## RISK TO INVESTORS

1. Our Bank has a high illiquidity ratio. A high Illiquidity Ratio indicates that a bank holds a low amount of liquid assets, which affects its ability to pay its debt obligations and short-term liabilities. If we are unable to decrease our Illiquidity Ratio, it could have an adverse effect on our business, financial condition, results of operations and cash flows.

As noted in the RBI Inspection report, our Bank's illiquidity ratio was 46.16% as at March 31, 2022, as against industry average of 40% (as per the RBI), indicating our Basic Earning Assets were supported by Volatile Liabilities. A high Illiquidity Ratio indicates that a bank holds a low amount of liquid assets, which affects its ability to pay its debt obligations and short-term liabilities. Our Illiquidity Ratio improved to 40.24% as at September 30, 2023, which was primarily due to an increase in our Basic Earning Assets. However, we cannot assure you this improvement will be sustained and if our Bank's Illiquidity Ratio increases, it could have an adverse effect on our business, financial condition, results of operations and cash flows.

The table below sets forth our Bank's Illiquidity Ratio as at the dates indicated:

Particulars	As at September 30, 2023	As at March 31, 2023	As at March 31, 2022	As at March 31, 2021
	(₹ in millions, except percentages)			
Illiquidity Ratio (%)	40.24%	32.75%	46.16%	30.44%

2. Our Bank has a low Core Deposit Ratio. A low Core Deposit Ratio means that a bank has less assets that are backed by deposits, and indicates that the bank has low liquidity. If we are unable to increase our Core Deposits Ratio, it could have an adverse effect on our business, financial condition, results of operations and cash flows.

As noted in the RBI Inspection report, our Bank's Core Deposit Ratio was 36.03% as at March 31, 2022, as against the industry average of

...continued from previous page.

50.00% (as per the RBI), indicating that 63.97% of our total assets were funded through an unstable deposit base. A low Core Deposit Ratio means that a bank has less assets that are backed by deposits, and indicates that the bank has low liquidity. Our Core Deposits Ratio improved to 40.19% as at September 30, 2023, which was primarily due to an increase in our Core Deposits. However, we cannot assure you this improvement will be sustained and if our Bank's Core Deposit Ratio decreases, it could have an adverse effect on our business, financial condition, results of operations and cash flows.

The table below sets forth our Core Deposit Ratio as at the dates indicated:

3. Our Bank has a high Illiquid Assets Ratio. A high Illiquid Assets Ratio may affect a bank's ability to pay its liabilities. If we are unable to decrease our Illiquid Assets Ratio, it could have an adverse effect on our business, financial condition, results of operations and cash flows.

As noted in the RBI Inspection report, our Bank's Illiquid Assets Ratio as at March 31, 2022 was 252.97%, signifying a higher degree of illiquidity embedded in our Bank's balance sheet. A high Illiquid Assets Ratio may adversely affect a bank's ability to pay its liabilities. Our Illiquid Assets Ratio increased to 221.72% as at September 30, 2023, which was primarily due to an increase in our Core Deposits. The maturity of deposits has been calculated on the basis of contractual maturity for deposits and a fixed ratio for CASA. However, we cannot assure you this improvement will be sustained and if our Bank's Illiquid Assets Ratio increases, it could have an adverse effect on our business, financial condition, results of operations and cash flows.

The table below sets forth our ratio of Illiquid Assets to Core Deposits ("Illiquid Assets Ratio") as at the dates indicated:
