RISK TO INVESTORS

- The microfinance industry in India faces certain risks due to the category of customers that it services, (the primary focus customer segment for our micro-loan business is women with an annual household income of up to ₹300,000) which are not generally associated with other forms of lending. As a result, we may experience increased levels of non-performing assets and related provisions and write-offs that may adversely affect our business, financial condition and results of operations. Our Loans written off, Collection Efficiency and Expected Credit Loss ("ECL") allowance percentage is as follows:
- We will not receive any proceeds from the Offer for Sale. The Selling Shareholders will receive the entire proceeds from the Offer for Sale.
- Our business is vulnerable to interest rate risk, and volatility in interest rates could have an adverse effect on our net interest income and net interest margin, thereby affecting our results of operations. The table below sets forth our cost to income ratio for the Financial Years 2021, 2022 and 2023, and the six months ended September 30, 2022 and 2023:
