

## You never forget to cross a cheque. Then, why do you forget to strike off blanks in your KYC?

When filling your KYC, remember to exercise your right to choose the segment you want to trade in. Whether it's Equity or F&O or Currency Derivatives. Tick the one you want and strike off the one you don't.

Leaving the slot blank could lead to someone else making a choice for you, thereby making a financial commitment on your behalf, which you will be forced to honour.
