trends

Source - CMIE

The production of polythene, polyester, PVC, and other plastic films in India has exhibited a resilient and adaptive upward trend from FY 2017–18 through FY 2024–25, despite intermittent pressures. Starting at around 856,036 tonnes in FY 2017–18, it climbed to a peak of 910,122 tonnes in FY 2021–22—driven by strong demand in food processing, pharmaceuticals, and personal care, particularly during the post-COVID recovery phase.

Although volumes dipped slightly in FY 2022–23 due to raw material price volatility and inventory adjustments, a synchronized rebound in FY 2024–25 reflects a robust recovery. This upswing is buoyed by accelerated FMCG consumption, accelerated Make-in-India initiatives, and strengthened e-commerce logistics, even as manufacturers adapt to regulatory mandates like Extended Producer Responsibility (EPR). It Continued adoption of high-barrier and multi-layer films in food, dairy, and pharmaceutical packaging, combined with lightweighting trends and sustainability-driven innovations like bio-based films, will underpin long-term production growth. Moreover, supportive regulatory shifts and capacity expansions among key players will further enhance the industry’s resilience and forecasting visibility.

The Wholesale Price Index (WPI) for various plastic and adhesive film products reflects dynamic pricing trends across key polymer-based categories and packaging materials over the years. The overall index has demonstrated a clear upward trajectory, signalling sustained increases in input costs, market demand, and value-added applications.

Several segments such as Polythene film and Plastic film have witnessed consistent inflationary movement, reflecting heightened demand from packaging industries and broader usage in food, pharmaceutical, and consumer goods sectors. Polythene film saw its WPI climb from 100 in 2011–12 to 145.5 in 2024–25 (~45% increase), underscoring its rising significance and value elasticity.

Categories like Polypropylene film, Polyester film (metalized), also show notable increases, aligning with global demand for specialty and barrier packaging materials. For example, metalized polyester rose to 129.0—both significant advances from their base levels.

Conversely, Polyester film (non-metalized) has shown more moderate growth—reaching 109.6—possibly due to competitive pricing and substitution by other film types. Its relatively subdued index compared to metalized

variants reflects product differentiation and market dynamics. Traditional polymer segments like Polypropylene film have recorded progressive, steady increases (121.3 by 2024–25), pointing to their ubiquitous role in packaging with controlled but consistent cost pressures. Essential and supportive product categories continue to exhibit stable, moderate increases. Plastic film, for instance, rose steadily to 124.8.

Overall, the WPI trends mirror the shifting cost structures and evolving demand landscape in polymer and packaging materials. Differential growth across film types highlights varying levels of value addition: higher-end or metalized films have seen stronger inflation, while bulk commodity films show gradual increases.

The plastic films, Sheets, Foil and Strip sector in FY25 reflected a balanced mix of opportunities and challenges in global trade. On the export front, India achieved double-digit growth, with the USA emerging as the dominant market (25.96%), reaffirming strong demand for Indian plastic films across packaging-intensive industries such as FMCG, pharmaceuticals, and industrial applications. Secondary markets like South Africa, Canada, and the UAE also contributed meaningfully, while the significant share of “Others” (52.60%) highlights a diversified export base and growing penetration into smaller but expanding markets.

On the import side, dependency on China remained substantial, with the country contributing nearly half of total imports (49.76%), underscoring India’s reliance on Chinese raw materials and intermediate films. Other key suppliers such as the USA, Turkey, Germany, and Vietnam reflect India’s efforts to diversify sourcing, though the concentration risk with China persists.

Overall, the sector’s trade pattern indicates resilient export competitiveness alongside a structural import dependency, particularly for specialized grades of plastic films not manufactured domestically. This creates both a challenge and an opportunity—encouraging domestic capacity expansion and technological upgrades could gradually reduce reliance on imports while sustaining export momentum.

The United States retained its position as the largest export destination, contributing over 20% of total outbound shipments, reflecting strong preference for India’s cost-effective and high-quality flexible packaging solutions. On the import front, China remained the dominant source, accounting for nearly 48% of total inbound shipments, primarily supplying raw materials and intermediate films.

Despite a marginal rise in import value, the industry’s export growth outpaced imports, indicating strengthening global competitiveness and increased acceptance of Indian packaging products in advanced markets. The sector's trade profile in FY25 underscores its strategic role in the international packaging value chain, supported by manufacturing scale, sustainability initiatives, and expanding export capabilities.

