Headline: Market cap of NSE-listed firms sees nearly 7 pc growth in FY25 with 11.3 crore investors

https://ianslive.in/market-cap-of-nse-listed-firms-sees-nearly-7-pc-growth-in-fy25-with-113-crore-investors--20250331133903#google_vignette

The market capitalisation of NSE-listed companies reached Rs 410.87 lakh crore ($4.81 trillion) in FY25 (till March 31), from Rs 384.2 lakh crore ($4.61 trillion) in FY24 — a growth of 6.94 per cent year-on-year, according to the data released by the National Stock Exchange on Monday.

The total number of companies listed on the NSE stood at 2,720 (as on March 31, 2025).

Total unique registered investors reached 11.3 crore (till March 28), with total unique accounts at 21.94 crore (till March 27). New investor registrations in FY25 were 2.09 crore (till March 28), according to the NSE data.

The financial year saw 242 initial public offerings (IPOs), and the total amount raised through IPO (Mainboard + Emerge) reached Rs 1.7 lakh crore.

According to the data, the market capitalisation of NSE Emerge (SME) listed companies (as of March 31, 2025) was Rs 1.8 lakh crore ($20.8

billion) in FY25, up a massive 50 per cent from Rs 1.2 lakh crore ($14.8 billion) in FY24.

Total cumulative volume in GIFT Nifty contracts for FY25 reached 23.99 million contracts, with a total turnover of $1.111 trillion.

Since the commencement of full-scale operations in July 2023, GIFT Nifty has achieved a total cumulative volume of 38.99 million contracts, with a total cumulative turnover of $1.72 trillion as of March 28, 2025.

The total cumulative traded value surged from $611.95 billion to $1111.14 billion, a growth of 82 per cent.

Average monthly value rose from $67.99 billion to $92.60 billion, a growth of 36 per cent, as per the NSE data. Average daily traded value climbed from $3.19 billion to $4.26 billion, a growth of 34 per cent.

On NSE IX (GIFT IFSC), the total notional turnover crossed the $1 trillion mark in FY25.

"Total Notional Turnover of the NSE IX across all the products for FY25 is $1,144 billion vs $735 billion for FY24," according to the NSE data.

As many as 65,031 unique clients were registered in FY25 (till March 28) compared to 316 in FY24.

Headline: Indian companies with over Rs 1 lakh crore market cap surge 40 times since 2000: NSE Report

https://www.aninews.in/news/business/indian-companies-with-over-rs-1-lakh-crore-market-cap-surge-40-times-since-2000-nse-report20250331111630/

The number of Indian companies with a market capitalisation of over Rs 1 lakh crore has surged 40 times over last 24 years. This reflects the country's strong economic growth and market expansion, according to a report by the National Stock Exchange (NSE).

The report highlighted that the number of companies with a market cap of over Rs 1 lakh crore increased significantly between FY02 and FY24, with their share of the total market capitalisation of NSE-listed companies rising from nearly 18 per cent to over 60 per cent.

This growth is attributed to India's strong economic fundamentals, implementation of crucial reforms, surplus global liquidity after the 2008 financial crisis, and a steadily expanding investor base.
The report said, "The number of companies with over 1 lakh crore market cap have increased by over 40 times between FY02 and FY24."

The report further stated that the market capitalisation of the top 10 companies has grown 28 times over the last two decades. Their profits and assets have increased by an average of 15.4 per cent and 16 per cent, respectively, each year over the past 20 years.

In FY02, only one company had a market capitalisation exceeding Rs 1 lakh crore. By FY04, this number had grown to two, and in FY10, it increased to 14, with a combined market cap of Rs 21.2 lakh crore.

The Global Financial Crisis of 2008 caused a temporary decline, but global liquidity infusion, key economic reforms such as easing FDI limits and fuel price deregulation, and improving political stability helped the markets recover.

By FY15, the number of companies with over Rs 1 lakh crore market cap rose to 22, with a total market cap of Rs 43.8 lakh crore. This growth continued, with 30 companies reaching this milestone by FY19, taking their total market cap to Rs 73 lakh crore.

The COVID-19 pandemic in FY20 disrupted financial markets, reducing the number of such companies to 20, with a total market cap of Rs 51.8 lakh crore. However, post-pandemic policy measures, strong economic recovery, and rising domestic participation fuelled a sharp rebound.

As a result, the number of companies with at least Rs 1 lakh crore market cap soared to 81 in FY24, out of the total 2,439 listed companies. In value terms, the total market cap of these companies stood at Rs 234 lakh crore, accounting for over 60 per cent of the total market cap.

This remarkable rise in high-market-cap companies' showcases India's economic resilience, market depth, and investor confidence.

As reforms continue and the economy expands, the number of companies crossing the Rs 1 lakh crore market cap threshold is expected to grow further, reinforcing India's position as a key player in global markets. (ANI)

Headline: Are SME IPOs on the rise? Here's what NSE data suggests

https://www.indiatvnews.com/business/markets/are-sme-ipos-on-the-rise-here-s-what-nse-data-suggests-2025-04-01-983335

Small and Medium Enterprises, commonly known as SMEs, are now an integral part of India's socio-economic development. Just like regular Initial Public Offerings (IPOs), the one issued by SME is known as SME IPO. Through IPOs, SMEs raise funds to meet their financial requirements. After the listing, the stocks of these SMEs trade on the stock exchange.

Are SME IPOs Popular?

Small and Medium Enterprises (SME) Initial public offerings (IPOs) have become popular in recent times. Many of them witnessed good response from investors and were subscribed in multiples of hundreds over the shares that were on offer.

Are SME IPOs On The Rise?

Data made available by the National Stock Exchange showed that of the total 242 IPOs launched in 2024-25, 163 were of SMEs.

The SMEs raised a total of Rs 7,111 crore through these IPOs in the financial year that's ending March 31, 2025, on NSE, Mumbai-based stock exchange data showed. The average fund raising by these SMEs was Rs 44 crore.

Danish Power Ltd raised the highest fund among the SMEs IPOs of Rs 198 crore, while Hoac Foods India Ltd raised the lowest fund of Rs 6 crore, NSE data showed. The market capitalisation of NSE Emerge (SME) listed companies as of March 31, 2025 is Rs 1.8 lakh crore.

As per a report put out by wealth management firm Angel One Wealth, last year, the average listing gains in SMEs have skyrocketed from 2 per cent in 2019 to 74 per cent in 2024, while average listing gains in mainboard IPOs peaked out in 2020 and have been range-bound around 30 per cent since then.

Given the increasing participation of retail investors and the heightened oversubscription in recent IPOs, SEBI undertook an in-depth study to analyse investor behaviour in IPOs. The study covered data from 144 IPOs listed between April 2021 and December 2023. The study also found that returns on shares influenced investor selling behaviour.

Headline: Market Cap Of NSE-Listed Firms Reaches Rs 410.87 Lakh Crore In FY 25- Details Here

https://zeenews.india.com/economy/market-cap-of-nse-listed-firms-sees-nearly-7-per-cent-growth-in-fy25-with-11-3-crore-investors-2879902.html

The market capitalisation of NSE-listed companies reached Rs 410.87 lakh crore ($4.81 trillion) in FY25 (till March 31), from Rs 384.2 lakh crore ($4.61 trillion) in FY24 — a growth of 6.94 per cent year-on-year, according to the data released by the National Stock Exchange on Monday.

The total number of companies listed on the NSE stood at 2,720 (as on March 31, 2025). Total unique registered investors reached 11.3 crore (till March 28), with total unique accounts at 21.94 crore (till March 27). New investor registrations in FY25 were 2.09 crore (till March 28), according to the NSE data.

The financial year saw 242 initial public offerings (IPOs), and the total amount raised through IPO (Mainboard + Emerge) reached Rs 1.7 lakh crore.

According to the data, the market capitalisation of NSE Emerge (SME) listed companies (as of March 31, 2025) was Rs 1.8 lakh crore ($20.8 billion) in FY25, up a massive 50 per cent from Rs 1.2 lakh crore ($14.8 billion) in FY24.

Total cumulative volume in GIFT Nifty contracts for FY25 reached 23.99 million contracts, with a total turnover of $1.111 trillion. Since the commencement of full-scale operations in July 2023, GIFT Nifty has achieved a total cumulative volume of 38.99 million contracts, with a total cumulative turnover of $1.72 trillion as of March 28, 2025.

The total cumulative traded value surged from $611.95 billion to $1111.14 billion, a growth of 82 per cent.
Average monthly value rose from $67.99 billion to $92.60 billion, a growth of 36 per cent, as per the NSE data. Average daily traded value climbed from $3.19 billion to $4.26 billion, a growth of 34 per cent.

On NSE IX (GIFT IFSC), the total notional turnover crossed the $1 trillion mark in FY25. "Total Notional Turnover of the NSE IX across all the products for FY25 is $1,144 billion vs $735 billion for FY24," according to the NSE data.

Business Today

Headline: NSE's unique investor base at 113 million; these states lead with the highest count

https://www.businesstoday.in/markets/story/nses-unique-investor-base-at-113-million-these-states-lead-with-the-highest-count-470107-2025-04-01

The unique equity investors of the NSE increase by more than 20 million in financial year 2024-25. This came despite the volatility in the domestic stock markets due to heavy outflows from foreign institutional investors, a slowdown in earnings, and US trade war woes. Data shared by the exchange showed the NSE had 113 million unique investors as of March 28, 2025, against 91.6 million on March 31, 2024. The benchmark NSE Nifty index gained 5.34% in the past 12 months.

