

PARTY’S LOK SABHA MPs SAY A HANDFUL OF RAJYA SABHA MEMBERS CALL THE SHOTS

As Cong sticks to Adani row, unease within over stalling of Parliament

LIZ MATHEW & MANOJ C G
New Delhi, December 1

WITH THE STANDOFF in Parliament, triggered by the Congress’s insistence on a thorough discussion on the Adani bribery allegations and the government’s reluctance to accept it, showing no signs of ending, there is unease among a section of the party’s Lok Sabha MPs as well as some other Opposition parties over the continued stalling of the two Houses.

It is largely the Congress MPs who have been demanding a discussion on the Adani issue — leading to a washout of the first week of the winter session. The notices by other Opposition MPs were over other issues, including the Manipur situation and the Sambhal violence. Parties such as the Trinamool Congress and the NCP (Sharad-chandra Pawar) are not keen to raise the Adani issue.

The Adani issue is a pet theme of Leader of the Opposition in the Lok Sabha Rahul Gandhi and hence the Congress MPs have no option but to give notices demanding suspension of all business for taking up a discussion on the issue. But a section of its MPs, particularly those in the Lok Sabha, believe

Congress chief Mallikarjun Kharge at the Ramlila Maidan in New Delhi on Sunday

the House should resume normal business, which they argue would give them an opportunity to hold the NDA government accountable — using the Question Hour and discussions — and raise important issues during the Zero Hour.

A section of the Congress’s Lok Sabha MPs believe it is the party’s Rajya Sabha leadership that is calling the shots. As for other Opposition parties, the TMC has already declared that it wants the House to run. The Left, too, is concerned that the Opposition is not able to make its points in Parliament because of the disruptions. The leaders of the INDIA bloc will

meet at Leader of the Opposition in the Rajya Sabha Mallikarjun Kharge’s chamber Monday morning to review the floor strategy. At least half a dozen MPs of the Congress said they did not appreciate “disruptions of the proceedings as a protest without exploring the chances for cornering the government over issues in debate”. Many of them also said that despite the increase in the number of MPs in the 18th Lok Sabha, it is a “handful of Rajya Sabha MPs who take decisions and dictate the party’s position” in Parliament.

“We have won elections... Are we not accountable to our

voters? If we do not discuss their issues in the House during the limited time in the sessions, how can we do justice to them? Rajya Sabha MPs do not have to be answerable to voters like us,” said an MP. Pointing out that the Congress and other Opposition parties had lost considerable time in protests during the 17th Lok Sabha as well and that there is a view emerging among Opposition MPs cutting across age and region that such protests are not effective, a senior MP said, “Parliament is a unique forum in which only parliamentarians get to record their views for posterity. Giving up that opportunity is actually a betrayal of their electorate. These protests are neither noticed nor yielding any impact on the ground. Issues we seem to be harping on absolutely have no resonance with the common man.”

Sources in the TMC said the party’s leadership had identified five issues that it wants to be discussed in both Houses of Parliament. These issues are inflation, unemployment, deprivation of housing and other funds for West Bengal, fertiliser shortage, and violence in Manipur. Missing from the agenda is the Adani indictment.

“We want Parliament to run. We don’t want one issue to disrupt Parliament. We must hold this government accountable for multiple failures,” said a TMC Lok Sabha MP.

Even smaller allies of the Congress expressed displeasure over the ongoing chaos in the House and adjournments without transacting any business. “Initially, the understanding was that the Opposition would disrupt the proceedings only for a day and we would cooperate for the business and discussions for the remaining days. But this is just going on. This is not the way,” said an ally leader.

MPs feel that the Opposition has “just fallen into the trap” of the treasury benches, which they said, did not want to face any serious debate on the floor of the House. “Now that the Opposition is a significant force in the Lok Sabha and having speakers who have the ability to put the government on the mat, we should be using opportunities — Zero Hour, Question Hour, debates on Bills etc — to grill the government. Now we are giving them a cake walk. The real questions are not being asked, the real issues are not being talked about,” said an MP.

As pollution levels soar, so do housing prices

“MAYBE A PROPERTY price discount for the quality of air and water is the solution. If economics accounted for this, maybe we would all figure this out. Essentially the air and water quality determine the rate for the property,” Kamath posted on X on November 24.

Also, this would probably turn a property owner into the owner of the place, and would have better odds of fixing it if working as a group, he said.

While Delhi is getting all the attention, the air quality index (AQI) isn’t good in most urban areas in the country. Mumbai, Chennai, Kolkata, Bengaluru and others are included in areas with very poor air quality, he said.

Kamath also said cities such as Delhi, Mumbai, Kolkata and Chennai have seen pollution-related deaths of 11,964, 5,091, 4,678 and 2,870, respectively. “You have to wonder what it will take for us to take air pollution more seriously. By the way, this data only covers until 2019, and things have only gotten worse in the last five years,” he said.

Environmentalists such as Anumita Roychowdhury, executive director, research and advocacy, Centre for Science

and Environment, said the real estate industry should start integrating these micro environmental concerns into the value of the projects “so that people pay prices for quality of life.” Roychowdhury said that there are instances where green elements of the real estimates are put in front to promote a project like lake view property, green belt and rain water harvesting facilities.

“For instance, there are reports about several families shifting out of Delhi-NCR during the winter months to escape poor air quality,” she said, adding that there is a need to study the correlation between property prices and quality of air or water a place offers. Vikrant Tongad, a Noida-based environmentalist

and founder of Social Action for Forest and Environment, said, “Decision to buy a property is currently guided by employment opportunities available in the urban centres, concern about the environment often is seen as a temporary annual phenomenon during winter months.”

But real estate developers such as Sanjay Dutt, managing director & CEO at Tata Realty & Infrastructure, said governments should have invested in controlling pollution at all levels. “Government collect education cess, water cess and so on. That never gets spend. Then these kind of problems bound to happen,” Dutt said.

Dutt added that it is good that cities such as Mumbai have got Coastal Road, new metro lines and so on and it is a welcome move. “But all these should have happened 20 years ago. They are delayed,” he said, adding that electric vehicles have reduced pollution and pre-cast technologies have reduced construction pollution.

He said because infrastructure is bad in many cities, people are paying premium to stay in good localities. “Real estate prices are high because infrastructure is bad,” he said.

- We may face resistance to change from existing users of conventional fossil fuel.
- Our production is based on competitive bidding process by government authorities/bodies. We may not be able to qualify for, compete and win future projects, which could adversely affect our business and results of operations.
- The availability, quality and timely delivery of raw material is an important factor for our business, any fluctuation, delay or increase in cost in same may affect our business and prices.
- Our financial performance is dependent primarily on the sale of Biodiesel.
- Prices of bio-fuel might be more than non-renewable conventional fossil fuel. Moreover, decline in price of fossil fuel may affect the demand for bio-fuel.
- Absence of entry barriers into bio-fuel production may attract many players from both organized and unorganized sectors which will escalate competition and resultant price pressure on the products.
- Our top ten customers contribute majority of our revenues from operations. Any loss of business from one or more of them may adversely affect our revenues and profitability.