- **Surge in E-commerce and Last-Mile Delivery Packaging Demand** - The explosive growth of e-commerce has driven high near-term demand for lightweight and durable plastic films used in courier bags, mailers, and protective wraps. While this momentum is expected to continue in the short to medium term, it may plateau over the long run as packaging norms stabilize, and reuse solutions gain traction.
- **Rising Demand for Retort Pouches and High-Barrier Films in F&B Packaging** - The shift toward convenience foods, ready-to-eat meals, and on-the-go consumption is pushing food brands to adopt high-barrier, retortable plastic films. This trend is especially strong in the mid-term, fuelled by urbanization and lifestyle changes, though adoption may stabilize as technology matures.
- **Growing Adoption of Sustainable, Mono-Material Films due to EPR and Green Regulations** - Environmental mandates like EPR are prompting FMCG brands to transition to recyclable, mono-material plastic films. While adoption is currently limited, regulatory pressures and brand sustainability goals are expected to drive strong growth over the medium to long term.
- **Expansion in Pharmaceutical and Biologics Flexible Packaging** - **Rising** global demand for temperature-sensitive biologics and vaccines is leading to higher consumption of specialized films for blister packs and cold-chain pouches. While currently moderate, this driver is set to strengthen over time as the pharmaceutical sector expands, and product safety regulations tighten.
- **Investments in Digital Printing and Smart Packaging for Cosmetics and Branding** - Brands, especially in cosmetics and personal care, are increasingly adopting digital printing and smart packaging technologies for short-run, customized film packaging. This trend is expected to accelerate, driven by marketing differentiation and rising consumer preference for premium packaging.

- **Urbanization-Driven Shift to Convenience Formats** - Changing lifestyles and a growing urban middle class are fuelling demand for easy-to-use formats such as stand-up pouches, resealable packs, and peel-off films. This trend is gaining traction steadily and is projected to grow further as convenience continues to be a key consumer priority.

5.2 Challenges

The plastic films packaging industry faces several challenges, including volatility in raw material prices such as polyethylene and polypropylene, which directly impacts production costs and margins. Increasing environmental concerns and stringent regulations on single-use plastics are also creating compliance pressures and driving the need for sustainable alternatives. Additionally, intense price competition, dependence on petrochemical-based inputs, and the need for continuous investment in recyclable and eco-friendly technologies pose operational and financial challenges for industry participants.

Detailed Overview of Restraints

- **Regulatory Uncertainty in Plastic Waste and EPR Enforcement** - Frequent changes and ambiguity in environmental policies, including the Plastic Waste Management Rules and Extended Producer Responsibility (EPR) mandates, create compliance complexities for packaging manufacturers. Variability in state-level enforcement and lack of clear frameworks for recyclability classifications lead to increased legal and operational risks. This remains a high-impact restraint in the short to medium term, with some stabilization expected over time.
- **Volatility in Raw Material Prices (Crude-Linked Polymers)** - The Plastic films packaging sector is heavily dependent on petrochemical derivatives such as polyethylene (PE) and polypropylene (PP). Fluctuations in global crude oil prices directly impact raw material costs, squeezing margins—

especially for converters with limited pricing power. This is a high-impact challenge in the short term, though companies may mitigate it through strategic sourcing and long-term contracts.

