Headline: NSE expands co-location facility capacity to over 1,200 full rack equivalents

<https://www.cnbctv18.com/market/nse-expands-co-location-facility-capacity-to-over-1200-full-rack-equivalents-19536597.htm>

The National Stock Exchange (NSE) on Wednesday (January 8) said it has expanded its co-location facility capacity with the introduction of Phases 11 and 12, adding over 200 Full Rack Equivalent (FRE) units.

Launched on January 3, 2025, the latest phases are part of NSE's ongoing effort to meet growing demand from market participants. With this expansion, NSE now offers a combined co-location capacity exceeding 1,200 FREs, positioning itself as one of the largest co-location facility providers globally.

Currently, over 200 members have subscribed to racks in the exchange co-location facility and over 100 members have subscribed to co-location via the Co-location as a Service (CaaS) model being provided by the exchange.

Looking at the development in the Indian financial markets and demand from the market participants, the NSE continues to augment the existing capacity and plans to add over 300 Full Rack Equivalent capacities by the end of the first quarter of FY 2025-26 at the Exchange Plaza, BKC site that takes the capacity to 1,500 racks in next 3 months at the Exchange Plaza, BKC.

In addition to the above, the National Stock Exchange also plans to add approximately 2,000 Full Rack Equivalent capacity on a need basis in a phased manner over the next two years.

To create the capacities, the existing premises in Exchange Plaza, BKC is planned to be converted into a data centre and non-critical employees or departments currently operating from the Exchange Plaza premises are being relocated to alternate office facilities which have been identified within the BKC area.

The Economic Times

Headline: NSE expands colocation facility in Mumbai with 200 new racks

<https://economictimes.indiatimes.com/markets/stocks/news/nse-expands-colocation-facility-in-mumbai-with-200-new-racks/articleshow/117052522.cms>

The National Stock Exchange of India (NSE) on Wednesday announced the launch of phases 11 and 12 of its colocation facility expansion in Mumbai, introducing over 200 full rack equivalent (FRE) units to its data center capacity.

The expansion brings the total colocation capacity at NSE to more than 1,200 racks, reinforcing its position as one of the largest colocation providers in the world, the stock exchange said.

The colocation facility enables trading members to place their servers at the exchange's premises, ensuring ultra-low latency access to trading data and price feeds — a critical advantage in today's technology-driven financial markets

The expansion follows strong demand from market participants for enhanced colocation infrastructure, NSE said. Currently, over 200 members subscribe to the colocation racks, with an additional 100 leveraging the Colocation as a Service (CaaS) model.

Building on this momentum, NSE plans to add 300 more full rack equivalent (FRE) racks by the end of the first quarter of FY25-26 at its

Exchange Plaza site in Bandra Kurla Complex (BKC), Mumbai. This will increase total capacity to 1,500 racks in the next three months, the stock exchange said.

Looking ahead, the exchange intends to add approximately 2,000 additional racks over the next two years, scaling its capacity to over 4,000 FRE racks in a phased manner. To accommodate this growth, NSE will convert its existing Exchange Plaza premises into a dedicated data center, relocating non-critical operations to nearby facilities.

While the colocation facility operates on a best-effort basis, members are advised to put robust contingency systems in place to mitigate risks such as power failures, system issues, or connectivity disruptions. The colocation facility is part of NSE's broader integrated business model, which includes trading services, clearing and settlement, market data, and financial education.

With the introduction of the new phases of expansion, the Exchange is now one of the largest colocation facility providers in the world

National Stock Exchange (NSE) has enhanced its co-location capacity with the introduction of over 200 full rack equivalent (FRE) capacity. It was part of colocation Phase-11 and Phase-12 launched on January 3.

With the introduction of the new phases of expansion, the NSE is now one of the largest colocation facility providers in the world with combined capacity of over 1,200 FRE capacity being made available to market participants.

The colocation facility enables trading members to place their servers at the exchange's premises, ensuring ultra-low latency access to trading data and price feeds. It is a critical advantage in technology-driven financial markets.

Currently, over 200 members have subscribed to racks in the Exchange Colocation Facility and over 100 members have subscribed to colocation via Colocation as a Service (CaaS) model being provided by the Exchange. Expansion plans

Considering the growing demand, the exchange plans to add over 300 FRE capacity by June quarter-end at the Exchange Plaza, BKC site that takes the capacity to 1,500 racks in next three months.

Exchange also plans to add about 2000 FRE capacity on need basis in a phased manner over next two years. To create the aforesaid capacities, the existing premises in Exchange Plaza, BKC is planned to be converted to a Data Centre and non-critical employees / departments currently operating from the Exchange Plaza premises are being relocated to alternate office facilities which have been identified in the BKC area.

Business Standard

Headline: NSE plans expansion of its colocation facility, to add 2,000 new racks

https://www.business-standard.com/markets/news/nse-plans-expansion-of-its-colocation-facility-to-add-2-000-new-racks-125010800864_1.html

The National Stock Exchange (NSE) on Wednesday announced plans to expand its colocation facility, targeting the addition of approximately 2,000 new racks.

The new additions will be made within its existing premises.

A colocation facility allows stockbrokers to place their servers in the exchange's data centre, providing faster access to trade data and price feeds. The ultra-low latency of the facility enables quicker trading, with exchanges charging an annual fee from brokers for this service.

In recent phases, NSE has added over 200 full rack equivalent (FRE) capacities, with plans to add around 300 FRE capacity by the end of the first quarter of FY26, taking the total capacity to 1,500 racks. Over the next two years, NSE aims to add nearly 2,000 FRE capacity in a phased manner, based on demand.

To support this expansion, the exchange plans to convert its existing premises into a dedicated data centre and relocate non-critical employees to other office facilities.

Currently, over 200 stockbrokers and members have subscribed to the racks in the exchange's colocation facility, while more than 100 members use the Colocation as a Service (CaaS) model.

NSE stated that the expansion plans were driven by increasing demand from market participants.

Headline: NSE to Expand Co-Location Facility at NSEIL Premises

NSE plans expansion of colocation facility

The National Stock Exchange (NSE) on Wednesday announced the expansion plans for its colocation facility under which it is targeting a total addition of around 2,000 new racks. The new additions will be done in its current premises.

In the recent phases, it has released over 200 full rack equivalent (FRE) capacity while around 300 FRE capacity will be added by the end of the first quarter of FY26. This addition will take the capacity to 1500 racks.

Colocation facility helps stock brokers to place their servers in the data centre of the exchange and allows faster access of trade data and price feeds. The ultra-low latency of the facility enables faster trading.

Our Bureau

Mumbai

The NSE has enhanced its co-location capacity with the introduction of over 200 full rack equivalent (FRE) capacity. It was part of the co-location phase-11 and phase-12 launched on January 3.

CO-LOCATION FACILITY

With the introduction of the new phases of expansion, NSE is now one of the largest co-location facility providers in the world with combined capacity of over 1,200 FRE being made available to market participants.

The facility enables trad-

ing members to place their servers at the exchange's premises, ensuring ultra-low latency access to trading data and price feeds. It is a critical advantage in technology-driven financial markets.

Currently, over 200 members have subscribed to racks in the Exchange Co-location

Facility and over 100 members have subscribed to co-location via Co-location as a Service (CaaS) model being provided by the exchange.

EXPANSION PLANS

Considering the growing demand, the exchange plans to add over 300 FRE capacity by June quarter-end at the Exchange Plaza, BKC site, which will take the capacity to 1,500 racks in three months. It also plans to add about 2000 FRE capacity on need-basis in a phased manner over two years. To create these capacities, the existing premises at Exchange Plaza, BKC, are planned to be converted to a data centre.

NEW DELHI

NSE expands co-location capacity

The National Stock Exchange introduced and released over 200 Full Rack Equivalent (FRE) capacity of various variants in colocation facilities at the start of the New Year 2025 – on January 3. In a statement, the stock exchange said it continued to review and augment the capacity of available racks in the colocation facility in phases, based on feedback and demand from market participants.

नेशनल स्टॉक एक्सचेंज ने एनएसईआईएल परिसर में को-लोकेशन क्षमता के विस्तार की योजना बनाई

नेशनल स्टॉक एक्सचेंज (एनएसई) ने अपने व्यापारिक सदस्यों के लिए मुंबई स्थित मुख्यालय में चरणबद्ध तरीके से को-लोकेशन क्षमता का विस्तार करने की योजना बनाई है। बाजार सहभागियों से प्राप्त फीडबैक और मांग के आधार पर, एक्सचेंज को-लोकेशन सुविधा में उपलब्ध रैक की क्षमता की समीक्षा और वृद्धि करने का काम जारी रखता है।

इसी सिलसिले में एक्सचेंज ने ३ जनवरी, २०२५ को लॉन्च किए गए को-लोकेशन चरण ११ और १२ में विभिन्न प्रकारों की २०० से अधिक पूर्ण रैक समतुल्य (एफआरई) क्षमता की शुरुआत और रिलीज की घोषणा की है।

नए चरण ११ और १२ की शुरुआत के साथ, एक्सचेंज अब दुनिया में सबसे बड़े को-लोकेशन

सुविधा प्रदाताओं में से एक बन गया है, जिसकी संयुक्त क्षमता १२०० से अधिक पूर्ण रैक समतुल्य (एफआरई) क्षमता बाजार सहभागियों को उपलब्ध कराई जा रही है। वर्तमान में २०० से अधिक सदस्यों ने एक्सचेंज को-लोकेशन सुविधा में रैक की सदस्यता ली है और १०० से अधिक सदस्यों ने एक्सचेंज द्वारा प्रदान किए जा रहे को-लोकेशन एज ए सर्विस (सीएएस) मॉडल के माध्यम से को-लोकेशन की सदस्यता ली है। भारतीय वित्तीय बाजारों में विकास और बाजार सहभागियों की मांग को देखते हुए, एक्सचेंज मौजूदा क्षमता को बढ़ाने के लिए काम कर रहा है। एक्सचेंज ने वित्त वर्ष २०२५-२६ की पहली तिमाही के अंत तक एक्सचेंज प्लजा, बीकेसी साइट पर ३००

से अधिक पूर्ण रैक समतुल्य (एफआरई) क्षमता जोड़ने की योजना बनाई है, जिससे अगले ३ महीनों में एक्सचेंज प्लजा, बीकेसी में क्षमता १५०० रैक तक हो जाएगी। उपर्युक्त के अलावा, एक्सचेंज अगले २ वर्षों में चरणबद्ध तरीके से आवश्यकता के आधार पर लगभग २००० पूर्ण रैक समतुल्य (एफआरई) क्षमता जोड़ने की भी योजना बना रहा है। उपर्युक्त क्षमताएं बनाने के लिए, एक्सचेंज प्लजा, बीकेसी में मौजूदा परिसर को डेटा सेंटर में बदलने की योजना है और वर्तमान में एक्सचेंज प्लजा परिसर से काम कर रहे गैर-महत्वपूर्ण कर्मचारियों/विभागों को वैकल्पिक कार्यालय सुविधाओं में स्थानांतरित किया जा रहा है, जिन्हें बीकेसी क्षेत्र के भीतर पहचाना गया है।

Reuters

Headline: National Stock Exchange of India expands co-location capacity

<https://www.reuters.com/world/india/national-stock-exchange-india-expands-co-location-capacity-2025-01-08/>

The National Stock Exchange of India (NSE) (NSEI.NS), opens new tab, the country's largest bourse, said on Wednesday it has expanded the capacity of its co-location data centre by more than 200 racks, which house servers and storage devices.

A co-location facility lets brokers set up servers within a stock exchange, giving them quicker and easier access to price-sensitive information as well as faster connectivity.

NSE said it now has the capacity for more than 1,200 racks, making it one of the largest co-location facility providers in the world.

To meet high demand, the NSE plans to add another 300 racks by the end of the first quarter of fiscal year 2025-26 and, if the demand sustains, it will add about 2,000 racks over the next two years, the exchange said.

Headline: NSE Expands Co-Location Capacity By Over 200, Another 300 In Offing

<https://zeenews.india.com/economy/nse-expands-co-location-capacity-by-over-200-another-300-in-offing-2841123.html>

The National Stock Exchange introduced and released over 200 Full Rack Equivalent (FRE) capacity of various variants in colocation facilities at the start of the New Year 2025 -- on January 3. In a statement, the stock exchange said it continued to review and augment the capacity of available racks in the colocation facility in phases, based on feedback and demand from market participants.

With the introduction of the new phases, NSE claims it is now one of the largest co-location facility providers in the world with a combined capacity of over 1200 Full Rack Equivalent (FRE) capacity being made available to market participants.

Currently, over 200 members have subscribed to racks in the Exchange Colocation Facility and over 100 members have subscribed to colocation via Colocation as a Service (CaaS) model being provided by NSE. Looking at the demand dynamics, NSE plans to add over 300 more capacity by the end of the first quarter of the upcoming financial year 2025-26 at its Mumbai BKC site.

The addition will take the capacity to 1500 racks in the next three months at its BKC site. Further, NSE also plans to add approximately 2,000 Full Rack Equivalent (FRE) capacity, on a need basis, in a phased manner over the next two years.

"To create the aforesaid capacities, the existing premises in Exchange Plaza, BKC is planned to be converted to a Data Centre and non-critical employees/departments currently operating from the Exchange Plaza premises are being relocated to alternate office facilities which have been identified within the BKC area," said the exchange in the statement.

NSE began operations in 1994. NSE has a fully integrated business model comprising exchange listings, trading services, clearing and settlement services, indices, market data feeds, technology solutions and financial education offerings.

Headline: NSE announces expansion of co-location capacity at NSEIL premises

<https://www.moneycontrol.com/news/business/markets/nse-announces-expansion-of-co-location-capacity-at-nseil-premises-12905876.html>

The National Stock Exchange (NSE) has announced a significant expansion of its co-location capacity at the NSEIL premises, strengthening its position as one of the world's largest co-location service providers.

In a statement released on Wednesday, the exchange unveiled over 200 Full Rack Equivalent (FRE) capacity as part of Colocation Phases 11 and 12. This addition takes the Exchange's combined capacity to over 1,200 FREs. "With the introduction of the new phases, NSE has become one of the largest co-location facility providers globally, catering to the diverse needs of market participants," the Exchange said.

Currently, over 200 members have subscribed to racks in the Exchange's Co-Location Facility, while more than 100 members are utilising the service through the Colocation as a Service (CaaS) model, the statement added.

Acknowledging the rapid development in Indian financial markets and the rising demand for co-location services, the Exchange plans to further expand its capacity. It is set to introduce an additional 300 FREs by the end of the first quarter of FY 2025-26 at the Exchange Plaza in Bandra-Kurla Complex (BKC), Mumbai. This will take the total capacity at the BKC site to 1,500 racks within the next three months.

Looking ahead, NSE has ambitious plans to add approximately 2,000 more FREs over the next two years in a phased manner, subject to market demand.

The co-location facilities are critical for enabling high-frequency and low-latency trading, providing market participants with the infrastructure to process trades at speeds critical for today's fast-paced trading environment.

Hindi Business Standard

Headline: Colocation facility: NSE will expand the scope of colocation facility

<https://hindi.business-standard.com/markets/nse-will-expand-the-scope-of-colocation-facility-id-401638>

नैशनल स्टॉक एक्सचेंज (एनएसई) ने बुधवार को अपनी कोलोकेशन सुविधा के लिए विस्तार योजनाओं की घोषणा की। इसके तहत उसने करीब 2,000 नए रैक जोड़ने का लक्ष्य रखा है। यह क्षमता वृद्धि उसके मौजूदा परिसरों में की जाएगी।

कोलोकेशन सुविधा से शेयर ब्रोकरों को एक्सचेंज के डेटा सेंटर में अपने सर्वर रखने और ट्रेडिंग डेटा (करीद-फरोख्त के आंकड़े) और प्राइस फीड (कीमतों) तक तेज पहुंच बनाने में मदद मिलती है। सुविधा तुरंत मिलने से ट्रेडिंग तेजी से होती है। इसके बदले एक्सचेंज ब्रोकरों से वार्षिक शुल्क लेते हैं।