Data highlighted that only two states—Maharashtra and Uttar Pradesh—have more than 10 million unique investors each. Maharashtra leads with 18.4 million registered investors as of March 28, registering a 16.6% year-on-year (YoY) growth. On the other hand, Uttar Pradesh posted a 29.4% YoY growth to 12.8 million unique registered investors.

These top two states are followed by Gujarat (9.9 million registered investors), West Bengal (6.6 million) and Rajasthan (6.5 million) which complete the top five positions.

Overall, there are 20 states that have more than 1 million registered investors. Tamil Nadu, Karnataka, Madhya Pradesh, Andhra Pradesh, Bihar, Delhi, Haryana, Punjab, Kerala, Telangana, Assam, Odisha, Jharkhand, Chhattisgarh and Uttarakhand each have over 10 lakh registered investors, as per NSE data.

Region-wise, East India, North India and South India witnessed 26%, 26% and 23% growth, respectively, in the number of registered investors. West India saw a 19% YoY increase at 34.1 million.

As many as 37.7 million individual investors traded at least once in the cash market segment during the FY25, up 22.8% YoY. On the other hand, 10.6 million (up 10.4%) traded at least once in the equity derivatives segment.

The bottom five in terms of the number of unique registered investors include Ladakh, Lakshadweep, Daman & Diu, Mizoram and Andaman & Nicobar Islands.

ABP Live

Headline: Investors' Interest Tumbles In Feb, New Registrations Fall 31 Per Cent

https://news.abplive.com/business/investors-interest-tumbles-in-feb-new-registrations-fall-31-per-cent-1762100

Equity markets experienced an extended selloff in February, influenced by concerns over tariffs, slowing corporate earnings, and valuation uncertainties. According to the latest report from the National Stock Exchange (NSE), this market volatility contributed to a 31.2 per cent decline in new investor registrations compared to January.

The downturn affected all states, though Uttar Pradesh continued to lead in new investor additions despite the overall slowdown, reported Moneycontrol.

The sharpest drop in new registrations was recorded in the western region, which saw a decline of over 41 per cent in February as compared to the previous month.

Despite the overall slump, Northern India maintained its dominance, accounting for 40.5 per cent of total new investor registrations in February. Meanwhile, East India and South India experienced declines of 24.7 per cent and 26.8 per cent, respectively.
Uttar Pradesh Retains Top Spot Despite Decline

Uttar Pradesh registered the highest number of new investors on the NSE in February, with 1.6 lakh additions. However, this marked a significant drop from the 2.2 lakh registrations recorded in January, reflecting a nearly 27 per cent decline. Maharashtra followed with 1.3 lakh new investors, while West Bengal (79,300), Tamil Nadu (78,300), Bihar (67,200), Gujarat (65,100), Karnataka (63,400), Rajasthan (57,400), Madhya Pradesh (53,300), Andhra Pradesh (49,100), Telangana (40,900), and Delhi (40,000) also contributed to the investor pool.

Maharashtra continued to dominate in terms of total registered investors, holding a 16.3 per cent share of the NSE investor base. Uttar Pradesh accounted for 11.3 per cent, followed by Gujarat (8.8 per cent), West Bengal (5.8 per cent), Rajasthan (5.7 per cent), and Karnataka (5.5 per cent).

"Region-wise, North India remained on top with a registered investor base of 4.1 crore, followed by West India at 3.4 crore, South India at 2.3 crore, and East India at 1.3 crore," the NSE report highlighted. Uttar Pradesh alone contributed 14.5 per cent of all new registrations in February.

The NSE report also indicated a shift in investor demographics, with younger individuals increasingly participating in the market. Investors under 30 years of age made up 39.6 per cent of the total investor base in February, up from 22.6 per cent in March 2019. The average investor age has decreased significantly, from 41.3 years in March 2019 to 35.8 years in February 2025, while the median age dropped from 38 to 32 years over the same period.

Female investor participation also witnessed a notable rise, reaching 24.3 per cent in February. "Among the top 10 states by investor base, Maharashtra (28.2 per cent), Gujarat (27.8 per cent), Tamil Nadu (27.8 per cent), and Karnataka (27.3 per cent) exhibit higher female representation than the pan-India average of 24.3 per cent in FY25TD. In contrast, Rajasthan (20.2 per cent), Madhya Pradesh (21.7 per cent), and Uttar Pradesh (18.5 per cent) show lower female investor participation. Notably, Lakshadweep had the lowest female representation of 15.2 per cent, while Goa had the highest at 32.4 per cent in FY25 so far," the report stated.

The Economic Times

Headline: Indian companies with over Rs 1 lakh crore market cap surge 40 times since 2000: NSE Report

https://economictimes.indiatimes.com/markets/stocks/news/indian-companies-with-over-rs-1-lakh-crore-market-cap-surge-40-times-since-2000-nse-report/articleshow/119792122.cms?from=mdr

The number of Indian companies with a market capitalisation of over Rs 1 lakh crore has surged 40 times over last 24 years. This reflects the country's strong economic growth and market expansion, according to a report by the National Stock Exchange (NSE).

The report highlighted that the number of companies with a market cap of over Rs 1 lakh crore increased significantly between FY02 and FY24, with their share of the total market capitalisation of NSE-listed companies rising from nearly 18 per cent to over 60 per cent.

This growth is attributed to India's strong economic fundamentals, implementation of crucial reforms, surplus global liquidity after the 2008 financial crisis, and a steadily expanding investor base.

The report said, "The number of companies with over 1 lakh crore market cap have increased by over 40 times between FY02 and FY24."

The report further stated that the market capitalisation of the top 10 companies has grown 28 times over the last two decades. Their profits and assets have increased by an average of 15.4 per cent and 16 per cent, respectively, each year over the past 20 years.

In FY02, only one company had a market capitalisation exceeding Rs 1 lakh crore. By FY04, this number had grown to two, and in FY10, it increased to 14, with a combined market cap of Rs 21.2 lakh crore.

The Global Financial Crisis of 2008 caused a temporary decline, but global liquidity infusion, key economic reforms such as easing FDI limits and fuel price deregulation, and improving political stability helped the markets recover.

By FY15, the number of companies with over Rs 1 lakh crore market cap rose to 22, with a total market cap of Rs 43.8 lakh crore. This growth continued, with 30 companies reaching this milestone by FY19, taking their total market cap to Rs 73 lakh crore.

The COVID-19 pandemic in FY20 disrupted financial markets, reducing the number of such companies to 20, with a total market cap of Rs 51.8 lakh crore. However, post-pandemic policy measures, strong economic recovery, and rising domestic participation fuelled a sharp rebound.

As a result, the number of companies with at least Rs 1 lakh crore market cap soared to 81 in FY24, out of the total 2,439 listed companies. In value terms, the total market cap of these companies stood at Rs 234 lakh crore, accounting for over 60 per cent of the total market cap.

This remarkable rise in high-market-cap companies' showcases India's economic resilience, market depth, and investor confidence.

As reforms continue and the economy expands, the number of companies crossing the Rs 1 lakh crore market cap threshold is expected to grow further, reinforcing India's position as a key player in global markets. (ANI)

Live Mint

Headline: SME IPOs on the rise, 163 out of 242 public issues in FY2024-25 were of small firms: NSE data

https://www.livemint.com/market/ipo/sme-ipos-on-the-rise-163-out-of-242-public-issues-in-fy2024-25-were-of-small-firms-nse-data-11743413639162.html

Small and Medium Enterprises (SME) Initial public offerings (IPOs) have gained much traction in recent times. Many such small IPOs were subscribed in multiples of hundreds over the shares that were on offer.

Data made available by the National Stock Exchange showed that of the total 242 IPOs launched in 2024-25, 163 were of SMEs.

The SMEs raised a total of ₹7,111 crore through these IPOs in the financial year that's ending March 31, 2025, on NSE, Mumbai-based stock exchange data showed. The average fund raising by these SMEs was ₹44 crore.

Danish Power Ltd raised the highest fund among the SMEs IPOs of ₹198 crore, while Hoac Foods India Ltd raised the lowest fund of ₹6 crore, NSE data showed.

The market capitalisation of NSE Emerge (SME) listed companies as of March 31, 2025 is ₹1.8 lakh crore.

India's booming stock market, has given opportunities to many companies to list their shares, and a sizable number of them have made handsome gains, including the SMEs.

The Small and Medium Enterprise (SME) initial public offerings (IPOs) have reportedly outperformed large-cap and mid-cap stocks since their listings in the year 2024-25.

As per a report put out by wealth management firm Angel One Wealth, last year, the average listing gains in SMEs have skyrocketed from 2 per cent in 2019 to 74 per cent in 2024, while average listing gains in

mainboard IPOs peaked out in 2020 and have been range-bound around 30 per cent since then.

Given the increasing participation of retail investors and the heightened oversubscription in recent IPOs, SEBI undertook an in-depth study to analyse investor behaviour in IPOs. The study covered data from 144 IPOs listed between April 2021 and December 2023. The study also found that returns on shares influenced investor selling behaviour. (ANI)

Business Standard

Headline: Uttar Pradesh is top state in terms of new investor registrations on NSE

https://www.business-standard.com/markets/news/uttar-pradesh-is-top-state-in-terms-of-new-investor-registrations-on-nse-125033100811_1.html

Uttar Pradesh has emerged as the top state in terms of new investor registrations in the financial year 2024-2025 (FY25) on the National Stock Exchange (NSE). According to a release by the exchange, Uttar Pradesh added 29.5 lakh new investors in FY25, comprising 14 per cent of new additions.

Maharashtra and Gujarat have the second- and third-highest number of new investor registrations at 26.2 lakh and 17.2 lakh, respectively. The top five states command 48 per cent of new registrations.

Delhi-NCR, with 12.2 lakh new registrations, tops the list among districts, followed by Mumbai, which had 8.5 lakh, and Bengaluru, with 3 lakh.

Maharashtra has the highest number of unique investors at 1.84 crore, followed by Uttar Pradesh at 1.3 crore, and Gujarat at 99 lakh.

Mizoram showed the highest growth in the number of unique investors in the past 12 months, growing from 0.2 to 0.3 lakh or 54 per cent.
The total number of unique investors is 11.3 crore, up from 9.2 crore in the previous financial year. The total market capitalisation of NSE-listed companies grew by 7 per cent from Rs 384 trillion in FY24 to Rs 411 trillion in FY25.

The total number of companies listed on the NSE is at 2,720, of which 2,110 are from the mainboard and the remaining are on its Emerge platform for listing small and medium enterprises.

The market capitalisation of NSE Emerge firms now stands at Rs 1.8 trillion as of March 2025, which has risen from Rs 1.2 trillion in the previous financial year.

Business World

Headline: India's Rs 1 Lakh Cr Market Cap Firms Surge 40x In 24 Years

https://www.businessworld.in/article/indias-rs-1-lakh-cr-market-cap-firms-surge-40x-in-24-years-552161

The number of Indian companies with a market capitalisation exceeding Rs 1 lakh crore has surged 40 times over the last 24 years, reflecting the country's robust economic growth and expanding equity markets, according to a report by the National Stock Exchange (NSE).

The report highlighted that the share of companies with a market cap above Rs 1 lakh crore in the total market capitalisation of NSE-listed firms has jumped from nearly 18 per cent in FY02 to over 60 per cent in FY24.

This remarkable expansion is attributed to India's strong economic fundamentals, key policy reforms, surplus global liquidity post the 2008 financial crisis, and a growing investor base. "The number of companies with over Rs 1 lakh crore market cap has increased by over 40 times between FY02 and FY24," the report noted.

The market capitalisation of the top 10 companies alone has grown 28 times in the past two decades, with their profits and assets rising at an average annual rate of 15.4 per cent and 16 per cent, respectively.

In FY02, only one company had a market cap above Rs 1 lakh crore. This number rose to two by FY04 and 14 by FY10, with a combined market cap of Rs 21.2 lakh crore. The 2008 global financial crisis caused a temporary dip, but subsequent policy measures, including easing of FDI limits and fuel price deregulation, helped the markets recover.

By FY15, 22 companies had crossed the Rs 1 lakh crore threshold, with a cumulative market cap of Rs 43.8 lakh crore. This momentum continued, reaching 30 firms in FY19 with a market cap of Rs 73 lakh crore.

Post-Pandemic Rebound Fuels Growth

The Covid-19 pandemic in FY20 led to market disruptions, reducing the number of such companies to 20, with a total market cap of Rs 51.8 lakh crore. However, post-pandemic recovery measures and rising domestic investor participation triggered a sharp rebound.

By FY24, the number of companies with a market cap of at least Rs 1 lakh crore surged to 81 out of 2,439 listed firms, with their combined valuation reaching Rs 234 lakh crore—over 60 per cent of the total market cap.

India's rising number of high-market-cap companies highlights its economic resilience, market depth, and growing investor confidence. With continued reforms and economic expansion, more companies are expected to surpass the Rs 1 lakh crore milestone, further cementing India's standing in global markets.

Money Control

Headline: February selloff also saw a 31% fall in new investor additions, UP still the fastest growing: NSE data

https://www.moneycontrol.com/news/business/february-selloff-also-saw-a-31-fall-in-new-investor-additions-up-still-the-fastest-growing-nse-data-12981060.html

Equity markets saw an extended selloff in February, partly due to tariff-related jitters, earnings slowdown and valuation concerns. This led to a 31.2% fall in new investor registrations for the month, showed an NSE report, with all states witnessing a drop. However, the populous state of Uttar Pradesh accounted for the most number of additions.

Overall, the new registrations dropped by 31.2 percent in February, said NSE's latest report, with West India seeing sharpest drop of over 41 percent versus January. Northern India still holds the top spot in terms of new investor registrations, accounting for 40.5% of the total registrations in February. East India and South India, meanwhile, saw their new registrations drop by 24.7 percent and 26.8 percent respectively.

Uttar Pradesh continued to record the highest number of new investor registrations in February on the National Stock Exchange (NSE), even though the state saw a nearly 27 percent fall in new investor addition in February at 1.6 lakh versus 2.2 lakh new registrations in January. Uttar Pradesh was followed by Maharashtra with 1.3 lakh new investors registering on NSE in February. The other key states include West Bengal (79,300 new investors), Tamil Nadu (78,300 new investors), Bihar (67,200 new investors), Gujarat (65,100 new investors), Karnataka (63,400 new investors), Rajasthan (57,400 new investors), Madhya Pradesh (53,300 new investors), Andhra Pradesh (49,100 new investors), Telangana (40,900 new investors), and Delhi (40,000 new investors).

Maharashtra Dominates the Total Investor Base

Maharashtra continues to hold the lion's share in terms of total registered investors. As of February, the state accounted for 16.3 percent of the total investor base on NSE, followed by Uttar Pradesh (11.3 percent), Gujarat (8.8 percent), West Bengal (5.8 percent), Rajasthan (5.7 percent), Karnataka (5.5 percent) and other states.

"Region-wise, North India remained on top with a registered investor base of 4.1 crore, followed by West India at 3.4 crore, South India at 2.3 crore, and East India at 1.3 crore," the NSE report said. In terms of share, UP accounted for 14.5 percent of the overall new registrations seen during February.

More Young Investors Entering Markets

Younger investors, under the age of 30 years, represented 39.6 percent of the total investor base on NSE in February. This is a sharp increase from the 22.6 percent share held in March 2019. The mean age has reduced from 41.3 years in March 2019 to 35.8 years in February 2025, while the median age declined from 38 to 32 years over the same period.

Strongest Female Participation

Women's share in individual investor registrations has seen a strong rise at 24.3 percent in February.

"Among the top 10 states by investor base, Maharashtra (28.2 percent), Gujarat (27.8 percent), Tamil Nadu (27.8 percent), and Karnataka (27.3 percent) exhibit higher female representation than the pan-India average of 24.3% in FY25TD. In contrast, Rajasthan (20.2 percent), Madhya Pradesh (21.7 percent), and Uttar Pradesh (18.5 percent) show lower female investor participation. Notably, Lakshadweep had the lowest

female representation of 15.2 percent within its registered investor base, while Goa had the highest (32.4 percent) in FY25 so far," the report said.

Dalal Street Investment Journal

Headline: Market Capitalisation Hits Rs 410.87 Lakh Crore: India's National Stock Exchange Witnesses Record Rs 18.68 Lakh Crore Fund Mobilisation and 242 IPOs in FY25

https://www.dsij.in/dsijarticledetail/market-capitalisation-hits-rs-41087-lakh-crore-indias-national-stock-exchange-witnesses-record-rs-1868-lakh-crore-fund-mobilisation-and-242-ipos-in-fy25-id003

NSE achieved significant growth in FY25 with increased listings, higher market capitalisation, record IPOs, strong fund mobilisation, and expanding investor participation across various market segments.

The National Stock Exchange (NSE) has shown significant growth in the financial year 2024-25, marked by increased listings, substantial fund mobilisation, and expansion in investor participation. This article provides a detailed overview of the key highlights of NSE's performance in FY25, drawing insights from the official report.

Listings and Market Capitalisation

As of March 31, 2025, the total number of companies listed on the NSE reached 2,720, with a total market capitalisation of Rs. 410.87 lakh crore (USD 4.81 trillion). This represents an increase from the market capitalisation of Rs. 384.2 lakh crore (USD 4.61 trillion) as of March 31, 2024. The NSE's Main Board had 2,110 companies listed as of March 31, 2025.

The NSE Emerge platform, dedicated to Small and Medium Enterprises (SMEs), has played a crucial role in facilitating SME listings. Since its inception, the NSE Emerge platform has seen 610 SME **IPO**s. The market

capitalisation of NSE Emerge listed companies reached Rs. 1.8 lakh crore (USD 20.8 billion) as of March 31, 2025, compared to Rs. 1.2 lakh crore (USD 14.8 billion) in the previous year.

Initial Public Offerings (IPOs)

FY25 witnessed a total of 242 IPOs, raising a total of Rs. 1.7 lakh crore. Of these, 79 were Mainboard IPOs and 163 were SME IPOs. Additionally, there were 56 direct listings during the fiscal year.

