Read Risk Factors

Prospective investors should not rely solely on the information contained in this Scheme Information Document. They should read the risk factors presented in this document and also note that the risk factors are only illustrative and not exhaustive. The Trustee accepts no responsibility for unauthorised information.

Summary of Indicative Scheme-Specific Risks

Performance of the NIFTY 100 Equal Weighted Index will have a direct bearing on the performance of the scheme. In the event the Underlying Index is dissolved or withdrawn by India Index Services and Products Ltd. (IISL), the Trustees reserve the right to modify the schemes so as to track a different and suitable index and appropriate intimation will be sent to the Unitholder of the scheme.

Tracking errors are inherent in any indexed fund and such errors may cause the scheme to generate returns, which are not in line with the performance of the NIFTY 100 Equal Weighted Index. Such variations, referred to as tracking error, shall be maximum of 2% per annum, but may vary substantially due to several factors including but not limited to:

- Any delay experienced in the purchase or sale of shares due to liquidity of the market, settlement and realisation of sales proceeds and the registration of any security transfer and any delays in receiving cash and scrip dividends and resulting delays in reinvesting them.
- The NIFTY 100 Equal Weighted Index reflects the prices of securities at close of business hours. However, the Fund may buy or off-load securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the National Stock Exchange (NSE).
- IISL undertakes a periodic review of the scrips that comprise the NIFTY 100 Equal Weighted Index and may either drop or include new securities. In such an event the Fund will endeavour to reallocate its portfolio but the available investment / disinvestment opportunities may not permit precise mirroring of the NIFTY 100 Equal Weighted Index immediately.
- The potential for trades to fail, which may result in the particular scheme not having acquired shares at a price necessary to track the index
- The holding of a cash position and accrued income prior to distribution and accrued expenses.
- Disinvestments to meet redemption, recurring expenses, IDCW payout etc.
- Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA) which

involves Liquidity Risk & Credit Risk etc.

For detailed scheme-specific risk factor refer "Risk Factors" section of this document.

Suitability

The Scheme is appropriate for investors who have a high risk-appetite and understand the risks involved, as equity markets are subject to high volatility and consequently high risk. The Scheme is appropriate only for those who have a sizeable allocation to equity in their portfolio and wish to allocate a part of their corpus for a differentiated strategy to investing in the equity market.

Income Distribution Policy

The Trustee Company reserves the right to distribute income subject to availability of distributable surplus. Any distribution and frequency of such distribution will be entirely at the discretion of the Trustee.

Detailed Scheme-Specific Risks

- Performance of the NIFTY 100 Equal Weighted Index will have a direct bearing on the performance of the scheme. In the event the NIFTY 100 Equal Weighted Index is dissolved or withdrawn by India Index Services and Products Ltd. (IISL), the Trustees reserve the right to modify the scheme so as to track a different and suitable index and appropriate intimation will be sent to the Unitholder of the scheme.
- Tracking errors are inherent in any indexed fund and such errors may cause the scheme to generate returns, which are not in line with the performance of the NIFTY 100 Equal Weighted Index or one or more securities covered by/ included in the Underlying Index. Such variations, referred to as tracking error, shall be maximum of 2% per annum, but may vary substantially due to several factors including but not limited to:
 - a) Any delay experienced in the purchase or sale of shares due to liquidity of the market, settlement and realisation of sales proceeds and the registration of any security transfer and any delays in receiving cash and scrip IDCWs and resulting delays in reinvesting them.
 - b) The NIFTY 100 Equal Weighted Index reflects the prices of securities at close of business hours. However, the Fund may buy or off-load securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the National Stock Exchange (NSE).
 - c) IISL undertakes a periodic review of the scrips that comprise the Underlying Index and may either drop or include new securities. In such an event the Fund will endeavour to reallocate its portfolio but the available investment / disinvestment opportunities may not permit precise mirroring of the NIFTY 100 Equal Weighted Index immediately.
 - d) The potential for trades to fail, which may result in the particular scheme not having acquired shares at a price necessary to track the index
 - e) The holding of a cash position and accrued income prior to distribution and accrued expenses.
 - f) Disinvestments to meet redemption, recurring expenses, IDCW payout etc.
 - g) Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA) which involves Liquidity Risk & Credit Risk etc.
- Sundaram NIFTY 100 Equal Weight Fund would be investing in equities and money market instruments (such as TREPS/Repo or as defined by SEBI regulations, term/notice money market, repos, reverse repos and any alternative to the call money market as may be directed by the RBI). The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances.

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such

as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.

- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down
- Past performance of the Sponsor/Investment Manager/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs 1 lakh made by them towards setting up the Fund.
- The Scheme is not a guaranteed or assured return Scheme.

General Risk Factors

- Mutual Funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
- The main types of risks to which the Scheme is exposed are risk of capital loss, market risk, currency risk, liquidity risk, credit risk, counter party default risk, to name a few.
- As with any investment in securities, the NAV of the Units issued under the Scheme can go up or down depending on the factors and forces affecting the capital markets.
- The NAV may be affected by factors such as market conditions, level of interest rates, market-related factors, trading volumes, settlement periods, transfer procedures, price/interest rate risk, credit risk, government policy, volatility and liquidity in markets, exchange rate, geo-political development, to name a few.
- Trading volumes in the securities in which the Scheme invest may inherently restrict the liquidity of the Scheme's investments.
- Change in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to Investors in the Scheme.
- The tax benefits available under the Scheme is as available under the present taxation laws and subject to relevant conditions. The information given is included for general purposes only and is based on advice that the Investment Manager has received regarding the law and the practice that is now in force in India.
- Unit holders should be aware that the relevant fiscal rules and their interpretation might change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor/Unit holder is advised to consult his/her own professional tax advisor.
- Investors/unit holders are also urged to read the detailed clause(s) titled 'Special considerations'.
- FATCA imposes tax withholding upto 30% on any payments (including redemption and IDCW proceeds) made by the Fund/AMC to a US Person classified as recalcitrant account holder in respect of whom the applicable documentation and

SOB
No.2SOB
No.2

reporting requirements are not met.

This is only an illustrative list and not an exhaustive list factors that could affect the NAV of the Scheme. They should read the risk factors presented in this document though the list is no way exhaustive. Potential investors should rely solely on the information contained in this Scheme Information Document and are advised to consult their investment advisors before taking investment decisions.

Risk of Capital Loss

The Net Asset Value (NAV) of the Scheme is exposed to market fluctuations, and its value can go up as well as down. Investors may lose their entire principal.

Risk Factors - Equity Markets

Stock Market Volatility: Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Different parts of the market can react differently to these developments. The stock-specific volatility may also change over a period of time as the characteristic of the stock undergoes a change in terms of market-cap category.

Equity Price Risk: Stock prices may rise or decline based on a number of factors. These could be a combination of company-specific and system-specific factors. Their impact on different types of stocks may vary. Prices change due to events that impact entire financial markets or industries (for example, changes in inflation, consumer demand, supply situation and GDP growth). Company-specific factors may include the likes of success or failure of a new product, mergers, takeovers, earnings announcement and changes in management, to name a few. Securities owned by the Scheme may offer opportunities for growth because of high potential earnings growth; they may also involve greater risks than securities that do not have the same potential.

Dependency Risk: The Scheme may invest in stocks and mutual funds. Equity confers a proportionate share of the ownership of a company. Its value will depend on the success of the company's business, income paid to stockholders by way of dividend, the value of the company's assets, quality of its corporate governance practice, its attractiveness relative to peers and general market conditions.

Temporary Investment Risk: If the fund manager is of the view that market or economic conditions may become unfavourable for investors in equities, he may invest a higher proportion of the fund's assets in high quality short-term and medium-term fixed income instruments as well as near-cash equivalents. This may be a defensive and temporary strategy. The fund manager may also adopt such a strategy to maintain liquidity. At times, such investments may lead to lower returns. In these circumstances, the Scheme may be unable to achieve its investment goal. Such temporary investment shall not exceed for period more than 30 days

Regulation-Change Risk: If the Government of India, RBI and/or SEBI decide to alter the regulatory framework for investment in financial assets by mutual funds, it may have an impact on the Scheme's ability to adhere to the investment objective. If and when such an eventuality materialises, the Trustee reserves the right to alter the investment objective of the Scheme or wind up the Scheme. In such cases of fundamental attribute change, the procedure in accordance with SEBI Regulations as highlighted in this document under the heading "F. Fundamental Attributes" will be adhered to.

Risk Factors - Debt Markets

- **Interest Rate Risk:** Changes in the prevailing rates of interest

may affect the value of the Scheme's holdings and consequently the value of the Scheme's Units. Increased rates of interest, which frequently accompany inflation and /or a growing economy, may have a negative effect on the value of the Units. The value of debt securities held by the Scheme generally will vary inversely with the changes in prevailing interest rates.

- While it is the intent of the fund manager to invest primarily in high rated debt securities, the Scheme may from time to time invest in higher yielding, low rated securities. As a result, an investment in the Scheme may be accompanied by a higher degree of risk relative to an investment consisting exclusively of high rated, lower yielding securities.
- **Credit Risk:** Credit Risk refers to the risk of failure of interest (coupon) payment and /or principal repayment. All debt instruments carry this risk. Government securities carry sovereign credit risk. The assets of the Scheme will be partly invested in fixed income securities issued by a corporate entity, bank, financial institution and/or a public sector undertaking owned by the Government of India or by a government in any state. The credit risk associated with the aforementioned issuers of debt is higher than that of government securities.
- **Price Risk:** As long as the corpus of the scheme is invested its Net Asset Value (NAV) is exposed to market fluctuations, and its value can go up as well as down. The portfolio of fixed-income securities that the Scheme invest in would be exposed to price changes on a day-to-day basis.
- These price changes may occur due to instrument-specific factors as well as general macroeconomic conditions. In general, price of fixed-income securities go up when interest rates fall, and vice versa.
- **Market Risk:** The Scheme may also be subject to price volatility due to such factors as interest sensitivity, market perception or the creditworthiness of the issuer and general market liquidity .
- **Liquidity Risk:** A lower level of liquidity affecting an individual security (ies) or an entire market may have an adverse bearing on the value of the Scheme's assets. This may more importantly affect its ability to sell particular securities with minimal impact cost as and when necessary to meet requirement of liquidity or to sell stocks in response to triggers such as a specific economic/corporate event. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few of the investments.
- **Risk relating to investment pattern:** Different types of securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate debt carry credit risk unlike Government securities. Further even among corporate debt, AAA rated debt is comparatively less risky (in credit risk terms) than those rated lower (say AA or A).
- **Risks relating to duration:** Fixed Income securities of any issuer that has higher duration could be more risky in terms of price movements relative to those with lower duration. Thus any impact of interest rate changes would be higher on securities with higher duration irrespective of the status of the issuer of the security.
- **Limited Liquidity & Price Risk:** Presently, secondary market for fixed income papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities.

This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

Risks associated with investing in Tri-Party Repo through CCIL (TREPS)

Tri-party Repo i.e. TREPS facilitates, borrowing and lending of funds, in Triparty Repo arrangement. CCIL would be the Central Counterparty to all trades from Tri Party Repo Dealing System (TREPS) and would also perform the role and responsibilities of Triparty Repo Agent, in terms of Repurchase Transactions (Repo) (Reserve Bank) Directions, 2018 as amended from time to time. The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All TREPS trades are settled anonymously and centrally through the infrastructure and settlement systems provided by CCIL. Further the settlement is guaranteed by CCIL. This is a collateralized investment whereby borrowers have to give adequate amount of securities on which a haircut is applied by CCIL. CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral." CCIL has several risk management processes in place such as initial margin, borrowing limits, identification of eligible collateral, haircuts on eligible collateral, mark to market margins (MTM) and volatility margin are applicable for Triparty Repo trades. There is a default fund for Triparty Repo trades. The exposure monitoring is online and on a pre-order basis, ensuring that orders can be placed only if the member has sufficient initial margin and/or borrowing limits to support the resultant trades. CCIL may temporarily impose volatility margin in case of a sudden increase in volatility in interest rates. Thus the settlement and counterparty risks are considerably low. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to handle any shortfall arising out of such default and to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

Minimum Number of Investors & Single-Investor Limit

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from

SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15-days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Risk Factors - Segregated Portfolio

Liquidity Risk: Securities classified under the segregated portfolio will typically be those securities that are thinly traded or not traded at all. Hence these securities will have significant liquidity risk and investors may not be able to redeem their investments.

Credit Risk: Securities classified under the segregated portfolio will typically be securities which are undergoing stress with regard to their ability to make principal and interest payments. Hence these securities will have significant credit risk and investors may not be able to redeem / realize their investments. It is also highly likely that these securities will undergo bankruptcy / liquidation processes which further increases the risk of the amount and the time taken for the investor to realize his investment.

Special Considerations

10. The existence of the provisions for segregated portfolio should not encourage the AMCs to take undue credit risk in the scheme portfolio.

In partial modification to SEBI Circular No. SEBI/HO/IMD/DF2/CIR/P/2018/160 dated December 28, 2018 on 'Creation of segregated portfolio in mutual fund schemes', it has been decided by SEBI to permit creation of segregated portfolio of unrated debt or money market instruments by mutual fund schemes of an issuer that does not have any outstanding rated debt or money market instruments, vide circular number SEBI/HO/IMD/DF2/CIR/P/2019/127, dated 07th November 2019. subject to the following:

- a. Segregated portfolio of such unrated debt or money market instruments may be created only in case of actual default of either the interest or principal amount.
- b. AMCs will inform AMFI immediately about the actual default by the issuer. Upon being informed about the default, AMFI shall immediately inform the same to all AMCs. Pursuant to dissemination of information by AMFI about actual default by the issuer, AMCs may segregate the portfolio of debt or money market instruments of the said issuer in terms of SEBI circular dated December 28, 2018.

The Scheme intends to have the ability to create a segregated portfolio in line with the above SEBI circular No. SEBI/HO/IMD/DF2/CIR/P/2018/160 dated December 28, 2018.

Example of Segregation:

The below table shows how a security affected by a credit event will be segregated and its impact on investors. Whether the distressed security is held in the original portfolio or the segregated portfolio, the value of the investors holdings will remain the same on the date of the credit event. Over time, the NAV of the portfolios are subject to change.

Key Assumptions: We have assumed a Scheme consists of 3 Securities (A, B, and C). It has two investors with total of 10,000 units. (Investors 1 – 6,000 Units, Investors 2- 4,000 units)

Total Portfolio Value of Rs. 30 Lakhs (Each Security invested Rs. 10 Lakh)

Current NAV : $30,00,000/10,000 = \text{Rs. } 300$ Per Unit

Suppose Security A is downgraded to below investment grade and consequently the value of the security falls from Rs. 10,00,000 to Rs. 4,00,000 and the AMC decides to segregate the security into a new portfolio. Investors will be allotted the same number of units in the segregated portfolio as they hold in the main portfolio. So, Investor 1 will get 6,000 Units and Investor 2 will get 4,000 units in the segregated portfolio.

With Segregation – Portfolio Value is Rs. 24,00,000 (Now B & C Securities worth Rs. 20 Lakh and Security A has fallen from Rs. 10,00,000 to Rs. 4,00,000)

| | Main Portfolio (Security of B & C) | Segregated Portfolio (Security A) |
|-----------------|--|--|
| Net Assets | Rs. 20,00,000 | Rs. 4,00,000 |
| Number of Units | 10,000 | 10,000 |
| NAV per Unit | $\text{Rs. } 20,00,000/10,000 = \text{Rs. } 200$ | $\text{Rs. } 4,00,000/10,000 = \text{Rs. } 40$ |

With respect to Investors.

| | Investor 1 | Investor 2 |
|--|------------------|------------------|
| Units held in Main portfolio (No. of Units) | 6,000 | 4,000 |
| NAV of Main Portfolio | Rs. 200 per Unit | Rs. 200 per unit |
| Value of Holding in Main Portfolio (A) – Rs. | 12,00,000 | 8,00,000 |
| Units Held in Segregated Portfolio | 6,000 | 4,000 |
| NAV of Segregated Portfolio | Rs. 40 Per unit | Rs. 40 Per unit |
| Value of Holding in Segregated Portfolio (B) – Rs. | 2,40,000 | 1,60,000 |
| Total Value of Holdings (A) + (B) – Rs. | 14,40,000 | 9,60,000 |

In case if it does not segregate (Total Portfolio would be)

| Net Assets of the Portfolio | No. of Units | NAV per unit Rs. |
|--|--------------|--------------------------------------|
| Rs. 24,00,000 | 10,000 | $24,00,000/10,000 = \text{Rs. } 240$ |
| (Rs. 4,00,000 in Security A and Rs. 10,00,000 in Security B and Rs. 10,00,000 in Security C) | | |

| | Investor 1 | Investor 2 |
|---|------------------|------------------|
| Units held in Original portfolio (No. of Units) | 6,000 | 4,000 |
| NAV of Original Portfolio | Rs. 240 Per Unit | Rs. 240 Per Unit |
| Value of Holding – Rs. | 14,40,000 | 9,60,000 |

Note:

1. The term 'segregated portfolio' shall mean a portfolio, comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme.
2. The term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio.

3. The term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event.

Brief note on fixed-income and money market in India

SOB
No.12

(i) Debt Instrument Characteristics:

A Debt Instrument is basically an obligation which the borrower has to service periodically and generally has the following features:

Face Value: Stated value of the paper /Principal Amount

Coupon: Zero, fixed or floating

Frequency: Semi-annual; annual, sometimes quarterly

Maturity: Bullet, staggered

Redemption: FV; premium or discount

Options: Call/Put

Issue Price: Par (FV) or premium or discount

A debt instrument comprises of a unique series of cash flows for each paper, terms of which are decided at the time of issue. Discounting these cash flows to the present value at various applicable discount rates (market rates) provides the market price.

