

 **LIVE** INTERACTIVE BOOTCAMP ON

# APPLICATION OF PYTHON IN TRADING & INVESTING

**REGISTER & PAY NOW**

## About the Course

Application of Python in Trading & Investing program covers the practical uses of Python, like analyzing data and stock market trading. Participants will learn how to install Python, use a code editor, and execute Python commands.

## Eligibility

For individuals interested in enrolling for the Python course for beginners, it is advisable to have a basic understanding of stock market and investment principles, as well as a basic knowledge of Technical Analysis. This program caters to a wide range of Python proficiency levels, including those who have no prior experience in Python. The course primarily emphasizes analysis and strategy concepts related to long-term and short-term investments..

## Course Content

---

The sessions will cover the following topics:

### ▶ Python Working Environment

- ▶ Jupyter notebook
- ▶ Introduction to Python with history, Python features
- ▶ Installation of Jupyter notebook, creating python environment on Windows OS, python commands.
- ▶ Programming Basics: keywords, syntax, variables.
- ▶ Operators: logical operators, comparison operators, mathematical operators
- ▶ Concepts: Conditional (if-else), string operations, array, loops, functions and file I/O
- ▶ Data collections: Pandas data frames, dictionary, arrays.

### ▶ Main Data Analysis

- ▶ How to import / export financial data from a file (file I/O)
- ▶ Exploratory data analysis
- ▶ Customized Charts
- ▶ Libraries: NumPy, Technical indicators
- ▶ News feed in Python.
- ▶ Backtesting in Python.
- ▶ Sample project.

## Course Objective

---

This course aims to teach learners how to use Python for financial data analysis. They will gain foundational knowledge of Python programming, data collections, and key libraries such as NumPy and Pandas. Additionally, they will develop the skills needed to import/export financial data, perform exploratory data analysis, generate tailored visualizations, and implement back-testing on financial models using Python.

## Course Features

---

Live online interactive classes by professional faculty

Class recordings will be available for 3 Months

Course access through Mobile, Desktop & Laptop

Get certified by NSE Academy

Access to Content on Digital Platform

## Program Schedule

---

Duration: 16 Hours (4 Sessions | 4 Hours Each)

Bathes: Weekends

## Faculty

---

NSE Academy hosts a distinguished faculty made up of highly qualified professionals, including CA, CFA, FRM, MBA, IIM graduates, and PhD holders, all with extensive industry and corporate experience. They offer both theoretical and practical perspectives on financial concepts through real-world examples, assisting learners in tackling real-life challenges, fostering innovation, and elevating their knowledge. The faculty comprises leading educators and industry experts dedicated to the professional and personal development of students. Moreover, learners gain valuable insights through interactions with industry leaders and senior executives, benefiting from their global expertise. The exceptional faculty at NSE Academy stands out as one of its greatest assets.

## Refund Policy

---

- Registration Fees paid by the candidate shall not be refunded under any circumstances after the classes have commenced.
- In case the registered candidate wishes to cancel the registration for the program, he/she is required to inform NSE Academy via a written request or an Email within 2 working days prior to the commencement of the program. If the refund request is approved, the candidate will be refunded 90% of the total course fees paid for the respective program.\*

\* NSE Academy reserves the right to change or modify the class date / time due to certain exigencies.