- **Capital-Intensive Nature of Recycling and Mono-Material Infrastructure** - Transitioning to recyclable mono-material packaging and investing in advanced recycling or compostable film production requires significant capital. This presents a major barrier for small and mid-sized manufacturers, particularly in a price-sensitive market. As sustainability regulations tighten, this restraint will continue to exert high impact through the medium term, before infrastructure scales up and costs normalize.
- **Margin Pressures from FMCG Price Sensitivity and Retailer Consolidation** - Large FMCG brands and organized retailers increasingly demand lower unit costs, while expecting higher sustainability, print quality, and innovation in packaging. With limited ability to pass on input cost increases, manufacturers face ongoing margin compression, especially in high-volume, low-margin categories. This challenge is expected to intensify over time.
- **Lack of Uniform Collection and Segregation Systems for Flexible Waste** - The absence of structured municipal and private collection systems for packaging waste hinders India’s ability to build a circular economy. Without reliable segregation, even recyclable materials end up in landfills. This systemic constraint is high impact in the short and medium term, limiting EPR compliance and recyclability targets.
- **Dependence on Imported Barrier Resins and Specialty Films** - India currently imports significant volumes of high-barrier films, metallized laminates, and PVDC-coated substrates from countries like China and South Korea. This supply dependence increases vulnerability to trade disruptions, currency fluctuations, and policy barriers. Over time, domestic capacity additions may reduce this risk, making it a moderate-to-low impact in the long term.
- **Limited Awareness of Sustainable Packaging Benefits Among Small Brands** - Many small and regional FMCG or pharma brands continue to prioritize cost over environmental responsibility, delaying the adoption of sustainable packaging formats. Limited customer demand, regulatory enforcement, and awareness contribute to this challenge, which will likely diminish over time as awareness and regulations improve.
- **Recycling Infrastructure Gaps for Multi-Layer Packaging** - The lack of commercial-scale infrastructure for recycling multi-layer packaging—especially those combining plastic, foil, —remains a major hurdle to achieving circularity. While pilots exist, scalable models are limited. This remains a high-impact barrier in the short to medium term, with some progress expected through industry partnerships and government-backed projects.
- **Technical Challenges in Developing Biodegradable Alternatives with Equivalent Performance** - While bio-based and compostable packaging is gaining traction, current materials often lack the mechanical strength, barrier properties, or shelf-life performance of conventional plastics. This limits adoption, particularly in high-barrier applications like snacks, dairy, and pharmaceuticals. Over the long term, R&D may mitigate this gap, but near-term performance trade-offs remain a key restraint.
- **Supply Chain Disruptions Due to Geopolitical and Trade Policy Events** - Trade conflicts, import bans, and logistics bottlenecks (e.g., post-COVID and Russia–Ukraine impacts) continue to pose risks to raw material availability and export logistics. These macro-level uncertainties result in volatile delivery timelines, inventory costs, and procurement risks, especially in an industry highly reliant on imported materials and global clients. This remains a high-impact constraint in the near term with some expected normalization in future years.

7. Government Initiatives and Policy Support

The Government of India has introduced various regulatory, infrastructure, and sustainability-focused initiatives that directly or indirectly support the Plastic films & flexible packaging sector. These programs aim to improve domestic manufacturing capabilities, encourage circularity, support MSMEs, and enhance global competitiveness. The following key initiatives are particularly relevant for stakeholders in the packaging value chain:

- **Plastic Waste Management Rules (Amendment), 2022** - Under the Plastic Waste Management (Amendment) Rules, 2022, the Government of India has implemented a robust Extended Producer Responsibility (EPR) framework specifically targeting flexible plastic packaging—such as films, pouches, and sachets. From FY 2024–25 onwards, all producers, importers, and brand owners must register on the CPCB’s centralized EPR portal, adhere to phase-wise recycling and reuse targets for plastic waste, and ensure packaging is clearly labelled with material type and thickness. These regulations significantly benefit the flexible packaging industry. They drive investments in recyclable mono-material films, enhance supply chain traceability through mandatory registration, and ensure compliance with both domestic FMCG requirements and international sustainability norms.
- **Make in India & Atmanirbhar Initiative** - Under the **Make in India** and **Atmanirbhar Bharat** initiatives led by DPIIT, flexible packaging manufacturers are receiving significant government support aimed at boosting domestic manufacturing and reducing import reliance—especially for essential inputs like petrochemicals and film-grade polymers. The PM Gati Shakti National Master Plan, launched in October 2021, is enhancing infrastructure development by improving multimodal connectivity, logistics efficiency, and last-mile delivery through a centralized digital platform.
- **Single-Use Plastic Ban & Minimum Thickness Notification** - Under the Plastic Waste Management (Amendment) Rules, 2021–22, the Ministry of Environment, Forest and Climate Change enforced a phased ban on single-use plastic items—such as cutlery, straws, and films—effective July 1, 2022, and mandated that plastic carry bags be a minimum 120 microns thick by December 31, 2022 to enhance their reusability and recyclability. These regulations eliminate low-quality packaging, promote higher-quality, recyclable substrates, and require mandatory labelling of material and thickness—measures aimed at boosting sustainable innovation, improving plastic sorting across urban local bodies and aligning India’s packaging sector with global environmental standards.
- **Anti-Dumping Duties on Polyester and BOPP Films** - India has long protected its domestic flexible packaging film industry through anti-dumping duties on imports of BOPET (polyester) films, particularly from countries like China, India, and Thailand. These measures help safeguard Indian film manufacturers against undercutting, promote investment in local extrusion capacity, and provide pricing stability essential for flexible packaging converters.
- **National Packaging Policy** - The National Packaging Policy (NPP) is under consideration by the Indian government to address packaging waste. It aims to establish standards for packaging, promote recycling, and encourage the use of eco-friendly materials. Encourage processes to reduce packaging waste by establishing material recovery facilities (MRFs).