Mainboard IPOs in FY25 raised a total of Rs. 1.63 lakh crore, with an average fund raise per IPO of Rs. 2,057 crore. The highest funds raised in a Mainboard IPO were by Hyundai Motor India Ltd. (Rs. 27,859 crore), and the lowest were by Kronox Lab Sciences Ltd. (Rs. 130 crore). SME IPOs collectively raised Rs 7,111 crore, with an average fund raise of Rs. 44 crore per IPO. The highest funds raised in an SME IPO were by Danish Power Ltd. (Rs. 198 crore), and the lowest were by Hoac Foods India Ltd. (Rs. 6 crore).

Fund Mobilisation

Fund mobilisation through equity and debt issuances on the NSE saw substantial growth in FY25. Total equity raised amounted to Rs. 4,26,010 crore, a 110 per cent increase compared to the previous year's Rs. 2,03,239 crore. Primary market equity segments saw significant increases, with fresh listings and Offers for Sale (OFS) showing growth of 100 per cent and 222 per cent, respectively.

Debt markets also experienced growth, with total debt raised reaching Rs. 14,18,443 crore, a 24 per cent increase from Rs. 11,42,077 crore in the previous year. However, InvITs saw a decline in fund mobilisation, with a 36 per cent decrease compared to the previous year. Overall, the total fund mobilisation in FY25 reached Rs. 18,68,924 crore, a 35 per cent increase from Rs. 13,83,547 crore in FY24.

Regional and City-wise IPO Activity

Maharashtra led in Mainboard IPO listings with 28 listings and a total issue size of Rs. 52,660 crore, followed by Tamil Nadu and Karnataka. In the SME segment, Maharashtra also topped with 50 listings, raising Rs. 1,950 crore, followed by Gujarat and Delhi. Bangalore led among cities for Mainboard IPOs, with 10 listings totalling Rs. 28,062 crore, while New Delhi led in SME IPOs with 27 listings raising Rs. 1,233 crore.

IPO Allocation

Mainboard IPOs allocated Rs. 31,666 crore to Retail Individual Investors, Rs. 19,361 crore to Non-Institutional Investors, and Rs. 1,09,213 crore to Qualified Institutional Buyers. SME IPOs allocated Rs. 2,670 crore to Retail Individual Investors, Rs. 1,290 crore to Non-Institutional Investors, and Rs. 2,745 crore to Qualified Institutional Buyers.

Market Performance

The Indian equity markets showed positive performance in FY25, with key indices recording gains. The Nifty 50 rose to 23,519, a 5.3 per cent increase, and the Nifty Total Market index reached 11,985, a 5.5 per cent increase. The Nifty Midcap 150 showed the highest growth at 7.6 per cent. The market capitalisation of NSE-listed companies increased by 6.9 per cent, although the market cap to GDP ratio saw a slight decrease.

Municipal and Social Stock Exchange (SSE) Bonds

NSE facilitated the raising of Rs. 1,058.9 crore through 6 issuances of Municipal Bonds. The Social Stock Exchange (SSE) also saw activity, with 12 projects listed and a total of Rs. 40.8 crore raised.

Investor Participation

The total number of registered unique investors reached 11.3 crore as of March 28, 2025, with a total of 21.94 crore unique accounts. New investor registrations in FY25 amounted to 2.09 crore. Maharashtra and Uttar Pradesh led in total investor base, while Uttar Pradesh recorded the highest number of new investor registrations.

Trading Activity

The total turnover in the cash segment increased by 39.9 per cent, and equity futures turnover increased by 40.4 per cent. However, commodity futures saw a significant decline. The average daily turnover in the cash market reached Rs. 1,12,963 crore.

NSE IX (GIFT IFSC)

NSE IX at GIFT IFSC achieved a total notional turnover of USD 1,144 billion in FY25, compared to USD 735 billion in FY24. The exchange also saw a substantial increase in unique client registrations. GIFT Nifty reported a total cumulative volume of 23.99 million contracts and a turnover of approximately USD 1.111 trillion.

Conclusion

NSE's performance in FY25 reflects a vibrant and growing market, with increased participation from both issuers and investors. The exchange's focus on diversifying its offerings and enhancing market infrastructure has contributed to its robust growth across various segments.

Headline: SME IPOs on the rise, 163 out of 242 public issues in FY2024-25 were of small firms: NSE data

https://www.thehindubusinessline.com/markets/sme-ipos-on-the-rise-163-out-of-242-public-issues-in-fy2024-25-were-of-small-firms-nse-data/article69395934.ece

The SMEs raised a total of ₹7,111 crore through these IPOs in the financial year that's ending March 31, 2025, on NSE

Small and Medium Enterprises (SME) Initial public offerings (IPOs) have gained much traction in recent times. Many such small IPOs were subscribed in multiples of hundreds over the shares that were on offer. Data made available by the National Stock Exchange showed that of the total 242 IPOs launched in 2024-25, 163 were of SMEs.

The SMEs raised a total of ₹7,111 crore through these IPOs in the financial year that's ending March 31, 2025, on NSE. The average fund raising by these SMEs was ₹44 crore. Danish Power Ltd raised the highest fund among the SMEs IPOs of ₹198 crore, while Hoac Foods India Ltd raised the lowest fund of ₹6 crore, NSE data showed.

The market capitalisation of NSE Emerge (SME) listed companies as of March 31, 2025 is ₹1.8 lakh crore. India's booming stock market, has given opportunities to many companies to list their shares, and a sizable number of them have made handsome gains, including the SMEs. The Small and Medium Enterprise (SME) initial public offerings (IPOs) have reportedly outperformed large-cap and mid-cap stocks since their listings in the year 2024-25.

As per a report put out by wealth management firm Angel One Wealth, last year, the average listing gains in SMEs have skyrocketed from 2 per cent in 2019 to 74 per cent in 2024, while average listing gains in mainboard IPOs peaked out in 2020 and have been range-bound around 30 per cent since then. Given the increasing participation of retail

investors and the heightened oversubscription in recent IPOs, SEBI undertook an in-depth study to analyse investor behaviour in IPOs. The study covered data from 144 IPOs listed between April 2021 and December 2023. The study also found that returns on shares influenced investor selling behaviour.

Business World

Headline: SME Dominates IPO Space With 163 Out Of 242 Listing

https://www.businessworld.in/article/sme-dominates-ipo-space-with-163-out-of-242-listing-552190

Initial public offerings (IPOs) for Small and Medium Enterprises (SMEs) have garnered significant attention lately. Numerous small IPOs had subscriptions in hundreds beyond the shares available for sale.

Information released by the National Stock Exchange indicated that out of the 242 IPOs initiated in 2024-25, 163 belonged to SMEs.

The SMEs garnered a total of Rs 7,111 crore via these IPOs in the financial year concluding March 31, 2025, according to data from the NSE, Mumbai-based stock exchange. The typical fundraising amount for these SMEs was Rs 44 crore.

Danish Power secured the largest amount among the SMEs IPOs at Rs 198 crore, whereas Hoac Foods India acquired the smallest amount of Rs 6 crore, as per NSE data.

As of 31 March 2025, the market capitalisation of companies listed on NSE Emerge (SME) stands at Rs 1.8 lakh crore.

India's thriving stock market has created opportunities for numerous companies to go public, and a significant number of them, including SMEs, have reaped considerable profits.

The initial public offerings (IPOs) of Small and Medium Enterprises (SMEs) have apparently surpassed large-cap and mid-cap stocks since their launches in the year 2024-25.

According to a report from wealth management company Angel One Wealth, the average listing gains in SMEs surged from 2 per cent in 2019 to 74 per cent in 2024, while the average listing gains in mainboard IPOs reached a peak in 2020 and have remained stable around 30 per cent since that time.

Business World

Headline: India's Rs 1 Lakh Cr Market Cap Firms Surge 40x In 24 Years

https://www.businessworld.in/article/indias-rs-1-lakh-cr-market-cap-firms-surge-40x-in-24-years-552161

The number of Indian companies with a market capitalisation exceeding Rs 1 lakh crore has surged 40 times over the last 24 years, reflecting the country's robust economic growth and expanding equity markets, according to a report by the National Stock Exchange (NSE).

The report highlighted that the share of companies with a market cap above Rs 1 lakh crore in the total market capitalisation of NSE-listed firms has jumped from nearly 18 per cent in FY02 to over 60 per cent in FY24.

This remarkable expansion is attributed to India's strong economic fundamentals, key policy reforms, surplus global liquidity post the 2008 financial crisis, and a growing investor base. "The number of companies with over Rs 1 lakh crore market cap has increased by over 40 times between FY02 and FY24," the report noted.

The market capitalisation of the top 10 companies alone has grown 28 times in the past two decades, with their profits and assets rising at an average annual rate of 15.4 per cent and 16 per cent, respectively.

In FY02, only one company had a market cap above Rs 1 lakh crore. This number rose to two by FY04 and 14 by FY10, with a combined market cap of Rs 21.2 lakh crore. The 2008 global financial crisis caused a temporary dip, but subsequent policy measures, including easing of FDI limits and fuel price deregulation, helped the markets recover.

By FY15, 22 companies had crossed the Rs 1 lakh crore threshold, with a cumulative market cap of Rs 43.8 lakh crore. This momentum continued, reaching 30 firms in FY19 with a market cap of Rs 73 lakh crore.

Post-Pandemic Rebound Fuels Growth

The Covid-19 pandemic in FY20 led to market disruptions, reducing the number of such companies to 20, with a total market cap of Rs 51.8 lakh crore. However, post-pandemic recovery measures and rising domestic investor participation triggered a sharp rebound.

By FY24, the number of companies with a market cap of at least Rs 1 lakh crore surged to 81 out of 2,439 listed firms, with their combined valuation reaching Rs 234 lakh crore—over 60 per cent of the total market cap.

India’s rising number of high-market-cap companies highlights its economic resilience, market depth, and growing investor confidence. With continued reforms and economic expansion, more companies are expected to surpass the Rs 1 lakh crore milestone, further cementing India’s standing in global markets.

Headline: Indian Companies With Over ₹1 Lakh Crore Market Cap Surge 40 Times Since 2000, NSE Report Highlights Robust

https://www.freepressjournal.in/business/indian-companies-with-over-1-lakh-crore-market-cap-surge-40-times-since-2000-nse-report-highlights-robust-growth

According to the National Stock Exchange (NSE) report, the number of Indian companies with a market capitalisation exceeding Rs 1 lakh crore has grown exponentially, increasing 40 times from 2000 to 2024. This remarkable rise is a testament to India's robust economic growth, policy reforms, and expanding investor base.

In FY02, there was only one company with a market cap over Rs 1 lakh crore. By FY04, this number doubled to two, and by FY10, it had surged to 14 companies with a combined market cap of Rs 21.2 lakh crore.

Impact of Global Events on Market Dynamics

The Global Financial Crisis of 2008 temporarily stalled growth, causing a dip in high-cap companies. However, post-crisis measures, including global liquidity infusion and key reforms like easing FDI limits and deregulating fuel prices, helped markets recover swiftly.

By FY15, the number of companies with over Rs 1 lakh crore market cap rose to 22, totaling Rs 43.8 lakh crore. This growth continued with 30 companies in FY19, reaching Rs 73 lakh crore in market cap.

The COVID-19 pandemic in FY20 posed another challenge, reducing the number of such companies to 20 with a market cap of Rs 51.8 lakh crore. However, strong post-pandemic recovery measures, rising domestic participation, and economic resilience fueled a rapid rebound.

Current Status and Future Outlook

In FY24, the number of companies with market capitalisation over Rs 1 lakh crore has soared to 81, out of 2,439 listed companies. These companies now account for over 60 per cent of the total NSE market cap, valued at Rs 234 lakh crore.

This growth reflects India's economic resilience, market depth, and strong investor confidence. With ongoing reforms, economic expansion, and increased global interest, the number of such companies is expected to rise further, reinforcing India's position as a global economic powerhouse.

Headline: Indian companies with over Rs 1 lakh crore market cap surge 40 times since 2000: NSE Report

https://theprint.in/economy/indian-companies-with-over-rs-1-lakh-crore-market-cap-surge-40-times-since-2000-nse-report/2572213/

The number of Indian companies with a market capitalisation of over Rs 1 lakh crore has surged 40 times over last 24 years. This reflects the country's strong economic growth and market expansion, according to a report by the National Stock Exchange (NSE).

The report highlighted that the number of companies with a market cap of over Rs 1 lakh crore increased significantly between FY02 and FY24, with their share of the total market capitalisation of NSE-listed companies rising from nearly 18 per cent to over 60 per cent.

This growth is attributed to India's strong economic fundamentals, implementation of crucial reforms, surplus global liquidity after the 2008 financial crisis, and a steadily expanding investor base.

The report said, “The number of companies with over 1 lakh crore market cap have increased by over 40 times between FY02 and FY24.”

The report further stated that the market capitalisation of the top 10 companies has grown 28 times over the last two decades. Their profits and assets have increased by an average of 15.4 per cent and 16 per cent, respectively, each year over the past 20 years.

In FY02, only one company had a market capitalisation exceeding Rs 1 lakh crore. By FY04, this number had grown to two, and in FY10, it increased to 14, with a combined market cap of Rs 21.2 lakh crore.

The Global Financial Crisis of 2008 caused a temporary decline, but global liquidity infusion, key economic reforms such as easing FDI limits and fuel price deregulation, and improving political stability helped the markets recover.

By FY15, the number of companies with over Rs 1 lakh crore market cap rose to 22, with a total market cap of Rs 43.8 lakh crore. This growth continued, with 30 companies reaching this milestone by FY19, taking their total market cap to Rs 73 lakh crore.

The COVID-19 pandemic in FY20 disrupted financial markets, reducing the number of such companies to 20, with a total market cap of Rs 51.8 lakh crore. However, post-pandemic policy measures, strong economic recovery, and rising domestic participation fuelled a sharp rebound.

As a result, the number of companies with at least Rs 1 lakh crore market cap soared to 81 in FY24, out of the total 2,439 listed companies. In value terms, the total market cap of these companies stood at Rs 234 lakh crore, accounting for over 60 per cent of the total market cap.

This remarkable rise in high-market-cap companies’ showcases India’s economic resilience, market depth, and investor confidence.

As reforms continue and the economy expands, the number of companies crossing the Rs 1 lakh crore market cap threshold is expected to grow further, reinforcing India's position as a key player in global markets. (ANI)

The Hans India

Headline: NSE increases lot size for Bank Nifty, Nifty Mid Select

https://www.thehansindia.com/business/nse-increases-lot-size-for-bank-nifty-nifty-mid-select-958902

The National Stock Exchange (NSE) has made changes to the lot size of derivatives contracts for Nifty Bank and Nifty Mid Select. According to a circular issued by the NSE's Futures and Options (F&O) department, the decision aligns with the guidelines set by the Securities and Exchange Board of India (Sebi).

"Under the revised structure, the lot size for Nifty Bank has been increased from 30 to 35. Similarly, the lot size for Nifty Mid Select F&O contracts has been raised from 120 to 140," the exchange said in its circular.

However, there have been no changes to the lot size of derivatives contracts for other indices. The lot size for Nifty 50 remains at 75, while Nifty Financial Services is unchanged at 65, and Nifty Next 50 continues at 25.

The changes to Nifty Bank and Nifty Mid Select derivatives contracts will not apply to the existing monthly expiry contracts scheduled for April 24, May 29, and June 26. Instead, these changes will come into effect from the monthly expiry of July 31.

Earlier, the NSE had announced a shift in the expiry dates for derivatives contracts of Nifty, Bank Nifty, and other indices to the 'last Monday of the month'. However, the Sebi has put a temporary hold on this decision.

The report said, "The number of companies with over 1 lakh crore market cap have increased by over 40 times between FY02 and FY24."

The report further stated that the market capitalisation of the top 10 companies has grown 28 times over the last two decades. Their profits and assets have increased by an average of 15.4 per cent and 16 per cent, respectively, each year over the past 20 years.

In FY02, only one company had a market capitalisation exceeding Rs 1 lakh crore. By FY04, this number had grown to two, and in FY10, it increased to 14, with a combined market cap of Rs 21.2 lakh crore.

The Global Financial Crisis of 2008 caused a temporary decline, but global liquidity infusion, key economic reforms such as easing FDI limits and fuel

price deregulation, and improving political stability helped the markets recover.

By FY15, the number of companies with over Rs 1 lakh crore market cap rose to 22, with a total market cap of Rs 43.8 lakh crore. This growth continued, with 30 companies reaching this milestone by FY19, taking their total market cap to Rs 73 lakh crore.

The COVID-19 pandemic in FY20 disrupted financial markets, reducing the number of such companies to 20, with a total market cap of Rs 51.8 lakh crore. However, post-pandemic policy measures, strong economic recovery, and rising domestic participation fuelled a sharp rebound.

As a result, the number of companies with at least Rs 1 lakh crore market cap soared to 81 in FY24, out of the total 2,439 listed companies. In value terms, the total market cap of these companies stood at Rs 234 lakh crore, accounting for over 60 per cent of the total market cap.

This remarkable rise in high-market-cap companies' showcases India's economic resilience, market depth, and investor confidence.

As reforms continue and the economy expands, the number of companies crossing the Rs 1 lakh crore market cap threshold is expected to grow further, reinforcing India's position as a key player in global markets.

https://www.telanganajournal.in/news/indian-companies-with-over-rs-1-lakh-crore-market-cap-surge-40-times-since-2000-nse-report20250331111625/

The number of Indian companies with a market capitalisation of over Rs 1 lakh crore has surged 40 times over last 24 years. This reflects the country's strong economic growth and market expansion, according to a report by the National Stock Exchange (NSE).

The report highlighted that the number of companies with a market cap of over Rs 1 lakh crore increased significantly between FY02 and FY24, with their share of the total market capitalisation of NSE-listed companies rising from nearly 18 per cent to over 60 per cent.

This growth is attributed to India's strong economic fundamentals, implementation of crucial reforms, surplus global liquidity after the 2008 financial crisis, and a steadily expanding investor base.

The report said, "The number of companies with over 1 lakh crore market cap have increased by over 40 times between FY02 and FY24."

