7	Potential Risk Class (as on date)	NA
8	Description, Objective of the scheme	The primary investment objective of this fund is to generate income and capital appreciation by investing in arbitrage opportunities & pure equity investments along with investments in debt securities & money market instruments. However, there can be no assurance or guarantee that the investment objective of the scheme will be achieved.
9	Stated Asset Allocation	Under normal circumstances, the anticipated asset allocation would be: Equities and equity related instruments: 65%–90% of which: - Derivatives including index futures, stock futures, index options, & stock options, etc. backed by underlying equity (only arbitrage opportunities)*: 25%-70%, Unhedged Equity Position#: 20%-40%, Debt and Money market instruments** (including investments in securitized debt & margin for derivatives): 10%–35%. When adequate arbitrage opportunities are not available in the Derivative and Equity markets, the anticipated alternate asset allocation on defensive considerations would be: Equities and equity related instruments: 20%– 65% of which: - Derivatives including index futures, stock futures, index options, & stock options, etc. backed by underlying equity (only arbitrage opportunities)*: 0%-45%, Unhedged Equity Position#: 20%-40%, Debt and Money market instruments** (including investments in securitized debt & margin for derivatives): 35%–80%. #Denote the directional equity exposure which is not hedged. *This denotes only hedged equity positions by investing in arbitrage opportunities in the equity market. The fund manager in the above case can therefore take exposure to equivalent stock/ index futures & create completely covered positions. The margin money deployed on these positions would be included in Money Market category. ** including securitized debt up to 30%.