ताजा चरण में उसने 200 से ज्यादा फुल रैक इन्फ्रामेंट (एफआरई) क्षमता उपलब्ध कराई है जबकि करीब 300 एफआरई क्षमता वित्त वर्ष 2026 की पहली तिमाही के अंत तक जोड़ी जाएगी। इस वृद्धि से क्षमता 1,500 रैक तक पहुंच जाएगी। अगले दो वर्ष में चरणबद्ध तरीके से जरूरत के आधार पर लगभग 2,000 एफआरई क्षमता जोड़ने की योजना है। इसके लिए एक्सचेंज अपने मौजूदा परिसरों को डेटा सेंटर में तब्दील करेगा और कम जरूरी कर्मियों को अन्य कार्यालय परिसरों में भेजा जाएगा।

इस समय 200 से ज्यादा शेयर ब्रोकरों और सदस्यों ने एक्सचेंज की कोलोकेशन सुविधा में रैक की सदस्यता ले रखी है जबकि 100 से अधिक सदस्यों ने कोलोकेशन एज ए सर्विस (सीएएस) मॉडल की सदस्यता ली है। एनएसई ने कहा है कि बाजार कारोबारियों की मांग के बाद इस विस्तार योजना पर अमल किया जा रहा है।

The National Stock Exchange of India (NSE), the country's largest bourse, said on Wednesday it has expanded the capacity of its co-location data centre by more than 200 racks, which house servers and storage devices.

A co-location facility lets brokers set up servers within a stock exchange, giving them quicker and easier access to price-sensitive information as well as faster connectivity.

NSE said it now has the capacity for more than 1,200 racks, making it one of the largest co-location facility providers in the world.

To meet high demand, the NSE plans to add another 300 racks by the end of the first quarter of fiscal year 2025-26 and, if the demand sustains, it will add about 2,000 racks over the next two years, the exchange said.

Headline: NSE Expands Co-Location Capacity, Strengthens Global Presence

<https://lakshmishree.com/news/nse-expands-co-location-capacity-strengthens-global-presence/>

The National Stock Exchange (NSE) has announced a major expansion of its co-location services, further establishing itself as one of the largest co-location service providers worldwide.

It has added more than 200 Full Rack Equivalent capacities under Colocation Phases 11 and 12 at its NSEIL premises. This takes the total capacity to over 1,200 FREs and caters to the emerging needs of market participants.

More than 200 members are currently subscribed to NSE's Co-Location Facility, while more than 100 members are using the Colocation as a Service -CaaS model, the exchange said in its statement on Wednesday.

The NSE thus plans further expansion to meet the growing demand for high-frequency and low-latency trading infrastructure. An additional 300 FREs will be introduced at the Exchange Plaza in BKC, Mumbai, by the end of Q1, FY 2025-26, taking the total capacity at the BKC site to 1,500 racks within the next three months.

Going forward, the exchange plans to add 2,000 more FREs in phases over the next two years, depending on market demand.

Co-location facilities are important in facilitating high-frequency, low-latency trading. These provide state-of-the-art infrastructures that help the market participant to execute trades with minimum latency. Recent developments at the NSE epitomize their commitment to responding to the dynamic requirements of both the Indian and international markets.

Devdis Course

Headline: NSE Expands Co-location Capacity to Strengthen Global Presence

<https://www.devdiscourse.com/article/business/3218722-nse-expands-co-location-capacity-to-strengthen-global-presence>

The National Stock Exchange (NSE) of India has announced a significant expansion of its colocation facilities, releasing over 200 Full Rack Equivalent (FRE) capacities at the start of 2025. This initiative is part of NSE's strategy to review and enhance its infrastructure in response to feedback and demand from market participants.

With the addition, NSE is now one of the largest providers of colocation facilities globally, boasting a combined capacity exceeding 1,200 FRE. Currently, the Exchange Colocation Facility has over 200 members subscribing to its racks, with more than 100 utilizing its Colocation as a Service (CaaS) model.

In response to increasing demand, NSE plans to further boost its capacity by 300 racks by the end of the first quarter of the financial year 2025-26, expanding to 1,500 racks at its Mumbai BKC site. The exchange also anticipates adding approximately 2,000 FRE capacities in phases over the next two years.

To facilitate this growth, the existing premises at Exchange Plaza, BKC, will be transformed into a dedicated Data Centre, with non-critical operations relocating to other BKC area facilities. NSE, operational since 1994, maintains a fully integrated business model providing exchange listings, trading, clearing, settlement services, and more.

