1	Fund Name	ADITYA BIRLA SUN LIFE EQUITY SAVINGS FUND
2	Option Names (Regular & Direct)	Growth IDCW IDCW Reinvest
3	Fund Type	An open ended scheme investing in equity, arbitrage and debt.
4	Riskometer (At the time of Launch)	Moderately High
5	Riskometer (as on Date)	Moderate
6	Category as Per SEBI Categorization Circular	Hybrid Scheme - Equity Savings
7	Potential Risk Class (as on date)	NA
8	Objective of the scheme	To provide capital appreciation and income distribution to the investors by using a blend of equity derivatives strategies, arbitrage opportunities and pure equity investments. The Scheme does not guarantee/indicate any returns. There can be no assurance that the schemes' objectives will be achieved.
9	Stated Asset Allocation	Under normal circumstances, the asset allocation of the Scheme will be as follows: Equity & Equity Related instruments including derivatives - Very High - 65-90% Out of which: - Cash-futures arbitrage* : 0% - 90% Very High - Net long equity exposure* : 10% - 50% Very High Debt & Money market Instruments (including margin for derivatives) - Low - 10-35% Units issued by REITs & InvITs - Very High - 0-10% *The exposure to derivatives shown in the above asset allocation table would normally be the exposure taken against the underlying equity investments and should not be considered for calculating the total asset allocation. This denotes hedged equity positions by investing in arbitrage opportunities in the equity market. The fund manager in the above case can therefore take exposure to equivalent stock/ index futures & create completely covered positions. E.g. - The scheme invests 65% in equity stocks/index basket in the cash market and takes short position in futures market for relevant stocks/ index to the extent of exactly 65% to avail arbitrage between spot & futures market. Thus, the entire position is used to lock arbitrage profit. The Scheme may also invest in other derivative instruments like covered calls etc. as deemed appropriate. **This denotes only net long equity exposures (including units of MFs and ETFs) aimed to gain from potential capital appreciation of these positions. Thus, it is a directional equity exposure which is not hedged.