(ii) Types of Debt Market Instruments:

The Indian Debt market comprises of the Money Market and the Long Term Debt Market.

Money market instruments are Commercial Papers (CPs), Certificates of Deposit (CDs), Treasury bills (T-bills), Repos, Inter-bank Call money deposit, CBLOs, Reverse Repo and TREPS etc. They are mostly discounted instruments that are issued at a discount to face value.

Money market instruments have a tenor of less than one year while debt market instruments typically have a tenor of more than one year.

Long Term Debt market in India comprises mainly of two segments viz., the Government securities market and the corporate securities market.

Government securities include central, state and local issues. The main instruments in this market are dated securities (Fixed or Floating) and Treasury bills (Discounted Papers). The Central Government securities are generally issued through auctions on the basis of ‘Uniform price’ method or ‘Multiple price’ method while State Govt. are through on-tap sales.

Corporate Debt segment on the other hand includes bonds/debentures issued by private corporates, public sector units (PSUs) and development financial institutions (DFIs). The

debentures are rated by a rating agency and based on the feedback from the market, the issue is priced accordingly. The bonds issued may be fixed or floating. The floating rate debt market has emerged as an active market in the rising interest rate scenario. Benchmarks range from Overnight rates or Treasury benchmarks.

The following table gives approximate yields prevailing during the month of May 2021 on some of the instruments. These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro economic conditions and RBI policy

| Issuer | Instruments | Maturity | Yields (p.a) |
|------------|---------------|-----------------|--------------|
| GOI | Treasury Bill | 91 days | 3.33 |
| GOI | Treasury Bill | 364 days | 3.70 |
| GOI | Short Dated | 1-3 Yrs | 3.84-4.73 |
| GOI | Medium Dated | 3-5 Yrs | 4.73-5.54 |
| GOI | Long Dated | 5-10 Yrs | 5.54-6.01 |

(iii) Regulators:

The RBI operates both as the monetary authority and the debt manager to the government. In its role as a monetary authority, the RBI participates in the market through open-market operations as well as through Liquidity Adjustment Facility (LAF) to regulate the money supply. It also regulates the bank rate and repo rate, and uses these rates as indirect tools for its monetary policy. The RBI as the debt manager issues the securities at the cheapest possible rate. The SEBI regulates the debt instruments listed on the stock exchanges.

(iv) Fixed income and money market segments

The market for fixed-income securities in India can be briefly divided into the following segments:

- The money market – The market for borrowing / lending money;
- The securities market – The market for trading in securities .

In this predominantly institutional market, the key market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and companies. Provident / pension funds, though present, are not active players.

The Money Market

The money market can be classified into two broad categories

The market for clean borrowing/lending without backing of any collateral:

- Call Money: The market for overnight borrowing/lending.
- Notice Money: The market for borrowing/lending from 2 days to a fortnight.
- Term Money: The market for borrowing/lending from a fortnight to six months.

The market for collateralised borrowing/lending:

- Repo transactions: These are redemption-obligation transactions in which the borrower tenders securities to the lender; these securities are bought back by the borrower on the redemption date. The price difference between the sale and redemption of the securities is the implicit interest rate for the borrowing/lending. The eligible underlying securities for these transactions are government securities and treasury bills. Corporate bonds are not allowed as eligible securities for repo transactions. The minimum repo term (lending /borrowing period) is one day.

The Securities Market

The market for fixed-income securities can be broadly classified into

- The market for money market (short-term) instruments: Money-market securities are generally discount securities maturing within one year from the date of issuance. Instruments satisfying this criterion are treasury bills (obligations of the government), commercial paper (obligations of the corporate sector) and certificate of deposit (obligations of banks).
- The market for Government Securities: Government securities are medium-/long-term fixed income securities of the government. The market for government securities is the most liquid segment of the fixed-income market in India. Most of the secondary market trading is concentrated in government securities. Trading in government securities is now done mostly through an electronic trading, reporting and settlement platform developed by the Reserve Bank of India (RBI) called Negotiated Dealing System. The role of brokers, which was an important element of the Indian bond market, is now less significant in this segment than in the past.
- The market for corporate bonds: Trading in corporate bonds is relatively subdued (in comparison to government securities). Price discovery and trading in this segment are still through the telephone. Attempts at improving the trading, settlement and risk-management practices for trading corporate bonds are currently underway.