Business Upturn

Headline: NSE to expand co-location capacity to enhance trading efficiency

<https://www.businessupturn.com/finance/stock-market/nse-to-expand-co-location-capacity-to-enhance-trading-efficiency/>

The National Stock Exchange of India (NSE) has announced plans to expand its co-location facility, aiming to accommodate growing demand and improve trading efficiency. The initiative reflects NSE's commitment to providing cutting-edge infrastructure for market participants.

What is the co-location facility?

NSE's co-location service allows trading members to place their servers in close proximity to the exchange's trading infrastructure. This setup significantly reduces latency, enabling faster order execution and improved trading performance.

Key Benefits of Expansion:

Enhanced Capacity: The expanded facility will support more participants, catering to the increasing demand for low-latency trading.

Technological Advancements: The upgrade will integrate advanced technologies to ensure seamless operations and improved data handling.

Market Efficiency: With reduced latency and higher capacity, the expansion is expected to contribute to more efficient and transparent trading.

NSE continues to strengthen its infrastructure to remain competitive in the evolving market landscape. This expansion aligns with its vision of supporting robust, efficient, and fair-trading ecosystems for its participants.

Angel One

Headline: NSE Announces Expansion of Co-Location Capacity at NSEIL Premises

<https://www.angelone.in/news/nse-announces-expansion-of-co-location-capacity-at-nseil-premises>

The National Stock Exchange (NSE) has announced expansion of its co-location facilities, adding over 200 Full Rack Equivalent (FRE) capacity under Phases 11 and 12 at the NSEIL premises. This development boosts NSE's combined capacity to over 1,200 FREs, making it one of the largest co-location service providers globally.

Current Usage and Co-Location Models

At present, more than 200 members have subscribed to the racks within NSE's Co-Location Facility. Additionally, over 100 members are utilizing the service through the Colocation as a Service (CaaS) model, showing the user base of the facility. The co-location services enable stock brokers to place their servers in the exchange's data centres, offering low latency essential for high-frequency trading. NSE charges an annual fee for this facility.

Expansion Plans

Looking ahead, NSE plans to introduce an additional 300 FREs by the end of Q1 FY 2025-26 at its Exchange Plaza in Bandra-Kurla Complex (BKC), Mumbai. This will take the total capacity at the BKC site to 1,500 racks. Over the next two years, the exchange is set to add approximately 2,000 more FREs in a phased manner, contingent on market demand. To

accommodate this growth, NSE will convert existing premises into a data centre and relocate employees to other office spaces.

Demand-Driven Expansion

The expansion comes in response to the growing demand for co-location services, fueled by developments in Indian financial markets. NSE's co-location facilities cater to market participants' requirements for high-speed, low-latency trading infrastructure, critical for today's trading environment.

Co-Location Services Overview

Co-location facilities provide brokers faster access to trade data and price feeds by hosting their servers within the exchange's data center. This infrastructure ensures the swift processing of trades, essential for high-frequency trading. The latest capacity addition aligns with the needs of market participants while ensuring scalability for growth.

Headline: NSE Plans Expansion Of Colocation Facility, To Add 2,000 Racks

<https://m.rediff.com/news/commentary/2025/jan/09/nse-plans-expansion-of-colocation-facility-to-add-2000-racks/9f9f9268e88f826c9ebfa9f2778d6dc4>

The National Stock Exchange on Wednesday announced expansion plans for its colocation facility under which it is targeting addition of around 2,000 new racks.

The new additions will be done at its current premises.

Colocation facility helps stock brokers to place their servers in the data centre of the exchange and allows faster access of trade data and price feeds.

The ultra-low latency of the facility enables faster trading. The exchanges charge an annual fee for this facility from the brokers.

In the recent phases, it has released over 200 full rack equivalent (FRE) capacity while around 300 FRE capacity will be added by the end of the first quarter of FY26. This addition will take the capacity to 1,500 racks.

In the next two years, it plans to add nearly 2000 FRE capacity on need basis in a phased manner.

For this, the exchange will be converting its existing premises into a data centre and relocate non-critical employees to other office facilities.

At present, over 200 stock brokers and members have subscribed to the racks in the exchange's colocation facility while over 100 members have subscribed to the colocation as a service model.

NSE stated that the expansion plan follows the demand raised by market participants.
