(For details refer to the section titled "Risk Factors" on page 31 of the RHP)

1. **Project cancellation/ modification risk:** Our Order Book is subject to cancellation, modification or delay which may materially and adversely affect our business, future prospects, reputation, financial condition and results of operation. If any of our projects are cancelled or terminated prematurely, there can be no assurance that our Company will receive the applicable termination payments in time or at all or that the amount paid will be adequate to enable our Company to recover its investments in the prematurely cancelled project. As of June 30, 2024, our confirmed Order Book amounted to ₹ 102,130.66 million.

In the past our Company has faced time and cost overruns in certain international projects.
3. **Risk in relation to tenders by public sector authorities:** Our business is substantially dependent on tenders being floated by government authorities, public sector undertakings and utilities, from which we derive a significant portion of our revenues, i.e. approximately 70% of our revenue from operations for the three months period ended June 30, 2024. Any delays in tenders released or no tenders released by such entities may have a material adverse effect on our business and results of operations.

Track record of established presence and growth in power transmission and distribution vertical through our implementation and execution skills: We have completed more than 200 projects in power transmission and distribution vertical, along with comprehensive and extensive project execution capabilities in terms of manpower, supply of materials (including self-manufactured products) and availability of world class machinery, both in India and internationally. We have developed extensive pre-qualifications in power transmission and distribution business owing to our extensive experience in the sector.

Established manufacturing facilities : Our factories are fitted with advanced computer numerical control ("CNC") machines, plasma / gas-cutting machines, shearing machines, welding facilities, large sized galvanizing baths, wire drawing machines and furnaces. As of June 30, 2024, we have supplied 1.3 million metric ton ("MMT") of towers, 194,534 kilometer ("KM") of conductors and 458,705 poles.

Strong and diversified Order Book: Our Order Book has a healthy balance of international and domestic clients and has consistently witnessed growth over the past few years. We primarily focus on the quality of the products and services provided by us which helps us in honing our strong relationships with our clients. As of June 30, 2024, we have total of 156 Confirmed Unexecuted Order Book amounting to ₹102,130.66 million.

Strong in-house designing and engineering: We undertake our EPC business in an integrated manner. Our Company has developed key competencies and resources in-house to deliver a project from conceptualization until completion. We have an experienced team of 114 designers and engineers who are specialists in each segment of our business with a total cumulative experience of more than 17,000 man months. Our total revenue increased at a CAGR of 32.37% while our profit for the year increased at a CAGR of 89.84%.

2. The following provides an explanation to the Cap Price being 3.08 times of weighted average cost of acquisition of Equity Shares that were issued by our Company or acquired by our Promoters, the Promoter Group or other shareholders with rights to nominate directors by way of primary and secondary transactions as disclosed above, in the last 18 months preceding the date of the Red Herring Prospectus in view of external factors, if any.

Market opportunity: The power transmission and distribution system across India has expanded extensively. The total length of domestic transmission lines rose from 413,407 CKM in Financial Year ended March 31, 2019 to 485,544 CKM in Financial Year ended March 31, 2024. To service a large generation installed base, the estimated investment in the transmission sector is expected to cumulatively reach approximately ₹3.00 trillion for Financial Year 2025-2029.

The distribution segment is expected to attract investments worth ₹ 3-4 trillion over fiscals 2025 to 2029 vis-a-vis ~ ₹ 3.3 trillion between fiscal 2019-2024 led by the government's thrust on the Revamped Distribution Sector Scheme, improving access to electricity and providing 24x7 power to all. (Source: CRISIL Report)

Further, internationally, the lack of access to electricity across the African region has influenced public and private investments in the deployment of new transmission and distribution networks across the region. For instance, at present, 43% of the total population in the African region, lack access to electricity, which displays the critical need for electrical infrastructure in Africa. Further, power sector investment in Latin America and the Caribbean is also expected to increase to meet rising electricity demand and to modernise and expand grid infrastructure.