The report further stated that the market capitalisation of the top 10 companies has grown 28 times over the last two decades. Their profits and assets have increased by an average of 15.4 per cent and 16 per cent, respectively, each year over the past 20 years.

In FY02, only one company had a market capitalisation exceeding Rs 1 lakh crore. By FY04, this number had grown to two, and in FY10, it increased to 14, with a combined market cap of Rs 21.2 lakh crore.

The Global Financial Crisis of 2008 caused a temporary decline, but global liquidity infusion, key economic reforms such as easing FDI limits and fuel

price deregulation, and improving political stability helped the markets recover.

By FY15, the number of companies with over Rs 1 lakh crore market cap rose to 22, with a total market cap of Rs 43.8 lakh crore. This growth continued, with 30 companies reaching this milestone by FY19, taking their total market cap to Rs 73 lakh crore.

The COVID-19 pandemic in FY20 disrupted financial markets, reducing the number of such companies to 20, with a total market cap of Rs 51.8 lakh crore. However, post-pandemic policy measures, strong economic recovery, and rising domestic participation fuelled a sharp rebound.

As a result, the number of companies with at least Rs 1 lakh crore market cap soared to 81 in FY24, out of the total 2,439 listed companies. In value terms, the total market cap of these companies stood at Rs 234 lakh crore, accounting for over 60 per cent of the total market cap.

This remarkable rise in high-market-cap companies' showcases India's economic resilience, market depth, and investor confidence.

As reforms continue and the economy expands, the number of companies crossing the Rs 1 lakh crore market cap threshold is expected to grow further, reinforcing India's position as a key player in global markets.

Headline: NSE Report: Amazing! Companies with market cap of more than Rs 1 lakh crore have made a great growth

https://hindi.etnownews.com/markets/nse-report-1-lakh-crore-mcap-companies-companies-growth-since-2000-nse-national-stock-exchange-article-151323719

नेशनल स्टॉक एक्सचेंज (NSE) की रिपोर्ट के मुताबिक, 1 लाख करोड़ रुपये से अधिक बाजार पूंजीकरण वाली कंपनियों की संख्या में पिछले 24 वर्षों में 40 गुना वृद्धि हुई है। यह वृद्धि भारत की मजबूत अर्थव्यवस्था और वित्तीय बाजारों के विस्तार को दर्शाती है। NSE की रिपोर्ट में यह स्पष्ट हुआ है कि पिछले दो दशकों में भारतीय कंपनियों का बाजार पूंजीकरण काफी बढ़ा है।

ग्लोबल इकोनॉमिक संकट के बावजूद भारत के बाजारों में सुधार!

NSE की रिपोर्ट के अनुसार, वित्त वर्ष 2002 में भारत में सिर्फ एक कंपनी थी, जिसका बाजार पूंजीकरण 1 लाख करोड़ रुपये से अधिक था। 2004 तक यह संख्या बढ़कर 2 हो गई, और 2010 में 14 कंपनियां इस आंकड़े तक पहुंच गईं। 2008 में ग्लोबल इकोनॉमिक संकट के बावजूद, भारत के बाजारों में सुधार हुआ और 2015 तक यह संख्या 22 तक बढ़ गई। 2019 तक यह संख्या बढ़कर 30 हो गई। हालांकि, कोविड-19 महामारी के कारण 2020 में इन कंपनियों की संख्या घटकर 20 हो गई थी, लेकिन इसके बाद नीतिगत सुधारों और आर्थिक उपायों के कारण कंपनियों की संख्या फिर से बढ़ी।

रिपोर्ट में आगे कहा गया है कि पिछले दो दशकों में शीर्ष 10 कंपनियों का बाजार पूंजीकरण 28 गुना बढ़ा है। पिछले 20 वर्षों में हर साल उनके मुनाफे और एसेट्स में क्रमशः औसतन 15.4 प्रतिशत और 16 प्रतिशत की वृद्धि हुई है।

वैश्विक बाजारों में भारत की स्थिति मजबूत

FY24 में, भारत में 81 कंपनियां 1 लाख करोड़ रुपये से अधिक बाजार पूंजीकरण वाली हो गई हैं। इन कंपनियों का कुल मार्केट कैप 234 लाख करोड़ रुपये तक पहुंच गया है, जो कि कुल बाजार का 60 प्रतिशत से अधिक है। यह वृद्धि न केवल भारत की आर्थिक मजबूती को दर्शाती है, बल्कि निवेशकों के विश्वास और बाजार की

गहरी स्थिरता को भी दिखाती है। इससे भारत की स्थिति वैश्विक बाजारों में और भी मजबूत होगी।

Due to the rising involvement of retail investors and the significant oversubscription witnessed in recent IPOs, SEBI conducted a comprehensive study to examine investor behavior in IPOs.

The research included information from 144 IPOs that were listed from April 2021 to December 2023. The research also discovered that the gains on stocks affected how investors decided to sell.

Headline: SME IPOs Gain Momentum: 163 Out Of 242 IPOs In 2024-25 Were From Small Businesses: NSE Data

https://www.freepressjournal.in/business/sme-ipos-gain-momentum-163-out-of-242-ipos-in-2024-25-were-from-small-businesses-nse-data

Small and Medium Enterprises (SME) Initial public offerings (IPOs) have gained much traction in recent times. Many such small IPOs were subscribed in multiples of hundreds over the shares that were on offer.

Data made available by the National Stock Exchange showed that of the total 242 IPOs launched in 2024-25, 163 were of SMEs.

The SMEs raised a total of Rs 7,111 crore through these IPOs in the financial year that's ending March 31, 2025, on NSE, Mumbai-based stock exchange data showed. The average fund raising by these SMEs was Rs 44 crore.

Danish Power Ltd raised the highest fund among the SMEs IPOs of Rs 198 crore, while Hoac Foods India Ltd raised the lowest fund of Rs 6 crore, NSE data showed.

The market capitalisation of NSE Emerge (SME) listed companies as of March 31, 2025 is Rs 1.8 lakh crore.

India's booming stock market, has given opportunities to many companies to list their shares, and a sizable number of them have made handsome gains, including the SMEs.

The Small and Medium Enterprise (SME) initial public offerings (IPOs) have reportedly outperformed large-cap and mid-cap stocks since their listings in the year 2024-25.

As per a report put out by wealth management firm Angel One Wealth, last year, the average listing gains in SMEs have skyrocketed from 2 per cent in 2019 to 74 per cent in 2024, while average listing gains in mainboard IPOs peaked out in 2020 and have been range-bound around 30 per cent since then.

Given the increasing participation of retail investors and the heightened oversubscription in recent IPOs, SEBI undertook an in-depth study to analyse investor behaviour in IPOs. The study covered data from 144 IPOs listed between April 2021 and December 2023. The study also found that returns on shares influenced investor selling behaviour.

https://www.gujaratsamachar.news/news/sme-ipos-on-the-rise-163-out-of-242-public-issues-in-fy2024-25-were-of-small-firms-nse-data20250331143616/

Small and Medium Enterprises (SME) Initial public offerings (IPOs) have gained much traction in recent times. Many such small IPOs were subscribed in multiples of hundreds over the shares that were on offer.

Data made available by the National Stock Exchange showed that of the total 242 IPOs launched in 2024-25, 163 were of SMEs.

The SMEs raised a total of Rs 7,111 crore through these IPOs in the financial year that's ending March 31, 2025, on NSE, Mumbai-based stock exchange data showed. The average fund raising by these SMEs was Rs 44 crore.

Danish Power Ltd raised the highest fund among the SMEs IPOs of Rs 198 crore, while Hoac Foods India Ltd raised the lowest fund of Rs 6 crore, NSE data showed.

The market capitalisation of NSE Emerge (SME) listed companies as of March 31, 2025 is Rs 1.8 lakh crore.

India's booming stock market, has given opportunities to many companies to list their shares, and a sizable number of them have made handsome gains, including the SMEs.

The Small and Medium Enterprise (SME) initial public offerings (IPOs) have reportedly outperformed large-cap and mid-cap stocks since their listings in the year 2024-25.

As per a report put out by wealth management firm Angel One Wealth, last year, the average listing gains in SMEs have skyrocketed from 2 per cent in 2019 to 74 per cent in 2024, while average listing gains in

mainboard IPOs peaked out in 2020 and have been range-bound around 30 per cent since then.

Given the increasing participation of retail investors and the heightened oversubscription in recent IPOs, SEBI undertook an in-depth study to analyse investor behaviour in IPOs. The study covered data from 144 IPOs listed between April 2021 and December 2023. The study also found that returns on shares influenced investor selling behaviour.

आर्थिक वर्ष 2024-25 मध्ये लघु आणि मध्यम उद्योग (SME) च्या प्रारंभिक सार्वजनिक ऑफरिंगमध्ये (IPO) लक्षणीय वाढ झाली आहे, नॅशनल स्टॉक एक्सचेंज (NSE) च्या आकडेवारीनुसार, कंपन्यांनी एकूण 7,111 कोटी रुपये उभारले आहेत. आर्थिक वर्षात लाँच झालेल्या 242 आयपीओपैकी 163 एसएमईचे होते, जे लहान कंपन्यांमध्ये गुंतवणूकदारांच्या वाढत्या हिताचे अधोरेखित करते, असे वृत्तसंस्था एएनआयने आपल्या वृत्तात म्हटले आहे.