8. Technology and Digital Transformation

The plastic films flexible packaging industry in India is undergoing a significant transformation driven by advancements in technology, a growing emphasis on sustainability, and rapidly changing consumer expectations. From smart packaging solutions to digital process integration, these innovations are revolutionizing the industry's manufacturing, functionality, and environmental impact.

- 1. Smart Packaging** - Smart packaging technologies are becoming increasingly prevalent in plastic films, incorporating elements such as QR codes, RFID tags, and embedded sensors. These features enable real-time tracking, product authentication, and consumer engagement. In food and pharmaceutical packaging, sensors can monitor freshness and spoilage, enhance quality control and reduce waste.
- 2. Digital Printing** - Digital printing is reshaping how plastic film packaging is produced, enabling high-resolution, customizable graphics without the need for traditional plates or cylinders. This allows for shorter production runs, faster time-to-market, and reduced material waste. It is especially valuable for promotional packaging and personalized product offerings.
- 3. Automation and Robotics** - Robotics and automated systems are being integrated into plastic film packaging production lines to enhance efficiency, accuracy, and consistency. AI-powered inspection systems can detect defects in film printing or sealing in real-time, significantly improving quality assurance and minimizing rejections.
- 4. 3D Printing** - 3D printing enables quick prototyping of packaging designs, cutting down on time and costs compared to traditional methods. This technology allows brands to develop tailored solutions while reducing plastic waste.
- 5. Sustainability through technology** - As regulatory pressures mount, including India's Plastic Waste Management Rules, technology is playing a pivotal role in sustainability. Companies are innovating with biodegradable and compostable films derived from seaweed, cornstarch, or agricultural waste like rice stubble. Recyclable mono-material films and downgauged multilayer structures are also gaining traction.
- 6. Digital Transformation in Sales and Customer Engagement** - The rise of e-commerce and direct-to-consumer models is reshaping how brands approach packaging. Plastic film packaging is now expected to be not only protective but also visually compelling. Digital technologies enable mass customization and personalized designs, catering to consumers seeking unique, limited-edition, or interactive packaging experiences.

9. Competitive Landscape of Plastic Films Packaging Players in India

The Indian Plastic films packaging industry, a vital component of sectors like food, pharmaceuticals, and consumer goods, is undergoing significant transformation. This evolution is propelled by technological advancements, regulatory shifts, and changing consumer preferences, leading to heightened competition and innovation within the sector.

9.1 Key Factors Shaping Competition

- Infrastructure and Cold-Chain Capabilities** - The increasing demand for temperature-sensitive products like frozen foods, dairy, and pharmaceuticals has highlighted the need for reliable cold-chain infrastructure in the plastic films packaging sector. However, the industry faces gaps such as outdated storage systems, poor last-mile connectivity, and insufficient trained personnel. Government initiatives like the National Logistics Policy and development of Multi-Modal Logistics Parks (MMLPs) aim to strengthen the logistics backbone, improving efficiency and enabling timely delivery of film-based packaging solutions across the country.
- Regulatory Compliance and Licensing** - Plastic films packaging companies must navigate a complex regulatory environment, particularly with the enforcement of the Plastic Waste Management Amendment Rules, 2023. These regulations promote biodegradable, recyclable, and mono-material films, requiring substantial investment in R&D and material innovation. Inconsistencies in state-level policies further

challenge unified compliance strategies, making agility and localized adaptation critical to staying compliant and competitive.

- **Manufacturer and Retailer Tie-ups** - Strategic alliances between packaging film producers and FMCG, pharmaceutical, or retail companies have become essential for maintaining stable demand and enhancing product customization. Manufacturers that offer integrated services—ranging from design to distribution—gain a competitive edge through long-term contracts and exclusive product lines, enabling better resource planning and customer retention.
- **Geographic Reach and Network Penetration** - Wider distribution networks and local market presence play a vital role in reducing lead times and logistics costs in the plastic films packaging space. Companies with extensive geographic coverage are better equipped to meet just-in-time delivery models, especially for large-scale clients across multiple sectors. Infrastructure investments under government schemes are further expected to support deeper market penetration.
- **Digital Infrastructure and Technology Adoption** - The rapid adoption of digital tools—such as IoT sensors, real-time tracking systems, and AI-driven quality control—is revolutionizing production and logistics in plastic films packaging. Players investing in automation and blockchain-based traceability systems can ensure higher product integrity and operational transparency. Additionally, rising e-commerce volumes have led to increased demand for intelligent, tamper-evident packaging film formats.
- **Service Differentiation and Value-Added Offerings** - To move beyond commoditization, plastic film manufacturers are increasingly offering value-added services like bespoke branding, sustainable material consulting, and streamlined supply chain management. These offerings not only enhance customer satisfaction but also create stronger, loyalty-based partnerships with both upstream (raw material suppliers) and downstream (brand owners, retailers) stakeholders.