- The market for floating-rate securities: The coupon rate in floating-rate securities is linked to an acceptable benchmark. Floating-rate securities generally have a coupon rate, which is reset over a regular period depending on the benchmark chosen. The market widely uses the MIBOR benchmarks announced by Independent agencies such as NSE and Reuters. When benchmark interest rate rises, the income generated on these floating-rate securities may also rise. When the benchmark interest rates decline, the income generated on these floating-rate securities may decline. Increasingly more companies are raising resource through floating-rate securities. Most of such securities are in the form of floating-rate debentures at a spread over NSE MIBOR. The other popular benchmark is the Indian Government securities benchmark yield (known as INBMK). The reset in such cases happen after a period of time, generally six months. The Government of India has also started issuing floating-rate securities using INBMK 1 year as the benchmark.

(v) Market Participants:

Given the large size of the trades, the debt market has remained predominantly a wholesale market.

Primary Dealers

Primary Dealers (PDs) act as underwriters in the primary market, and as market makers in the secondary market.

Brokers

Brokers bring together counterparties and negotiate terms of the trade.

Investors

Banks, Insurance Companies, Mutual Funds are important players in the debt market. Other players are Trusts, Provident and pension funds.

(vi) Trading Mechanism:

Government Securities and Money Market Instruments

Negotiated Dealing System (NDS) is an electronic platform for facilitating dealing and online reporting of transactions. Government Securities (including T-bills), call money, notice/term money, repos in eligible securities, etc. are available for negotiated dealing through NDS. Currently G-Sec deals are done telephonically and reported on NDS.

Corporate Debt is basically a phone driven market where deals are concluded verbally over recorded lines. The reporting of trade is done on the NSE Wholesale Debt Market segment.

Risk Profile

As the scheme is an Index linked Equity Fund, it shall have

exposure to securities in a proportion similar to that of NIFTY 100 Equal Weighted Index. Performance of the NIFTY 100 Equal Weighted Index will have a direct bearing on the performance of the scheme.

As the Underlying Index consists of companies which are constituents of Nifty 50 and Nifty Next 50, the liquidity aspect will be taken care of. Portfolio liquidity is also monitored on a regular basis by the Risk Management team and fund managers are also kept informed through internal reports.

Risk Mitigation

An independent risk management team is in place to oversee and monitor portfolio risk on a day-to-day basis. Internal risk control guidelines are in place and the portfolio contours are tracked on a daily basis to ensure adherence. Any deviation is brought to the notice of the Managing Director and the fund manager for corrective action. Follow up actions are made to ensure that the deviation is corrected within the time period prescribed in internal risk control guidelines. Adherence to limits from SEBI regulations as well as stipulations in the Scheme Information Document is monitored by the Compliance team. The Risk Management team reports to the CEO / MD.

Risk Process / Guidelines:

Risk Management is an independent function and the Risk team reports directly to the MD. Broadly the function is divided into two – Regulatory and Internal. Regulatory risk consists of ensuring adherence to all the rules prescribed by the SEBI as well as the limits prescribed in the Offer documents. Internal risk monitoring consists of a host of other parameters that the risk team monitors on a continuous basis like internal limits (i.e. soft limits established to red flag potential breach in SEBI prescribed limits), adherence to fund style, operational and preparation of reports etc.,

The primary mechanism that the Risk team employs to monitor is through Bloomberg. All the rules (regulatory and internal) are uploaded into Bloomberg which thereafter monitors its adherence on a continuous basis. All trades are routed through Bloomberg systems and hence no deviation can occur without an alert being triggered by the Bloomberg system. Any breach in limits consequent to inputting of a trade is flagged off with various levels of concern and needs specific approvals in order to proceed.

Portfolio turnover

Portfolio turnover is defined as the lower of the aggregate value of purchases or sales, as a percentage of the average corpus of the Scheme during a specified period of time. This will exclude purchases and sales of money market securities.

The portfolio turnover in the Scheme will be a function of the inflows in the form of subscriptions into the Scheme and outflows in the form of redemption as well as the market opportunities available to the fund manager. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio(s).

As the scheme will follow a passive investment strategy, the endeavour will be to minimise portfolio turnover subject to the exigencies and needs of the Schemes. Generally, turnover will be confined to rebalancing of portfolio on account of new subscriptions, redemptions and change in the composition of NIFTY 100 Equal Weighted Index.

