#### SECTION III- RISK FACTORS

An investment in Equity Shares involves a high degree of risk. prospective investors should carefully consider all the information in this Draft Red Herring Prospectus, particularly the "Financial Information of the Company" and the related notes, "Our Business" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" beginning on pages 155, 112 and 201 respectively and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved.

- 1. Some events may not be material individually but may be found material collectively.

- 3. Some events may not be material at present but may be having material impact in future.

#### Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in "Risk Factors" beginning on page 25 and "Management Discussion and Analysis of Financial Condition and Results of Operations" beginning on page 201 unless otherwise indicated, has been calculated on the basis of the amount disclosed in the "Audited Financial Statements, as restated" prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP).

#### **INTERNAL RISK FACTORS**

1. The viability of our business operations for the Steel Division is dependent on cost of power and fuel, any volatility in energy prices may result into financial stress on the viability of the Steel operations which may lead to temporary shutdown of the plant, which had an affect our revenue and financial strength in the past and could effect the future too.

Our company has two line of business viz. Sponge iron and Steel products. The cost of power in the past has led to the temporary shutdown of our manufacturing operations for mild steel ingots, steel shots, grits, and other steel products since 2020. While we have the necessary infrastructure and machinery in place for steel products manufacturing, the economic environment has not been conducive to sustained operations due to high power cost. To address this, we plan to install a

captive power plant on our premises using proceeds from the current issue. This will allow us to generate our own electricity, reducing reliance on external power sources, stabilizing energy costs, and improving cost predictability.

However, there is no assurance that our machinery will be fully operational once production resumes, given the long halt in activity. Moreover, any delays or challenges in the installation of the captive power plant may further extend our dependency on unpredictable external energy sources, potentially leading to future operational disruptions.

Failure to manage these costs effectively, or delays in completing the captive power plant, could significantly impact our business operations, financial condition, and overall performance. The timely and successful installation of the captive power plant is crucial for ensuring the sustainability of our operations and mitigating the risks associated with energy price volatility.

At our sponge iron manufacturing facility, power and fuel costs totaled ₹190.06 lakhs in Fiscal 2024, representing 2.31% of revenue from operations. While power costs currently form a small part of our overall revenue, a sharp or sustained increase in these costs could erode our operating margins, adversely affecting our profitability.

2. Substantial portion of our revenues has been dependent upon few customers, with which we do not have any firm commitments. The loss of any one or more of our major customer would have a material adverse effect on our business, cash flows, results of operations and financial condition.

The substantial portion of our revenues has been dependent upon few customers. For instance, our top five customers for the period ended March 31, 2024, March 31, 2023 and March 31, 2022 accounted for 76.25%, 61.51% and 61.47% of our revenue from operations for the respective year/period. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our significant customers, a failure to negotiate favorable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company.

The contribution of our top five customers in our sales as a percentage of the revenue from operations during Fiscal 2024 are disclosed hereunder: -

| S. No. | Customer   | % contribution in the revenue from operations for Fiscal 2024 |
|--------|------------|---|
| 1      | Customer 1 | 28.12%  |
| 2      | Customer 2 | 19.05%  |
| 3      | Customer 3 | 13.82%  |
| 4      | Customer 4 | 11.51%  |
| 5      | Customer 5 | 3.75%   |
| Total  |            | 76.25%  |

In addition, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on maintaining good relationship with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources. Additionally, our revenues may be adversely affected if there is an adverse change in any of our customers' supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers.

We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

3. We significantly depend upon few of the raw material suppliers for manufacturing of sponge iron. Volatility in the supply and pricing of our raw materials may have an adverse effect on our business, financial condition and results of operations.

Sponge iron production requires substantial amounts of raw materials and energy, including iron ore and coal, which are subject to significant price volatility. Our cost of raw materials consumed for Fiscal 2024 was ₹ 6,115.92 lakhs, which represented 74.34% of our revenue from operations.

We do not have long term agreements with any of our raw material suppliers and we acquire such raw materials pursuant to our purchase orders from suppliers across many states. Raw material supply and pricing can be volatile due to a number of factors beyond our control, including global demand and supply, general economic and political conditions, tariff disputes, transportation and labour costs, labour unrest, natural disasters, competition, import duties, the outbreak of infectious diseases such as COVID-19, tariffs and currency exchange rates and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations. There can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Any delay in the supply or delivery of raw materials to us by our suppliers in may in turn delay our process of manufacture and delivery of products to our customers and this may have an adverse effect on our business, cash flows and results of operations. Additionally, our inability to predict market conditions may result in us placing supply orders for inadequate quantities of such raw materials. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms.

4. Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.

We generate major domestic sales through our customers situated at Maharashtra, Madhya Pradesh and Chhattisgarh. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations.

The manufacturing operations of the company are carried in the state of Chhattisgarh at Siltara- Raipur. Due to the geographical concentration of our manufacturing operations in Chhattisgarh, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant

delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local customers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

5. Our Company is yet to place orders for the Plant & Machinery for the setup of captive power plant. Any delay in placing orders or procurement of such machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.

Our Company has received third party quotations for the machinery proposed to be installed for Captive Power Plant at Siltara—Raipur. Although, we have identified the type of machinery proposed to be purchased from the net proceeds, we are yet to place orders for the proposed machinery approximately amounting to Rs. 3,608.00 Lakhs. The cost of the proposed purchase of machinery is based on the quotations received from third party vendors and contractors and such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. For details, please refer to the chapter titled "Objects of the Issue" beginning on page 79 of this Red Herring Prospectus.

We cannot assure that we will be able to procure the machinery in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the Machinery or in the event the vendors are not able to provide the machinery in a timely manner, or at all, we may encounter time and cost overruns in expanding the capacity of the Manufacturing unit. Further, if we are unable to procure machinery from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the machinery which satisfy our requirements at acceptable prices. Our inability to procure the machinery at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

6. Majority of our revenue is dependent on single business segment i.e. Sponge Iron. An inability to anticipate or adapt to evolving upgradation of products or inability to ensure product quality or reduction in the demand of such products may adversely impact our revenue from operations and growth prospects.

Majority of our revenue is dependent on single business segment i.e. Sponge Iron, which accounted for 96.53%, 96.51% & 95.99% of our total revenue from operations, respectively for the period of Financial Year ending March 31, 2024, March 31, 2023 & March 31, 2022. Our continued reliance on single business segment for substantial portion of our revenue exposes us to risks, including but not limited to, reduction in the demand of the products in the particular segment in the future; increased competition from regional and national players; the invention of superior and cost- effective technology; fluctuations in the price and availability of the raw materials; changes in regulations and import duties and the general economic conditions. Any occurrences of such event could significantly reduce our revenues, thereby materially adversely affecting our results of operations and financial condition.

7. We do not own the Registered Office and Manufacturing Unit from which we carry out our business activities. In case of dispute in relation to use of the said premise, our business and results of operations can be adversely affected.

For our Registered Office situated Flat No 2D, 2nd Floor, Tower No. 1, Alcove Gloria, Municipal Premises No 403/1, Dakshindari Road, VIP Road, Kolkata, , Sreebhumi, North 24 Parganas, West Bengal 700048 has been taken by us on Rent for a period of 11 months w.e.f. July 26, 2024 from our Corporate Promoter Anita Tradelinks Private Limited. Further, our Manufacturing unit situated at Phase-II, Plot No. 106, Industrial Growth Centre, Siltara, Raipur, Chhattisgarh, India, 493111 has been taken by us on Rent (3.67 acre) for a period of 11 month w.e.f. March 01, 2024 from our Group Company ARP Complex Private Limited and Leased (9.78 acre) for a period of 99 years w.e.f. June 30, 2003 from Governor of Chhattisgarh.

In the event of termination/non-renewal of said agreements, we may be required to vacate the said premises which may cause disruption in our inventory management, corporate affairs and business and impede our effective operations which could lead temporarily impact our business operations until we get suitable alternative premises. For details on the duration

of existing rent/lease agreements for our premises, please refer to the section titled "*Our Business*" beginning on page 112 of this Draft Red Herring Prospectus. There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favourable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the lease/rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our manufacturing operations which could materially and adversely affect our business, financial condition and results of operations.

8. There have been certain instances of non-compliances/ discrepancies, including with respect to certain secretarial/ regulatory filings for corporate actions taken by our Company in the past. Consequently, we may be subject to regulatory actions and penalties for any such non-compliance/ discrepancies and our business, financial position and reputation may be adversely affected.

Our company has not complied with certain statutory provisions of the Companies Act, 2013 in the past including but not limited to the details as mentioned in this risk factor. The company has not filed annual compliance certificate in Form 66 under the Companies Act 1956, there are few non compliances reported regarding the appointment of KMPs such as Company Secretary was not appointed up to the FY 2019-20, Chief Financial Officer was not appointed up to the FY 2021-22. In addition, the Company has entered into related party transactions [RPTs] in F.Y. 2022-23 with the relatives of directors regarding holding of office of profit exceeding the limits that can be approved by the Board of Directors. However, these transactions have been recorded as RPTs at arms length price by the statutory auditors of the Company thereby making them exempt from the compliance requirements of Section 188 of the Companies Act 2013

There are few discrepancies noticed in the company records such as late filing of eforms to the Registrar of Companies, some clerical error exists in the share allotment returns filed to the Registrar of Companies, period of appointment not mentioned in the shareholder resolution for the appointment of past independent director in the FY 2015-16. Also, we could not found find few share transfer deeds belongings to the promoters for the acquisition made in the FY 2007-08 & 2010-11. Accordingly, we have relied on the other corporate records maintained by the Company such as statutory registers to ascertain the information for the missing corporate records.

9. We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.

We are primarily engaged in the business of manufacturing and selling of Direct Reduced Iron (i.e. sponge iron), based on technical specifications provided by our customers. Given the nature of our products and the sector in which we operate, our customers have high and exacting standards for product quality as well as delivery schedules. Adherence to quality standards is a critical factor in our manufacturing process as any defects in the products manufactured by our Company or failure to comply with the technical specifications of our customers regarding the alloy composition may lead to cancellation of the orders placed by our customers. Further, any failure to make timely deliveries of products in the desired quantity as per our customers' requirements could also result in the cancellation of orders placed by our customers and may adversely affect our reputation and goodwill. In addition, our customers may demand, among others, price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house, or replace their existing products with alternative products, any of which may have an adverse effect on our business, cash flows, results of operations and financial condition. Although, no such instance occurred in the past, by the company till date.

10. We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Except as described below and as mentioned in the chapter titled "Government and Other Approvals", we believe that we have obtained requisite permits and licenses which are adequate to run our business, however we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

We have recently applied for following approvals:

- i. We have applied for renewal of Trading License under Orissa Mineral (Prevention of Theft, Smuggling, Illegal Mining, Procession, Trading, Storage and Transportation) Rules, 2007
- ii. We have applied for Fire NOC dated August 24, 2024 for our Manufacturing unit situated at Plot No 106, Phase-II, Industrial Growth Centre, Siltara, Raipur, 493111

For details regarding pending approvals, please refer to section titled "Government and Other Approvals" beginning on page 214 of the Draft Red Herring Prospectus. There can be no assurance that the relevant authorities will issue or renew these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

11. Our business is significantly dependent upon the steel industry. Any downturn or cyclical fluctuation in steel sector could reduce the demand for our products which can adversely impact our business, results of operations, cash flows and financial condition.

The sponge iron, as produced by us, is mainly used as a raw material for making steel in electric arc furnaces and induction furnaces. Any downturn or cyclical fluctuation in both these sectors could reduce the demand for our products which can adversely impact our business, results of operations, cash flows and financial condition. We believe that in the steel industry, the steel prices fluctuate based on a number of factors, such as, the availability and cost of raw material inputs, fluctuations in domestic and international demand and supply of steel and steel products, international production and capacity, fluctuation in the volume of steel imports, transportation costs, protective trade measures and various social and political factors, in the economies in which the steel producers sell their products. Any adverse change in these factors causing downturn in steel sector, may result in decreased demand for our products, which can have a material adverse effect on our business, results of operations, financial condition and prospects.

12. Our operations involve melting of iron ores in the rotary kilns which can be extremely dangerous and any accident, could cause serious injury to people or property which may adversely affect our production schedules, costs, sales and ability to meet customer demand.

Our operations require individuals to work under potentially dangerous circumstances, with flammable materials as a significant portion of our business involves melting of iron ores in the rotary kilns. Despite compliance with requisite safety requirements and standards, our operations are subject to significant hazards, including:

- Explosions
- Fires
- Mechanical failures and other operational problems
- Inclement weather and natural disasters
- Discharges or releases of hazardous substances, chemicals or gases; and
- Other environmental risks

Although, we employ safety procedures during the melting of iron ores and maintain what we believe to be adequate insurance, there is a risk that any hazard may result in personal injury to our employees or other persons, destruction of property or equipment, environmental damage, etc. may lead to suspension of our operations and/or imposition of civil or criminal liabilities. The loss or shutting down of our facilities could disrupt our business operations and adversely affect our results of operations, cash flows, financial condition and reputation. We could also face claims and litigation in India, filed on behalf of persons alleging injury predominantly as a result of occupational exposure to hazards at our facilities, the outcome of which is difficult to assess or quantify, and the cost to defend such litigation could be significant. These claims and lawsuits, individually or in the aggregate, may be resolved against us inflicting negative publicity and consequently, our business, cash flows, results of operations and financial condition could be adversely affected.

Further, we have one instance in the past where factory inspector filed a complaint against our company in Judicial Magistrate First Class, Raipur under section 92 of the Factories Act, 1948. Rahul Kumar Yadav an ex-employee of the Company died on duty due to severe injury on head while working in the factory. For details, see "Outstanding Litigation and Material Developments" beginning on page 210 of this Draft Red Herring Prospectus.

In particular, if operations at our manufacturing facilities were to be disrupted as a result of any significant workplace accident, fire, explosion or other connected reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. Interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, reputation, financial condition, results of operations, cash flows and prospects.

13. There are outstanding legal proceedings involving our Company, our Directors and our Promoters. Any adverse decisions could impact our cashflows and profit or loss to the extent of demand amount, interest and penalty, divert management time and attention and have an adverse effect on our business, prospects, results of operations and financial condition.

There are outstanding legal proceedings involving our Company, our Directors and our Promoters. For details, see "Outstanding Litigation and Material Developments" beginning on page 210 of this Draft Red Herring Prospectus.

14. Under-utilization of our manufacturing capacities and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.

As of March 31, 2024, we own and operate one manufacturing facility at Siltara-Raipur, Chhattisgarh with an aggregate installed production capacity of 30,000 metric tonnes. Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facility, the availability of raw materials, industry/ market conditions, as

well as by the product requirements of, and procurement practice followed by, our customers. In the event we face prolonged disruptions at our facilities including due to interruptions in the supply of water, electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing facility, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition.

In Fiscals 2024, 2023 and 2022, our overall capacity utilization for manufacturing sponge iron were 84%, 85% and 79% respectively. For further information, see "*Our Business - Capacity and Capacity Utilization*" on page *112* of this Draft Red Herring Prospectus. These rates are not indicative of future capacity utilization rates, which is dependent on various factors, including demand for our products, availability of raw materials, our ability to manage our inventory and improve operational efficiency. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance.

## 15. Our Contingent Liability and Commitments as stated in our Restated Financial Statements could affect our financial condition

Our Contingent liabilities as on March 31, 2024 were ₹335.85 lakhs. If these contingent liabilities materialize, fully or partly, the financial condition of our Company could be affected.

# 16. Our continued operations are critical to our business and are subject to operating risks such as breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our manufacturing facilities, in the event of which, our business, results of operations, financial condition and cash flows can be adversely affected.