In conclusion, the Indian plastic films packaging industry is shaped by a blend of infrastructure development, evolving regulatory norms, digital transformation, and rising expectations for customization and sustainability. Companies that proactively invest in innovation, compliance, and customer-centric services are best positioned to lead in this highly competitive landscape.

9.2 Competitive Strategies

The Indian plastic films packaging industry is witnessing intensifying competition, driven by innovation, environmental mandates, and changing end-user needs. Companies are transitioning from traditional volume-driven models to more agile, tech-enabled, and value-driven strategies. Below is a structured analysis of key competitive approaches adopted by leading players:

- 1. Product & Market Differentiation** - Functional Innovation Brands are offering stand-up pouches, resealable zippers, spouts, microwave- and puncture-proof packaging—meeting consumer demand for “on-the-go” convenience. Advanced UV and digital printing allow small-batch, high-design packaging tailored for brands, especially in food, cosmetics, and healthcare.
- 2. Sustainability – Led Positioning** - Leading players are adopting sustainability-first strategies by developing biodegradable films, recyclable mono-material laminates, and down-gauged film structures. Examples include the use of agri-waste-based materials and integration of 20–30% recycled content in packaging. These efforts align with India's Plastic Waste Management Rules and support brand ESG commitments, providing a strong market differentiator.
- 3. Scale & Infrastructure Expansion** - Companies are adding plants across regions (e.g., UFlex’s Dharwad plant, PET chip unit in Panipat) and leveraging Maharashtra's industrial infrastructure to serve diverse sectors. Jindal Poly Films’ (JPFL) recent capacity augmentation exemplifies the aggressive scale and infrastructure expansion shaping India’s packaging sector.
- 4. Digital & Smart Packaging Integration** - Integration of QR codes, NFC/RFID tags, anti-counterfeit tech not only strengthens consumer engagement, but also improves traceability—especially vital for pharmaceuticals. AI/IoT-supported production lines, robotics, and ERP systems are being implemented in

smart manufacturing setups to increase flexibility, reduce downtime, and support small-batch customization.

5. **Strategic Collaboration and Acquisition** - Partnerships such as Amcor acquiring Phoenix Flexibles and Polymateria teaming with Indian film producers for biodegradable masterbatches showcase strategic scaling. Collaboration with bodies like CCRI-VNIT and Indian Institute of Packaging (IIP) yields sustainable material innovations and high-quality packaging design.
6. **Supply chain & Logistics Optimization** - Investing in logistics parks, cold/multi-temp chain facilities, and regional hubs to ensure safe distribution across metros and tier-II/III cities, crucial for e-commerce and pharma demand. Down-gauging films, using space-saving packaging, and light-weighting material all contribute to cost-cutting and lower carbon footprint.
7. **Regulatory Compliance & Quality Assurance** - Players invest to meet India's Plastic Waste Management Amendment Rules (2023), along with state regulations, ensuring traceability and audit readiness. Adherence to FSSAI, pharma-specific packaging guidelines, and certifications that enhances credibility and reduces compliance risk.
8. **Value – Added Ecosystem Services** - Beyond packaging, vendors provide branding support (design, digital printing), packaging consultancy via IIP, and track/trace solutions leveraging smart packaging technology. Through AR-enabled packaging experiences, QR-based loyalty schemes, and freshness sensors—enhancing brand interaction and awareness.

9.3 Barriers to Entry

The plastic films packaging industry in India presents significant entry challenges due to its capital-intensive infrastructure, regulatory complexity, and high levels of technical and operational expertise. Unlike basic packaging segments, plastic films packaging demands sophisticated machinery, skilled labour, and compliance with stringent environmental and product safety standards. These factors elevate the entry threshold, discouraging smaller or undercapitalized entrants. The key structural and operational barriers include:

- **High Capital & equipment investment** - Establishing production facilities demands heavy investment in advanced lamination, and pouch-making equipment—costs that quickly escalate into several crores. These are typically only within reach of well-funded players, creating a substantial financial barrier for smaller entrants.
- **Economies of Scale** - Larger manufacturers benefit from economies of scale in sourcing raw materials (like polymers), operational efficiency, and fixed cost absorption. Smaller or new players face higher per-unit production costs, making it difficult to offer competitive pricing or absorb margin pressures from volatile raw material prices.
- **Technology and Quality Expertise** - Meeting performance standards—such as barrier protection, heat seal ability, print fidelity—requires in-depth technical know-how. Additionally, integration of emerging technologies like digital printing, smart packaging (QR/NFC/RFID), and automated quality control systems further elevates the technical entry bar.
- **Strict Regulatory & Environmental norms** - Plastic films used in food, pharma, and export markets must meet regulatory standards such as the Plastic Waste Management Amendment Rules, FSSAI norms, and pharma packaging compliance. Adapting to evolving regulations and managing cross-state compliance requires investments in certifications, audits, and regulatory frameworks, which pose substantial barriers for newcomers.
- **Supply Chain & Raw material Challenges** - The plastic films industry is heavily reliant on petrochemical-based inputs, which are subject to global price volatility. Smaller firms often lack the volume leverage to hedge against these fluctuations or negotiate favourable terms. Inconsistent supply of key materials like PE, BOPP, or metallized films further adds procurement risk for new entrants without established vendor relationships.
- **Experience & Human Capital requirements** - Operating high-speed, multi-process packaging lines demands a skilled workforce proficient in handling diverse substrates and machine settings. Achieving

quality consistency across lamination, and slitting stages requires trained technicians and robust SOPs. For new entrants, building such a talent pool and operational discipline takes significant time and investment.

- **Fragmented market and intense Competition** - The industry is highly fragmented, with both large-scale producers and numerous regional players. The presence of tier-1 incumbents with economies of scale, and smaller local converters, creates a crowded and competitive landscape. The sheer number of players leads to price-based competition, pressuring margins and limiting room for new entrants to establish premium value.

9.4 Consolidation Trends for Plastic Films Packaging Industry

The Indian plastic films packaging industry, long dominated by a fragmented base of regional converters and raw material suppliers, is now experiencing a marked wave of consolidation. This is especially pronounced in specialty packaging segments where rising sustainability requirements, evolving technology, and regulatory compliance demand greater integration and scale. Several key factors are driving this consolidation, reshaping the industry's competitive landscape and operational dynamics:

- **Strategic Acquisitions by Global Players** - Global packaging giants are actively expanding their footprint in India through strategic acquisitions. Notably, in August 2023, Amcor PLC acquired Phoenix Flexibles, a Gujarat-based manufacturer specializing in flexible packaging for food, home care, and personal care applications.
- **Capacity Scaling through Vertical Integration** - Domestic giants like UFlex are scaling up by integrating upstream capabilities (e.g., polyester chips and BOPET lines in Panipat and Dharwad). This vertical integration improves control over raw material sourcing, cost structure, and product innovation—especially for pharmaceutical and medical packaging.
- **Sustainability and Regulatory Push** - India's Plastic Waste Management Amendment Rules (2023) are driving companies to shift toward recyclable, compostable, or bio-based films. Manufacturers are consolidating or acquiring technology to comply, reduce environmental footprint, and bolster brand reputation.
- **E-commerce & Smart Packaging Momentum** - The rapid growth of e-commerce has increased demand for durable, puncture-resistant, and smart packaging (e.g., NFC labels, tamper-evidence). Local manufacturers are consolidating technical know-how or investing in bolt-on acquisitions to meet rising demand for intelligent packaging solutions.
- **Regional Capacity Consolidation** - Key states—Maharashtra, Gujarat, Karnataka—are focal points for consolidation as firms expand or merge to optimize logistics, reduce lead times, and serve growing industrial clusters in food, pharmaceuticals, and consumer goods.
- **Market Fragmentation & Quality Differentiation** - Despite growth, the Indian market remains fragmented. Consolidation is reducing fragmentation by enabling better quality control, standardized processes, and access to financing for technology upgrades. This shift is crucial for differentiation in high-growth verticals like pharmaceuticals and ready-to-eat foods.
- **Rationalization of the Unorganized Sector** - India's unorganized plastic film packaging segment is shrinking due to formalization policies like GST, rising regulatory compliance, and environmental restrictions. Many smaller players are either exiting the market or being acquired by larger companies. This transition is enabling industry consolidation, leading to more standardized, quality-assured, and traceable packaging solutions.

10. Future Outlook

India's plastic film packaging industry has emerged as a vital segment within the broader flexible packaging ecosystem, playing a pivotal role in the preservation, transportation, and aesthetic presentation of products across food and beverages, pharmaceuticals, FMCG, agriculture, and e-commerce. The market has shown steady growth, with its estimated value increasing from 1.93 million tonnes in FY 2025, indicating consistent demand growth across sectors. As the industry estimates, the Indian plastic film packaging market is projected to reach around 3.81 million tonnes by FY 2035, growing at a CAGR of 7.05% during the forecast period FY 2025–FY 2035.