E. Investment Strategy

The Scheme will be managed passively with investments in stocks in the same proportion as in NIFTY 100 Equal Weighted Index. The investment strategy would revolve around reducing the tracking error to 2% through quarterly rebalancing of the portfolio, taking into account the change in weights of stocks in the indices as well as the incremental collections / redemptions in the Scheme. A small portion of the net assets will be held as cash or will be invested in debt and money market instruments permitted by SEBI/RBI to meet the liquidity requirements under the Scheme.

G. Benchmark

NIFTY 100 Equal Weighted TRI

The performance of the Scheme will be benchmarked to NIFTY 100 Equal Weighted Index. As the Scheme is an Index Scheme quarterly and would primarily invest in securities which are constituents of NIFTY 100 Equal Weighted Index, the said index is an appropriate benchmark for the Scheme. Nifty 100 is a diversified 100 stock index accounting for 38 sectors of the economy. Nifty 100 represents top 100 companies based on full market capitalisation from Nifty 500. This index intends to measure the performance of large market capitalisation companies. The Nifty 100 tracks the behavior of combined portfolio of two indices viz. Nifty 50 and Nifty Next 50.

Nifty 100 is owned and managed by India Index Services & Products Ltd. (IISL). IISL is India's first specialized company focused upon the index as a core products.

The Nifty 100 Index represents about 77% of the free float market capitalization of the stocks listed on NSE as on March 31, 2016.

The total traded value for the last six months ending March 2016 of all index constituents is approximately 61% of the traded value of all stocks on the NSE.

The Trustees reserve the right to change the benchmark or select an additional index for evaluation of performance of the Scheme from time to time in conformity with the investment objective and appropriateness of the benchmark subject to SEBI Regulations and other prevailing guidelines, if any.

Methodology

The NIFTY 100 Equal Weighted Index is computed using a float-adjusted, market capitalization weighted methodology, wherein the level of the index reflects the total market value of all the stocks in the index relative to a particular base period. The methodology also takes into account constituent changes in the index and corporate actions such as stock splits, rights issuance, etc., without affecting the index value.

Index Service Provider

India Index Services & Products Limited (IISL), a subsidiary of NSE Strategic Investment Corporation Limited was setup in May 1998 to provide a variety of indices and index related services and products for the Indian capital markets.

Restriction on redemption in Mutual Funds

Pursuant to SEBI Circular No: SEBI/HO/IMD/DF2/CIR/P/2016/57 dated May 31, 2016.

- Restriction may be imposed when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets such as:
 - Liquidity issues - when market at large becomes illiquid affecting almost all securities rather than any issuer specific security. AMCs should have in place sound internal liquidity management tools for schemes.
Restriction on redemption cannot be used as an ordinary tool in order to manage the liquidity of a scheme. Further, restriction on redemption due to illiquidity of a specific security in the portfolio of a scheme due to a poor investment decision, shall not be allowed.
 - Market failures, exchange closures-when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
 - Operational issues-when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out). Such cases can only be considered if they are reasonably unpredictable and occur in spite of appropriate diligence of third parties, adequate and effective disaster recovery procedures and systems.
- Restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period.

- Any imposition of restriction would require specific approval of Board of AMCs and Trustees and the same should be informed to SEBI immediately.
- When restriction on redemption is imposed, the following procedure shall be applied:
 - No redemption requests upto INR 2 lakh shall be subject to such restriction.
 - Where redemption requests are above INR 2 lakh, AMCs shall redeem the first INR 2 lakh without such restriction and remaining part over and above INR 2 lakh shall be subject to such restriction.
- Disclosure:
The above information to investors shall be disclosed prominently and extensively in the scheme related documents regarding the possibility that their right to redeem may be restricted in such exceptional circumstances and the time limit for which it can be restricted.

Central KYC

Central KYC Registry is a centralized repository of KYC records of customers in the financial sector with uniform KYC norms and inter-usability of the KYC records across the sector with an objective

to reduce the burden of producing KYC documents and getting those verified every time when the customer creates a new relationship with a financial entity. KYC means the due diligence procedure prescribed by the Regulator for identifying and verifying the proof of address, proof of identity and compliance with rules regulations, guidelines and circulars issued by the Regulators or Statutory Authorities under the Prevention of Money Laundering Act, 2002.

The Central Govt. vide notification dt. Nov, 26, 2015 has authorised Central Registry of Securitisation Asset Reconstruction and Security Interest of India (CERSAI) to act as and to perform the functions of the CKYC Registry including receiving, storing, safeguarding and retrieving the KYC records in digital form of a Client. A 14 digit CKYC identification Number (KIN) would be issued as identifier of each client.