Our manufacturing facility is subject to operating risks, such as the breakdown or failure of machinery, power supply or processes, performance below expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. We also require substantial electricity for our manufacturing facilities which is sourced from state electricity boards. Our customer relationships, business and financial results may be materially adversely affected by any disruption of manufacturing operations, including as a result of any of the factors mentioned above.

## 17. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Promoters and Key managerial personnel, particularly Shyam Sunder Parasrampuria, Manoj Parasrampuria and Manish Parasrampuria. We depend significantly on them for executing our day to day activities. The loss of any of our Promoters or Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoter and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section "Our Management" on page 133 of this Draft Red Herring Prospectus.

# 18. We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realization of the price for our product, which may adversely affect our business operation and financial condition.

The market for our products is competitive on account of existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, sales network, pricing and timely delivery. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may

enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

We operate in a rapidly consolidating industry. The strength of combined companies could affect our competitive position in all of our business areas. Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

19. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.

Our Company has entered into various transactions with our directors, promoters, promoter group and group entities. These transactions, inter-alia includes sales, remuneration, loans and advances etc. For details, please refer to "Annexure 30 - Related Party Transactions" under Section titled "Financial Information of the Company" and Chapter titled "Capital Structure" beginning on page 185 and 57 respectively of this Draft Red Herring Prospectus.

Our Company has entered into such transactions due to easy proximity and quick execution in accordance with Companies Act 2013 and other applicable laws. Although all related party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

#### 20. Our Statuory Auditor has included an emphasis of matter in our Restated Financial Statements

The report issued by our Statuory auditor for Restated Financial Information for Fiscals 2024 contains the emphasis of matter paragraph

We draw attention to Note 2.09 to the financial statements regarding provision for diminution in the value of non-current investments in LLP.Our opinion is not modified in respect of the above matter.

There is no assurance that our audit reports for any future financial years will not contain any qualification or emphasis of matter or observations which affect our results of operations in such future periods. For further details, see, "Restated Financial Statements" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" on pages 155 and 201, respectively.

21. Our Company's logo is not registered as on Draft Red Herring Prospectus. We may be unable to protect our intellectual property against third party infringement or are found to infringe on the intellectual property rights of others, it could have a material adverse effect on our business, result of operations, and financial conditions.

We have not yet registered the trademark that we are using for the business. We have made an application under the Trademarks Act of 1999 to register our logo. , which is pending for approval. Our logo is significant to our business and operations. The use of our logo by third parties could adversely affect our reputation, which could in turn adversely affect our business and results of operations. Obtaining, protecting and defending intellectual property rights can be time consuming and expensive, and may require us to incur substantial costs, including the diversion of the time and resources of management and technical personnel.

Further, while we endeavor to ensure that we comply with the intellectual property rights of others, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties that may require us to introduce changes to our operations. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims, and may divert the efforts and attention of our management and technical personnel away from our business. We could be required to pay third party infringement claims. In such cases, our financial conditions and business operations may be adversely impacted.

#### 22. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

### 23. Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third party transport service providers and engage them on a needs basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

#### 24. Delays or defaults in client payments could affect our operations.

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

## 25. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.

Our operations are subject to risks inherent in manufacturing facilities such as risk of equipment failure, work accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including hazards that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage. Our significant insurance policies consist of, among others, Business Guard Laghu Policy, Marine Insurance Policy and Vehicle Insurance Policy. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as Workmen Insurance Policy, product liability insurance and Keyman Insurance Policy. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

# 26. The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled "Objects of the Issue". The fund requirement and deployment, as mentioned in the section titled "Objects of the Issue" on page 79 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter "Objects of the Issue" is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter "Objects of the Issue" will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

## 27. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.

We propose to utilize the Net Proceeds for Capital expenditure requirements of our company towards setup of captive power plant at Siltara - Raipur and general corporate purposes. For further details of the proposed objects of the Issue, see "Objects of the Issue" beginning on page 79 of this Draft Red Herring Prospectus. However, these objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and results of operations.

# 29. Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.

Our business activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any labour problem in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock- outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

30. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement as detailed in the section titled "Objects of the Issue" is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled "Objects of the Issue" beginning on page 79 of this Draft Red Herring Prospectus.

# 31. Our Promoter and Promoter Group members has provided personal guarantees for loans availed by our Company. Our Promoter and Promoter Group Members has provided personal guarantees to secure a significant portion of our existing borrowings, and may post listing continue to provide such guarantees and other security. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter and Promoter Group Members may be invoked, which could negatively impact the reputation of our Company. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoter and Promoter Group Members may be required to liquidate his shareholding in our Company to settle the claims of the lenders, thereby diluting his shareholding in our Company. We may also not be successful in procuring alternate guarantees satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer "Statement of Financial Indebtedness" on page no. 198 of this Draft Red Herring Prospectus.

#### 32. None of our Directors possess experience of being on the board of any listed company

None of our Directors possess experience of being on the board of any listed company and accordingly, may not be adequately well-versed with the activities or industry practices undertaken by the listed company. Any demand or penalty raised by the concerned authority in future for late payments or non-payments for any previous year and current year will affect the financial position of the Company. For instance, our company in the past had delayed filing of GST Returns due to operational reasons and accordingly paid late fees and penalties on the same. Any demand or penalty raised by the concerned GST authority for such late filing may affect the financial position of the company,

#### 34. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

## 35. Technology failures or Cyber-attacks or other security breaches could have a material adverse effect on our business, results of operation or financial condition

IT systems are critical to our ability to manage our operations. Our IT systems enable us to coordinate our operations, from planning, production scheduling, raw material ordering, invoicing, delivery, customer relationship, management and decision support. If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure, we could be subject to transaction errors, processing inefficiencies, customer service disruptions and, in some instances, loss of customers.

We face cyber threats, threats to the physical security of our facilities and employees, the potential for business disruptions associated with IT failures, natural disasters, or public health crises. We have installed anti-virus software to prevent our systems and infrastructure from being infected and crippled by computer viruses. All our internet facing servers installed at all our data centres as well as at all our offices are also secured with firewalls and intrusion preventions systems to prevent hacking. If we are unable to protect sensitive information, our customers could question the adequacy of our threat mitigation and detection processes and procedures. Due to the evolving nature of these security threats, the impact of any future incident cannot be predicted.

#### 36. The average cost of acquisition of Equity Shares by our Promoters, will be lower than the issue price of Equity Share.

Our Promoters average cost of acquisition of Equity Shares in our company may be lower than the Issue Price as may be decided by the company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter "*Capital Structure*" beginning on pages 57 of this Draft Red Herring Prospectus.

# 37. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders

Our promoters along with the promoter group will continue to hold collectively [•] % of the post issue paid up share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder's vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters and promoter group will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

# 38. Certain key performance indicators for certain listed industry peers included in this Draft Red Herring Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete.

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the "Basis for Offer Price" beginning on page 87 of the Draft Red Herring Prospectus. Although this information is sourced from and relied upon on the consolidated audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There may be different methodologies and formulas used to compute the various ratios.

# 39. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder's investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section "Dividend Policy" on page 154 of the Draft Red Herring Prospectus.

# 40. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance

may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt - equity ratio to increase or require us to create charges or liens on our assets in favor of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

41. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares will be determined by our Company in consultation with the BRLMs through the Book Building Process. This price will be based on numerous factors, as described under "Basis for the Issue Price" on page 87 and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, problems such as temporary closure, broker default and settlement delays experienced by the Indian Stock Exchanges, strategic actions by us or our competitors, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

42. QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Issue Closing Date.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Issue within six (6) Working Days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing. Retail Individual Investors can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing D ate. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Issue within six Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing

#### **EXTERNAL RISK FACTORS**

### 43. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may scause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries.

### 44. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or man- made disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, and recent initiatives by the Indian government and other factors. Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

#### 45. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

# 46. The continuing effect of the COVID-19 pandemic on our business, results of operations and financial condition is highly uncertain and cannot be predicted.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our consumers. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased

economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession.

### 47. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by center or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

# 48. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "Government and Other Statutory Approvals" on page 214 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. We are involved in various disputes with tax authorities. For details of these disputes, see "Outstanding Litigation and Material Developments" on page 210 of this Draft Red Herring Prospectus. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India's Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would influence our profitability.

The Finance Act, 2022 ("Finance Act"), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax

("DDT"), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

#### 49. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, NSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

#### 50. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business /to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

### 51. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

#### 52. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

We believe that such alternate arrangements would be available to fund any such shortfalls. Our Company may have to revise its estimated costs, fund allocation and fund requirements owing to various factors such as economic and business conditions, increased competition and other external factors which may not be within the control of our management. #### **Details of Utilization of Net Proceeds**

The details of utilization of the Net Proceeds are set forth herein below:

# 1. Funding of Capital Expenditure requirements of our company towards setup of captive Power Plant at Siltara – Raipur

Due to increasing power costs, our manufacturing operations for mild steel ingots, steel shots, grits, and other steel products have been temporarily shut down since 2020. Despite having a well-defined production process and all necessary machinery installed at our manufacturing unit, the economic environment has not supported sustained operations. Therefore, we are planning to install a captive power plant on our premises using proceeds from the issue.

We propose to utilize Rs. 2,300 lakhs from the net proceeds to fund capital expenditures for setting up the captive power plant. The total project cost is Rs. 4,709.38 lakhs; of this, Rs. 2,300 lakhs will be covered by the proceeds, while the remaining Rs. 2,409.38 lakhs will be financed through bank borrowings and internal accruals. This initiative will enable us to generate our own electricity, reducing reliance on external power sources, stabilizing energy costs, and improving cost predictability. The project aims to reduce power costs and ensure a continuous and reliable power supply. It will be established at our existing plant in Siltara, Raipur, Chhattisgarh. Our company has obtained a cost estimate from ARK Engineering & Power Consultants (P) Ltd. through their quotation dated August 10, 2024.

#### GLOBAL ECONOMIC OUTLOOK

Global growth is projected to stabilize at 2.6 percent this year, holding steady for the first time in three years despite flaring geopolitical tensions and high interest rates. It is then expected to edge up to 2.7 percent in 2025-26 amid modest growth in trade and investment. Global inflation is projected to moderate-but at a slower clip than previously assumed, averaging 3.5 percent this year. Given continued inflationary pressures, central banks in both advanced economies and emerging market and developing economies (EMDEs) will likely remain cautious in easing monetary policy. As such, average benchmark policy interest rates over the next few years are expected to remain about double the 2000-19 average.

Despite an improvement in near-term growth prospects, the outlook remains subdued by historical standards in advanced economies and EMDEs alike. Global growth over the forecast horizon is expected to be nearly half a percentage point below its 2010-19 average pace. In 2024-25, growth is set to underperform its 2010s average in nearly 60 percent of economies, representing more than 80 percent of global population and world output. EMDE growth is forecast to moderate from 4.2 percent in 2023 to 4 percent in both 2024 and 2025. Prospects remain especially lackluster in many vulnerable economies—over half of economies facing fragile- and conflict-affected situations will still be poorer by the end of this year than on the eve of the pandemic.

Global risks remain tilted to the downside despite the possibility of some upside surprises. Escalating geopolitical tensions could lead to volatile commodity prices, while further trade fragmentation risks additional disruptions to trade networks. Already, trade policy uncertainty has reached exceptionally high levels compared to other years that have featured major elections around the world since 2000. The persistence of inflation could lead to delays in monetary easing. A higher-forlonger path for interest rates would dampen global activity. Some major economies could grow more slowly than currently anticipated due to a range of domestic challenges. Additional natural disasters related to climate change could also hinder activity. On the upside, global inflation could moderate more quickly than assumed in the baseline, enabling faster monetary policy easing. In addition, growth in the United States could be stronger than expected.

Against this backdrop, decisive global and national policy efforts are needed to meet pressing challenges. At the global level, priorities include safeguarding trade, supporting green and digital transitions, delivering debt relief, and improving food security. At the national level, persistent inflation risks underscore the need for EMDE monetary policies to remain focused on price stability. High debt and elevated debt-servicing costs will require policy makers to seek ways to sustainably boost investment while ensuring fiscal sustainability. To meet development goals and bolster long-term growth, structural policies are needed to raise productivity growth, improve the efficiency of public investment, build human capital, and close gender gaps in the labor market.

## Global outlook

The global economy is stabilizing, following several years of negative shocks. Global growth is projected to hold steady at 2.6 percent this year, despite flaring geopolitical tensions and high interest rates, before edging up to 2.7 percent in 2025-26 alongside modest expansions of trade and investment. Global inflation is expected to moderate at a slower clip than previously assumed, averaging 3.5 percent this year. Central banks in both advanced economies and emerging market and developing economies (EMDEs) are likely to remain cautious in easing policy. As such, markedly higher interest rates than prior to the pandemic are set to sustain for an extended period. Despite some improvement, the outlook remains subdued.

Global growth over the forecast horizon is expected to be nearly half a percentage point below its 2010-19 average, with a slower pace of expansion in economies comprising over 80 percent of the global population. EMDE growth is projected to moderate from 4.2 percent in 2023 to 4 percent in 2024. Amid heightened conflict and violence, prospects remain especially lackluster in many vulnerable economies—over half of fragile and conflict-affected economies will still be poorer in 2024 than on the eve of the pandemic. Risks have become more balanced but remain tilted to the downside. Escalating geopolitical tensions could lead to volatile commodity prices. In a context of elevated trade policy uncertainty, further trade fragmentation risks additional disruptions to trade networks. More persistent inflation could lead to higher-for-longer interest rates. Other risks include weaker-than anticipated activity in key economies and disasters related to climate change. Against this backdrop, policy makers face daunting challenges. Global efforts are needed to safeguard trade, support green and digital transitions, deliver debt relief, and improve food security. Still-pronounced inflation risks underscore the need for EMDE monetary policies to remain focused on price stability. High debt and elevated debt-servicing costs will require EMDE policy makers to balance sizable investment needs with fiscal sustainability. To meet development goals, policies are needed to raise productivity growth, improve the efficiency of public investment, build human capital, and close gender gaps in the labor market.

### Global prospects

The global economy is stabilizing but the outlook remains subdued—both advanced economies and EMDEs are projected to grow at a slower pace over 2024-26 than in the pre-pandemic decade. Recent upward pressures on global core inflation are anticipated to gradually ease, such that headline inflation converges to levels broadly consistent with central bank targets by 2026. Market expectations for the path of U.S. policy rates have been repeatedly revised higher. Amid elevated borrowing costs, about two-fifths of EMDEs are acutely vulnerable to debt stress. In 2024-25, growth is expected to underperform its 2010-19 average in countries comprising more than 80 percent of global output and population. The multiple shocks of recent years have impeded per capita income catch-up, with almost half of EMDEs losing ground relative to advanced economies over 2020-24.

The global economy is stabilizing, following several years of overlapping negative shocks. Despite elevated financing costs and heightened geopolitical ensions, global activity firmed in early 2024. Global growth is envisaged to reach a slightly faster pace this year than previously expected, due mainly to the continued solid expansion of the U.S. economy. However, the extent of expected declines in global interest rates has moderated amid lingering inflation pressures in key economies. By historical standards, the global outlook remains subdued: both advanced economies and emerging market and developing economies (EMDEs) are set to grow at a slower pace over 2024-26 than in the decade preceding the pandemic (figure A).

Inflation continues to wane globally, making progress toward central bank targets in advanced economies and EMDEs, but at a slower pace than previously expected. Core inflation has remained stubbornly high in many economies, supported by rapid growth of services prices. Over the remainder of 2024, continued tight monetary policy stances and slowing wage increases should help reduce inflation further. By the end of 2026, global inflation is expected to settle at an average rate of 2.8 percent, broadly consistent with central bank targets (figure B)

The anticipated extent of monetary easing in advanced economies this year has diminished substantially since late 2023—by more than a percentage point in the case of the United States. Expected policy rate paths diverge across major economies, as the European Central Bank proceeds with policy easing while the U.S. Federal Reserve keeps rates on hold for longer. Indeed, aside from short-term fluctuations, market expectations for the path of U.S. interest rates have repeatedly moved higher since 2022 (figure C). Despite this market reassessment, global financial conditions have eased this year, reflecting solid risk appetite following last year's progress on disinflation and diminished concerns about the possibility of a sharp slowdown in global growth. In particular, global equity markets have made sizable gains

EMDE financial conditions similarly became more accommodative early this year, aided by declining domestic policy rates, improving global sentiment, and expected easing of advanced economy monetary conditions. EMDE conditions turned somewhat less accommodative in the second quarter, as a strengthening of the U.S. dollar—prompted by geopolitical tensions and firm inflation data in the United States-coincided with a bout of capital outflows. Although market perceptions of sovereign credit risk have generally eased this year, EMDE borrowing costs continue to be high, and marked divergences persist. Indeed, credit ratings and debt sustainability analyses indicate that about 40 percent of EMDEs remain acutely vulnerable to debt-related stress (figure D).

Across the forecast horizon, global growth remains lackluster by recent historical standards, at about 0.4 percentage point below the 2010-19 average. In 2024-25, growth is set to underperform its average pace in the 2010s in nearly 60 percent of economies, representing more than 80 percent of global output and population (figure 1.1.E). The subdued outlook—despite the anticipated moderation of various cyclical headwinds underscores a secular deceleration of potential growth in many large economies. Relative to pre-pandemic norms, growth has weakened notably in countries that experienced high rates of inflation, much of which emanated from shocks to supply chains and commodity prices. Yet this trend is set to continue in the coming years, suggesting potentially enduring supply-side weakness.

GDP per capita in EMDEs is forecast to grow at about 3 percent on average over 2024-26, well below the average in 2010-19. Excluding China, EMDE per capita GDP growth is forecast to be lower still, averaging 2.5 percent over 2024-26. Some large EMDEs, such as India, are expected to see continued solid per capita growth. Yet the trend of the 2020s so far is one of uneven and limited progress. Nearly half of EMDEs are set to lose ground relative to advanced economies when viewed over the 2020-24 period (figure F). Although this trend is expected to improve somewhat over 2025-26 in EMDEs as a whole, per capita growth is set to remain stagnant in many LICs and FCS.

## INDIAN ECONOMY OUTLOOK

In general, global economic shocks in the past were severe but spaced out in time. This changed in the third decade of this millennium. At least three shocks have hit the global economy since 2020. It all started with the pandemic-induced contraction of the global output, followed by the Russian-Ukraine conflict leading to a worldwide surge in inflation. Then, the central banks across economies led by the Federal Reserve responded with synchronized policy rate hikes to curb inflation. The rate hike by the US Fed drove capital into the US markets causing the US Dollar to appreciate against most currencies. This led to the widening of the Current Account Deficits (CAD) and increased inflationary pressures in net importing economies. The rate hike and persistent inflation also led to a lowering of the global growth forecasts for 2022 and 2023 by the IMF in its October 2022 update of the World Economic Outlook. The frailties of the Chinese economy further contributed to weakening the growth forecasts. Slowing global growth apart from monetary tightening may also lead to a financial contagion emanating from the advanced economies where the debt of the non-financial sector has risen the most since the global financial crisis. With inflation persisting in the advanced economies and the central banks hinting at further rate hikes, downside risks to the global economic outlook appear elevated.

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better

performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilization across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world's second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year's capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. A much-improved financial health of well-capitalized public sector banks has positioned them better to increase the credit supply. Consequently, the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector has been remarkably high, over 30.6 per cent, on average during Jan-Nov 2022, supported by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) of the Union government. The increase in the overall bank credit has also been influenced by the shift in borrower's funding choices from volatile bond markets, where yields have increased, and external commercial borrowings, where interest and hedging costs have increased, towards banks. If inflation declines in FY24 and if real cost of credit does not rise, then credit growth is likely to be brisk in FY24.

India's economic growth in FY23 has been principally led by private consumption and capital formation. It has helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. Still, private capex soon needs to take up the leadership role to put job creation on a fast track. Recovery of MSMEs is proceeding apace, as is evident in the amounts of Goods and Services Tax (GST) they pay, while the Emergency Credit Linked Guarantee Scheme (ECGLS) is easing their debt servicing concerns. The Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) has been directly providing jobs in rural areas and indirectly creating opportunities for rural households to diversify their sources of income generation. Schemes like PM-Kisan and PM Garib Kalyan Yojana have helped in ensuring food security in the country, and their impact was also endorsed by the United Nations Development Programme (UNDP). The results of the National Family Health Survey (NFHS) also show improvement in rural welfare indicators from FY16 to FY20, covering aspects like gender, fertility rate, household amenities, and women empowerment.

Global growth has been projected to decline in 2023 and is expected to remain generally subdued in the following years as well. The slowing demand will likely push down global commodity prices and improve India's CAD in FY24. However, a downside risk to the Current Account Balance stems from a swift recovery driven mainly by domestic demand and, to a lesser extent, by exports. The CAD needs to be closely monitored as the growth momentum of the current year spills over into the next. Growth is expected to be brisk in FY24 as a vigorous credit disbursal, and capital investment cycle is expected to unfold in India with the strengthening of the balance sheets of the corporate and banking sectors. Further support to economic growth will come from the expansion of public digital platforms and path-breaking measures such as PM GatiShakti, the National Logistics Policy, and the Production-Linked Incentive schemes to boost manufacturing output.

Economic Survey 2022-23 (Source - https://www.indiabudget.gov.in/economicsurvey/doc/eschapter/echap01.pdf)

Despite uncertainty from adverse geopolitical developments and expansionary fiscal measures taken during the COVID-19 pandemic, the Indian economy has demonstrated resilience and maintained healthy macroeconomic fundamentals. As per the First Advance Estimates of National Income of FY 2023-24, India's Real GDP is projected to grow at 7.3 per cent. This was stated in the Macro-Economic Framework Statement 2024-25.

Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in H1 of FY2023-24. On the supply side, industry and services sectors were the primary growth drivers in H1 of FY2023-24. India has registered the highest growth among major advanced and emerging market economies during this period. As per the IMF, India is likely to become the third-largest economy in 2027 in USD at market exchange rate. It also estimates that India's contribution to global growth will rise by 200 basis points in 5 years.

Calling the decade of 2014-23 as the golden era for FDI inflows, Smt. Sitharaman informed the House that the inflow during this period was twice the figure during 2005-14,

amounting to USD 596 billion. "For encouraging sustained foreign investment, we are negotiating bilateral investment treaties with our foreign partners, in the spirit of 'First Develop India'", she added.

Macroeconomic stability and improvements in India's external position, particularly significant moderation in the current account deficit and revival of capital flows on the back of a comfortable foreign exchange reserves buffer, resulted in stability in the Indian rupee during FY 2023-24. Further, inflationary pressures in India moderated majorly driven by proactive supply side initiatives by the Government, noted the Macro-Economic Framework Statement 2024-25.

## Strategic priorities for FY 2024-25:

The Government's fiscal policy stance has been to make the domestic economy more resilient to exogenous shocks and to mitigate the risks of global economic downturn without compromising on the overall macroeconomic balances. The FY 2024-25 fiscal strategy of the government is based on the following broad intents:

- a. Directing towards more inclusive, sustainable and more resilient domestic economy to absorb the unanticipated shocks, if any;
- b. Channelizing and allocating increased resources towards capital spending to sustain infrastructure development momentum;
- c. Continuing the holistic approach of fiscal federalism towards enhancing the public infrastructure by supporting efforts of the States for capital spending;
- d. Focus on integrated and coordinated planning and implementation of infrastructure projects in the country, embracing the principles of PM Gati Shakti;
- e. Prioritization of expenditure towards the key developmental sectors viz., drinking water, housing, sanitation, green energy, health, education, agriculture, rural development etc. for long run sustainable and inclusive betterment of the citizens;
- f. Enhancing the effectiveness of cash management through just-in-time release of resources by using SNA/TSA system etc.

# INDUSTRY SCENARIO - INDIA'S IRON AND STEEL INDUSTRY

India's iron ore production is estimated to stand at 257.85 MT in FY23, while it stood at 253.97 MT in FY22 - a sharp increase of 23% compared with 205.04 MT in FY21. In 2022-23, exports of iron ore stood at US\$ 1.75 billion as compared to US\$ 3.18 billion in 2021-22.

In FY24 (until January 2024), the production of crude steel and finished steel stood at 118 MT and 114 MT respectively. In FY23, India produced about 193.16 MT of crude steel, while finished steel production stood at 89.55 MT. In April 2024, crude steel production in India stood at 11.9 MT. In April 2024, finished steel production stood at 11.2 MT. Steel Authority of India Limited (SAIL), achieved the best-ever annual production during the financial year 2022-23. The company recorded 18.289 million tonnes (MT) of crude steel production with a growth of 5.3% over the previous best. In FY24, SAIL's crude steel production stood at 19.23 MT and saleable steel production was 18.4 MT. Moreover, capacity increased to 142.2 million tonnes (MT) in FY20, and the figure is anticipated to rise to 300 MT by 2030-31.

In 2019, India ranked as the second-largest crude steel producer in the world. Between, April, 2021- March 2022, finished steel production stood at 120.007 MT. In April 2022, the production of crude steel in India stood at 10.144 MT.In January 2022, India's finished steel consumption stood at 9.65 MT. The National Steel Policy aims to increase per capita steel consumption to 160 kgs by 2030-31. It is expected that consumption per capita would increase, supported by rapid growth in the industrial sector and rising infra expenditure projects in railways, roads and highways, etc. The government has a fixed objective of increasing rural consumption of steel from the current 19.6 kg/per capita to 38 kg/per capita by 2030-31. Demand for steel from different sectors will drive this industry. Consumption of steel by India's infrastructure segment is expected to

increase to 11% by FY26. Steel demand from the automotive sector is expected to increase due to rise in the demand for automobiles. The new Vehicle Scrappage policy will help in reducing steel prices as the policy enables recycling of materials used in old vehicles. On the healthcare front, key steel producers are now exceeding their capacities to produce oxygen cylinders for COVID patients. The Smart Cities' Affordable Housing and industrial corridors are a few government initiatives to boost the steel industry. About 158 lakh metric tonnes (MT) of steel are likely to be consumed in the construction of houses sanctioned under the Pradhan Mantri Awas Yojana (Urban).

#### STEEL INDUSTRY: DOMESTIC SCENARIO

- The Indian steel industry has entered into a new development stage, post de-regulation, riding high on the resurgent economy and rising demand for steel.
- Rapid rise in production has resulted in India becoming the 2nd largest producer of crude steel during last four years (2018 2021), from its 3rd largest status in 2017. The country was also the largest producer of Sponge Iron or DRI in the world and the 2nd largest finished steel consumer in the world after China in 2021 (provisional), based on rankings released by the World Steel Association.
- In a de-regulated, liberalized economic/market scenario like India the Government's role is that of a facilitator which lays down the policy guidelines and establishes the institutional mechanism/structure for creating conducive environment for improving efficiency and performance of the steel sector.
- In this role, the Government has released the National Steel Policy 2017, which has laid down the broad roadmap for encouraging long term growth for the Indian steel industry, both on demand and supply sides, by 2030-31. The Government has also announced a policy for providing preference to domestically manufactured Iron & Steel products in Government procurement.

## **Iron Ore and Steel Production**

- Iron ore is a key input for production of steel and primary iron.
- India's iron ore production stood at 257.85 MT in FY23P, an increase of 1.52% compared with 253.97 MT in FY22P.
- Majority (over 85%) of iron ore reserves are of medium- to high-grade and are directly used in blast furnace and direct reduced iron (DRI) plants in the form of sized lumps or sinters or pellets.
- In 2022-23, exports of iron ore stood at US\$ 1.75 billion as compared to US\$ 3.18 billion in 2021-22.
- The index of mineral production of the mining and quarrying sector for the month of December 2023 at 139.4, was 5.1% higher compared to the level in the month of December 2022.

- Government has taken various steps to increase production and availability of iron ore, which inter-alia include Mining
  and Mineral Policy reforms to ensure enhanced production, early auction & operationalization of expired mines, ease of
  doing business, seamless transfer of all valid rights & approvals, incentivizing for starting of mining operation & dispatch,
  transfer of mining leases, allowing captive mines to sell upto 50% of the minerals produced, enhancing exploration
  activities, etc.
- Steel industry was de-licensed and de-controlled in 1991 & 1992 respectively.
- India was the 2nd largest producer of crude steel in the world in 2021.
- In 2021-22 (provisional), production of total finished steel (alloy/stainless + non alloy) was 113.60 mt, a growth of 18.1% over last year.
- Production of Pig Iron in 2021-22 (provisional) was 5.76 mt, a growth of 18.1% over last year.

- India's steel production capacity has expanded rapidly over the past few years, growing at a CAGR of 4.84% from 97 MT in FY13 to 171 MT in FY24\*. The National Steel Policy 2017 has envisaged achieving up to 300 MT of production capacity by 2030-31.
- BF-BOF route is expected to contribute 65% of the capacity, while the remaining 35% is expected to come from EAF & IF routes.
- Expansion of production capacity to 300 MT will translate into additional investment of Rs. 10 lakh crore (US\$ 156.08 billion) by 2030-31.
- Steel companies are looking to restart expansion projects on the back of surging steel process with a capacity addition of 29 MT.

#### Steel Production in India Has Been Growing at a Fast Pace

## **Business Overview**

Established in 2003, we are primarily engaged in the business of manufacturing and selling of Sponge Iron. Sponge iron is mainly used as a raw material for steel production in electric arc furnaces and induction furnaces. Through our sponge iron business, we cater to the metallic requirements of steel producers in selected geographies.

Our manufacturing facility is located in Siltara - Raipur, Chhattisgarh and is spread across an area of around 13.45 acres of land with an annual production capacity of 30,000 metric tonnes. The strategic location of our sponge iron manufacturing facility provides us with access to high-quality iron ore, iron ore pellets, coal and dolomite which are essential raw materials for producing sponge iron. During production of sponge iron, a solid waste is produced as a by-product called dolochar. For the Fiscal 2024, our revenue from operations stood at Rs. 8,226.63 lakhs of which revenue from sponge iron, dolochar and other items (iron ore fines, dust and waste scrap) contributed 96.53%, 1.10% and 2.37% respectively.

Due to increasing power costs, our manufacturing operations for mild steel ingots, steel shots, grits, and other steel products have been temporarily shut down since 2020. Despite having a well-defined production process and all necessary machinery installed at our manufacturing unit, the economic environment has not supported sustained operations. Therefore, we are planning to install a captive power plant on our premises using proceeds from the issue. The installation of the captive power plant will enable us to resume and sustain our operations effectively.

We have been granted ISO 9001:2015 for quality management systems, ISO 14001:2015 for environmental management systems and ISO 45001:2018 for occupational health and safety management systems. Our manufacturing facility is equipped with requisite technology and infrastructure including machineries, testing laboratory other handling equipments to facilitate smooth manufacturing process. The key raw materials to produce sponge iron are iron ore/iron ore pellets, coal and dolomite. Sponge iron manufacturing is highly sensitive to raw material characteristics that would help obtain the rated capacity and the desired product quality. To ascertain the suitability of our raw materials in a rotary kiln, we have in-house testing laboratory that is responsible for conducting tests on raw materials i.e. coal, iron ore and dolomite to check their chemical and physical properties, so as to ensure that the product conform with the pre-determined standards. Currently, we sell our products primarily in the state of Maharashtra, Madhya Pradesh and Chhattisgarh.

Our Company is managed by Mr. Manoj Parasrampuria, Chairman and Managing Director who looks after the affairs of the Company and has considerable experience in steel Industry. We believe our success is the result of sustained efforts over the years in key aspects of our business, such as products, process improvements and increased scale of operations. The details of our financial performance as per the restated financial statements for the Fiscal years ended March 31, 2024, 2023 and 2022, are set forth below:

## **Our Competitive Strengths**

We believe that the following are our primary competitive strengths:

## In-house manufacturing facility

We presently carry all our manufacturing operations through manufacturing facility located at Siltara - Raipur, Chhattisgarh, which is situated on a vast area of over 13.45 acre land with an annual production capacity of 30,000 metric tonnes. It is strategically located and is well connected with road for transportation of raw materials & finished goods. The iron ore/iron ore pellets, coal and dolomite are some of the key raw materials required for our manufacturing operations, and their continued and sustained availability at competitive prices is essential to the growth of our business. These raw materials i.e. coal, iron ore and dolomite are available in abundant in the local mines of Raipur which are located at nearby distance from our manufacturing facility. The close proximity with raw materials brings cost efficiencies in procurement of raw material and also reduce logistic cost which helps us to achieve economies of scale.

## Stringent quality control mechanism ensuring standardized product quality

The quality of raw materials and their relative proportions determine the quality of the final product and the efficiency of our rotary kilns. Thus, the quality of raw materials is of paramount importance to us in our sponge iron production process. To verify the same, we have established in-house testing laboratory at our sponge iron manufacturing facility, which is equipped with precision equipments, that is responsible for conducting tests and checks in respect of the quality of our key raw materials. We employ an extensive and stringent quality control mechanism at each stage of the manufacturing including check of raw materials, which are required to ensure that our finished product conforms with the exact requirement of our customers and successfully passes all validations and quality checks.

We strive to produce sponge iron that would constitute high metallic iron content along with consistent chemical and physical characteristics, as per the requirements of our customers. We move our final products through trucks so as to preserve quality and reduce and/or prevent re-oxidation. Further, as a certification of the quality assurance, our Company has received ISO 9001:2015 for quality management systems, ISO 14001:2015 for environmental management systems and ISO 45001:2018 for occupational health and safety management systems. We believe that our focus on quality of products has enabled us to sustain and grow our business model to benefit our customers

## Long standing relationship with our customers

Our sponge iron product generally caters to customers who primarily are manufacturers of steel in state of Maharashtra, Chhattisgarh and Madhya Pradesh. We generally do not enter into long term agreements with our customers, however, we have developed longstanding relationships with these customers. Maintaining strong relationships with our key customers is essential to our business strategy and to the growth of our business. Owing to our strong customer relationships and service, we have been able to retain a number of our customers for a long period of time ensuring uninterrupted supplies of our products to them. We believe that our existing relationship with our customers represents a competitive advantage in gaining new customers and increasing our business.

## Well Qualified and Experienced Management Team

We have an experienced and qualified management team led by our Promoter Mr. Manoj Parasrampuria who has considerable work experience in the steel industry. We believe that our Management team's experience and their understanding of the steel industry enable us to take advantage of both current and future opportunities. It is also expected to help us on addressing and mitigating various risks inherent in our business, including significant competition. We are also supported with adequate technical and commercial team having relevant experience of the industry that along with the experience of our promoter help us to achieve the organizational goals. Thus, we are well placed to capitalize the knowledge

and experience of our management team which has been instrumental in growth of our Company. Our management team enables us to capture market opportunities, formulate and execute business strategies, manage client expectations as well as proactively respond to changes in the market conditions.

#### **Our Business Strategies**

We intend to pursue the following principal strategies to leverage our competitive strengths and grow our business:

## Continue to invest in our technological capabilities

Our company's strategy focuses on establishing a 5MW captive power plant at our existing manufacturing facility in Siltara, Raipur, Chhattisgarh, to reduce energy costs and ensure a reliable power supply, which is crucial for resuming operations of steel ingots, steel shots, grits, and other steel products. We plan to allocate Rs. 2,300 lakhs from Net Proceeds for this project, with a total cost of Rs. 4,709.38 lakhs and remaining will be financed through a combination of borrowings and internal accruals. This initiative will enhance operational efficiency and strengthen our production capacity. ## **Our Manufacturing Process of Sponge Iron:**

Set forth below is a brief description of the process carried out in our facility to produce Sponge Iron:

Iron ore, iron ore pellets, coal, and dolomite are the primary raw materials used in sponge iron production. These materials are fed into a rotary kiln in specific proportions, with dolomite also added. Coal functions both as a fuel and as a reductant, providing the necessary heat to maintain a temperature of range from 800°C to 1050°C inside the rotary kiln. The reduction process occurs in a solid state within the kiln, where controlled coal combustion converts coal into carbon monoxide, which then removes oxygen from the iron ore. This direct reduction process takes about 10 to 12 hours. Afterward, the hot reduced sponge iron, along with semi-burnt coal (Dolochar), is discharged into a rotary cooler for indirect cooling, bringing the temperature down to between 100°C and 150°C. Since sponge iron is magnetic, the discharge from the cooler, which contains sponge iron, Dolochar, and other contaminants, is processed through electromagnetic separators to remove impurities (non-magnetics). The resulting product is then screened into size fractions: lumps (greater than 3 mm) and fines (less than 3 mm). These fractions are stored in separate bins to maintain quality, minimize re-oxidation, and facilitate quicker loading onto trucks. Automatic bagging machines positioned below the bunkers handle the packaging of sponge iron, which is subsequently transported to customers by truck.

# Plant & Machinery

The details of major plant & machinery installed at our Siltara unit are given below:

Kiln & Cooler Main Drive, Gear Box, Payloader and Tipper machine, Crusher with Vibratory sieve machine, Raw Material Handling system, FD Cooler, Conveyor system & Screening system, Weigh bridge machine, Electrical & Machinery Equipment, Laboratory Equipment and all other accessories.

# **Infrastructure and Utilities:**

- Raw Materials: The key raw materials to produce sponge iron are iron ore/iron ore pellets, coal and dolomite. Sponge iron manufacturing is highly sensitive to raw material characteristics that would help obtain the rated capacity and the desired product quality.
- Iron Ore/Iron Ore Pellets: During sponge iron manufacturing, iron ore/iron ore pellets is reduced in solid state. To optimize yield during sponge iron making, it is essential for us to select an ore with high iron content and a low gangue content. We primarily source our iron ore from the mines of Siltara, Raipur- Chhattisgarh, as well as from other nearby mines, as and when required. Major Supplier includes NMDC from Chhattisgarh.

- Coal: To enhance productivity at an optimal cost, improve our product quality and kiln campaign life, we procure coal of specified quality from mines located near to our manufacturing facility or from other parts of India and also use coal imported from other countries.
- **Dolomite:** Dolomite is an important ingredient and acts as a de-sulphuriser removing sulphur from the feed mix during the reduction process. Control of sulphur content is an essential pre-requisite for the manufacture of good quality steel. We procure dolomite from mines located near to our manufacturing facility or from other parts of India.
- Water: The existing water requirement for our manufacturing unit is met from Chhattisgarh Ispat Bhoomi Limited.
- **Power:** The requirement of power for our operations, like power for running and operating the machinery / equipment is met through supply from Chhattisgarh State Power Distribution Company Limited.

The Actuarial valuation method used for measuring the liability is the Projected Unit Credit method. The expense is recognised at the present value of the amount payable as per actuarial valuations. Actuarial gains and losses in respect of such benefits are recognised in the Statement of Profit and Loss. Termination benefits are recognized as an expense as and when incurred.