The future of India's plastic film packaging industry appears robust, shaped by dynamic shifts in consumption, regulation, and innovation. Driving this momentum are several key themes: surging demand from the food and beverage sector, which continues to favor lightweight, shelf-stable formats; the rapid growth of e-commerce, catalysing demand for durable and tamper-evident packaging; and rising consumer expectations for convenience, hygiene, and product freshness.

Technological advancements will be central to the industry's transformation. High-barrier, multilayer films and smart packaging solutions—including QR codes, RFID, and gas sensors—are expected to see widespread adoption, especially in pharmaceutical and perishable product segments. These innovations are enhancing traceability, shelf life, and user interaction, driving premiumization and functionality in packaging.

Concurrently, sustainability has become a defining imperative. The growing emphasis on bio-based, biodegradable, and compostable films—driven by regulatory bans on single-use plastics, consumer eco-consciousness, and materials innovation (e.g., PLA, PHA, starch blends)—is transforming industry priorities. Government interventions, such as the Plastic Waste Management Rules and incentives for local packaging start-ups, are actively steering the industry toward circularity.

OUR PROCESS:

The manufacturing process of the company is described as follow:-

1. Raw Material Procurement:-

Our manufacturing process commences with the procurement of raw materials, which primarily include various types of films like CPP films, CPE films, metallized films, LD films, BOPP films and other types of films, inks, adhesives and other chemicals. We source all raw materials domestically from established suppliers. Upon receipt, the raw materials are subjected to quality inspection by our quality and assurance staff forming part of our operations and production department to ensure compliance with our predefined standards.

2. Quality Check

We have an in-house quality and assurance staff forming part of our operations and production department which is responsible for conducting sample based manual inspections of raw materials upon receipt. These quality checks ensure that all materials comply with our established standards and specifications. Raw materials that meet the required criteria are approved and released to the production department for further processing. Conversely, any materials that do not meet the specified standards are rejected and returned to the respective suppliers.

3. Printing

Printing is done using engraved cylinders, each designed for a single color. These cylinders are custom-ordered as per design requirements, and printing is carried out on the first film layer using the gravure process, a high speed, high quality method ideal for multi color jobs. Generally, a supplier provide us the customised cylinder used for printer. In gravure printing, ink fills engraved cells on the cylinder, and excess ink is removed by a doctor blade, leaving ink only in the cells to be transferred to the film. After printing, lamination is done by applying a second layer over the printed surface to improve durability and appearance.

4. Lamination

Our lamination process involves the bonding of two or more layers of flexible plastic films printed films are further processed through the machine to add another layer of film like metallized films, LDP (low-density polyethylene) films, and other specialized film to enhance strength, and visual appearance of final packaging material. Our company has a lamination machine capable of laminating film using solvent-based adhesives. The process begins with the application of adhesive on the first film, then film is heated to dry the adhesive. A second film layer is then applied on that through secondary unwinder. The laminated structure is subsequently wound into rolls for further use. If an additional film layer is required to add on that product, then laminated roll undergoes the same process again to incorporate the next layer, ensuring flexibility in creating multi-layer structures as per customer specifications.

5. Cutting & Slitting

After the lamination process, the rolls are sent for cutting and slitting to remove excess material from the edges. This step is done to trim side borders, ensuring uniform roll. The slitting machine cuts these side strips precisely without affecting the main area. This ensures smooth winding and better-quality control for the next stage. As our company supplies both rolls and pouches, the slit rolls are directed accordingly those meant for pouching are sent to the pouching section, while rolls required by customers are sent for final inspection and prepared for dispatch. The trimmed side strips generated during this process are not wasted, they are collected and sold separately, helping us reduce material waste and improve overall resource efficiency.

6. Pouching

The slit rolls required for pouch making are sent to the pouching section, where they are used as input for producing finished pouches. In this process, the rolls are fed into the pouching machine, which applies heat to bond or seal the two edges of the film together, forming the sides of the pouch. After sealing, the film is further cut into individual pouches as per the sizes and specifications provided by the customer. The machine ensures accurate sealing and cutting to maintain uniformity and quality. This in-house pouching process enables us to efficiently convert rolls into ready-to-use pouches, allowing us to cater to varying customer needs with both roll and pouch formats.

7. Final Inspection

After this, the product undergoes final inspection by the Quality and Assurance staff forming part of our operations and production department on a sample basis manually. Any material that does not meet quality standards is identified, segregated, and sold as scrap.

8. Packing and Shipment

Once the final quality inspection is completed and the product is approved, it is carefully packed in plastic bags to ensure protection during transit. The packed goods are then handed over to third-party logistics service providers for delivery to the customer's location. The mode of transport is selected based on the delivery destination and customer preference. All transportation and delivery charges are borne by the customer, as per the agreed terms.

The FTA is the main legislation concerning foreign trade in India. The FTA, read along with Foreign Trade (Regulation) Rules, 1993, provides for the development and regulation of foreign trade by facilitating imports into, and augmenting exports from, India and for matters connected therewith or incidental thereto. As per the provisions of the FTA, the Government:- (i) may make provisions for facilitating and controlling foreign trade; (ii) may prohibit, restrict and regulate exports and imports, in all or specified cases as well as subject them to exemptions; (iii) is authorised to formulate and announce an export and import policy and also amend the same from time to time, by notification in the Official Gazette; (iv) is also authorised to appoint a 'Director General of Foreign Trade' for the purpose of the FTA, including formulation and implementation of the Export-Import ("EXIM") Policy. The FTA prohibits anybody from undertaking any import or export except under an Importer-Exporter Code number ("IEC") granted by the Director General of Foreign Trade pursuant to Section 7 of the FTA. Hence, every entity in India engaged in any activity involving import/export is required to obtain an IEC unless specifically exempted from doing so. Failure to mention IEC number attracts a penalty of not less than ₹10,000 and not more than five times the value of the goods or services or technology in respect of which any

contravention is made or is attempted to be made, whichever is made. The IEC shall be valid until it is cancelled by the issuing authority.

Under the Foreign Trade (Development and Regulation) Act, 1992, the Central Government is empowered to periodically formulate the Export Import Policy (the —EXIM Policy) and amend it thereafter whenever it deems fit. All exports and imports must be in compliance with the EXIM Policy. The iron and steel industry has been extended various schemes for the promotion of exports of finished goods and imports of inputs. Deferred tax represents the tax expected to be payable or recoverable on temporary differences between the carrying amounts of assets and liabilities in the financial statements and their corresponding tax bases. Deferred tax liabilities are recognised for all taxable temporary differences, while deferred tax assets are recognised only to the extent that there is reasonable or virtual certainty, supported by convincing evidence where required, that sufficient future taxable profits will be available for their realisation. Deferred tax is measured using tax rates and laws enacted or substantively enacted at the reporting date and reflects the expected manner of recovery or settlement of the related assets and liabilities. Deferred tax assets and liabilities are offset when they relate to the same tax authority and there exists a legally enforceable right to set off, and their carrying amounts are reviewed at each reporting date.

Minimum Alternate Tax (MAT) credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments have been included under "unallocated revenue / expenses / assets / liabilities". The company operates in only one segment i.e Trading & Manufacturing of Flexible Packaging Products in India and therefore Segment reporting is not applicable to the company.

The liabilities are presented as salary and wages payable under other current liabilities in the restated statement of assets and liabilities. Actuarial Valuation report is not applicable as per AS 15, as the company does not fall under the definition prescribed for gratuity under the applicable provisions.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, an Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by an Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. *SEBI/HO/CFD/DIL2/CIR/P/2020/50* dated *March 30, 2020* extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III/T+3: This phase has become applicable vide T+3 Press Release. In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Press Release as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and/ or payment instructions of the Individual Bidders using the UPI.

The processing fees for applications made by Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: *SEBI/HO/CFD/DIL2/P/CIR/2021/570* dated June 2, 2021 read with SEBI Circular No:

SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

The list of Banks that have been notified by SEBI as Issuer Banks for UPI are provided on <https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmid=40> .

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

| Bid Quantity | Bid Amount (₹) | Cumulative Quantity | Subscription |
|--------------|----------------|---------------------|--------------|
| 500 | 24 | 500 | 16.67% |
| 1,000 | 23 | 1,500 | 50.00% |
| 1,500 | 22 | 3,000 | 100.00% |
| 2,000 | 21 | 5,000 | 166.67% |
| 2,500 | 20 | 7,500 | 250.00% |

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), has issued consolidated FDI Policy Circular of 2020 (“**FDI Policy 2020**”), which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular. The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia; the pricing guidelines prescribed under the Master Circular.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore, applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2020 has to be obtained by the Company. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionality’s (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open issue/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any ‘fit and proper/due diligence’ requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionality’s (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares

of Our Company. Investors will not issue, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