As per PMLA (Maintenance of Records) Amendment rules, 2015, Rule 9(IA), every reporting entity shall within three days after the commencement of an account based relationship with an individual, file the electronic copy of the client's KYC records with the Central KYC Registry. Institutions need to upload the common KYC template along with the scanned copy of the certified supporting documents (Pol/PoA), cropped signature and photograph. SEBI vide its circular dated November 10, 2016 has advised all mutual funds to upload the KYC records of all existing customers into the CKYC database.

Since the records are stored digitally, it helps institutions de-duplicate data so that they don't need to do KYC of customers multiple times. It helps institutions find out if the client is KYC compliant based on Aadhaar, PAN and other identity proofs. If the KYC details are updated on this platform by one entity, all other institutions get a real time update. Thus, the platform helps firms cut down costs substantially by avoiding multiplicity of registration and data upkeep.

Please note that PAN is mandatory for investing in MF's (Except Micro KYC and other exempted scenarios). If CKYC is done without submission of PAN, then he/she will have to submit a duly self-certified copy of the PAN card alongwith KIN.

First time investing Financial Sector (New investor) New to KRA-KYC: while on boarding investors who are new to the MF & do not have KYC registered as per existing KRA norms, such investors should fill up CKYC form (attached). This new KYC form is in line with CKYC form guidelines and requirements and would help to capture all information needed for CKYC as well mandatory requirements for MF. Investors should submit the duly filled form along with supporting documents, particularly, self-certified copy of the PAN Card as a mandatory identity proof. If prospective investor submits old KRA KYC form, which does not have all information needed for registration with CKYC, such customer should either submit the information in the supplementary CKYC form or fill the CKYC form.

Updation of Permanent Account Number (PAN) for processing redemption and related transactions in non-PAN exempt folios and various communication(s) sent in this regard from time to time, it is reiterated that, it is mandatory to complete the KYC requirements for all unit holders, including for all joint holders and the guardian in case of folio of a minor investor.

Accordingly, financial transactions (including redemptions, switches and all types of systematic plans) and non-financial requests will not be processed if the unit holders have not completed KYC requirements.

Unit holders are advised to use the applicable KYC Form for completing the KYC requirements and submit the form at the point of acceptance. Further, upon updation of PAN details with the KRA (KRA-KYC)/ CERSAI (CKYC), the unit holders are requested to intimate us/our Registrar and Transfer Agent their PAN information along with the folio details for updation in our records.

| <p>Methodology of calculating the sale and repurchase price of units</p> | <p>Sale Price: Applicable NAV and applicable Stamp Duty</p> <p>Repurchase Price: The exit fee is usually a percentage of the Net Asset Value (NAV) of the mutual fund held by investors. Once the AMC deducts the exit load from the total Net Asset Value, the remaining amount gets credited to the investor's account.</p> <p>Suppose, an investor has invested Rs.10,000 in mutual fund schemes in January 2017. The NAV of the scheme is Rs. 100 and the exit fee for redeeming before one year is 1%. In March 2017, the investor opt for an additional investment of 50 units at Rs 105 in the same fund. He redeems all his investments in the fund in November 2017, when the NAV is Rs. 110 in scenario 1 and Rs 115 in scenario 2 (February 2018)? His exit load is as follows:</p> <p>100 Units bought in January 2017 @ Rs 100 = Rs 10,000 50 units bought in March 2017 @ Rs 105 = Rs 5,250</p> <p>Scenario 1 (Full Redemption before expiry of 1 year)</p> <p>Exit charges on redemption in November 2017.</p> <p>Exit Load: 1% of [(100 units x Rs. 110) + (50 units x Rs. 110)] = Rs 165.</p> <p>The amount credited the investor: Rs. 16,500 (Rs. 110*150 units) – Rs. 165 = Rs. 16,335 (Total NAV – Exit fee)</p> <p>In scenario 1 exit load is applicable on 150 units purchased in January and March 2017 as the holding period is less than 1 year</p> <p>Scenario 2 (Full Redemption after expiry of 1 year)</p> <p>Investor redeems 50 units</p> <p>Exit charges on redemption in February 2018.</p> <p>Exit Load: 1% of (50 units x Rs. 115) = Rs 57.5</p> <p>The amount credited the investor: Rs.17,250 (Rs. 115*150 units) – Rs.57.5= Rs.17,192.5 (Total NAV-Exit fee)</p> <p>In scenario 2 exit load is not applicable on 100 units purchased in January 2017 as the holding period is more than 1 year</p> |