#### 4.09 Taxes on Income

Tax expense for the year comprising current tax & deferred tax are considered in determining the net profit for the year. Provision is made for current tax and based on tax liability computed in accordance with relevant tax laws applicable to the Company. Provision is made for deferred tax for all timing difference arising between taxable incomes & accounting income at currently enacted or substantively enacted tax rates, as the case may be. Deferred tax assets(other than in situation of unabsorbed depreciation and carry forward losses) are recognized only if there is reasonable certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each Balance Sheet date. Deferred Tax Assets and Deferred Tax Liability have been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liability and where the Deferred Tax Asset and Deferred Tax Liability relate to Income taxes is levied by the same taxation authority.

#### 4.10 Earnings Per Share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The net profit or loss for the period attributable to equity shareholders is the net profit or loss for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares is the number of equity shares outstanding at the beginning of the period, adjusted by the number of equity shares bought back or issued during the period multiplied by the time-weighing factor. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares. The number of equity shares is the aggregate of the weighted average number of equity shares and the weighted average number of equity shares which would be issued on the conversion of all the dilutive potential equity shares into equity shares. Dilutive potential equity shares are deemed to have been converted into equity shares at the beginning of the period or, if issued later, the date of the issue of the potential equity shares. Potential equity shares are treated as dilutive when, and only when, their conversion to equity shares would decrease net profit per share from continuing ordinary operations.

## 4.11 Impairment of assets

Impairment is ascertained at each Balance Sheet date in respect of cash generating units. An impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount. Recoverable amount is the higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life.

## 4.12 Provisions, contingent liability and contingent assets

Provisions are recognized in the accounts in respect of present probable obligations, the amount of which can be reliably estimated. Contingent Liabilities are disclosed in respect of possible obligations that arise from past events but their existence is confirmed on the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent Assets are neither recognized nor disclosed in the financial statements.

## 4.13 Cash & cash equivalents

Cash & cash equivalents comprise cash and cash on deposit with banks and corporations. The company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amount of cash to be cash equivalents.

#### 4.14 Leases

Leases where the Lessor effectively retains substantially all the risks and benefits of ownership of the Leased Asset, are classified as 'Operating Leases". Lease rentals with respect to assets taken on 'Operating Lease' are charged to Statement of Profit and Loss on a straight-line basis over the lease term.

Leases which effectively transfer to the Company substantially all the risks and benefits incidental to the ownership of the leased item are classified as 'Finance Lease'. Assets acquired on Finance Lease which substantially transfer all the risks and rewards of ownership to the Company are capitalized as assets by the Company at the lower of the fair value and the present value of the minimum lease payment and a liability is created for an equivalent amount. Lease rentals payable is apportioned between the liability and finance charge so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

#### 4.15 Borrowing cost

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with ShortTerm/Long Term borrowing of funds. Borrowing costs that are attributable to the acquisition or construction of a qualifying asset is capitalised as part of the cost of such asset till such time the asset is ready for its intended use. A qualifying asset is one that necessarily takes a substantial period of time to get ready for its intended use. All other borrowing costs are charged to Statement of Profit and Loss in the period in which they are incurred.

#### 4.16 Intangible Assets

#### **Initial Recognition**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, Intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any.

#### **Amortization**

Intangible assets are amortized on straight line basis over the estimated useful economic life of the asset. The company presumes that the useful economic life of the software is ten years from the year in which it is acquired and ready to use.

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS

You should read the following discussion in conjunction with our restated financial statements attached in the chapter titled "Financial Information of the Company" beginning on page 155. You should also read the section titled "Risk Factors" on page 25 and the section titled "Forward looking Statement" on page 19 of this Draft Red Herring Prospectus, which discusses a number of factors and contingencies that could affect our financial condition and results of operations. The following discussion relates to us, and, unless otherwise stated or the context requires otherwise, is based on our Restated financial Statements.

Our financial statements have been prepared in accordance with Indian GAAP, the Companies Act and the SEBI (ICDR) Regulations and restated as described in the report of our auditor date September 05, 2024 which is included in this Draft Red Herring Prospectus under "Financial Statements". The Restated Financial Information has been prepared on a basis that differs in certain material respects from generally accepted accounting principles in other jurisdictions, including US GAAP and IFRS. Our financial year ends on March 31 of each year, and all references to a particular financial year are to the twelve-month period ended March 31 of that year.

#### **OVERVIEW**

Established in 2003, we are primarily engaged in the business of manufacturing and selling of Sponge Iron. Sponge iron is mainly used as a raw material for steel production in electric arc furnaces and induction furnaces. Through our sponge iron business, we cater to the metallic requirements of steel producers in selected geographies

Our manufacturing facility is located in Siltara - Raipur, Chhattisgarh and is spread across an area of around 13.45 acres of land with an annual production capacity of 30,000 Metric Tonnes. The strategic location of our sponge iron manufacturing facility provides us with access to high-quality iron ore, iron ore pellets, coal and dolomite which are essential raw materials for producing sponge iron. During production of sponge iron, a solid waste is produced as a by-product called dolochar. For the Fiscal 2024, our revenue from operations stood at Rs. 8,226.63 lakhs of which revenue from sponge iron, dolochar and other items (iron ore fines, dust and waste scrap) contributed 96.53.%, 1.10% and 2.37% respectively.

Due to increasing power costs, our manufacturing operations for mild steel ingots, steel shots, grits, and other steel products have been temporarily shut down since 2020. Despite having a well-defined production process and all necessary machinery installed at our manufacturing unit, the economic environment has not supported sustained operations. Therefore, we are planning to install a captive power plant on our premises using proceeds from the issue. The installation of the captive power plant will enable us to resume and sustain our operations effectively.

We have been granted ISO 9001:2015 for quality management systems, ISO 14001:2015 for environmental management systems and ISO 45001:2018 for occupational health and safety management systems. Our manufacturing facility is equipped with requisite technology and infrastructure including machineries, testing laboratory other handling equipments to facilitate smooth manufacturing process. The key raw materials to produce sponge iron are iron ore/iron ore pellets, coal and dolomite. Sponge iron manufacturing is highly sensitive to raw material characteristics that would help obtain the rated capacity and the desired product quality. To ascertain the suitability of our raw materials in a rotary kiln, we have in-house testing laboratory that is responsible for conducting tests on raw materials i.e. coal, iron ore and dolomite to check their chemical and physical properties, so as to ensure that the product conform with the pre-determined standards. Currently, we sell our products primarily in the state of Maharashtra, Madhya Pradesh and Chhattisgarh.

Our Company is managed by Mr. Manoj Parasrampuria, Chairman, Chairman and Managing Director who looks after the affairs of the Company and has considerable experience in steel Industry. We believe our success is the result of sustained efforts over the years in key aspects of our business, such as products, process improvements and increased scale of operations. The details of our financial performance as per the restated financial statements for the Fiscal years ended March 31, 2024, 2023 and 2022, are set forth below:

## Phased implementation of UPI

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by UPI Bidders through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. The SEBI in its circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, has reduced the time period for listing of equity shares pursuant to a public issue from six Working Days to three Working Days. The timeline was applicable on a voluntary basis for public issues opening on or after September 1, 2023 and has been made applicable on a mandatory basis for public issues opening on or after December 1, 2023. Considering the time required for making necessary changes to the

systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RIIs had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

**Phase II:** This phase became applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever was later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II until further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

SEBI through its circular SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, prescribed that all individual bidders applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹200,000 and up to ₹500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid cum-Application Form for Bidding through Syndicate, subsyndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

**Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The processing fees for applications made by UPI Bidders may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as the Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 as amended pursuant to SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("UPI Streamlining Circular"), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streamlining Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the BRLM, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

The processing fees for applications made by UPI Bidders may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2

## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the "FDI Policy"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval along with a copy thereof within the Offer Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