एसएमई आयपीओद्वारे मोठी गुंतवणूक

एनएसईच्या आकडेवारीनुसार, भारतीय शेअर बाजारात एसएमई आयपीओद्वारे सरासरी निधी उभारणी 44 कोटी रुपये होती, ज्यामध्ये डॅनिश पॉवर लिमिटेडने सर्वाधिक 198 कोटी रुपये उभारले, तर होक फूड्स इंडिया लिमिटेडने सर्वात कमी

6 कोटी रुपये उभारले. 31 मार्च 2025 पर्यंत एनएसई इमर्ज (SME) सूचीबद्ध कंपन्यांचे बाजार भांडवल 1.8 लाख कोटी रुपयांवर पोहोचले, जे या क्षेत्राच्या मजबूत कामगिरीवर प्रकाश टाकते. (हेही वाचा, IPO Fundraising in 2024: भारतात 2024 मध्ये विक्रमी आयपीओ गुंतवणूक; तब्बल 1.4 ट्रिलियन निधीची उभारणी)

एसएमई आयपीओची मीडिकॅपेक्षा सकस कामगिरी

भारताच्या तेजीच्या शेअर बाजारामुळे अनेक एसएमईंना त्यांचे शेअर्स सूचीबद्ध करण्याची संधी मिळाली आहे, त्यापैकी अनेकांनी प्रभावी नफा मिळवून दिला आहे. एंजल वन वेल्थच्या मते, आर्थिक वर्ष 2024-25 मध्ये त्यांच्या यादीपासून एसएमई आयपीओंनी लार्ज-कॅप आणि मिड-कॅप स्टॉकपेक्षा चांगले प्रदर्शन केले आहे. (हेही

अहवालात पुढे असे दिसून आले आहे की एसएमई आयपीओसाठी सरासरी लिस्टिंग नफा 2019 मध्ये फक्त 2% होता, जो 2024 मध्ये 74% पर्यंत वाढला, तर मेनबोर्ड आयपीओ 2020 मध्ये शिखरावर पोहोचले आणि सुमारे 30% रेंज-बाउंड राहिले. ही उल्लेखनीय वाढ लहान उद्योगांमधील गुंतवणूकदारांचा वाढता विश्वास आणि उच्च-वाढीच्या संभाव्य स्टॉकसाठी तीव्र भूक दर्शवते.

किरकोळ गुंतवणूकदारांचा वाढता सहभाग

किरकोळ गुंतवणूकदारांच्या वाढत्या सहभागामुळे एसएमई आयपीओमध्ये विक्रमी-उच्च ओव्हरसबस्क्रिप्शन झाले आहे. हा ट्रेंड ओळखून, सिक्युरिटीज अँड एक्सचेंज बोर्ड ऑफ इंडिया (SEBI) ने आयपीओमधील गुंतवणूकदारांच्या वर्तनाचे विश्लेषण करणारा एक सखोल अभ्यास केला.

एप्रिल 2021 ते डिसेंबर 2023 दरम्यान सूचीबद्ध केलेल्या 144 आयपीओंचा समावेश असलेल्या या अभ्यासात असे आढळून आले की, शेअर्सवरील परताव्याने गुंतवणूकदारांच्या विक्रीच्या निर्णयांवर लक्षणीय परिणाम केला. एसएमई स्टॉक्समध्ये वाढत्या रसामुळे, गुंतवणूकदारांचे संरक्षण आणि निष्पक्ष व्यापार पद्धती सुनिश्चित करण्यासाठी सेबी बाजारातील गतिमानतेवर लक्ष ठेवत आहे. एसएमई आयपीओ अपेक्षांपेक्षा जास्त कामगिरी करत असल्याने आणि गुंतवणूकदारांचा उत्साह उच्च राहिल्याने, आर्थिक वर्ष 2025-26 मध्ये हे क्षेत्र सतत वाढीसाठी सज्ज आहे, ज्यामुळे ते भारताच्या विकसित होत असलेल्या शेअर बाजाराच्या व्यापक दृष्टीकोणातून पाहण्यासारखे एक महत्त्वाचे क्षेत्र बनले आहे.

Headline: Indian companies with over Rs 1 lakh crore market cap surge 40 times since 2000: NSE Report

https://www.bignewsnetwork.com/news/278138092/indian-companies-with-over-rs-1-lakh-crore-market-cap-surge-40-times-since-2000-nse-report

The number of Indian companies with a market capitalisation of over Rs 1 lakh crore has surged 40 times over last 24 years. This reflects the country's strong economic growth and market expansion, according to a report by the National Stock Exchange (NSE).

The report highlighted that the number of companies with a market cap of over Rs 1 lakh crore increased significantly between FY02 and FY24, with their share of the total market capitalisation of NSE-listed companies rising from nearly 18 per cent to over 60 per cent.

This growth is attributed to India's strong economic fundamentals, implementation of crucial reforms, surplus global liquidity after the 2008 financial crisis, and a steadily expanding investor base.

The report said, "The number of companies with over 1 lakh crore market cap have increased by over 40 times between FY02 and FY24."

The report further stated that the market capitalisation of the top 10 companies has grown 28 times over the last two decades. Their profits and assets have increased by an average of 15.4 per cent and 16 per cent, respectively, each year over the past 20 years.

In FY02, only one company had a market capitalisation exceeding Rs 1 lakh crore. By FY04, this number had grown to two, and in FY10, it increased to 14, with a combined market cap of Rs 21.2 lakh crore.

The Global Financial Crisis of 2008 caused a temporary decline, but global liquidity infusion, key economic reforms such as easing FDI limits and fuel price deregulation, and improving political stability helped the markets recover.

By FY15, the number of companies with over Rs 1 lakh crore market cap rose to 22, with a total market cap of Rs 43.8 lakh crore. This growth continued, with 30 companies reaching this milestone by FY19, taking their total market cap to Rs 73 lakh crore.

The COVID-19 pandemic in FY20 disrupted financial markets, reducing the number of such companies to 20, with a total market cap of Rs 51.8 lakh crore. However, post-pandemic policy measures, strong economic recovery, and rising domestic participation fuelled a sharp rebound.

As a result, the number of companies with at least Rs 1 lakh crore market cap soared to 81 in FY24, out of the total 2,439 listed companies. In value terms, the total market cap of these companies stood at Rs 234 lakh crore, accounting for over 60 per cent of the total market cap.

This remarkable rise in high-market-cap companies' showcases India's economic resilience, market depth, and investor confidence.

As reforms continue and the economy expands, the number of companies crossing the Rs 1 lakh crore market cap threshold is expected to grow further, reinforcing India's position as a key player in global markets.

By FY15, the number of companies with over Rs 1 lakh crore market cap rose to 22, with a total market cap of Rs 43.8 lakh crore. This growth continued, with 30 companies reaching this milestone by FY19, taking their total market cap to Rs 73 lakh crore.

The COVID-19 pandemic in FY20 disrupted financial markets, reducing the number of such companies to 20, with a total market cap of Rs 51.8 lakh crore. However, post-pandemic policy measures, strong economic recovery, and rising domestic participation fuelled a sharp rebound.

As a result, the number of companies with at least Rs 1 lakh crore market cap soared to 81 in FY24, out of the total 2,439 listed companies. In value terms, the total market cap of these companies stood at Rs 234 lakh crore, accounting for over 60 per cent of the total market cap.

This remarkable rise in high-market-cap companies' showcases India's economic resilience, market depth, and investor confidence.

As reforms continue and the economy expands, the number of companies crossing the Rs 1 lakh crore market cap threshold is expected to grow further, reinforcing India's position as a key player in global markets.

Headline: Indian companies with over Rs 1 lakh crore market cap surge 40 times since 2000: NSE Report

https://mrgaga.in/indian-companies-with-over-rs-1-lakh-crore-market-cap-surge-40-times-since-2000-nse-report/

The number of Indian companies with a market capitalisation of over Rs 1 lakh crore has surged 40 times over last 24 years. This reflects the country's strong economic growth and market expansion, according to a report by the National Stock Exchange (NSE).

The report highlighted that the number of companies with a market cap of over Rs 1 lakh crore increased significantly between FY02 and FY24, with their share of the total market capitalisation of NSE-listed companies rising from nearly 18 per cent to over 60 per cent.

This growth is attributed to India's strong economic fundamentals, implementation of crucial reforms, surplus global liquidity after the 2008 financial crisis, and a steadily expanding investor base.

The report said, "The number of companies with over 1 lakh crore market cap have increased by over 40 times between FY02 and FY24."

The report further stated that the market capitalisation of the top 10 companies has grown 28 times over the last two decades. Their profits and assets have increased by an average of 15.4 per cent and 16 per cent, respectively, each year over the past 20 years.

In FY02, only one company had a market capitalisation exceeding Rs 1 lakh crore. By FY04, this number had grown to two, and in FY10, it increased to 14, with a combined market cap of Rs 21.2 lakh crore.The Global Financial Crisis of 2008 caused a temporary decline, but global liquidity infusion, key economic reforms such as easing FDI limits and fuel price deregulation, and improving political stability helped the markets

recover.By FY15, the number of companies with over Rs 1 lakh crore market cap rose to 22, with a total market cap of Rs 43.8 lakh crore. This growth continued, with 30 companies reaching this milestone by FY19, taking their total market cap to Rs 73 lakh crore.

The COVID-19 pandemic in FY20 disrupted financial markets, reducing the number of such companies to 20, with a total market cap of Rs 51.8 lakh crore. However, post-pandemic policy measures, strong economic recovery, and rising domestic participation fuelled a sharp rebound.

As a result, the number of companies with at least Rs 1 lakh crore market cap soared to 81 in FY24, out of the total 2,439 listed companies. In value terms, the total market cap of these companies stood at Rs 234 lakh crore, accounting for over 60 per cent of the total market cap.

This remarkable rise in high-market-cap companies' showcases India's economic resilience, market depth, and investor confidence.

As reforms continue and the economy expands, the number of companies crossing the Rs 1 lakh crore market cap threshold is expected to grow further, reinforcing India's position as a key player in global markets

UP tops new investor registrations on NSE

BS REPORTER
Mumbai, 31 March

Uttar Pradesh has emerged as the top state in terms of new investor registrations in the financial year 2024-2025 (FY25) on the National Stock Exchange (NSE). According to a release by the exchange, Uttar Pradesh added 2.95 million new investors in FY25, comprising 14 per cent of new additions.

Maharashtra and Gujarat have the second- and third-highest number of new investor registrations at 2.62 million and 1.72 million, respectively. The top five states command 48 per cent of new registrations. Delhi-NCR, with 1.22 million new registrations, tops the list among districts, followed by Mumbai, which had 850,000, and Bengaluru, with 300,000.

Maharashtra has the highest number of unique investors at 18.4 million, followed by Uttar Pradesh at 13 million, and Gujarat at 9.9 million. Mizoram showed the highest growth in the number of unique investors in the past 12 months, growing from 20,000 to 30,000 or 54 per cent.

The total number of unique investors is 113 million, up from 92 million in the previous financial year.

DII FLOWS HIGHEST IN A DECADE

Retail inflows into equities at three-year high of ₹1.25L cr

● Uttar Pradesh sees most number of new investor registrations at 2.95 million

ANANYA GROVER
Mumbai, March 31

NET INFLOWS OF ₹ 1.25 lakh crore from retail investors into equities touched a three-fiscal high in FY25 while infusions from domestic institutional investors crossed ₹6 lakh crore, the highest in a decade, data from the National Stock Exchange (NSE) showed.

Foreign portfolio investors (FPIs) withdrew ₹ 1.27 lakh crore from Indian stocks, the most since FY22, when this category had seen outflows of ₹ 1.4 lakh crore.

For the fiscal that ended on March 31, the major indices of the NSE delivered returns in the range of 4%-5.5%, with the Nifty Midcap 150 outperforming with a 7.6% return. Data also reveal that during FY25, market capitalisation of 2,720 companies listed on the NSE rose to ₹ 410.87 lakh crore, from ₹384.2 lakh crore in the previous financial year.

Of this, 610 companies on its SME platform, NSE Emerge, had market capitalisation of ₹ 1.8 lakh crore, against ₹ 1.2 lakh crore in financial year 2024.

A total of 20.9 million new investors were added in the year, taking the unique registered investors to 113 million with total unique accounts at 219.4 million. While Maharashtra remained the top state in terms of investor base with 18.4 million investors, Uttar Pradesh saw the most number of new investor registrations at 2.95 million.

In the cash market, NSE's total turnover stood at ₹281.27 lakh crore, up 39.9% from last year; premium turnover of equity options rose 2.3% to ₹155.50 lakh crore; and that from equity futures was up 40.4% to ₹462.89 lakh crore.

Total notional turnover of the NSE IX, the exchange's multi-asset platform for global investment set up at GIFT City, crossed the $1-trillion mark in FY25, compared with $735 billion last year, with 65,031 unique clients being registered.

The total collateral at NSE Clearing has increased to more than ₹ 7 lakh crore as on March 27, 2025, from around ₹ 6 lakh crore on the same day last year.

In the primary market, 242 intial public offerings, both mainboard as well as Emerge, raised ₹ 1.7 lakh crore.

On the mainboard, 79 companies raised ₹ 1.63 lakh crore, with Hyundai Motors raising the highest amount at ₹ 27,859 crore. On the SME platform, 163 companies mopped up ₹ 7,111 crore.

भांडवली बाजार सूचिबद्धतेत महाराष्ट्राचा दबदबा !

लोकसत्ता व्यापार प्रतिनिधी

मुंबई : सरलेल्या आर्थिक वर्षात म्हणजेच २०२४-२५ मधील भांडवली बाजारातील पोषक वातावरणाचा फायदा घेत, २४२ कंपन्यांनी प्रारंभिक समभाग विक्रीच्या (आयपीओ) माध्यमातून १.७० लाख कोटींची निधी उभारणी केली. राष्ट्रीय शेअर बाजार अर्थात एनएसईच्या मुख्य बाजार मंचासह एनएसई इमर्ज या मंचावर समभाग सूचिबद्धतेत महाराष्ट्रातील कंपन्यांचा दबदबा राहिला.

एनएसईमध्ये सरलेल्या आर्थिक वर्षात सूचिबद्ध झालेल्या एकूण २४२ कंपन्यांपैकी ७९ कंपन्या मुख्य बाजार मंचावर तर १६३ कंपन्यांनी एनएसई इमर्ज या मंचावर पदार्पण केले. 'आयपीओ'च्या माध्यमातून करण्यात आलेली निधी उभारणी ही मागील आर्थिक वर्षाच्या तुलनेत १६५ टक्क्यांनी अधिक राहिली आहे. यामध्ये मुख्य मंचावर सूचिबद्ध होणाऱ्या ७९ कंपन्यांपैकी सर्वाधिक २८ कंपन्या या महाराष्ट्रातील आहेत. या महाराष्ट्रातील कंपन्यांनी आयपीओच्या माध्यमातून सरलेल्या आर्थिक वर्षात ५२,६६० कोटी रुपयांची निधी उभारणी केली. तर त्याखालोखाल दिल्ली १२ कंपन्यांनी २३,६१५ कोटी आणि कर्नाटकमधील १० कंपन्यांनी २८,०६२ कोटींची निधी उभारणी केली. याप्रमाणेच एनएसई इमर्ज या मंचावर महाराष्ट्रातील ५० कंपन्या सूचिबद्ध झाल्या आहेत. त्यापाठोपाठ गुराराटमधील ३१ आणि दिल्लीतील २७ कंपन्या सूचिबद्ध झाल्या आहेत. यात महाराष्ट्रातील कंपन्यांनी एनएसई इमर्जच्या मंचाच्या माध्यमातून सर्वाधिक १,९५० कोटींची निधी उभारणी केली आहे.

सर्वाधिक गुंतवणूकदार महाराष्ट्रातील

किरकोळ गुंतवणुकीवरही झटपट लाभ, प्रक्रिया सुलभ करणारे ॲप आणि समाजमाध्यमांवरून प्रसारित होणाऱ्या मोबदल्याच्या सुरस कहाण्यांचा एकत्रित प्रभाव यातून भांडवली बाजारातील नवगुंतवणूकदारांची रीघही वाढताना दिसत आहे. सरलेल्या २०२४-२५ या आर्थिक वर्षांत आतापर्यंत सुमारे २.०९ कोटी नोंदणीकृत नवीन गुंतवणूकदारांची भर राष्ट्रीय शेअर बाजाराने घातली आहे. यामध्ये वर्षभरात सर्वाधिक २९ लाख नवगुंतवणूकदारांच्या नोंदीसह उत्तर प्रदेशने पहिला क्रमांक पटकावला असून, या प्रदेशाची या आघाडीवरील उसळी ही गुंतवणूकदारांच्या संख्येत अव्वल असलेल्या महाराष्ट्र, गुजरातमधील दरी वेगाने भरून काढत आहे. राष्ट्रीय शेअर बाजाराने प्रसिद्ध केलेल्या आकडेवारीनुसार, वार्षिक आधारावर उत्तर प्रदेशमधील नवगुंतवणूकदारांमध्ये सर्वाधिक २९.४ टक्क्यांची वाढ दिसून आली आहे. भांडवली बाजारात गुंतवणूकदारांच्या बाबतीत महाराष्ट्र आणि गुजरात ही राज्ये परंपरेने अग्रेसर राहिली आहेत. महाराष्ट्राने २८ मार्च २०२५ पर्यंत २६ लाख नवीन गुंतवणूकदारांची (१६.६ टक्के) भर घातली, तर गुजरातमधून १७ लाख नवीन गुंतवणूकदार (२१.४ टक्के) नोंदवले गेले.

बंगळुरूची आघाडी

मुख्य बाजार मंचावर सूचिबद्ध होणाऱ्या कंपन्यांमध्ये बंगळुरूने आघाडी घेतली आहे. बंगळुरू शहरातील ७० कंपन्या एनएसईवर सूचिबद्ध झाल्या आहेत. त्यांनी एकत्रित २८,०६२ कोटींची निधी उभारणी केली आहे. तर महाराष्ट्रातील मुंबईमधील ७५, पुणे ७ आणि नवी मुंबईमधील २ कंपन्या सरलेल्या वर्षात भांडवली बाजारात सूचिबद्ध झाल्या आहेत.
